### College of Engineering

- Counseling Psychology (M.A.) ........................................... 129
- Counseling Psychology (Ph.D.) ........................................... 129
- Educational Psychology (M.Ed.) .......................................... 131
- Educational Psychology (Ph.D.) .......................................... 131
- School and Community Psychology (M.A.) ............................. 131

### College of Engineering

- College of Engineering .................................................... 133
- Academic Regulations for the College of Engineering .............. 135
- Biomedical Engineering .................................................... 137
- Biomedical Engineering (M.S.) ......................................... 137
- Biomedical Engineering (Ph.D.) ......................................... 137
- Biomedical Imaging (dual-title program) .............................. 139
- Injury Biomechanics (Bridge Graduate Certificate) ............... 139
- Chemical Engineering and Materials Science ......................... 140
- Chemical Engineering (M.S.) ............................................ 140
- Chemical Engineering (Ph.D.) ............................................ 141
- Materials Science and Engineering (M.S.) ............................ 141
- Materials Science and Engineering (Ph.D.) ........................... 141
- Polymer Engineering (Graduate Certificate) ........................ 142
- Civil and Environmental Engineering .................................. 142
- Civil Engineering (M.S.) ................................................ 142
- Environmental and Sustainability Engineering (M.S.) .......... 143
- Civil Engineering (Ph.D.) .............................................. 144
- Civil Engineering and Urban Sustainability (Ph.D. Dual-Title) .. 144

### College of Engineering

- Computer Science .......................................................... 146
- Computer Science (M.S.) ................................................. 146
- Computer Science (Ph.D.) .............................................. 148
- Data Science and Business Analytics (M.S. with a concentration in Data Computing) .............................. 149
- Robotics (M.S.) .......................................................... 150
- Electrical and Computer Engineering ................................ 151
- Computer Engineering (M.S.) .......................................... 151
- Computer Engineering (Ph.D.) ......................................... 152
- Electrical Engineering (M.S.) ......................................... 152
- Electrical Engineering (Ph.D.) ......................................... 152
- Robotics (M.S.) .......................................................... 153
- Engineering Technology .................................................. 155
- Engineering Technology (M.S.) ....................................... 155
- Robotics (M.S.) .......................................................... 156

### College of Engineering

- Industrial and Systems Engineering .................................... 157
- Data Science and Business Analytics (M.S.) ......................... 158
- Engineering Management (M.S.) ....................................... 158
- Industrial Engineering (M.S.) ........................................... 160
- Industrial Engineering (Ph.D.) ......................................... 161

### College of Engineering

- Manufacturing Engineering (M.S.) ..................................... 163
- Systems Engineering (Bridge Graduate Certificate) ............. 164
- Mechanical Engineering .................................................. 165
- Mechanical Engineering (M.S.) ....................................... 165
- Mechanical Engineering (Ph.D.) ....................................... 168

### Programs Offered by the College of Engineering

- Alternative Energy Technology (Graduate Certificate) ......... 172
- Alternative Energy Technology (M.S.) ............................... 172
- Electric-drive Vehicle Engineering (Graduate Certificate) .... 172
- Electric-drive Vehicle Engineering (M.S.) .......................... 172
- Mobility (Graduate Certificate) ....................................... 173
- Sustainable Engineering (Graduate Certificate) .................... 174

### College of Fine, Performing and Communication Arts

- College of Fine, Performing and Communication Arts ........... 176
- Academic Regulations for the College of Fine, Performing, and Communication Arts ................................. 177
- Art and Art History ....................................................... 179
- Art (M.A.) .............................................................. 180
- Art (M.F.A.) ............................................................. 182
- Art History (M.A.) ....................................................... 186
- Communication ........................................................... 190
- Communication (Ph.D.) ................................................ 191
- Communication and Urban Sustainability (Ph.D. Dual-Title) .. 191
- Communication (M.A.) ................................................... 192
- Dispute Resolution (M.A.D.R.) ........................................ 195
- Dispute Resolution (M.A./J.D.) ....................................... 196
- Dispute Resolution (Graduate Certificate) .......................... 196
- Communication and New Media (Graduate Certificate) ......... 196
- Health Communication (Graduate Certificate) ....................... 197
- Risk and Crisis Communication (Graduate Certificate) ....... 197
- Communication Studies AGRADE Program ......................... 198
- Public Relations AGRADE Program .................................. 198
- Music ................................................................. 198
- Music (M.A.) ........................................................... 198
- Music (M.M.) .......................................................... 198
- Theatre and Dance ....................................................... 202
- Arts Administration (M.A.) ............................................ 202
- Theatre (M.F.A.) ....................................................... 202
- Theatre and Dance (M.A.) ............................................. 205

### School of Information Sciences

- School of Information Sciences ....................................... 206

Pharmacology (Ph.D.) .................................................. 313
College of Nursing

Graduate Programs

Academic Regulations for the College of Nursing

Nursing (M.S.N.)

Nursing (D.N.P.)

Nursing (Ph.D.)

Nursing & Infant Mental Health (D.N.P. or Ph.D. Dual-Title)

Graduate Certificates

Adult Gerontology Nurse Practitioner Acute Care (Graduate Certificate)

Nursing Education (Graduate Certificate)

Pediatric Nurse Practitioner Acute Care (Graduate Certificate)

Pediatric Nurse Practitioner Primary Care (Graduate Certificate)

Psychiatric Mental Health Nurse Practitioner (Graduate Certificate)

Eugene Applebaum College of Pharmacy and Health Sciences

Academic Regulations

Applied Health Sciences

Pathologists' Assistant (M.S.)

Health Care Sciences

Nurse Anesthesia

Nurse Anesthesia Practice (D.N.A.P.)

Pediatric Anesthesia (Graduate Certificate)

Occupational Therapy (M.O.T.)

Physical Therapy (D.P.T.)

Physician Assistant Studies (M.S.)

Pharmaceutical Sciences

Pharmaceutical Sciences (M.S.)

Pharmaceutical Sciences (Ph.D.)

Pharmaceutical Sciences and Urban Sustainability (Ph.D. Dual-Title)

Pharmacy Practice

Pharmacy (Pharm.D.)

School of Social Work

Graduate Degree Programs

Social Work (M.S.W.)

Social Work (Ph.D.)

Social Work and Anthropology (SWAN Ph.D.)

Social Work and Gerontology (Ph.D. Dual-Title)

Social Work and Infant Mental Health (M.S.W. or Ph.D. Dual-Title)

Social Work and Public Health (M.S.W./M.P.H. Joint Degree)

Graduate Certificate Programs

Alcohol and Drug Abuse Studies (Graduate Certificate)

Child Welfare (Graduate Certificate)

Disabilities (Graduate Certificate)

Gerontology (Graduate Certificate)

Social Welfare Research and Evaluation (Graduate Certificate)

Field Education

Courses A-Z

ACC - Accounting

ACO - Art: Core

ACR - Art: Ceramics

ACS - Art: Special Seminars

ADA - Art: Digital Art

ADN - Art: Design

ADR - Art: Drawing

ADX - Art and Design Exposure

AED - Art Education

AET - Alternative Energy Technology

AFA - Art: Design and Merchandising

AFI - Art: Fibers

AFS - African American Studies

AGD - Art: Graphic Design

AH - Art History

AIA - Art: Interior Design

AID - Art: Industrial Design

AME - Art: Metalsmithing

AN - Anesthesia

ANA - Anatomy and Cell Biology

ANT - Anthropology

APA - Art: Painting

APH - Art: Photography

APR - Art: Printmaking

University Mission
Wayne State’s mission is to create and advance knowledge, prepare a diverse student body to thrive, and positively impact local and global communities.

Our vision
Wayne State will be a pre-eminent, public, urban research university known for academic and research excellence, success across a diverse student body, and meaningful engagement in its urban community.

Our values
While our vision and mission show where we want to go, our values guide us on the way. They cut across organizational boundaries, bind us culturally, and permeate our strategic and tactical initiatives. They are the defining traits of the Wayne State community.

  - Collaboration: When we work together, drawing upon various talents and perspectives, we achieve better results.
  - Integrity: We keep our word, live up to our commitments and are accountable to ourselves and each other.
  - Innovation: We are unafraid to try new things and learn by both failure and success.
  - Excellence: We strive for the highest quality outcomes in everything we do.
  - Diversity and Inclusion: We value all people and understand that their unique experiences, talents and perspectives make us a stronger organization and better people.

Wayne State intends to remain one of the nation’s most respected public research universities, and feels that these goals provide a way to make that happen. National recognition is not an end in itself; what matters most is how Wayne State’s progress as shaped by these goals will position the university to benefit its students and, ultimately, its city, state, nation and the world.

Accreditation
Since 1915, Wayne State University has been accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools, one of six regional accrediting agencies in the United States that provides accreditation to colleges and universities at the institutional level.

1. University Year Appointments are a full nine months in length. Individual service assignments are the responsibility of the appropriate Dean, or, by delegation, the Department Chairperson.

2. An equal number of class days is needed for courses.

### Religious Holidays

Because of the extraordinary variety of religious affiliations of the University student body and staff, the Academic Calendar makes no provisions for religious holidays. However, it is University policy to respect the faith and religious obligations of the individual. Students with classes or examinations that conflict with their religious observances are expected to notify their instructors well in advance so that mutually agreeable alternatives may be worked out.
Academic Affairs
MARK L. KORNBLUH, Ph.D., Provost and Senior Vice President for Academic Affairs
M. ROY WILSON, M.D., President of the University

The Graduate Council, which recommends candidates for the Doctor of Philosophy degree, the detailed supervision and approval of new graduate programs. Except for applicants and candidates for the Doctor of Philosophy degree, the detailed supervision of graduate students’ work is conducted by the college and school, and, where appropriate, by the departments.

The dean of the college or school is its chief executive officer. More than half the colleges and schools are organized into departments or divisions, each administered by a chairperson (or assistant dean). Academic standards, curricular development, course revision and similar academic matters are the primary responsibility of the faculty and dean of the college or school, although these matters are subject to review and approval by the Provost and Senior Vice President for Academic Affairs and by the President of the University. Major educational policy decisions are also subject to review by the Academic Senate.

The Graduate School is the central unit for the supervision and encouragement of graduate work in the university and has basic responsibility for the improvement and review of existing programs and the approval of new graduate programs. Except for applicants and candidates for the Doctor of Philosophy degree, the detailed supervision of graduate students’ work is conducted by the college and school and, where appropriate, by the departments.

All degrees are granted by the university through the colleges and schools, except that the Dean of the Graduate School, with the approval of the Graduate Council, recommends candidates for the Doctor of Philosophy degree.

EDWARD (NED) STAEBLER, M.S., Vice President for Economic Development.
MICHAEL WRIGHT, M.B.A., Vice President of Marketing and Communications and Chief of Staff
General Information

Mission of the Graduate School
Wayne State University Graduate School provides leadership in advancing academic excellence in graduate and postdoctoral education and cultivates a supportive environment for research, scholarly activities, and other creative endeavors that are integral to the success of a diverse body of master's and doctoral students, postdoctoral scholars, and graduate faculty across programs.

Graduate Council
The Graduate Council, the policy-formulating body for the Graduate School, is composed of two members elected from the regular graduate faculty of each of the various schools and colleges of the University, at least one graduate student member, the Dean of the Graduate School, and three members of the graduate faculty appointed by the Dean of the Graduate School. The Council meets monthly during the academic year, and all meetings are open to the University community.

In 1968, the Board of Governors established the Graduate Council and granted it the "authority and responsibility for the development of basic policies for the graduate education system and for the encouragement, improvement and evaluation of graduate programs throughout the University." In addition to reviewing new and existing graduate programs, the Council sets admission standards for graduate programs, makes recommendations for graduate faculty appointments, establishes criteria and evaluates applications for the Graduate-Professional Scholarship program, and awards all Ph.D. degrees, select master's degrees, and interdisciplinary graduate certificates.

Graduate Faculty
The Graduate Faculty consists of faculty members who are eminently qualified by virtue of preparation and competence to teach and direct research at the graduate level, according to specific criteria. Appointment to the Graduate Faculty does not modify a faculty member's responsibility to or affiliation with their department, division, college, or other instructional or administrative unit. The Dean of the Graduate School, on behalf of the Graduate Council, may appoint members of the WSU faculty to the Graduate Faculty, upon recommendation of their departments or divisions and with the approval of their deans.

Appointments to the Graduate Faculty are for a period of five years. Upon completion of the term, a qualified candidate may be recommended for reappointment to the Graduate Faculty by the department chairperson and the college dean.

History and Procedures of the Graduate School
Wayne State University's graduate and professional programs were established early in the history of the University and were unified within the newly-created Graduate School in 1933. Since that time, the Graduate School has grown steadily both in terms of quality and size and now ranks as one of the largest graduate schools in the nation. The University's Carnegie classification is reflective of a deep commitment to excellence in graduate education, relevance in academic curriculum, and leadership in research and scholarship.

The Graduate School is the central unit for the supervision and encouragement of graduate work in the University and has basic responsibility for the improvement and review of existing programs. The Ph.D. degree at Wayne State University is conferred by the Graduate School. The Graduate School monitors every significant stage in the doctoral student's career and ensures that all university-wide requirements have been fulfilled. Ph.D. plans of work must be approved by the Graduate School, and a Ph.D. applicant cannot advance to Ph.D. candidacy without the Graduate School's approval. After the dissertation defense, the Graduate School conducts a final audit of the student's record to certify them for graduation.

