

CYBERSECURITY (GRADUATE CERTIFICATE ONLINE)

The Graduate Certificate Program in Cybersecurity equips students and professionals with the essential knowledge of cybersecurity concepts and the technical expertise to implement robust security controls. The primary objective of the program is to cultivate practical, job-ready competencies that empower graduates to effectively secure digital assets and infrastructure. Upon completion, certificate holders will possess the knowledge, skills, and abilities (KSAs) necessary for success in today's dynamic cybersecurity workforce.

The Graduate Certificate in Cybersecurity requires 15 credits, which are listed below.

Code	Title	Credits
CSC 5172	Programming Foundations for Cyber Security	3
CSC 5272	Principles of Cyber Security	3
CSC 5372	Digital Forensics	3
CSC 5472	Ethical Hacking	3
CSC 7272	Malware and Reverse Engineering	3
Total Credits		15
