General Requirements for Graduate Study in Chemistry

Every student entering the graduate program in chemistry will be required to take a series of entrance (proficiency) examinations covering the major disciplines of chemistry. These examinations, which cover standard undergraduate-level material, will be administered on announced dates in August, January, and May (prior to the start of each term). The examination in each area must be taken every time it is offered until a satisfactory level of proficiency is demonstrated in three of the five major fields.

Demonstration of proficiency in each area may be achieved:

1. by receiving a grade of ‘pass’ on the proficiency examination; or
2. by completing a 7000-level course in the area with a grade of ‘B’ or higher.

Full-time graduate students must establish proficiency in three areas within twelve months of commencing graduate study. Part-time graduate students must meet this requirement by the time they have completed twelve hours of graduate credit.

A final oral examination is required of all graduate degree candidates.

AHN, YOUNG-HOON: Ph.D., New York University; B.S., Pohang University Science and Technology; Assistant Professor

ALLEN, MATHEW: Ph.D., California Institute of Technology; B.S., Purdue University; Professor and Chair

BHAGWAT, ASHOK S.: Ph.D., Pennsylvania State University; M.S., Indian Institute of Technology; B.A., University of Bombay; Professor

BROCK, STEPHANIE L.: Ph.D., University of California, Davis; B.S., University of Washington; Professor

CHA, JIN K.: Ph.D., University of Oxford; B.S., Seoul National University; Professor

CHERNYAK, VLADIMIR: Ph.D., Russian Academy of Science, Institute of Spectroscopy; M.S., Moscow Physics and Technology Institute; Professor

CHOW, CHRISTINE: Ph.D., California Institute of Technology; M.A., Columbia University; B.A., Bowdoin College; Professor

CRICH, DAVID: Des Sciences, Université de Paris XI; B.S., University of Surrey; Professor

ENDICOTT, JOHN F.: Ph.D., Johns Hopkins University; B.A., Reed College; Professor Emeritus

FEIG, ANDREW: Ph.D., Massachusetts Institute of Technology; B.S., Yale University; Professor

GROYSMAN, STANISLAV: Ph.D., B.S., Tel Aviv University; Assistant Professor

GUO, ZHONGWU: Ph.D., Institute of Organic Chemistry, Polish Academy of Sciences; M.S., B.S., Second Military Medical University; Professor

HENDRICKSON, TAMARA: Ph.D., California Institute of Technology; B.A., Wellesley College; Associate Professor

KODANKO, JEREMY: Ph.D., University of California at Irvine; B.S., University Wisconsin, Madison; Associate Professor

LI, WEN: Ph.D., Stony Brook University; B.S., Peking University; Associate Professor

LINTVEDT, RICHARD L.: Ph.D., University of Nebraska; B.A., Lawrence University; Professor Emeritus

LINZ, THOMAS H.: Ph.D., University of Kansas; B.S., Truman State University; Assistant Professor

MATTI, ANDREA: Ph.D., Michigan State University; B.S., Madonna University; Senior Lecturer

MUNK, BARBARA H.: Ph.D., Wayne State University; M.S., Purdue University; B.S., Arizona State University; Senior Lecturer

PFLUM, MARY KAY H.: Ph.D., Yale University; B.A., Carleton College; Associate Professor

POOLE, COLIN F.: Ph.D., Keele University; M.Sc., Bristol University; B.Sc., Leeds University; Professor

RABUFFETTI, FEDERICO A.: Ph.D., Northwestern University; B.Sc., Universidad de la Republica; Assistant Professor

RIGBY, JAMES H.: Ph.D., University of Wisconsin; B.S., Case Western Reserve University; Professor

RODGERS, MARY T.: Ph.D., California Institute of Technology; B.S., Illinois State University; Professor

ROMANO, LOUIS J.: Ph.D., B.A., Rutgers University; Professor

RORABACHER, DAVID B.: Ph.D., Purdue University; B.S., University of Michigan; Professor Emeritus

SANTA LUCIA, JOHN: Ph.D., University of Rochester; B.S., Clarkston University; Professor

SCHLEGEL, H. BERNHARD: Ph.D., Queen’s University; B.Sc., University of Waterloo; Professor

STOCKDILL, JENNIFER L.: Ph.D., California Institute of Technology; B.S., Virginia Polytechnic Institute and State University; Assistant Professor