History of the University
Wayne State University's story begins in 1868 with the founding of the Detroit Medical College, forerunner of the School of Medicine. In 1881, the Detroit Normal Training School was established, which is now the College of Education. In 1917, the Detroit Junior College (offering a two-year general education program) was established, which became the College of the City of Detroit (with four-year degree programs) in 1923, and now is the College of Liberal Arts and Sciences.

In 1924, the College of Pharmacy was organized, and six years later the first regular graduate courses were offered in liberal arts and education. Frank Cody became the first president in 1933, with the existing colleges united into a university organization, eventually named Wayne University, taken from Wayne County in honor of General Anthony Wayne.

Wayne University continued to grow, adding the School of Social Work, the Law School, and the School of Business Administration. In 1956, it was renamed Wayne State University. In 1963, Wayne State was designated one of Michigan's three constitutionally established universities. Wayne State has since grown to become one of the 50 largest public universities in the United States, offering nearly 350 degree and certificate programs through 13 schools and colleges.

Timeline
1868 — The Detroit Medical College, forerunner of the School of Medicine, was established.
1881 — The Detroit Normal Training School, forerunner of the College of Education, was established.
1917 — The Detroit Junior College, offering a two-year program in general education, was established in 'Old Main' and later developed into the College of Liberal Arts.
1923 — The Detroit Normal Training School became a four-year degree-granting institution under the name of the Detroit Teachers College. The first degrees were granted in 1924. The Detroit Junior College became the College of the City of Detroit with four-year degree programs. The first degrees were conferred in 1925.
1924 — The College of Pharmacy was organized.
1930 — The first regular graduate courses were offered in Liberal Arts and Education. The first Master's degrees were conferred in 1932.
1933 — The College of Engineering and the Graduate School were established.
1933 — The Colleges of Liberal Arts, Education, Engineering, Medicine and Pharmacy and the Graduate School were united by action of the Detroit Board of Education into a university organization, temporarily called the Colleges of the City of Detroit.
1934 — The name Wayne University was adopted, taken from Wayne County and, ultimately, from General Anthony Wayne.
1935 — The School of Public Affairs and Social Work was organized. In 1950 it became the present School of Social Work.
1937 — The Law School, established in 1927 as Detroit City Law School, came into the University.

1945 — The first doctoral programs were authorized in the fields of Chemistry, Physiological Chemistry and Education.

1945 — The College of Nursing, which began as a program in the College of the City of Detroit, became a separate college.

1946 — The School of Business Administration, originating in the College of Liberal Arts, became the tenth academic unit in the University.

1959 — Monteith College was established.

1959 — Wayne State University became a constitutionally established University by popularly adopted amendment to the Michigan Constitution.

1964 — The Division of Urban Extension was established.

1973 — The College of Lifelong Learning was established as successor to the Division of Urban Extension.

1973 — The College of Pharmacy and Allied Health Professions was established.

1974 — The College of Pharmacy and Allied Health Professions was formed from merger of the College of Pharmacy and the Division of Allied Health Professions, School of Medicine.

1985 — The School of Fine and Performing Arts and the College of Urban, Labor and Metropolitan Affairs were established.

1989 — The name of the School of Fine and Performing Arts was changed to the College of Fine, Performing and Communication Arts.

1993 — The College of Science was established.

2001 — The name of the College of Pharmacy and Allied Health Professions was changed to the Eugene Applebaum College of Pharmacy and Health Sciences.

2002 — The College of Lifelong Learning was discontinued and its programs transferred to other units.

2004 — The College of Liberal Arts and the College of Science were merged into the College of Liberal Arts and Sciences.

2005 — The College of Urban, Labor and Metropolitan Affairs was discontinued and its programs transferred to other units.

2008 — The Irvin D. Reid Honors College was established.

2009 — The Library and Information Science Program was established as the School of Library and Information Science.

2011 — The Warrior football team made its first appearance in the NCAA Division II championship game.

2015 — The Integrative Biosciences Center, a $90 million facility dedicated to eliminating health disparities in Detroit, opens.

2015 — The name of the School of Business Administration was changed to the Mike Ilitch School of Business.

2017 — The name of the School of Library and Information Science was changed to the School of Information Sciences.

2018 — The Mike Ilitch School of Business opens its new facility.

2019 — Wayne State opens the Anthony Wayne Drive Apartments.

Location of the University
More than 100 buildings provide housing for the services, instructional and research needs of the University and its students and staff. Most academic and service units of the University are located on the main campus in Midtown Detroit, largely bounded by York Street on the north, Woodward Avenue on the east, Forest Avenue on the south and Trumbull Street on the west. The major classroom, laboratory, library and other academic buildings are located east of the John C. Lodge Freeway; most of the athletics and recreational facilities are on the west side of the freeway.

The School of Medicine and its affiliated teaching hospitals and clinics are located a short distance south and east of the main campus in the Detroit Medical Center. The Eugene Applebaum College of Pharmacy and Health Sciences is also located on the medical campus. The Mike Ilitch School of Business is located south of main campus in the District Detroit area. Certain smaller instructional and service units are located in other parts of the metropolitan area.

Accreditation
Wayne State University as a whole is accredited as a doctoral degree-granting institution by the regional accrediting agency:

The Higher Learning Commission
230 South LaSalle St., Suite 7-500
Chicago, Illinois 60604-1411
telephone: 800-621-7440

In addition, many specific programs and curricula are accredited individually by specialized or professional accrediting agencies. A report is produced annually for the Board of Governors which designates the accrediting agencies of the University’s programs; the report is available from the Office of the Provost (https://provost.wayne.edu/apr/accreditations/). The principal accreditation agencies are as follows:

Mike Ilitch School of Business
BS and BA, MBA, MS in Accounting, Finance, or Global Supply Chain, and PhD: Accreditation Council of ACCSB International — The Association to Advance Collegiate Schools of Business (AACSBI)

Education
Art Therapy Program: American Art Therapy Association and Commission on Accreditation of Allied Health Education Programs (CAAHEP)

Counseling (graduate only): Council for Accreditation of Counseling and Related Educational Programs (CACREP)

Counseling Psychology (Ph.D.): American Psychological Association

School Psychology, M.A. and Graduate Certificate: National Association of School Psychologists

Applied Behavior Analysis: Association of Behavior Analysis International

Teacher Education Programs: Council for the Accreditation of Educator Preparation (CAEP)
B.S. in Exercise and Sport Science: Commission on Accreditation of Allied Health Education Programs (CAAHEP)

M.S. in Athletic Training: Commission on Accreditation of Athletic Training

M.Ed in Learning Design and Technology: Association for Educational Communications and Technology (ACET)

**Engineering**

Division of Engineering (undergraduate): B.S. degrees in Biomedical Engineering, Chemical Engineering, Civil Engineering, Electrical Engineering, Industrial Engineering, and Mechanical Engineering: Accreditation Board of Engineering and Technology, Inc. (ABET, Inc.) Engineering Accreditation Commission

Division of Engineering Technology (undergraduate): B.S. degrees in Electrical/Electronic Engineering Technology and Mechanical Engineering Technology: Accreditation Board of Engineering and Technology, Inc. (ABET, Inc.) Technology Accreditation Commission

Computer Science (undergraduate): B.S. degree in Computer Science: Accreditation Board of Engineering and Technology, Inc. (ABET, Inc.) Computing Accreditation Commission

**Fine, Performing And Communication Arts**

Communication (B.A. in Public Relations): The Public Relations Society of America, Inc. (PRSA)

Dance: National Association of Schools of Dance (NASD)

Music: National Association of Schools of Music (NASM)

Theatre: National Association of Schools of Theatre (NAST)

**Information Sciences**

M.L.I.S.: American Library Association (ALA)

**Law**

American Bar Association (ABA) and Association of American Law Schools (AALS) (Joint Committee)

**Liberal Arts and Sciences**

B.S. in Chemistry: American Chemical Society (ACS)

B.S. in Biochemistry and Chemical Biology: American Society for Biochemistry and Molecular Biology

Nutrition and Food Science (Coordinated Program in Diabetics): Accreditation Council for Education in Nutrition and Diabetics

Political Science (Master of Public Administration): Network of Schools of Public Policy, Affairs and Administration (NASPAA)

Psychology (Clinical Training Program): American Psychological Association (APA)

Urban Planning (Master of Urban Planning): Planning Accreditation Board (PAB)

**Medicine**

Continuing Medical Education: Accreditation Council for Continuing Medical Education (ACCME)

Doctor of Medicine Degree Program (M.D.): Liaison Committee on Medical Education (LCME), representing the American Medical Association (AMA) and the Association of American Medical Colleges

Genetic Counseling (Master of Science in Genetic Counseling): Accreditation Council of Genetic Counseling

Graduate Medical Education Programs, Affiliated Hospitals’ Resident Physician Programs: Accreditation Council on Graduate Medical Education (ACGME)

Master of Public Health: Council on Education for Public Health

Medical Physics/Radiation Oncology: Commission on Accreditation of Medical Physics Educational Programs, Inc.

**Nursing**

Nursing (Baccalaureate programs, M.S.N., and D.N.P.): Commission on Collegiate Nursing Education (CCNE)

Nurse-Midwifery Program: Accreditation Commission for Midwifery Education (ACME) and Commission on Collegiate Nursing Education (CCNE)

**Eugene Applebaum College of Pharmacy and Health Sciences**

Clinical Laboratory Science: National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)

Mortuary Science: American Board of Funeral Service Education, Inc. (ABFSE)

Nurse Anesthesia: Council on Accreditation of Nurse Anesthesia Educational Programs (COA)

Occupational Therapy: American Council on Occupational Therapy Education (ACOTE)

Pathologists’ Assistant Program: National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)

Pharmacy (Doctor of Pharmacy): American Council on Pharmaceutical Education (ACPE)

Physical Therapy: Commission on Accreditation in Physical Therapy Education (CAPTE), American Physical Therapy Association

Physician Assistant Program: Accreditation Review Committee on Education for the Physician Assistant, Inc. (ARC-PA)

Radiation Therapy Technology (undergraduate): Joint Review Committee on Education in Radiologic Technology (JRCERT)

Radiologic Technology (undergraduate): Joint Review Committee on Education in Radiologic Technology (JRCERT)

**Social Work**

Bachelor of Social Work and Master of Social Work: Council on Social Work Education (CSWE)
University Policies

University Equality of Opportunity Policy

Wayne State University is committed to a policy of non-discrimination and equal opportunity in all of its operations, employment opportunities, educational programs and related activities.

This policy embraces all persons regardless of race, gender, color, sex (including gender identity), national origin, religion, age, sexual orientation, marital status, familial status, disability, arrest record, weight, qualified Vietnam era veterans, qualified special disabled veterans, recently separated veterans and other protected veterans, or any other characteristic protected by applicable federal or state law. It expressly forbids discrimination, sexual harassment or any form of harassment in hiring, terms of employment, tenure, promotion, placement and discharge of employees, admission, training and treatment of students, extra-curricular activities, the use of University services, facilities and in the awarding of contracts.

This policy also forbids retaliation and/or any form of harassment against an individual as a result of filing a complaint of discrimination or harassment, or participating in an investigation of a complaint of discrimination or harassment.

Wayne State University, as an equal opportunity/affirmative action institution, complies with all applicable federal and state laws regarding non-discrimination and affirmative action. In furtherance of this policy, the University is also committed to promoting institutional diversity to achieve full equity in all areas of University life and service and in those private clubs and accommodations that are used by University personnel. No off-campus activities sponsored by or on behalf of Wayne State University shall be held in private club facilities or accommodations which operate from an established policy barring membership or participation on the basis of race, color, sex (including gender identity), national origin, religion, age, sexual orientation, familial status, marital status, height, weight, disability or veteran status. Affirmative action procedures, measures and program may be used to the extent permitted by law to establish, monitor and implement affirmative action plans for all budgetary units and the University as a whole.

Inquiries regarding equal opportunity Academic/Administrative policies or complaints may be made to:

Office of Equal Opportunity
4324 Faculty/Administration Building
Wayne State University
Detroit, Michigan 48202
Telephone: 313-577-2280
or http://www.oeo.wayne.edu

Disability Non-Discrimination Policy

In accordance with federal requirements of the Americans with Disabilities Act of 1990 and the Rehabilitation Act of 1973, there shall be no discrimination on the basis of disability in Wayne State University’s programs, operations and activities, in the hiring, terms and conditions or privileges of employment or any matter directly or indirectly related to such employment, or in the admission, education and treatment of students. The Student Disability Services Office (http://studentdisability.wayne.edu/) has complete information on services available to students.

Drug and Alcohol Free Workplace Policy

Wayne State University is committed to providing a drug-free environment for its faculty, staff, and students. The Board of Governors has made this commitment a formal policy of the University. All faculty, staff and students must abide by the terms of the Board policy as a condition of employment or enrollment at the University. The unlawful possession, use, distribution, sale or manufacture of drugs or alcohol is prohibited on University premises, at University activities, and at University work sites.

Pursuant to that policy, the unlawful possession, use, distribution, dispensation, sale or manufacture of any illicit drugs, and the unlawful possession, use or distribution of alcohol on University property, or at any University work site, or as part of any University activity, is prohibited.

