

# ROBOTICS (M.S. WITH A MAJOR IN SMART MOBILITY)

## Admission Requirements

Applicants must meet requirements for admission to the Graduate School (<http://bulletins.wayne.edu/graduate/general-information/academic-regulations/>). Students must have a bachelor's degree or the equivalent in engineering from an accredited college or university. Students from all science, technology, engineering and math (STEM) disciplines will be considered for admission.

All applicants must be admitted to the Graduate School, the College of Engineering (<http://bulletins.wayne.edu/graduate/college-engineering/academic-regulations/>), and a department within the college, meeting all applicable admission requirements, including a minimum grade point average of 2.75 for regular admission and 2.5 to 2.74 for qualified admission. Professional experience will be considered in admission.

## Program Requirements

The program requires students to complete a minimum of thirty credits using master's degree Plan A (24 course credits plus a 6 credit master's thesis) or Plan C (30 credits of coursework). Plan A is intended for students planning to go on to pursue a Doctoral degree. All courses must be graduate-level courses offered within the College of Engineering. The program requires applicants to *declare one of three majors*:

- **Industrial Automation**, hosted by the Engineering Technology (ET)
- **Intelligent Control**, hosted by the Electrical and Computer Engineering (ECE)
- **Smart Mobility**, hosted by the Computer Science (CSC)

The M.S. in Robotics requires competency in three foundational areas for all three majors. *A student must take one of the two courses in each of the 3 foundational areas.* In addition to fulfilling the general scholarship requirements of the Division, all course work must be completed in accordance with the regulations of the Graduate School (<http://bulletins.wayne.edu/graduate/general-information/academic-regulations/>) and the College of Engineering (<http://bulletins.wayne.edu/graduate/college-engineering/academic-regulations/>).

### Industrial Automation

Code	Title	Credits
<b>Foundational Areas (Please select one course from each area)</b>		<b>10</b>
<b>Robot Software &amp; Programming</b>		
CSC 6110	Software Engineering	
or ET 5600	Python: Industrial Applications	
<b>Robot Architectures</b>		
CSC/ECE 5280	Introduction to Cyber-Physical Systems	
or ET 5100	Fundamentals of Mechatronics and Industrial Applications	
<b>Robot Sensing, Perception, Planning, Dynamics &amp; Control</b>		
ECE 5425	Robotic Systems I	
or MIT 5700	Industrial Robots Modeling and Simulation	
<b>Departmental Requirement</b>		<b>4</b>
ET 7430	Methods of Engineering Analysis	
<b>Electives</b>		<b>16</b>
EET 5720	Computer Networking Applications	
EET 5730	Embedded Systems Networking	
EET 7720	Advanced Computer Networking	

ET 5110	Advanced Programmable Controllers and Industrial Applications	
ET 5800	Industrial Robots Programming	
ET 5870	Engineering Project Management	
ET 7300	Advanced Battery Systems for Electric-drive Vehicles	
ET 7800	Industrial Robots Dynamics and Control	
MCT 5150	Hybrid Vehicle Technology	
MCT 5210	Energy Sources and Conversion	
MIT 5500	Machine Tool Laboratory	
MIT 7700	Robotics and Flexible Manufacturing	
ET 7999	Master's Project	
<b>Total Credits</b>		<b>30</b>

### Intelligent Control

Code	Title	Credits
<b>Foundational Areas (Please select one course from each area)</b>		<b>10</b>
<b>Robot Software &amp; Programming</b>		
CSC 6110	Software Engineering	
or ET 5600	Python: Industrial Applications	
<b>Robot Architectures</b>		
CSC/ECE 5280	Introduction to Cyber-Physical Systems	
or ET 5100	Fundamentals of Mechatronics and Industrial Applications	
<b>Robot Sensing, Perception, Planning, Dynamics &amp; Control</b>		
ECE 5425	Robotic Systems I	
or MIT 5700	Industrial Robots Modeling and Simulation	
<b>Departmental Requirements</b>		<b>8</b>
ECE 5470	Control Systems II	
ECE 7425	Robotics Systems II	
<b>Electives</b>		<b>12</b>
ECE 5440	Computer-Controlled Systems	
ECE 5620	Embedded System Design	
ECE 6570	Smart Sensor Technology I: Design	
ECE 5690	Introduction to Digital Image Processing	
ECE 5770	Digital Signal Processing	
ECE 5960	Introduction to VLSI Systems	
ECE 7420	Nonlinear Control Systems	
ECE 7430	Discrete Event Systems with Machine Learning	
ECE 7440	Dynamic Systems and Optimal Control	
ECE 7530	Advanced Digital VLSI Design	
ECE 7690	Fuzzy Systems	
ECE 8999	Master's Thesis Research and Direction	
<b>Total Credits</b>		<b>30</b>

### Smart Mobility

Code	Title	Credits
<b>Foundational Areas (Please select one course from each area)</b>		<b>10</b>
<b>Robot Software &amp; Programming</b>		
CSC 6110	Software Engineering	
or ET 5600	Python: Industrial Applications	
<b>Robot Architectures</b>		
CSC/ECE 5280	Introduction to Cyber-Physical Systems	
or ET 5100	Fundamentals of Mechatronics and Industrial Applications	
<b>Robot Sensing, Perception, Planning, Dynamics &amp; Control</b>		

ECE 5425      Robotic Systems I  
or MIT 5700 Industrial Robots Modeling and Simulation

<b>Department Requirement</b>	<b>3</b>
CSC 5100      Introduction to Mobility	
<b>Electives</b>	<b>17</b>
CSC 5250      Network, Distributed, and Concurrent Programming	
CSC 5270      Computer Systems Security	
CSC 5825      Introduction to Machine Learning and Applications	
CSC 5870      Computer Graphics I	
CSC 6280      Real-Time and Embedded Operating Systems	
CSC 6800      Artificial Intelligence I	
CSC 6860      Digital Image Processing and Analysis	
CSC 6870      Computer Graphics II	
CSC 7991      Advanced Topics in Computer Science *	
CSC 8990      Graduate Seminar	
CSC 8999      Master's Thesis Research and Direction	
<b>Total Credits</b>	<b>30</b>

\* CSC 7991 should be taken with the topic area, Embedded Wireless Networking for Cyber-Physical Systems. Students should consult an advisor before choosing this course as an elective.