TRIMPIN, SARAH: Doktor der Naturwissenschaften, Max-Planck-Institute for Polymer Research, University of Mainz; Vor-Diplom, Diplom, University of Konstanz; Professor

VERANI, CLAUDIO N.: Ph.D., Max-Planck-Institut für Strahlenchemie und Ruhr-Universität; M.Sc., B.S., Universidade Federal de Santa Catarina; Professor

WINTER, CHARLES H.: Ph.D., University of Minnesota; B.S., Hope College; Professor
• Chemistry (M.A.) (http://bulletins.wayne.edu/graduate/college-liberal-arts-sciences/chemistry/chemistry-ma)
• Chemistry (M.S.) (http://bulletins.wayne.edu/graduate/college-liberal-arts-sciences/chemistry/chemistry-ms)
• Chemistry (Ph.D.) (http://bulletins.wayne.edu/graduate/college-liberal-arts-sciences/chemistry/chemistry-phd)

CHM 5020 Intermediate Inorganic Chemistry II Cr. 3
Transition metal chemistry. Coordination compounds and organometallics. Bonding theories and reactivity. Synthesis, purification, and characterization of inorganic compounds with an emphasis on transition metal compounds. Offered Fall.
Prerequisites: ([CHM 6070 with a minimum grade of C] OR [CHM 3020 with a minimum grade of C] AND [CHM 5400 with a minimum grade of C])
Course Material Fees: $110

CHM 5160 Instrumental Analytical Chemistry Cr. 3
Prerequisites: ([CHM 5400 with a minimum grade of C] OR [CHM 5420 with a minimum grade of C] OR [CHM 5440 with a minimum grade of C]) AND ([IPHY 2180 with a minimum grade of C])

CHM 5400 Biological Physical Chemistry Cr. 4
Presentation of physical chemistry topics: thermodynamics, solution equilibria, chemical kinetics, quantum chemistry, spectroscopy, statistical mechanics, transport processes, and structure with biological applications. Offered Winter.
Prerequisites: ([CHM 2280 with a minimum grade of C] AND ([IMAT 2020 with a minimum grade of C]) AND (May be taken concurrently: [IMAT 2030 with a minimum grade of C]) AND (May be taken concurrently: [IPHY 2170 with a minimum grade of C]))

CHM 5420 Physical Chemistry I Cr. 3
Chemical thermodynamics, phase equilibrium, solutions, surface chemistry, electrochemistry. Only two credits applicable toward degree after CHM 5400. Offered Fall.
Prerequisites: ([CHM 2280 with a minimum grade of C] AND ([IMAT 2020 with a minimum grade of C]) AND (May be taken concurrently: [IMAT 2030 with a minimum grade of C]) AND (May be taken concurrently: [IPHY 2170 with a minimum grade of C]))

CHM 5440 Physical Chemistry II Cr. 4
Kinetic theory, empirical and theoretical kinetics, quantum theory, atomic and molecular structure, molecular spectroscopy, statistical mechanics. Only three credits applicable to degree after CHM 5400. Offered Winter.
Prerequisites: ([CHM 2280 with a minimum grade of C] AND ([IMAT 2020 with a minimum grade of C]) AND (May be taken concurrently: [IMAT 2030 with a minimum grade of C]) AND (May be taken concurrently: [IPHY 2170 with a minimum grade of C]))

CHM 5510 Chemical Synthesis Laboratory Cr. 3
Advanced techniques for the synthesis, purification and characterization of organic compounds. Offered Fall.
Prerequisites: ([CHM 1420 with a minimum grade of C] OR [CHM 2220 with a minimum grade of C] AND [CHM 2230 with a minimum grade of C])
Course Material Fees: $110

CHM 5520 (WI) Physical Chemistry Laboratory Cr. 2
Prerequisites: (May be taken concurrently: [CHM 5400 with a minimum grade of C] OR [CHM 5420 with a minimum grade of C] OR [CHM 5440 with a minimum grade of C]) AND ([IPHY 2180 with a minimum grade of C])
Course Material Fees: $110

CHM 5570 Instrumental Analytical Chemistry Laboratory Cr. 3
Lecture and laboratory experiments covering electronics, measurement, and instrumentation. Principles and analytical applications of electrochemistry, chromatography, and spectroscopy including UV-visible, infrared, magnetic resonance, and mass spectroscopy. Offered Winter.
Prerequisites: ([CHM 5160 with a minimum grade of C])
Course Material Fees: $110