Any employee or student employee who is convicted of a criminal drug offense occurring at the workplace is subject to appropriate employee discipline in accordance with established University policies and collective bargaining agreements, and may be required to participate satisfactorily in a drug abuse or rehabilitation program as a condition of further employment or enrollment.

Any student or employee who, while on University premises or at any University activity, engages in the unlawful possession, sale, manufacture, distribution, or use of drugs or alcohol shall be subject to appropriate sanctions, in accordance with established University policies, the Student Code of Conduct, and collective bargaining agreements, and in conformity with local, state and federal law, up to and including expulsion or termination.

The University encourages employees who may have a problem with the use of illicit drugs or with the abuse of alcohol to seek professional advice and treatment. Individuals who seek assistance with such problems may obtain additional information on a confidential basis by telephoning the Employee Assistance Program (EAP) at 1-800-448-8326. Students may also seek referral assistance by contacting University Counseling and Psychological Services (CAPS), at 313-577-3398.

Policy Governing the Use of Alcoholic Beverages on Campus

The use or possession of alcoholic beverages is expressly prohibited in classrooms, lecture halls, laboratories, the libraries, the chapel and within buildings or areas where athletic events, lectures, and concerts are held. The use of alcoholic beverages is expressly prohibited in all public areas of campus buildings except as follows: the use of alcoholic beverages, subject to State law, is permitted in areas designated by, and with the approval of, the Office of the President, and the use of alcoholic beverages at student social events, subject to State law, is permitted in areas designated by, and with the approval of, the Office of the President.

Sexual Discrimination, Harassment, and Assault Policy

Title IX of the Education Amendments of 1972 is a federal civil rights law that prohibits discrimination on the basis of sex in education programs and activities. Under Title IX, discrimination on the basis of sex includes sexual harassment.

Sexual discrimination is prohibited by Title IX and by University Policy. (WSU Statute 2.28.01).

Sexual harassment is a form of sex discrimination that is prohibited by Title IX and by the University’s Interim Title IX Policy [cite]. It is the policy of Wayne State University that no member of the University community may sexually harass another. (WSU Statute 2.28.06).
Under the regulations that went into effect on August 14, 2020, and which are reflected in the Interim Title IX Policy, "sexual harassment" means conduct on the basis of sex that satisfies one or more of the following:

1. An employee of the University conditioning the provision of an aid, benefit, or service of the University on an individual’s participation in unwelcome sexual conduct;
2. Unwelcome conduct determined by a reasonable person to be so severe, pervasive, and objectively offensive that it effectively denies a person equal access to the University’s education program or activity; or
   a. sexual assault - The term "sexual assault" means an offense classified as a forcible or nonforcible sex offense under the uniform crime reporting system of the Federal Bureau of Investigation.
   b. dating violence – violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the victim; and where the existence of such a relationship shall be determined based on a consideration of the following factors:
      i. The length of the relationship.
      ii. The type of relationship.
      iii. The frequency of interaction between the persons involved in the relationship.
   c. domestic violence – includes felony or misdemeanor crimes of violence committed by:
      i. a current or former spouse or intimate partner of the victim,
      ii. by a person with whom the victim shares a child in common,
      iii. by a person who is cohabitating with or has cohabitated with the victim as a spouse or intimate partner,
      iv. by a person similarly situated to a spouse of the victim under the domestic or family violence laws of the jurisdiction receiving grant monies, or
     v. by any other person against an adult or youth victim who is protected from that person’s acts under the domestic or family violence laws of Michigan.
   d. Stalking - means engaging in a course of conduct directed at a specific person that would cause a reasonable person to fear for his or her safety or the safety of others; or suffer substantial emotional distress.

For the purpose of the Interim Title IX Policy, “consent” means knowing, voluntary and clear permission by word or action to engage in sexual activity. Since individuals may experience the same interaction in different ways, it is the responsibility of each party to determine that the other has consented before engaging in the activity. Consent cannot be given if force, coercion, or incapacitation as defined below are present:

1. **Force** is the use of physical strength or action (no matter how slight), violence, threats of violence or intimidation (implied threats of violence) as a means to engage in sexual activity. A person who is the object of actual or threatened force is not required to physically, verbally or otherwise resist the aggressor.
2. **Coercion** is unreasonable pressure for sexual activity. Coercive conduct differs from seductive conduct based on factors such as the type and/or extent of the pressure used to obtain consent. When someone makes it clear that they do not want to engage in certain sexual activity, that they want to stop, or that they do not want to go past a certain point of sexual interaction, continued pressure beyond that point can be coercive.
3. **Incapacitation** – A person is incapacitated when they are unable to understand what is happening or is disoriented, helpless, asleep, or unconscious, for any reason, including by alcohol or other drugs. Incapacitation is determined through consideration of all relevant indicators of an individual’s state and is not synonymous with intoxication, impairment, blackout, and/or being drunk.

**Reporting Sexual Misconduct**

There are several options for reporting sexual misconduct:

**Title IX coordinator**
All reports of sexual misconduct, including sex discrimination, sexual harassment and retaliation, may be made to the university’s Title IX coordinator:

Brandy Banks, Title IX coordinator
656 W. Kirby,
Suite 4249 Faculty/Administration Building
Detroit, MI 48202
Phone: 313-577-9999
Email: titleix@wayne.edu
Website: https://titleix.wayne.edu/

**Deputy Title IX coordinators**
These University officials are available to assist individuals with reporting sexual harassment, seeking supportive measures and filing a formal complaint:

**Deputy Title IX coordinator for students:** David J. Strauss, Ph.D., Dean of Students 301 Student Center Building 5221 Gullen Mall Detroit, MI 48202 313-577-1010 davidstrauss@wayne.edu

**Deputy Title IX coordinator for employees:** Shalandria Cooper, OEO lead secretary Office of Equal Opportunity 656 W. Kirby, Suite 432442 Detroit, MI 48202 313-577-2280 oeo@wayne.edu

**Deputy Title IX coordinator for athletics:** Theresa Arist, Senior Woman Administrator/Associate Athletics Director 5101 John C. Lodge 101 Matthaei Detroit, MI 48202 313-577-4282 theresa.arist@wayne.edu

**Deputy Title IX coordinator for the School of Medicine:** Dr. Beena G. Sood, Associate Dean for Professional Development, School of Medicine Scott Hall, Room 1310 540 E. Canfield St. Detroit, MI 313-577-9877 bsood@med.wayne.edu

**Deputy Title IX coordinator for residential life:** Nikki Dunham, Director of residential Life, 582 Student Center Building 5221 Gullen Mall Detroit, MI 48202 313-577-2116 ndunham@wayne.edu

**WSU Police**
Individuals are encouraged to report sexual misconduct that may also violate criminal law to the Wayne State police at 313-577-2222.

**Violence in the Workplace Policy**
Wayne State University is committed to providing a work and educational environment that is free from threats, assaults, or acts of violence. Threats of violence or of physical harm, and any form of physical or sexual assault or threats of physical assault are prohibited. This includes conduct that harasses, disrupts, or interferes with another person’s work performance or creates an intimidating, offensive or hostile work or educational environment.

The University has also adopted a Campus Safety Ordinance (WSU Statute 2.87.03) which applies to all property owned, leased or otherwise controlled by Wayne State University and applies to all individuals when present on such property, regardless of whether the individual has a
concealed weapons permit or is otherwise authorized by law to possess, discharge or use any device referenced in therein. The ordinance states that no person shall, while on any property owned, leased, or otherwise controlled by WSU:

1. possess or carry on his or her person any firearm, explosive or chemical weapon;
2. carry on his or her person any sword, switchblade knife, or other knife with a blade longer than three inches; and
3. carry on his or her person any other object or device with the intent of intimidating or injuring another person.

Upon conviction of any violation of this ordinance, the violator shall be sentenced to a fine not to exceed $500.00. In addition, violations of this policy may result in disciplinary action under existing University administrative policies. Limited exceptions to this policy exist for University employees expressly authorized to possess or use such weapons, devices or substances, law enforcement officials so authorized, and any individual whose possession or use is in connection with a research or regularly scheduled educational program authorized by the University, for which the Chief of the Wayne State University Police Department has been given at least one week's advance notice.

University personnel are expected to notify appropriate management personnel of any violent or threatening behavior, when that behavior is work-related, carried out on University property, or is connected to University employment. Any individual who has obtained a personal protection order that identifies the workplace as a protected area should provide that information to the Wayne State University Police Department.
**Graduate Degree and Certificate Requirements**

**Application for Degree or Certificate**

Each candidate for a degree or certificate must file an Application for Degree (https://wayne.edu/commencement/apply-for-graduation/), no later than the Friday of the fourth week of classes for the semester in which the student expects to complete the requirements for the degree or certificate. If an application for a degree was filed for a previous graduation term in which the student did not graduate, a new application and fee is required. Applications for graduation require that a $40.00 fee be paid in the online application process.

**Master's Degrees**

In addition to the following regulations, requirements may be specified by the individual graduate departments.

The minimum Graduate School requirement for the master's degree is thirty credits, at least twenty-four of which must be taken at the University. In those master's degree programs where the college, school or department requires more than the Graduate School minimum, their requirements take precedence. The Graduate School recognizes three general master's degree plans, though not all plans are offered in each department (for exact information, see listings under individual departments in the appropriate sections of this bulletin):

- **PLAN A** requires a total of thirty credits, including a total of eight credits for a thesis (some departments require less).

- **PLAN B** requires a total of thirty credits, including a minimum of two credits for an essay.

- **PLAN C** requires a total of thirty credits. The essay or thesis is not required.

**Candidacy for Master's Degree**

**Admission as an applicant does not assure acceptance as a candidate for a degree. Candidacy is a necessary but not sufficient requirement for graduation.**

Generally, students enrolled in master's degree programs are expected to file a Plan of Work by the time eight to twelve graduate credits have been earned. The applicant shall be advanced to the rank of 'Candidate' upon approval of the Plan of Work by the College Graduate Office. In most colleges candidacy must be authorized by the time twelve graduate credits have been earned or subsequent registration will be denied. In preparing the Plan, the student and advisor should evaluate with careful consideration the personal and professional objectives of the student as well as all degree and departmental requirements.

**Master's Essay**

Under Plan B, students are required to complete an essay prior to the granting of a master's degree. The essay must show evidence of scholarly study and writing and be related to the student's major. Students should consult their departments regarding any additional requirements for essays, as well as for correct essay manuscript style.

**Master's Thesis**

Under Plan A, departments require the completion of a thesis prior to the granting of a master's degree. The thesis may be of a research, expository or critical nature and should be selected and planned with care. It must be an original work, in or related to the student's major field of specialization. Work submitted for credit in other courses cannot be used in fulfilling thesis requirements. Neither the results of the research nor the publication of findings may be restricted by any non-University agency. The results of the research may be published prior to submission and acceptance of the thesis, with the approval of the thesis advisor.

The presentation of a thesis generally brings to a close the pursuit of the master's degree. In essence such manuscripts represent a tangible summation of the many hours spent in study and research to acquire a higher education. For this reason such scholarly documents must evidence only the highest standards of research and writing. They must show consistency in punctuation, style and format. The Graduate School oversees the format requirements and templates (http://www.gradschool.wayne.edu/).

Advisors have primary responsibility for approval of the thesis. Such approval includes all academic and professional evaluations and judgments as to originality, adequacy, accuracy, significance, methodology, justification or conclusions and correctness of style. Approval shall not be recorded until the work and manuscripts are fully verified and accepted.

**Additional Essay or Thesis Elections and Fee Policy**

A master's student who has enrolled for all elections (including essay or thesis) stipulated by his/her Plan of Work, and who has completed all the requirements of these elections, but has not completed the essay or thesis, will be required to register for at least one credit (the appropriate amount to be determined by the department) of essay or thesis direction until such time as the student:

1. completes the requirements for the degree;
2. declares themselves no longer a candidate for the degree; or
3. exceeds the time limit allotted for securing the degree.

For these credits, the student will pay customary fees and will register as an auditor. No degree credit will be granted for these elections which are beyond the required credits for an essay or thesis. A mark of 'Z' (Auditor) will be recorded on the student's record for additional elections.

**College of Nursing:** The additional elections and fee policy also applies to field studies and research practicums.

**Time Limitation for Master's Degree**

Students have a six-year time limit to complete all requirements for the master's degree. The six-year period begins with the end of the semester during which the student has taken work which applies toward meeting the requirements of the degree. The individual college or school reserves the right of revalidation of over-age credits which are between six and ten years old and which represent courses completed at Wayne State University. Such authority rests with the Graduate Officer of the college or school. Students are not permitted to revalidate credits earned at other institutions. In revalidation cases the advisor and the student must set a terminal date for completion of all degree requirements, including such additional requirements as may be prescribed to revalidate the over-age credits. Time extensions beyond these conditions are authorized only for conditions clearly beyond the student's control.

A student registered in a non-degree graduate classification is cautioned that only one semester of full-time graduate study, or part-time registration not to exceed nine credits, is permitted in this classification. Not more than nine credits may be applied toward the credit requirements for the master's degree.

Please see the appropriate school and college sections of this bulletin for specific master's program information.
Doctor of Philosophy Degrees (Ph.D.)

In addition to the following regulations, additional requirements for doctoral degrees may be specified by the individual graduate departments.

Requirements for the degree of Doctor of Philosophy emphasize an overall understanding of and high competence in a field of knowledge, familiarity with cognate disciplines, facility in the use of research techniques, and responsibility for the advancement of knowledge. The meeting of the requirements for the doctorate is tested primarily by examinations and the presentation of the dissertation rather than by a summation of courses, grades and credits.