CHM 5600 Survey of Biochemistry Cr. 3
Prerequisites: ([CHM 1420 with a minimum grade of C] OR [CHM 2220 with a minimum grade of C] OR [CHM 2225 with a minimum grade of C])

CHM 5900 Biomedical Research as Discovery Cr. 2
Solving biochemical research problems using laboratory research tools including computational methods. Offered Yearly.
Prerequisites: ([CHM 6610 with a minimum grade of D]) AND ([CHM 6620 with a minimum grade of D])

CHM 5998 Honors Thesis Research in Chemistry Cr. 2-4
Original investigation under the direction of a senior staff member. Submission of B.S. thesis or manuscript in publication format. Presentation of public lecture on B.S. research. Offered Every Term.
Restriction(s): Enrollment is limited to students with a major in Biochem & Chem Bio Honors or Chemistry Honors.
Repeatable for 8 Credits

CHM 5999 Research in Chemistry Cr. 2-4
Original investigation under the direction of a senior staff member. Submission of B.S. thesis or manuscript in publication format. Offered Every Term.
Restriction(s): Enrollment is limited to students with a major in Biochem & Chem Bio Honors, Biochem & Chemical Biology, Chemistry or Chemistry Honors.
Repeatable for 8 Credits

CHM 6060 Materials Chemistry and Engineering Cr. 3
Prerequisites: ([IMAT 3020 with a minimum grade of C])

CHM 6070 Advanced Bioorganic Chemistry Cr. 3
Applications of inorganic chemistry principles to understanding biological systems including metalloenzymes. Offered Winter.
Prerequisite: CHM 3000 with a minimum grade of C
CHM 6170 Advances in Bioanalytical Chemistry Cr. 3
How analytical methods are used to obtain information regarding biological systems. Offered Irregularly.
Prerequisite: CHM 5160 with a minimum grade of C

CHM 6240 Organic Spectroscopy Cr. 3
Application of IR, NMR, UV, and mass spectrometry to the identification of organic compounds. Emphasis on interpretation of spectra, especially NMR. Recommended for students intending to do graduate or industrial work in organic chemistry. Offered Winter.
Prerequisite: CHM 1420 with a minimum grade of C or CHM 2220 with a minimum grade of C

CHM 6270 Advanced Bioorganic Chemistry and Drug Design Cr. 3
Studies of biological problems using organic synthetic methods and applications to drug design. Offered Fall.
Prerequisite: CHM 6620 with a minimum grade of C

CHM 6440 Computational Chemistry Cr. 3
Aspects of computational chemistry pertinent to effective use of molecular modeling techniques. Molecular mechanics, semi-empirical and ab initio calculations, molecular dynamics. Offered Irregularly.
Prerequisite: CHM 5440 with a minimum grade of C

Course Material Fees: $95

CHM 6570 Computational Biochemistry and Bioinformatics Cr. 3
Application of computational and molecular modeling software tools to biochemical problems. Offered Irregularly.
Prerequisite: CHM 5400 with a minimum grade of C

CHM 6610 (WI) Biological Chemistry Laboratory Cr. 3
Basic experiments in isolation, purification, and analysis of biomolecules. Techniques currently used in molecular biology and recombinant DNA procedures stressed. Offered Fall, Winter.
Prerequisite: CHM 6620 with a minimum grade of C
Restriction(s): Enrollment is limited to students with a major in Biochem & Chem Bio Honors, Biochem & Chemical Biology, Chemistry or Chemistry Honors.

Course Material Fees: $110

CHM 6620 Metabolism: Pathways and Regulation Cr. 3
Major metabolic pathways of carbohydrate, fatty acid, amino acid, and nucleotide synthesis and degradation. Pathways and mechanisms of energy generation. Hormonal and allosteric regulation of enzyme activity. Offered Fall.
Prerequisites: ([CHM 2220 with a minimum grade of C])

CHM 6635 Tools of Molecular Biology Cr. 3
Principles underlying genetic and biochemical methods; complements work in lab CHM 6610. Offered Winter.
Prerequisite: CHM 6620 with a minimum grade of C

CHM 6640 Molecular Biology Cr. 3
Prerequisite: CHM 6620 with a minimum grade of C

CHM 6740 Laboratory Safety Cr. 1-2
Discussion and demonstration of safe laboratory practice. Use, storage and disposal of ordinary and hazardous substances; personal protection devices; regulations and codes. Required for all graduate degrees in chemistry. Not for chemistry major credit Offered Fall, Winter.