Admission: Ph.D. Program

Students may be admitted to the status of Ph.D. applicant if they meet all Graduate School requirements for admission, presents a grade point average of 3.0 (‘B’=3) for the upper division of the undergraduate course work and are accepted for study toward the degree by their school or college and major department. Additional requirements (e.g., letters of recommendation, undergraduate research experience, personal interview, specific coursework, service learning) are specified by departments and programs. Students presenting less than a 3.0 undergraduate grade point average are required to complete a master's degree program, or its equivalent, prior to consideration for admission to a Ph.D. program.

Responsible Conduct of Research Training

All PhD students are required to take the graduate school course GS0900 Responsible Conduct of Research (RCR) during the first year of their program. GS0900 is a zero credit pass-fail course offered in both the fall and winter terms. This is an institution-wide comprehensive training program conducted by the Graduate School that provides basic training in the ethical conduct of research. In addition to the GS0900 course, students should receive additional discipline-specific RCR training from their home department or program. Documented completion of RCR training is required for many external and internal individual fellowship applications. More information on this course can be found on the Graduate School’s website (https://gradschool.wayne.edu/students/phd/requirements/#rcr).

Initial Ph.D. Advising

An advisor is assigned to the student at the beginning of his/her program and represents the Department in helping plan the student’s program. The advisor provides academic guidance, approves required documents and monitors student progress. The initial advisor serves until the time the student identifies a dissertation director, who then assumes advising responsibilities.

Graduate Faculty and Ph.D. Student Responsibilities

Course work and research leading to the doctoral degree is a matter of shared responsibilities between faculty members and Ph.D. students. The Graduate Council has established the following reciprocal obligations:

Ph.D. program faculty are responsible for:
1. Admitting qualified students whose research interests can be accommodated within those of the program.
2. Ensuring that students receive competent and sustained advising from their entry into the program until degree requirements are completed or the student is separated from the program.
3. Monitoring and evaluating student progress toward the degree and for communicating the results of the evaluation to the student on an annual basis.
4. Assisting students in locating potential dissertation directors.
5. Offering guidance and instruction in those research areas in which they have expertise. To this end individual faculty members are responsible for deciding whether or not to serve as a dissertation director for any given student. This responsibility rests solely with the faculty, who are expected to make decisions based on reasonable academic criteria.

Ph.D. program students are responsible for:
1. Identifying research areas in which the Ph.D. program can provide guidance. The selection of a research area outside these areas may cause difficulty in achieving the degree.
2. Maintaining good standing throughout the doctoral program and making normal progress toward the degree.
3. Requesting that an individual member of the faculty serve as the dissertation director, working with the dissertation director toward timely completion of degree requirements, and complying with the dissertation director’s instructions.

Ph.D. Procedural Calendar

The stages of the Ph.D. degree are outlined below. The section following describes these stages in detail. Necessary forms and additional instructions and requirements may be found on the Graduate School website (http://wayne.edu/gradschool/phd/).

1. Plan of Work: Initiated by the student and completed with his/her advisor to plan the sequence of study. An approved Plan is a requirement for Ph.D. Candidacy.
2. Ph.D. Coursework: Ninety graduate credits beyond the baccalaureate degree are required. Completion of about fifty credits of coursework is a requirement for Ph.D. Candidacy.
3. Annual Review: The student’s department prepares a review of the student’s progress at the end of each academic year.
4. Qualifying Examination: The qualifying examination contains a written portion and may include an oral component. Successful completion of the qualifying examination is a requirement for Ph.D. Candidacy.
5. Dissertation Advisory Committee: The naming of a dissertation advisory committee is a requirement for Ph.D. Candidacy.
7. Dissertation Registration: Four consecutive academic-year semesters of registration as a degree candidate are required during the preparation of the dissertation.
8. Oral Examination: An oral examination is required of all Ph.D. students. It may be addressed as part of the qualifying examination, a prospectus meeting, a lecture or seminar, or another format approved by the student’s department.
9. Dissertation Prospectus: After attaining Candidacy, the student prepares a description of the proposed research and dissertation for approval by his/her advisory Committee.
10. Dissertation Preparation: The dissertation presents the original scholarship or research completed by the student.
Plan of Work

This planning document, which is developed by the student and the advisor, should include both course and non-course objectives. An interim Plan of Work, to be retained in the department, should be developed by the end of the student’s first year and updated annually. The final Plan of Work requires the signatures of both the advisor and the departmental Graduate Director prior to submission to the Graduate School for approval. The final Plan of Work (https://gradschool.wayne.edu/phd/forms/) may be filed with the Graduate School at any time; however, it must be submitted before forty credits have been completed and before the qualifying examination is scheduled. Once a student has an approved Plan of Work on file with the Graduate School, any changes to that plan are monitored and approved at the department level. The student is primarily responsible for monitoring that they’ve taken the minimum number of credits to earn the degree; 90 credits total, at least 30 WSU coursework credits, 60 coursework credits total, and 30 dissertation block credits.

Transfer credit: A student wishing to transfer graduate credit toward the Ph.D. degree must file a petition with the Graduate School via the Transfer of Credit form (https://gradschool.wayne.edu/phd/forms/), approved by his/her advisor and departmental graduate director, requesting such transfer. The petition must be supported by an official transcript showing a minimum grade of ‘B’ for the courses to be transferred; ‘B-minus’ and credit earned with ‘S’ and ‘P’ (satisfactory or pass) grades are not acceptable for transfer. When students would like to transfer credits from institutions without course codes, the closest WSU equivalents must be listed. When students would like to transfer credits from institutions without letter grades, a conversion chart must be used and submitted to the Graduate School. When students would like to transfer credits toward the 30 required 7000-level and above, evidence that those courses were open to graduate students only, and not undergraduates with special permission, must be submitted to the Graduate School. Up to thirty-two semester credits of ‘B’ or better graduate credit earned at Wayne State University or another institution prior to the student’s admission as a doctoral applicant may be applied toward the degree without regard to lapse of time. Credit earned with ‘B’ minus or ‘S’ or ‘P’ (satisfactory or pass) grades are not acceptable for transfer.

Ph.D. Coursework

To ensure adequate preparation, the Graduate Council has adopted minimum coursework requirements for the University’s highest degree. Many programs will exceed these minima.

A minimum of ninety graduate credits beyond the baccalaureate degree is required for completion of the Ph.D. program. A Ph.D. program will consist of:

1. at least twelve credits of coursework in the major (not including directed study or research credit);
2. sufficient additional coursework to total sixty credits (major and minor coursework, pre-dissertation research and directed study); and
3. thirty credits earned in four consecutive Candidate Status semesters after candidacy has been approved.

The Ph.D. program should provide for effective concentration in a major field with supporting courses in related fields. The decision concerning whether the student’s Plan of Work will include a minor is made by the department.

The total Ph.D. program must include thirty credits, excluding Candidate Status semesters, in courses open only to graduate students (i.e., 7000 level or above).

Directed Study

Registration in directed study must have advance approval of the student’s advisor and advance authorization of the student’s department. A Graduate School Petition and Authorization for Directed Study must be signed by the student’s advisor, instructor, and the Graduate Director of the department before registration. The Directed Study Petition must contain all relevant details, including an explicit course outline, a rationale for the course, and information about the major academic requirements the student must successfully fulfill.

Mandatory Ph.D. Pre-Candidacy Enrollment

During the pre-candidacy stage, registration is required in all semesters in which the Ph.D. student uses University resources, including the semester(s) in which the Qualifying Examination is taken. The student must register for a minimum of one graduate credit.

Annual Reviews

All Ph.D. students are required to receive an annual review of the student’s progress toward completion of degree requirements. The student’s progress in course work, scholarship, teaching, and all other academic or professional areas defined by the department will be summarized and communicated to the student in writing. The annual review must be signed by the student, advisor, and departmental Graduate Director. The annual review is filed in the student’s department.

Individual Development Plans (I.D.P.’s)

To promote long-term career planning and development, all Ph.D. students are required to complete an Individual Development Plan (IDP) by the end of their first year in graduate school. These documents are designed to foster conversation between a student and their mentor(s) about career goals and the skills necessary to succeed in those positions after graduate school. The document is to be updated annually throughout the student’s tenure in graduate school to promote follow through on the action plan and to revise the action plan in response to new opportunities and increased competency. This document is completed on-line. It is approved electronically by both the dissertation advisor and the Graduate Director.

Qualifying Examination

The Qualifying Examination covers the student’s primary areas of study and research, as well as such related matters as the qualifying examining committee may prescribe. The Qualifying Exam must contain a written component; an oral component (described later) is optional. No part of the dissertation proposal may be used to satisfy the written Qualifying Examination requirement.

The Qualifying Examining Committee must consist minimally of three members, two of which must be from the major department, and at least two must hold Regular Graduate Faculty appointments. An external member may be added at the discretion of the department. In this latter instance, the department is encouraged to select a person from the student’s minor/cognate area. The membership of this committee may not normally be changed until the Qualifying Examination(s) (written or written and oral, as required) have been passed.

If the written component of the Qualifying Examination is not completed successfully at the first administration, the examination may be repeated only once. A second examination may not be held until at least one semester has elapsed, but must be held within one calendar year following the first examination. The same examining committee must preside over both examinations. The second written examination will be considered final.

The student’s examining committee will select one of its members to serve as the Graduate Examiner. The results of the oral qualifying
examination are to be communicated to the Graduate School via Report on Doctor of Philosophy Oral Examination form (https://gradschool.wayne.edu/phd/forms/). If the Oral Examination is part of the final Qualifying Examination it must be completed within 60 days of the written exam.

If the Graduate Examiner certifies that the applicant has not passed all parts of the oral examination, the committee may recommend that a second oral examination be held. If a second oral examination is recommended, the committee must specify any additional work the student must complete prior to that examination. A second examination may not be held until at least four months have elapsed, but must be held within one calendar year following the first examination. The second oral examination shall be considered final.

Dissertation Advisory Committee

The dissertation advisory committee shall consist minimally of four members. If there are co-chairs, the committee shall consist of five members. At least two committee members shall be from the student’s home department/program, and at least two shall hold Regular Graduate Faculty appointments. The committee chair shall hold a Regular Graduate Faculty appointment in the home unit, and if there are co-chairs, at least the one from the home unit shall hold a Regular Graduate Faculty appointment. The committee shall have at least one external member who broadens the dissertation committee beyond the home program to represent a different perspective by virtue of his/her field, location or knowledge application; who does not hold any salaried or contractual appointment, tenure line or retreat rights in the home program; and, who is familiar with the standards for doctoral research. The expertise of the extra-departmental member must be appropriate to the student’s dissertation work. The dissertation director and advisory committee should be identified as early as possible, and by the time course work is completed at the latest. The dissertation advisory committee membership must be submitted to the Graduate School as a condition for attaining candidacy. The committee membership may be changed up to the time the dissertation prospectus is submitted. After Graduate School approval of the dissertation prospectus, any changes in committee membership will require written justification via the Change in Committee form (https://gradschool.wayne.edu/phd/forms/).

Conflict of Interest: It is essential that the members of the committee have not only the requisite professional credentials, but that they are also free of conflicts of interest or commitment that could bias or have the appearance of biasing their judgment about the best interests of the student and the scholarly merit of the dissertation. The present policies and procedures provide a means of disclosing and managing perceived or real conflicts of interest or commitment among dissertation committee members. Each committee member must complete and sign the disclosure form, which must be submitted prior to the approval of the Prospectus and Record of Approval form and again at the time of the Dissertation Public Lecture Presentation Defense form. Conflicts of interest or commitment include financial, personal and/or professional affiliations that could potentially or actually affect the member’s objectivity about the dissertation or the student. Committee members unable to sign or provide an electronic signature must email the Ph.D. Office with this exact verbiage: I, [committee member’s name], do not have a financial, commitment or affiliation conflict of interest with [student’s name] nor any member of his/her committee (should a conflict be disclosed, the conflict must be briefly described).

Candidacy for Ph.D. Degree

A Ph.D. applicant will be advanced to the rank of Ph.D. Candidate by the Graduate School upon the recommendation of the department and completion of the following requirements:

1. Approval of the Plan of Work by the Graduate School;
2. completion of didactic course work, or approximately fifty credits, as required by the Plan of Work;
3. satisfactory completion of the Qualifying Examination(s);
4. identification of the membership of the student’s dissertation advisory committee.

(The advisory Committee membership may be changed prior to submission of an approved prospectus to the Graduate School.) The department shall submit the Recommendation for Doctor of Philosophy Candidacy Status form (https://gradschool.wayne.edu/phd/forms/) to the Graduate School to recommend advancing the student to degree Candidacy.

Dissertation Registration

The Doctor of Philosophy degree requires that students register for Candidate Status during the preparation of the dissertation: Doctoral Dissertation Research and Direction I, II, III, and IV (courses numbered 9991, 9992, 9993, and 9994 offered under various subject area codes, respectively), in consecutive academic year semesters. Registration for these four Candidate Status courses equates to thirty credits.