CHM 6990 Directed Study Cr. 1-4
Offered Every Term.
Repeatable for 8 Credits

CHM 6991 Internship in Chemistry Cr. 1
Practical research experience through visiting a university, industry, or national laboratory. Offered Every Term.
Restriction(s): Enrollment is limited to students with a major in Chemistry; enrollment is limited to Graduate level students.

CHM 7010 Descriptive Inorganic Chemistry Cr. 3
Reactions and reactivity of inorganic compounds. Emphasizes mechanistic and synthetic approaches to transition metal, organometallic, main group chemistry. Offered Fall.
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7060 Materials Chemistry and Engineering Cr. 3
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7070 Advanced Bioinorganic Chemistry Cr. 3
Applications of inorganic chemistry principles to understanding biological systems including metalloenzymes. Offered Irregularly.
Prerequisite: CHM 3000 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7080 Electron Microscopy Cr. 3
Basics of electron microscopy and its applications. The theory and practice of transmission and scanning electron microscopies, along with associated spectroscopies, will be presented. Offered Irregularly.
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7100 Theory of Analytical Chemistry Cr. 3
Physicochemical principles applied to reaction equilibria and kinetics of analytical importance. Approaches to problem solving in complex systems, principally in the solution phase. Offered Fall.
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7120 Electroanalytical Chemistry Cr. 3
The theory and practice of modern voltammetric methods as applied to analytical, kinetic, and mechanistic studies. Offered Biannually.
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7142 Data Analysis Cr. 3
Application of statistics, chemometrics, and experimental design to the interpretation of chemical measurements; validation of analytical methods; practice and theory of sampling for chemical measurements. Offered Biannually (Fall).

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7160 Separation Science Cr. 3
Theory and practice of gas-liquid, supercritical fluid, and thin-layer chromatography and capillary electromigration methods. Offered Biannually.

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7170 Advances in Bioanalytical Chemistry Cr. 3
How analytical methods are used to obtain information regarding biological systems. Offered Irregularly.
Prerequisite: CHM 5160 with a minimum grade of D-

Restriction(s): Enrollment is limited to Graduate level students.

CHM 7180 Mass Spectrometry Cr. 3
Topics will include ICP, ICP-MS, AA, LIBX, MIPS, etc. Instrumentation concepts. Review of contemporary literature. Offered Winter.
Restriction(s): Enrollment is limited to Graduate level students.
CHM 7200 Organic Structures and Mechanisms Cr. 3
Structure and stereochemistry of organic molecules. Correlations between structure and chemical and physical properties. Reaction mechanisms. Offered Fall.
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7220 Organic Reactions and Synthesis Cr. 3
Alkylation, condensation, and Grignard reactions; synthesis of acid derivatives; cycloadditions and unimolecular rearrangements. Scope and limitations of important synthetic methods of organic chemistry. Offered Winter.
Prerequisite: CHM 7200 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7240 Organic Spectroscopy Cr. 3
Application of IR, NMR, UV, and mass spectrometry to the identification of organic compounds. Emphasis on interpretation of spectra, especially NMR. Recommended for students intending to do graduate or industrial work in organic chemistry. Offered Winter.
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7270 Advanced Bioorganic Chemistry and Drug Design Cr. 3
Studies of biological problems using organic synthetic methods and applications to drug design. Offered Irregularly.
Prerequisite: CHM 6620 with a minimum grade of D-
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7410 Statistical Thermodynamics Cr. 3
Statistical methods of determining thermodynamic properties of bulk materials from molecular properties. Real gases at high density, crystals, liquids; phase transitions, transport properties. Offered Biannually.
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7430 Chemical Kinetics Cr. 3
Empirical analysis of reaction rates, theories of chemical kinetics, gas phase reactions, molecular collisions and non-thermal reactions, and kinetics in liquids. Offered Biannually.
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7440 Computational Chemistry Cr. 3
Aspects of computational chemistry pertinent to effective use of molecular modeling techniques. Molecular mechanics, semi-empirical and ab initio calculations, molecular dynamics. Offered Winter.
Restriction(s): Enrollment is limited to Graduate level students.
Course Material Fees: $15