Ph.D. student enrollment in the first candidate status course prior to candidacy: Ph.D. applicants may be permitted to register in XXX 9991, Doctoral Candidate Status I: Dissertation Research and Direction, during the semester in which they expect to take their Qualifying Examination. To obtain permission to register, students must already have an approved Plan of Work on file with the Graduate School, and submit written approval prior to the census date from their advisor and graduate director that explicitly states the student is expected to achieve candidacy that term to the Graduate School. Students who submit this request to the Graduate School but do not have a Plan of Work on file by the census date will not be provided the override. Students who do not submit this request to the Graduate School by the census and then do achieve candidacy later in the semester cannot retroactively register for 9991 that semester. Students who achieved candidacy in a previous semester but did not register for 9991 can do so after the census date.

Courses numbered 9990 should only ever be taken under special circumstances: If a student is not able to register for 9991 because they are studying for their Qualifying Exam(s) but have finished all 60 credits of coursework, they may request to register for 9990, Pre-Doctoral Candidacy Research, to meet enrollment requirements (8 credits are required for full-time status). Note that 9990 credits do not count toward the 90 required for the degree and cannot be taken in 7.5 credit blocks. If there is any doubt that a student will achieve candidacy, the applicant should register for required coursework or 9990 and not request to register for 9991. Students who register for 9991 but do not achieve candidacy during that term must notify the PhD Office in writing to explain the situation, then register for required coursework or 9990. Up to 8 credits of 9990 can be taken per term; with maximum of 12 credits during the student’s degree program. The 7.5 credit blocks are reserved for dissertation blocks (9991, 9992, 9993, 9994).

If a student has registered for all four Candidate Status courses but has not completed the dissertation requirements, the student may register in Candidate Maintenance status (9995) until the requirements are completed, the time limit for the degree is reached, or the student withdraws from the program. Registration in Candidate Maintenance Status is required in all semesters in which the student uses University resources, including the semester in which the student defends the dissertation. The Candidate Maintenance fee is equivalent to the Registration Fee plus the Student Services Fee for one graduate credit and confers full-time registration status.
Guidelines for Research

All research is regulated by federal, state and local agencies. Approval is required for research involving human participants or animal subjects before research activities begin.

Human participant research

Federal regulations require that all research involving human participants must be reviewed and approved by an Institutional Review Board (IRB) before research activities can begin. The WSU Institutional Review Board (IRB) is the primary IRB of record for Wayne State University and its affiliated health care institutions (Barbara Ann Karmanos Cancer Institute, Children’s Hospital of Michigan, Detroit Receiving Hospital/University Health Center, Sinai-Grace Hospital, Harper Hospital, Huron Valley/Sinai Hospital, Hutzel Hospital, Rehabilitation Institute of Michigan, Oakwood Healthcare System, Michigan Orthopedic Surgery Hospital, and the John D. Dingell Veterans Administration Medical Center). The IRB has the responsibility to review all research that involves human participants and that is performed by faculty, students, or employees of WSU and its affiliated institutions. The authority of the IRB extends to biomedical research and behavioral/social science research, regardless of whether the research is being funded by a federal agency, by commercial companies, by intramural entities or supported by institutional resources. In addition, it includes research conducted on Wayne State University property or its affiliated medical institutions’ property. Designation of research as exempt from IRB review requires approval of the IRB chair or their designee.

The WSU IRB Administration Office

The IRB Administration Office staff is ready to assist you. They offer weekly ongoing training, online training, and are available to answer your questions. The IRB website (http://irb.wayne.edu/) contains forms, resources and tools, including a comprehensive handbook to help researchers and their staff with the IRB application process. The WSU IRB Administration Office has a listserv for all researchers and research staff using the WSU IRB. This listserv facilitates communication between WSU researchers and the IRB. To subscribe, send a blank email to irb-info-request@lists.wayne.edu and then confirm when you receive a reply. To unsubscribe at any time, send an email to irb-info-signoff-request@lists.wayne.edu. The IRB Administrative Office is located at 87 E. Canfield, second floor, Detroit, MI 48201. Phone: 313-577-1628

Animal subject research

Federal regulations require that all research involving animals must be reviewed and approved by an Institutional Animal Care and Use Committee (IACUC) before research activities begin. Wayne State University has its own IACUC that reviews protocols for Wayne State University and its affiliated medical institutions (Barbara Ann Karmanos Cancer Institute, Children’s Hospital of Michigan, Detroit Receiving Hospital/University Health Center, Sinai-Grace Hospital, Harper Hospital, Huron Valley/Sinai Hospital, Hutzel Hospital, Rehabilitation Institute of Michigan, and the John D. Dingell Veterans Administration Medical Center). In cooperation with research scientists and veterinarians, the IACUC ensures that all research and teaching protocols using live vertebrate animals are designed and carried out in a humane manner that complies with all applicable laws, policies and guidelines. The Division of Laboratory Animal Resources (DLAR) provides informational, species-specific and procedure-specific training sessions for researchers at various times throughout the year.

The WSU IACUC Administration Office

Detailed information about training and how to submit forms is located on the IACUC website (http://www.iacuc.wayne.edu/). The IACUC Administration Office is located at 87 E. Canfield, second floor, Detroit, MI 48201 (between John R. and Woodward). Phone: 313-577-1629.

Henry Ford Health System (HFHS)

Please note that Henry Ford Health System has its own IRB and IACUC. Wayne State University faculty and students wishing to do research in those facilities must either submit an Administrative Application to WSU IRB or IACUC after gaining approval from HFHS (if all of the research is being performed there) or submit research proposals to both WSU and HFHS (if the research is being performed in both locations). Questions regarding the type of submission required by WSU can be directed to the IRB or IACUC Office.

Dissertation Prospectus and Approval

The Ph.D. Candidate must prepare and complete a prospectus of the proposed dissertation research within 18 months of being named a PhD Candidate. If this timeline is delayed, one must request a formal extension of this policy, which must be approved by the dissertation committee, the director of graduate studies, and the Graduate School. In some departments, oral presentation of the prospectus constitutes the required Oral Examination. The student must submit the Doctoral Dissertation: Prospectus and Record of Approval form (https://gradschool.wayne.edu/phd/forms/) with the prospectus. The prospectus and form must be approved by the dissertation advisory committee and the departmental Graduate Director, before being forwarded to the Graduate School, which requires a hard copy of the proposal; a completed Conflict of Interest (https://gradschool.wayne.edu/phd/forms/); and Institutional Review Board (http://research.wayne.edu/irb/(IRB)/Institutional Animal Care and Use Committee (http://research.wayne.edu/iacuc/)(IACUC) approvals, if needed. Students and their dissertation Chair are responsible for following IRB/IACUC regulations and rules.

Oral Examination

Successful completion of an Oral Examination is a requirement for the Ph.D. degree. The Oral Examination may be administered as part of the Qualifying Examination (see previous discussion of Qualifying Examination), or as part of the prospectus meeting, or a lecture, or in some other departmentally-approved format in which the student presents information orally and answers questions posed by the student’s committee. The committee for the Oral Examination must be composed of minimally three members, two must be from the student’s department, one must be the advisor; a member outside the department, is optional. The members of the Oral Examination committee may also serve as the student’s dissertation advisory committee, but this is not required. At least two members must hold Regular Graduate Faculty appointment status, one must be the advisor. If the Oral Examination is part of the Qualifying Examination, the Oral Examination must be completed within 60 days of the written qualifying examination. If the Oral Examination is part of the prospectus meeting, the results of the Exam are to be reported to the Graduate School via the Doctoral Dissertation: Prospectus and Record of Approval form. The results of the Oral Examination administered in all other contexts should be reported to the Graduate School via the Report on Doctor of Philosophy Oral Examination form.

Dissertation Preparation

The dissertation should be selected and planned with care; it may be of a research, expository or critical nature. It must be an original work, in or related to the student’s major field of specialization. Work submitted for credit in other courses cannot be used in fulfilling dissertation requirements. Neither the results of the research nor the publication of findings may be restricted by any non-University agency. The results of
the research may be published prior to submission and acceptance of the dissertation, with the approval of the dissertation advisor.

Members of a doctoral dissertation advisory committee must read, approve and sign the dissertation. Such approval includes all academic and professional evaluations and judgments as to originality, adequacy, accuracy, significance, methodology, justification or conclusions and correctness of style. Approval shall not be recorded until the work and manuscripts are fully verified and accepted.

**Format:** Candidates preparing manuscripts are instructed to follow closely the Graduate School regulations governing the format of the dissertation. Format requirements and format templates are available on the Graduate School website. Two weeks prior to the Dissertation Defense, the student must submit the dissertation electronically (http://dissertations.umi.com/wayne/) for the initial format check. Note that format guidelines are written for Microsoft Word, and students who use other programs are expected to meet the same guidelines.

**Inclusion of Publications in the Dissertation:** In such instances where doctoral students have published work in discipline-appropriate refereed journals, and when the doctoral committee approves, these published materials may be incorporated into the dissertation. For papers so included, the student must be the principal author and/or have made the major contribution to the published work. In cases of co-authored material, the text of the dissertation must make clear (e.g., in the summary and conclusion) to the reader the original contribution of the author. If published materials are included, references to them in the other dissertation sections may not need to be as detailed as is required in dissertations which do not incorporate published materials.

When a co-author is someone other than the candidate and the advisor, it is recommended that permission to include the publication in the dissertation be secured from the other author(s). Students are advised that incorporation of materials published elsewhere requires permission of the copyright holder. Once permission is secured, it must be cited in the chapter from whom the permission was granted/where the material is already published.

Students must format a published article to conform to the body of the dissertation. As well, all remaining sections of the dissertation (e.g., abstract, introduction, conclusions) must conform to Graduate School format requirements.

**Dissertation Public Lecture Presentation-Defense**

Two weeks before the planned Defense, each dissertation advisory committee member must have certified in writing, via the Dissertation Public Lecture Presentation-Defense Final Report form (https://gradschool.wayne.edu/phd/forms/), that the dissertation has been read and approved for the Defense. Committee members unable to sign or provide an electronic signature may email this exact verbiage to the PhD Office: [committee member's name], certify that I have read the dissertation, approve its content and verify that it is ready for the Public Lecture Presentation-Defense. And I, [committee member's name], do not have a financial, commitment or affiliation conflict of interest with [student's name] nor any member of his/her committee (should a conflict be disclosed, the conflict must be briefly explained). The Defense cannot be held without such certification.

Dissertation Readiness for the Defense: Dissertation committee members will sign Part 1 of the Defense form and thereby indicate their assessment that the dissertation is ready for the Defense. Under no circumstances will a committee member sign Part 1 of the Defense form if s/he has not read the dissertation. A pre-Defense meeting of the student and whole committee is recommended, allowing committee members to indicate their concerns regarding the dissertation and the student to make needed revisions. Consequently, no requests for major revisions of the dissertation should arise at the Defense.

The Graduate School requires that all dissertations and theses must be submitted for a plagiarism check through Canvas Learning Management System (LMS) plagiarism check software prior to the defense. The Graduate School further requires that the student's dissertation/thesis advisor or program Graduate Director certify that the dissertation/thesis has been checked through plagiarism software in Canvas. The Defense Final Report form and the first page of the plagiarism check report will be used to transmit the certification to the Graduate School. The Graduate School requires additional justification for reports that suggests evidence of plagiarism.

**Policy on Presence at the Defense:** The Graduate School expectation is that the student and all members of the dissertation committee be physically present at the student's Final Defense of the dissertation. At the very least, the student and the dissertation committee chair(s) must be physically present; a student with dissertation co-chairs must have at least one in attendance. Committee members who cannot attend in person, synchronous audio-visual access, such as Skype, will be required. The Defense will be held during business hours, Eastern Standard Time. Electronic signatures on the Defense form and the title page are accepted.

**Graduate Examiner:** The Graduate Examiner is the presiding officer at the Defense and is responsible for its conduct. Representing the Graduate Council and the Graduate School, the Graduate Examiner serves as an advocate for the student. The dissertation advisor serves as the Graduate Examiner, but the student (or any committee member) may request that the Graduate School appoint a Graduate Examiner from outside the committee.

The Doctoral Dissertation Public Lecture Presentation-Defense has three phases, as follows:

**Public Lecture Presentation-Defense:** In the public lecture or presentation, candidates are expected to share the results of their dissertation research with the audience and the dissertation committee. This lecture or presentation may vary in length depending on the circumstances and discipline. At the end of this public lecture or presentation, members of the audience, as well as the dissertation committee members, are encouraged to direct questions pertaining to the presentation or research to the candidate. The Graduate Examiner moderates the questioning.

**Communicating Dissertation Revision Requirements:** To communicate to the Graduate School that revisions to the dissertation were requested at the Defense, a box on the Defense form will be checked that indicates "Changes Required." The dissertation advisor will not sign the dissertation cover page until the student has made all required revisions. Submission of the cover page to the Graduate School will indicate that the student has made the revisions satisfactorily.

**Dissertation Committee's Meeting with the Candidate:** At the conclusion of the public presentation and defense, the dissertation committee members will meet privately with the candidate to pose further questions about the candidate's research or to address issues related to the dissertation manuscript. The Graduate Examiner presides at this meeting.

**Evaluation of the Candidate's Performance:** Upon the completion of the public presentation and defense and the private meeting, the dissertation committee members, in the absence of the candidate and the audience, discuss the candidates' performance and decide whether or not they have passed the defense. The Graduate Examiner chairs the discussion...
and communicates the result to the candidate, and subsequently, to the Graduate School within 48 hours of the dissertation defense via the Dissertation Public Lecture Presentation-Defense Final Report form (https://gradschool.wayne.edu/phd/forms/).

If the candidate fails the Defense, the advisor and committee may recommend that the student be given the opportunity for a second defense. If a second defense is recommended, the advisor and committee will submit to the Graduate School, the Graduate Director of the program and the student a written description of the areas of weakness and what the student must do to correct the weaknesses. If candidates will need to make extensive corrections to the manuscript (ones requiring more than ten days), they will not be passed. Candidates must wait at least four months before holding another defense. The second defense shall be considered final.

Ph.D. Completion Deadline: Each semester the Graduate School establishes a Ph.D. completion deadline calendar for students intending to graduate in that semester, by which time all work must be completed and all required documents submitted, if the Ph.D. degree is to be awarded that term. Any dissertation revisions stemming from the defense must be completed and submitted prior to the completion deadline for the semester, so the manuscript can be accepted for publication by the deadline. Acceptance for publication by the Ph.D. completion deadline is required for a student to graduate that term.

Submission of Approved Dissertation

The submission of the approved dissertation concludes work pursuant to the doctoral degree. In essence such manuscripts represent a tangible summation of the many hours spent in study and research to acquire a higher education. For this reason such scholarly documents must evidence only the highest standards of research and writing. They must show consistency in punctuation, style and format. It is official policy that acceptance of a dissertation, as well as certification of a candidate for a degree, shall not be granted unless a manuscript is technically correct in format and in a form suitable in all respects for publication.

The corrected dissertation must be submitted and accepted for publication by the completion deadline of the graduation semester. Manuscripts must be submitted electronically. The signature page must also be submitted to the Graduate School.

Dissertation Publication Plan: Filing a Doctoral Dissertation Publishing Agreement form is required.

Dissertation Copyrighting Charge: Copyright service, provided by Proquest, is available upon request. The student shall pay the amount necessary to cover the cost of copyrighting.

Students wishing to obtain bound dissertation copies for personal use must select a bindery and pay the binding charges for these.

Information regarding completion of additional forms is available from the Graduate School office and website. The Ph.D. degree will be certified only upon receipt of the approved dissertation and the reconciliation of the student’s Plan of Work and transcripts.

Graduation

Each candidate for a degree or certificate must file a Graduate Application for Degree by the end of the fourth week of classes in the semester in which they expect to complete the requirements for the degree. If an application for a degree was filed for a previous term in which the student did not graduate, a new application is necessary.

Commencement

Information concerning commencement announcements, caps and gowns, invitations, tickets, time and place, assembling and other relevant items will be mailed to the graduates by the Commencement Office prior to the event. Candidates for advanced degrees are requested and expected to attend the commencement at which the University confers upon them the honor of the degree earned.

Exceptions

A student who wishes to request an exception to any of the Ph.D. program minimum requirements should file a written, detailed petition with his/her advisor. If the advisor approves the petition, they will forward it, along with their recommendation, to the Chairperson of the departmental Graduate Committee. If approved by the department, the petition will be forwarded to the Graduate School. All exceptions must ultimately be approved by the Graduate School. Appeals of decisions follow the same process; appeals of Graduate School decisions may be presented to the Provost.

Time Limitation for Doctoral Programs

Students have a seven-year time limit to complete all requirements for the Ph.D. degree. The seven-year period begins with the end of the semester during which the student was admitted to doctoral study and was completing work toward meeting the requirements for the degree. In order to request a time extension, a student may petition his/her advisor. If the advisor supports the request, it is forwarded to the chairperson of the departmental Graduate Committee, and if approved, it is reviewed by the Graduate School. The petition must include information concerning the reasons for the request, an explanation of how the student’s circumstances have changed to enable them now to complete the dissertation, compelling evidence that the student’s dissertation is in progress, a plan and timeline for completion of the dissertation, an explanation of how the student has remained current in his/her field, and a copy of the current annual review. The initial request for a time extension must be filed within six months of the expiration date. There is no grace period for additional time extensions that may be granted after the initial request. To be considered eligible for a time extension, the student must have an approved prospectus on file at the Graduate School. If students do not complete the program within ten years of their applicant date with approved time extensions, the written qualifying examination(s) must be repeated and passed by the end of the time extension. Students who have been granted time extensions must complete all program requirements within twelve years of the applicant date.

Foreign Language Requirement

The Ph.D. Foreign Language Requirement is a matter of departmental option. Students are advised to contact the department in which they intend to major in order to determine the nature of the Ph.D. foreign language requirement, if any, for that discipline.

Doctoral students should bear in mind that most departments reserve the right to require foreign language proficiency for any Ph.D. student pursuing research which would benefit from the use of foreign language materials, even though other students in the same Ph.D. program are not required to establish foreign language competence.

Ph.D. Residence Requirement

The Ph.D. requirement of one year of residence is met by completion of at least six graduate credits in course work, exclusive of dissertation, in each of two successive semesters. The spring/summer semester may be excluded from the definition of successive semesters. Additional residence requirements may be imposed by the Ph.D.-granting departments. The student should contact the major department to determine what residence requirements must be satisfied.

In the experimental sciences for which it can be demonstrated that a student’s research must be completed on campus, the residence
requirement for the Ph.D. degree may be met by the dissertation director’s written certification that the student has been in full-time residence for at least two successive semesters and one summer session. In this latter case, a count of course credits is not required for the fulfillment of the residence requirement, but specific dates of residence must be furnished.

In addition, the Ph.D. residence requirements stipulate that the student must elect at least thirty credits in graduate work exclusive of dissertation direction at the University.

Certificates: Graduate and Bridge Graduate Programs

Programs leading to Graduate Certificates and to Bridge Graduate Certificates are available through several University units and are open to students who meet the general graduate admission requirements of the University; individual programs may have additional admissions requirements. The specific number of credits required for completion varies by program, though Certificate programs must consist of at least twelve graduate credits.

**Graduate Certificates** may be earned independently of or concurrently with a graduate degree. A Graduate Certificate program must be completed within three years, a minimum grade point average of 3.0 in certificate courses must be maintained, and only nine semester credits of certificate course work may be applied toward a graduate degree.

**Bridge Graduate Certificates** are certificate programs designed to provide students with specialized knowledge that may subsequently be applied toward the requirements of a designated Master’s degree and may be viewed as transitional to a Master's program. The program is for students who hold at least a baccalaureate degree and are admissible to graduate studies.

The Bridge Graduate Certificates are generally housed in the same unit as the Master’s program that proposes it. The Certificate program consists of at least twelve graduate-level credits be completed within three years and a minimum grade point average of 3.0. No transfer credits are accepted into a Bridge program. The curriculum consists of courses from the corresponding Master’s program. All courses in the Bridge Certificate may be applied toward the requirements of the designated Master’s degree, given that they meet the approval of the Master’s program and the six-year time limit for Master’s degrees. For specific certificate requirements interested students should consult the specific certificate program descriptions in this Bulletin or contact the sponsoring department.

Dual-title Graduate Degrees

A dual-title degree program is designed to provide additional valuable course work not prescribed in an existing major program. The dual-title degree program consists of two components: an area of study, in which there are graduate course offerings and faculty strength but no graduate degree program, and one or more major degree programs that adopts the area of study and integrates its content into the coursework and progressive stages of the major program, including the Qualifying Examination, thesis and dissertation. The dual-title areas of study are not available as separate graduate degree programs.

Potential dual-title areas of study typically are interdisciplinary with courses and faculty housed in various departments. When incorporated into an existing program, they provide students with knowledge and skills graduates of traditional programs do not have. Dual-title areas often exist in new and emerging fields, generally where the most significant advances in research occur. The addition of a dual-title area to an existing degree program enables graduates to acquire the most current knowledge and up-to-date research skills beneficial to the major program.

**Joint Degrees**

A joint degree program is a formally approved and authorized program between two cooperating graduate or graduate and professional programs that permits the use of a limited number of credits to fulfill requirements in both programs. The joint degree programs offer exceptionally talented students the opportunity to acquire expertise and knowledge in a shorter time than is possible by completing two separate degrees in sequence.
Tuition and Fees

Listed below are the Tuition and Fees, as adopted by the Board of Governors, at the time of preparation of this Bulletin. Please see the Undergraduate Bulletin (http://bulletins.wayne.edu/undergraduate/) for rates in Undergraduate programs. Current tuition and fee information is also available on the Office of the Registrar’s website (https://wayne.edu/registrar/tuition/). Tuition and Fees are subject to change without notice by action of the Board of Governors.

Student Fees

Tuition and Fees are subject to change without notice by action of the Board of Governors.

Resident Years 1-4 | $726.00 per credit
Non-Resident Years 1-4 | $1,262.00 per credit

Student Fees

Registration Fee

There is a $328.01 registration fee for graduate and professional students (other than M.D. students). The registration fee is refundable according to the same principles as tuition and other fees.

Late Registration Fee

Any student registering after the Priority registration date (as indicated in the Schedule of Classes [http://www.classschedule.wayne.edu]) must pay either a $35.00 Late Registration Fee if registration is completed before the start of classes or $70.00 if completed after the start of classes. Late Registration Fees will be waived for new students in their first term of WSU enrollment.

Student Services Fee

Graduate and professional students (other than M.D. students) are assessed a $56.69 fee per credit per term. The Student Services Fee is used primarily to maintain, upgrade and replace student computing and technology resources on campus. A small portion is also used to fund student activities on campus, and to enhance programs directed toward improving on-campus activities, including athletics.

Doctoral Candidate Maintenance Fee

If a student has registered for all four Candidate Status courses but has not completed the dissertation requirements, the student may maintain Candidate Status (9995) until the requirements are completed, the time limit for the degree is reached, or the student withdraws from the program. Registration in Candidate Maintenance Status is required in all semesters in which the student uses University resources, including the semester in which the student defends the dissertation. The Candidate Maintenance fee is $384.70 (equivalent to the Registration Fee plus the Student Services Fee for one graduate credit) and confers full-time registration status.

Medical Student Fees

M.D. students (Years 1-4) are assessed a Student Services Fee of $28.00 per credit and an annual Student Support Fee of $979.00.

Student Exchange and Visitors Information Service (SEVIS) Fee

International students and scholars/visitors who must be reported through the federal SEVIS system shall be charged a $50.00 non-refundable fee for each term of enrollment.

Course Material Fees

These fees are required of some classes in which a relatively large portion of instructional costs is due to the necessary use of consumable resources. The fee is automatically assessed; a fee card is not required. The fee may be canceled when a course is officially dropped within the tuition and fee cancellation period specified in each semester’s term calendar. For additional information, contact the Department offering the course. Courses listed as having special fees require payment of the fee in addition to the tuition.

Music Fees

Students registering for music courses taken as private lessons pay an additional fee. In the event of withdrawal, the student will receive a refund.
of the difference between the fee assessed and the cost to the University of any lessons that were provided.

Examination Fee for Credit by Examination
The fee for an examination taken to establish credit by examination is $10.00 per credit. Such examinations will be approved under provisions established by the Schools and Colleges. Credit allowed on the basis of transcript entries from another institution is not applicable to this provision.

Graduation/Certificate Fee
There shall be a $40.00 fee for students who apply for a degree or certificate/diploma. Graduate applicants for graduate degrees will not be charged the Graduation Fee as they pay a higher Registration Fee. Undergraduates who are new to the university in fall 2014 or after will pay a Matriculation Fee in lieu of a Graduation Fee and in lieu of an Orientation Fee.

Payment of Tuition and Fees
Disclosure Statement
The University reserves the right to update and/or change this information at anytime.

Student Financial Obligation for Payment of Tuition and Fees
When registering for courses each semester students are required to electronically sign a “Financial Responsibility Agreement.” This agreement represents a binding contract obligating the student to pay all tuition and fees assessed including any collection, attorney, and/or litigation costs associated with collecting those fees, in the event of non-payment.

Payment Due Dates
Students registering during priority registration period are expected to pay the balance as follows:

FALL SEMESTER - August 15
WINTER SEMESTER - December 15
SPRING/SUMMER SEMESTER - April 15

Students registering on or after these payment dates are expected to pay the balance in full at the time of registration.

Students who register for short-term courses are required to pay the balance in full at the time of registration.

Students adding credits after the tenth day of the term must pay the additional tuition and fee assessment at the time the credits are added.

Failure to pay the balance in full by the specified due dates or dishonoring payment plan schedules will result in the assessment of monthly "late payment fees" and financial "holds" preventing registration, drop/add, release of official transcripts, diplomas, degrees and other university services.

Please refer to the published eBill Schedule and Payment Due Dates (http://fisops.wayne.edu/bursar/e-bills/eBill-Schedule.php) on the Office of University Bursar's website.

Checks, Money Orders, and Cash: Wayne State University accepts personal and certified checks, money orders, and cash as payment for tuition and fees. Payments can be mailed, however, please do not mail cash. Checks or money orders should be made payable to Wayne State University. All checks must be issued in U.S. dollars, and drawn on or payable through a U.S. or Canadian bank. The student’s name and University AccessID number should be written on the check or money order. Personal checks are not accepted on delinquent balances.

Fee-free ACH Checks: Wayne State University also accepts fee-free automated clearing house (ACH) check payments using Academica. Checks (paper or ACH) returned by the bank are subject to returned check fees.

Credit Card Payments
Wayne State University does not accept credit card payments directly. Credit card payments can be applied to a student’s University account by a third party processor, CASHNet SmartPay. CASHNet SmartPay will assess a convenience fee (2.9%) on all credit card payments. To make a credit card payment log into Academica and select the “Online Payments” option under “Student Resources” link. American Express, Discover, MasterCard and Visa cards are accepted.