CHM 7470 Quantum Chemistry Cr. 3
Theorems of quantum mechanics, approximation methods, solutions to simple atomic and molecular systems, electronic structure of many-electron atoms and molecules, chemical bonding. Offered Biannually.
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7480 Molecular Spectroscopy Cr. 3
Basic theory of interaction of molecules with the electromagnetic field. Rotational, vibrational, and electronic spectra of molecules; elements of lasers, multiphoton spectroscopy. Offered Biannually.
Prerequisite: CHM 7470 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7500 Modern Methods in Experimental Chemistry Cr. 3
Survey of modern methods for performing experiments in chemistry, including: laser techniques, high vacuum methods, time-resolved techniques, surface characterization, electronics and optics, and computer interfacing. Offered Biannually.
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7570 Computational Biochemistry and Bioinformatics Cr. 3
Application of computational and molecular modeling software tools to biochemical problems. Offered Irregularly.
Prerequisite: CHM 5400 with a minimum grade of D-
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7600 Structure and Function of Biomolecules Cr. 3
Introduction to the structure and function of macromolecules of biological importance. Emphasis on bioenergetics, nucleic acid and protein structure and chemical reactivities, enzyme catalysis, enzyme kinetics, carbohydrate and lipid structure and function, and membrane structure. Offered Fall.
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7620 Metabolism: Pathways and Regulation Cr. 3
Major metabolic pathways of carbohydrate, fatty acid, amino acid, and nucleotide synthesis and degradation. Pathways and mechanisms of energy generation. Hormonal and allosteric regulation of enzyme activity. Offered Fall.
Prerequisite: CHM 7600 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7635 Tools of Molecular Biology Cr. 3
Principles underlying genetic and biochemical methods; complements work in lab CHM 6610. Offered Yearly.
Prerequisite: CHM 7620 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7640 Molecular Biology Cr. 3
Prerequisite: CHM 7600 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7740 Responsible Conduct of Research Cr. 1
Recognition of and approach to ethical issues that chemistry students may confront during their careers; the tools for dealing with these quandaries; procedures for reporting and resolving such conflicts. Offered Fall.
Restriction(s): Enrollment is limited to Graduate level students.

CHM 7990 Directed Study Cr. 1-4
Offered Irregularly.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 12 Credits

CHM 8090 Advanced Topics in Inorganic Chemistry Cr. 1-3
Topics offered in different semesters: inorganic synthesis and reactions; organometallic chemistry; bioinorganic chemistry; spectroscopy and stereochemistry of inorganic compounds; inorganic reaction mechanisms; photochemistry. Offered Irregularly.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 12 Credits

CHM 8190 Advanced Topics in Analytical Chemistry Cr. 1-3
The following topics offered in different semesters: sample preparation, surface analysis, analytical mechanisms, advanced instrumentation, computer interfacing. Offered Irregularly.
Prerequisite: CHM 7100 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 12 Credits
CHM 8290 Advanced Topics in Organic Chemistry Cr. 1-3
The following topics offered in different semesters: physical-organic chemistry; kinetics of organic reactions; structure-reactivity correlations; reaction mechanisms; molecular orbital theory in organic chemistry; photochemistry; free radical chemistry; polymer chemistry; recent developments in organic chemistry; synthetic strategy; chemistry of natural products including steroids, terpenes, alkaloids, carbohydrates, and proteins. Offered Irregularly.
Prerequisite: CHM 7200 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 12 Credits

CHM 8420 X-Ray Crystallography Cr. 3
Theoretical and practical aspects of modern x-ray crystallography. Training and practice in determination of crystal structure. Offered Irregularly.
Prerequisite: CHM 7410 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 12 Credits

CHM 8490 Advanced Topics in Physical Chemistry Cr. 1-3
The following topics offered in different semesters: chemistry of the solid state; electron spin resonance; lasers and nonlinear spectroscopy; molecular dynamics; molecular quantum mechanics; particle and photon scattering: photophysics and photochemistry; radiation and nuclear chemistry; theory of gas phase kinetics. Offered Irregularly.
Prerequisite: CHM 7410 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 12 Credits

CHM 8690 Advanced Topics in Biochemistry Cr. 1-3
Topics offered in different semesters: applications of spectroscopy to biochemical systems; chemical carcinogenesis; DNA repair; enzyme biochemistry; mechanisms of oxygen metabolism; membrane chemistry. Offered Irregularly.
Prerequisite: CHM 7410 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 12 Credits