Installment Payment Plans (IPP)
Wayne State University is able to offer interest free installment payment plans for students on a semester-by-semester basis via Nelnet at: https://wayne.afford.com/ or 1-800-722-4867

There is a nominal fee for enrolling. Contact the company for terms and conditions.

Sponsored Tuition Programs
Certain employers participate in direct tuition billing arrangements as part of their employee benefits programs. Students with questions about the University’s procedures or required documentation for a specific plan should contact the Student Accounts Receivable Office at 313-577-6623.

IMPORTANT: Students who do not drop their courses during the tuition cancellation period for the term are financially obligated to pay for the courses even if they have not attended any class sessions. Tuition cancellation deadlines are available on the Registration Calendar (http://reg.wayne.edu/students/registration-calendar.php).

Students with questions regarding any information presented in Payment of Tuition and Fees section above should contact the Office of the University Registrar. In such cases, full tuition, Registration Fee and Late Registration Fee must be paid in advance of registration.

Holds on Records
Initial eligibility to register for classes each semester is based on a student’s admission status with the University. All students must be authorized by the University in order to enroll in classes. ‘Holds’ may be placed on student records, and registration denied to a student, for academic reasons (e.g., probation or dismissal), a disciplinary problem, money owed to the University, failure to return library books and/or other supplies and equipment, and/or non-compliance with program, Departmental, School/College, or University regulations.

A ‘Hold’ will be placed on the records of any student who has past due indebtedness to the University. While the hold is in effect, registration for a subsequent term will not be permitted, official transcripts of academic work taken at the University will not be furnished, degree or enrollment certification will not be provided, nor will a diploma be issued.
Transcript Request Policy

Transcripts are not issued to anyone outside the University without the written permission of the student. Request for official transcripts will not be honored if the student or former student has an outstanding financial obligation to the University. Exceptions are permitted for employment purposes only with an agreed upon payment plan and acceptable down payment.

Short Term Courses

Payment of the full tuition and the non-refundable Registration Fee is required on the date of registration or no later than the first class meeting date. Late Payment Fees are assessed to any student who has not paid his/her tuition and fee assessment by the due date.

Special Adjustments

The University Registrar is authorized to make adjustments in the application of the policies stated in this section when unusual circumstances warrant. Examples of circumstances which may warrant special consideration include: serious illness or death of the student or someone closely related, or mis-advisement by a University representative. Tuition cannot be canceled for reasons such as changes in work schedule or other employment demands, claims of lack of information, insufficient funds, unawareness of the difference between tuition and student financial aid, undocumented reasons, or for reasons that are within the control of the student. Non-attendance, except for situations falling under the University non-attendance policy (below), is not in and of itself a reason for tuition and fee cancellation. Students (or an authorized representative in the case of death or serious illness) must submit their applications and supporting documentation to the Office of the Registrar. A medical withdrawal is a complete withdrawal from all courses, supported by medical reports from the attending physician. Requests for exceptions to tuition and fee policies must be submitted within approximately two months of the end of the term, as follows:

- Fall Term - March 1
- Winter Term - July 1
- Spring/Summer Term - November 1

Deadlines falling on weekends will be extended to the next business day.

University Non-Attendance Policy

The University Non-Attendance Policy will allow 100% tuition cancellation only for students in their first term of attendance at Wayne State University. Instructors for all courses must verify the student did not attend classes after the tuition cancellation deadline. This policy is designed to provide relief to those students who in their first semester at Wayne State may not be familiar with the University’s Tuition Cancellation Policy.

Where the student has otherwise proceeded properly, (s)he may be granted full cancellation of tuition and fees assessed for the class(es) involved.

- If the University cancels the class(es), or
- If the University re-schedules the class(es) after the student has registered and (s)he is now unable to attend, or
- If an authorized University representative has taken action which causes financial loss related to tuition, e.g., authorizing a student’s schedule when the student does not have the necessary prerequisite(s).

Appeal Procedures: If a student (or an authorized representative in the case of death or serious illness) is dissatisfied with the Registrar’s decision with reference to this policy, the student (or an authorized representative) may appeal to the Tuition and Fee Appeals Board through the University Ombudsperson.

University policy allows for a Request for Medical Withdrawal. A medical withdrawal is a complete withdrawal from all courses. For approved requests, the University Medical Withdrawal Policy will grant 100% tuition and fee cancellation if a student stops attending ALL classes before the end of the 10th week of the scheduled class meeting period in a full fall/winter term. Medical documentation will need to confirm that medical attention was provided during this time period. For medical withdrawals occurring during the 11th or 12th week, tuition cancellation will be granted at the rate of 60%. There is no tuition cancellation after the twelfth week of the term. These periods are adjusted proportionally for courses that do not run the full term. While a request is under review tuition payments should be made as scheduled.

Tuition Cancellation

Tuition may be canceled in accordance with the following schedule when students officially drop classes using the Academica on-line portal, by submitting a properly completed Register/Drop/Add form, or by sending a certified letter to the Office of the Registrar. A certified letter requesting to drop classes sent through the U.S. Postal Service shall be considered effective on the date it is received in the Office of the Registrar.

Students who officially drop classes before the conclusion of the first two weeks of classes (for the Fall and Winter terms) are entitled to 100% tuition cancellation, and the dropped classes do not appear on the academic record.

Students are contractually liable for tuition unless they take official action during the tuition cancellation period to drop classes.

Students who officially withdraw from fifteen-week classes after the second week of classes (for the Fall and Winter terms) are not entitled to any tuition cancellation.

The tuition cancellation schedule shown below applies to courses that start in accordance with the Official University Academic Calendar. The tuition cancellation schedule for courses with specially approved starting dates is dependent upon the starting date of the course. Questions about the tuition cancellation schedule should be referred to the University Registrar.

- Classes meeting fewer than four weeks: Students who officially drop scheduled classes before the first day of classes are entitled to a 100% tuition cancellation and 0% thereafter.
- Classes meeting four to eight weeks: Students who officially drop scheduled classes before the second week of classes are entitled to a 100% tuition cancellation and 0% thereafter.
- Classes meeting nine to fifteen weeks: Students who officially drop scheduled classes before the third week of classes are entitled to a 100% tuition cancellation and 0% thereafter.
- Classes meeting sixteen to twenty-seven weeks: Students who officially drop scheduled classes before the fourth week of classes are entitled to a 100% tuition cancellation and 0% thereafter.
- Classes meeting twenty-eight or more weeks: Students who officially drop scheduled classes before the seventh week of classes are entitled to a 100% tuition cancellation and 0% thereafter.
Tuition Regulations and Review Procedures

The following regulations and review procedures are established by Wayne State University for tuition and fee purposes. Wayne State University recognizes three means by which an individual may establish eligibility for in-state tuition and fees:

By establishing residence by presence in the State of Michigan;

By establishing attendance at Michigan high schools; or

By establishing military service status.

Establishing Residence by Presence in Michigan

Generally, in order to establish residence by presence in the State of Michigan, an individual must document at least six months of continuous physical presence in the State. The six months continuous residence must be completed before the first day of classes for the semester in which in-state tuition is sought. Even if someone is present in Michigan for six months, the person may not qualify for in-state tuition; it depends on whether the person is in Michigan for educational purposes or some other reason. Under limited circumstances which clearly demonstrate that a student’s presence in the State of Michigan is not primarily for educational purposes, the student may be eligible for in-state tuition prior to the passage of the six-month presence requirement.

Temporary Absences

In general, a person’s residence is the place where he or she actually lives with the intention of making it the person’s permanent home and to which he or she intends to return from temporary absences. A person may be temporarily absent from Michigan without affecting his or her previously established residence. Full-time attendance at a school outside Michigan or enlistment in a military service are examples of temporary absences. Other types of absences for more than six months will be presumed not to be temporary.

Presence for Educational Purposes

Coming to Michigan from another state or country in order to attend Wayne State University or another school does not establish residence. A non-resident at the time of his or her enrollment remains a non-resident throughout his or her presence as a student, except where it can be established that presence in the State of Michigan is primarily for purposes that are not educational, with enrollment only incidental to the primary purpose of being in Michigan. If a student enrolls in undergraduate school for more than eight credits, or in graduate school for more than six credits, or in Law School for more than ten credits in any one full length semester, within six months after arrival in Michigan, Wayne State University normally presumes that the student is in Michigan for the purpose of attending school. Applicants must demonstrate that their presence in Michigan is primarily for purposes that are not related to enrollment.

Factors Considered in a Residence Classification

The following circumstances, although not conclusive, support a claim for in-state tuition on the basis of residence.

The student’s spouse or partner is employed in Michigan on a permanent, full-time basis and the applicant moved to Michigan as a consequence of that employment; and

The student has severed ties to his or her previous state of residence so that he or she no longer can reasonably be considered to be a resident of another state.

Factors Typically Not Supporting Residence Classification

The following circumstances, standing alone, do not typically support residence, inasmuch as they may be common to a temporary or short-term presence in Michigan:

1. Employment by the University as a fellow, scholar, assistant, or in any position normally filled by students;
2. A statement of intention to establish residence in this state;
3. Payment of local and state taxes; or
4. Automobile registration, driver’s license, continued presence in Michigan during vacation periods.

Although insufficient to establish residence, certain of these factors may be taken into consideration in determining whether a student has severed ties to the student’s previous state of residence.

For purposes of these regulations, the age of majority is eighteen years. Except as provided in paragraph “7” of this section, a minor does not have the capacity to establish his or her own legal residence. Normally, the legal residence of a minor follows:

1. That of the parents or surviving parent; or
2. That of the parent to whom custody of the minor has been awarded by a divorce or other judicial decree; or
3. That of the parent with whom the minor in fact makes his or her home, if there has been a separation without a judicial award of custody; or
4. That of an adoptive parent, where there has been a legal adoption, even though the natural parents or parent may be living; or
5. That of a “natural” guardian, such as grandparent with whom the minor in fact makes his or her home, where the minor has permanently left his or her parental home and reasonable expectation of substantial financial support from the parents has been dissolved. A natural guardian is someone who, although not legally the minor’s parent or guardian, performs the same sort of parental duties.
6. If a Michigan resident parent or guardian of a minor moves his or her residence to another state, the minor shall remain eligible for resident tuition status as long as he or she continues to attend school regularly in this state.
7. A minor who has permanently left his or her parental home, and who has no reasonable expectation of significant financial support from his or her parents or legal guardian, etc., may qualify for resident status even if under eighteen years of age.

Non-U.S. Citizen

A non-U.S. citizen may apply for resident status in the same manner as a citizen, if he or she is in the United States for other than a temporary educational purpose. In order to demonstrate this, applicants must provide evidence from the U.S. Department of Citizenship and Immigration Services of one of the following:

1. A U.S. permanent resident alien with a green card.
2. An applicant for U.S. permanent residence whose Petition for Alien Relative, or Employment-based Immigration Petition for Alien Worker has been approved, or who has been issued an Employment
Attendance of Michigan High Schools

An individual may be eligible for in-state tuition on the basis of high school attendance if he or she demonstrates that he or she:

1. Attended an accredited Michigan high school for at least three years and thereafter graduated from an accredited Michigan high school or obtained his or her GED in Michigan; and
2. Enrolls at Wayne State University within twenty-eight months of graduating from high school or obtaining a GED.

An individual does not need to be a legal resident of Michigan or a citizen of the United States to qualify for in-state tuition on the basis of attendance at Michigan schools.

Military Service

Individuals on active duty in the U.S. Military who are stationed in Michigan and their dependents are eligible for Michigan in-state tuition. Stationing orders and proof of relationship (for dependents) must be provided with the application.

Veterans and their dependents are eligible for Michigan in-state tuition. The term "veteran" means a citizen of the United States or a resident alien whose most recent separation from any branch of the armed forces of the United States was under conditions other than dishonorable after having served on active duty for 90 consecutive days or more or by reason of disability incurred while serving on active duty.

Individuals who are members of the National Guard of any state, or who were separated from the National Guard of any state under conditions other than dishonorable, and their dependents are eligible for Michigan in-state tuition.

Without regard to the foregoing, any individual using educational assistance under either Chapter 30 (Montgomery GI Bill® – Active Duty Program), Chapter 33 (Post-9/11 GI Bill®), of title 38, United States Code, and/or the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311 (b)(9)) who lives in the State of Michigan while attending Wayne State University (regardless of his/her formal state of residence) is eligible for Michigan in-state tuition.

Good Neighbor Provisions

Residents of Fulton, Lucas, Ottawa, and Williams counties in Ohio, or residents of Ontario, Canada, who are enrolled in eligible undergraduate programs will pay in-state tuition. WSU Tuition and Fee Regulations published each academic year identify specific academic programs eligible for this provision.

Great Lakes Policy (Undergraduate Only)

Residents of the states of Ohio, Indiana, Illinois, Wisconsin, Minnesota, New York, or Pennsylvania, or the province of Ontario, Canada, who are enrolled in eligible undergraduate programs and who are not eligible for the Good Neighbor Policy may pay tuition and fees at 110% of the then-current instate rate.

Online Programs

Students enrolled in programs which are offered online in their entirety will have the out-state portion of their tuition waived. WSU Tuition and Fee Regulations published each academic year will identify the specific academic programs eligible for this provision.