CHM 8700 Research in Chemistry Cr. 1-16
Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 40 Credits

CHM 8800 Seminar in Analytical Chemistry Cr. 1
Required of all graduate students in analytical chemistry. Weekly meetings of staff, invited guests, and qualified students to study recent developments. Each seminar member presents papers and enters into the discussion that follows. Offered Fall, Winter.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 4 Credits

CHM 8810 Seminar in Organic Chemistry Cr. 1
Required of all graduate students in organic chemistry. Weekly meetings of staff, invited guests, and qualified students to study recent developments. Each seminar member presents papers and enters into the discussion that follows. Offered Fall, Winter.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 4 Credits

CHM 8820 Seminar in Inorganic Chemistry Cr. 1
Required of all graduate students in inorganic chemistry. Weekly meeting of staff, invited guests, and qualified students to study recent developments. Each seminar member presents papers and enters into the discussion that follows. Offered Fall, Winter.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 4 Credits

CHM 8830 Seminar in Physical Chemistry Cr. 1
Required of all graduate students in physical chemistry. Weekly meetings of staff, invited guests, and qualified students to study recent developments. Each seminar member presents papers and enters into the discussion that follows. Offered Fall, Winter.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 4 Credits

CHM 8840 Seminar in Biochemistry Cr. 1
Required of all graduate students in biochemistry. Weekly meetings of staff, invited guests, and qualified students to study recent developments. Each seminar member presents papers and participates in discussions. Offered Fall, Winter.
Restriction(s): Enrollment is limited to students with a major in Chemistry; enrollment is limited to Graduate level students; enrollment limited to students in a Doctor of Philosophy or Master of Science degrees.
Repeatable for 4 Credits

CHM 8850 Frontiers in Chemistry Cr. 1
Fields of fundamental chemistry now under investigation, presented by invited specialists actively engaged in research. Offered Fall, Winter.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 4 Credits

CHM 8880 Seminar in Analytical Chemistry Cr. 1
Required of all graduate students in analytical chemistry. Weekly meetings of staff, invited guests, and qualified students to study recent developments. Each seminar member presents papers and enters into the discussion that follows. Offered Fall, Winter.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 4 Credits

CHM 8890 Advanced Topics in Biochemistry Cr. 1-3
Topics offered in different semesters: applications of spectroscopy to biochemical systems; chemical carcinogenesis; DNA repair; enzyme biochemistry; mechanisms of oxygen metabolism; membrane chemistry. Offered Irregularly.
Prerequisite: CHM 7410 with a minimum grade of C
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 12 Credits

CHM 8950 Pre-Doctoral Candidacy Research Cr. 1-8
Research in preparation for doctoral dissertation. Offered Every Term.
Restriction(s): Enrollment limited to students with a class of Candidate Masters; enrollment is limited to Graduate level students.
Repeatable for 8 Credits

CHM 9990 Pre-Doctoral Candidacy Research Cr. 1-8
Research in preparation for doctoral dissertation. Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 12 Credits

CHM 9991 Doctoral Candidate Status I: Dissertation Research and Direction Cr. 7.5
Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 998.99 Credits

CHM 9992 Doctoral Candidate Status II: Dissertation Research and Direction Cr. 7.5
Offered Every Term.
Prerequisite: CHM 9991 with a minimum grade of S
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 998.99 Credits

CHM 9993 Doctoral Candidate Status III: Dissertation Research and Direction Cr. 7.5
Offered Every Term.
Prerequisite: CHM 9992 with a minimum grade of S
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 998.99 Credits
CHM 9994 Doctoral Candidate Status IV: Dissertation Research and Direction Cr. 7.5
Offered Every Term.
Prerequisite: CHM 9993 with a minimum grade of S
Restriction(s): Enrollment is limited to Graduate level students.
Repeatable for 998.99 Credits

CHM 9995 Candidate Maintenance Status: Doctoral Dissertation Research and Direction Cr. 0
Offered Every Term.
Restriction(s): Enrollment is limited to Graduate level students.
Course Material Fees: $348.67
Repeatable for 998.99 Credits

CHM 9999 Doct Diss Rsch&Dir Cr. 1-16
Offered Every Term.
Restriction(s): Enrollment limited to students with a class of Doctoral Candidate; enrollment is limited to Graduate level students.