Review Procedures

Initial Classification and Appeal

1. The student is responsible for registering under proper residence or tuition status and advising the University of changes in circumstances, which might affect tuition status. Questions concerning a student's residence or tuition status prior to enrollment should be raised with the Office of Admissions. Questions arising after enrollment should be raised with the Registrar's Office.

2. After enrolling, a student may challenge the initial classification made by the Office of Admissions by filing an Application for Residence Classification or Change in Tuition Status with the Registrar's Office.

3. Except for documented delays caused by University personnel, such applications must be filed by:
   - September 30 for the Fall semester and the Medical Year semester
   - January 31 for the Winter semester
   - July 31 for the Spring/Summer semester

Deadlines falling on weekends or on days when the University is closed will be extended to the next business day. Applications received after these dates will be processed for the following semester.

Further Appeal

A student may appeal the initial tuition decision as follows:

1. By filing a written notice of appeal with the Registrar within thirty (30) days after the student is notified of the classification decision.

   The notice of appeal shall include reasons for the appeal, the period for which resident status is claimed, and a complete statement of the facts on which the appeal is based, together with supporting affidavits or other documentary evidence. Failure to file notice within thirty (30) days shall constitute a waiver of any right to further appeal.

   The student has the right to consult the University Ombuds Office at any time, and the student may particularly want to utilize the Ombudsperson's services at this point in the review procedures.

2. A student may appeal the Registrar's decision by filing a written notice of appeal with the Office of the General Counsel within fifteen (15) days from the date of the Registrar's decision. Failure to file written notice of appeal of the Registrar's decision with the Office of the General Counsel within fifteen (15) days shall constitute a waiver of any right to further appeal.

3. A student may appeal the decision of the Office of the General Counsel within fifteen (15) days with the Office of the President. Failure to file written notice of appeal of the General Counsel's decision with the Office of the President within fifteen (15) days shall constitute a waiver of any right to further appeal. After the notice of appeal, the President or his designee shall review the student's appeal and render a final decision.

Erroneous Classification

1. If an erroneous classification of non-residence occurs, an adjustment for the appropriate period and amount will be made.

2. If an erroneous classification of residence occurs, the student shall be reclassified as a non-resident student. If the cause of his or her incorrect classification shall be found to be due to any material concealment of facts or false statement made by the student before
the time of the original classification, the student will be required to pay all tuition and fees which would have been charged to him or her and also will be subject also to appropriate discipline in accordance with University Student Code of Conduct. If it is determined that there is no such concealment of facts by the student, fees shall be adjusted only for current and future semesters.

Effective Dates of Residence Regulations
Amended statute as adopted on September 20, 2013, will be effective for the Winter Semester 2014.

Financial Aid
Office of Student Financial Aid (OSFA)
Welcome Center, 42 W. Warren Avenue
P. O. Box 2340, Detroit, MI 48202
Telephone: 313-577-2100, Fax: 313-577-6648

The Office of Student Financial Aid (OSFA) provides need-based and non-need-based financial aid to help eligible students meet the expenses of their education. Financial aid is intended to supplement, not to replace, students’ financial resources. Financial need is determined from the information that students submit on the Free Application for Federal Student Aid (FAFSA).

Information concerning scholarships (/https://wayne.edu/scholarships/) is available online. Wayne State University offers a variety of University-wide scholarships that are awarded based on financial need, scholastic achievement, and/or leadership qualities. To apply for University-wide scholarships, students must complete the online application (/https://wayne.edu/scholarships/privateapp/). Note: Scholarships that have need as a criterion require submission of the FAFSA.

Service Hours: Walk-in financial aid assistance is provided in the lobby of the Welcome Center Monday through Thursday, 8:30 a.m. to 6:00 p.m., and Friday 8:30 a.m. to 5:00 p.m. June through August, appointments and walk-in services end at 5:00 p.m. Monday through Friday. You may also email studentservice@wayne.edu or call 313-577-2100.

The Office of Student Financial Aid will send email and notices to your WSU email account (/https://tech.wayne.edu/kb/communication-collaboration/wayne-connect/). Information about your award and award requirements is available in Academica. More information about using Academica is available on our website (/https://wayne.edu/financial-aid/receiving/pipeline/).

Financial Aid Types
Financial aid at Wayne State University is awarded in the form of a ‘package,’ or combination of aid sources, and generally consists of four types: grants, scholarships, loans, and employment. The amount of aid a student may receive cannot exceed the estimated cost of attendance. The amount of need-based financial aid that a student may receive cannot exceed their financial need, which is based on the information provided on the FAFSA. Graduate students may be eligible for a need-based Federal Work-study award or non-need-based Federal Unsubsidized or Grad PLUS loan.

Grants
Grants are gift assistance awarded on the basis of financial need and do not require repayment. The Free Application for Federal Student Aid (FAFSA) is required. Note: The Federal Pell Grant is limited to students who have not earned a bachelor’s or professional degree.

Scholarships
Scholarships are gift assistance awarded based on academic achievement or other special ability and do not require repayment. For some awards, financial need is a factor and a FAFSA is required.

Loans
Loans are money that must be repaid at a future date, usually following graduation or when the student ceases to be enrolled on at least a half time basis. Federal loans require submission of the FAFSA. A graduate
Federal Work-Study

Federal work-study is on- or off-campus part-time employment with eligible employers. Work-study is awarded based on financial need. Students interested in work-study should complete the annual FAFSA. The Work-Study Request Form is available on our website. The Student Guide to On-Campus Employment, which explains the hiring process and the terms and conditions of employment is available from the Office of Career Services (http://careerservices.wayne.edu/student-employment.php).

Free Application for Federal Student Aid (FAFSA)

How and When to Apply for Financial Aid: Each academic year, submit the Free Application for Federal Student Aid (FAFSA) and include the WSU federal code, 002329. The U.S. Department of Education, will electronically transmit the FAFSA data to the Office of Student Financial Aid.

Help Completing the FAFSA: Help completing the FAFSA is provided online throughout the application process. Help is also available by telephone from the Federal Student Aid Information Center: 1-800-4-FED-AID (1-800-433-3243) during regular business hours (Eastern Time), Monday through Friday.

Application Deadlines

Application Priority Date: The application priority date for financial aid consideration at WSU is the day by which the FAFSA should be submitted to facilitate determination of student eligibility for financial aid before the beginning of the fall semester. The priority date is not a deadline. See our website (https://wayne.edu/financial-aid/resources/dates/) for current information.

The 2022-23 aid year includes the fall 2022, winter 2023 and spring/summer 2023 semesters.

- You can file the 2022-23 FAFSA starting, October 1, 2021 through June 30, 2023.
- State of Michigan 2022-23 FAFSA deadline: March 1, 2022
- File by December 1, 2021 to be considered for maximum aid.
- WSU 2022-23 FAFSA priority deadline: March 1, 2022

Academic Calendar: At WSU, the spring/summer semester is the third term of the school year. For example: The spring/summer semester 2022 is part of the 2021-22 school year; the spring/summer semester 2023 is part of the 2022-23 school year.

Financial Need Determination

The Student Aid Report (SAR) lists the financial aid applicant’s answers to the questions on the FAFSA. Based on those answers, the SAR either states the student’s Expected Family Contribution (EFC) or instructs the student to take additional action which will allow an EFC to be determined. The EFC is a measure of the student’s financial strength and is used in determining financial need. The SAR also indicates whether the financial aid application has been selected for the verification process.

How Financial Need Is Determined: To determine financial need, OSFA subtracts the student’s expected family contribution (EFC) from the average cost of attendance (COA) for their program at Wayne State University. COA minus EFC equals financial need.

Verification: The process by which an educational institution confirms the accuracy of the data reported on an individual student’s FAFSA is called verification. The federal processor selects the FAFSA applications for which the data submitted must be verified. A student whose application is selected for verification must provide documentation to confirm the information on the FAFSA.

Note: If an application is selected for verification, the student must complete the verification process before eligibility for financial aid can be confirmed, and before financial aid can be paid.

The Cost of Attendance (COA): The cost of attendance (COA), which is also called a budget, components include: tuition, fees, books and supplies, housing allowance (based on the living arrangements reported on the FAFSA) and miscellaneous expenses. If a loan is awarded, loan fees will be an included component. All students are initially assigned estimated tuition costs and estimated costs for books and supplies based on full-time enrollment status for their academic programs. Financial aid awards are offered based on the estimated budgets. At the time of disbursement, each student’s financial aid award is adjusted based on current enrollment status (full-time, three-quarter time, or half-time).

The COA may be adjusted to include dependent care directly related to attendance at WSU; costs related to a disability; computer purchase for educational purposes; costs to obtain a first professional license; and an allowance for reasonable costs directly related to one’s program of study.

Michigan Resident and Out-of-State Resident Cost of Attendance (http://wayne.edu/financial-aid/resources/cost-of-attendance/): Please access our website for detailed information concerning how student budgets are assigned and cost of attendance component amounts.

Current Tuition and Fees (http://reg.wayne.edu/students/tuition.php): Tuition and fees are subject to change by the WSU Board of Governors without notice.

Special Circumstances (https://wayne.edu/financial-aid/forms/appeal/): The Office of Student Financial Aid recognizes that students may have extenuating financial circumstances that the standard need analysis form (FAFSA) does not consider. Applicants may request a review of extenuating circumstances that they believe affect their financial aid eligibility by submitting a Special Circumstances Appeal Form.

Eligibility and Conditions of Financial Aid

Students must be enrolled in an eligible degree- or certificate-granting program to receive financial aid funds. Enrollment must be at least half-time to be considered eligible for most types of aid.

Non-degree programs have aid limitations and not all programs are eligible for financial aid. OSFA can provide more information about non-degree programs, including a list of specific certificate programs that are ineligible for financial aid.

Prerequisite coursework aid eligibility is limited. Determination of aid eligibility requires submission of the Prerequisite Coursework Aid Request Form, which is available on our website.

Repeat Coursework

Federal financial aid will pay for only one repeat registration in a course for which the student has previously earned credit with a passing grade. That is, students are only eligible to receive financial aid the first time the course is repeated.

Wayne State University Graduate Bulletin 2022-2023 - DRAFT COPY 33
Calculating "Earned" versus "Unearned" Financial Aid

OSFA must follow federal regulations in determining the amount of "earned" versus "unearned" federal financial aid disbursed to a student who then leaves school without completing the semester. The refund percentage is determined by the student’s effective date of withdrawal from all classes, which is the last recorded date of attendance.

A student who completes 60% or less of a semester will be considered to have "earned" the same percentage of financial aid as the percentage of the semester completed. The percentage will be calculated by dividing the completed number of days by the total number of days in the semester. The percentage of "unearned" aid will correspond to the percentage of the semester not completed. A student who completes more than 60% of a semester will be considered to have earned 100% of the financial aid disbursed for that semester and no return of federal financial aid will be calculated.

A student has not "earned" all of the financial aid received may be required to repay those funds. Detailed information is provided in the WSU Withdrawals and Return of Title IV Policy (https://wayne.edu/financial-aid/receiving/sap/cancellation/).

Enrollment Requirements for Federal Direct Loans

To receive a Federal loan disbursement, a student’s enrollment status must be at least half-time.

Satisfactory Academic Progress (SAP)

Federal financial aid regulations require OSFA to apply reasonable standards for measuring whether a student is making progress toward a degree or certificate. The standards, which are called satisfactory academic progress (SAP), must be met for a student to remain eligible to receive financial aid. Academic progress is measured each semester.

WSU Satisfactory Academic Progress Standards are comprised of three components:

1. The cumulative grade point average of at least 3.0 is required at the graduate level.
2. The pace of progress toward the degree or certificate must be at least 67%, which is determined by dividing the cumulative number of credits completed by the cumulative number of credits attempted.
3. The maximum time frame for completing the degree or certificate, is 150% of the average published length in credits of the program.

Note: Full-time or part-time enrollment is not a factor in determining the pace of progress or the time frame since the sole unit of measurement is credits.

The WSU Satisfactory Academic Progress Policy is available online. (https://wayne.edu/financial-aid/receiving/sap/) Check your SAP status in Academica (https://academica.aws.wayne.edu/).

Consequences of Withdrawing from Courses

A student’s satisfactory academic progress (https://wayne.edu/financial-aid/receiving/sap/) may be affected if they withdraw from courses (some or all) during a semester. A student who does not comply with SAP standards may be denied financial aid for subsequent semesters. The university has specific instructions for SAP appeals (https://wayne.edu/financial-aid/receiving/sap/sapappeal/).

A student who withdraws from all courses may be required to repay a portion of the financial aid received. Please see the section above titled Calculating "Earned" versus "Unearned" Financial Aid.

If a student’s withdrawal from one or more courses results in less-than-half-time enrollment status, the student will not be eligible for new federal loan funds. At the end of the grace period on the loans received, repayment will begin. Detailed information about grace periods and loan repayment is available on the Federal Student Aid website (http://studentaid.ed.gov/repay-loans/understand/). A student should contact their loan servicer (https://studentaid.ed.gov/sa/repay-loans/understand/servicers/) to make payment arrangements or request a loan deferment or forbearance.

The amount in federal student loans that a student can receive has annual and aggregate limits. Students are strongly encouraged to consider these limits in developing their education plan.

Financial Aid Disbursement

Financial Aid Disbursement: Financial aid (except work-study) is paid in two disbursements if the award is for the academic year (fall and winter semesters). Half of the award is paid in the fall semester and half is paid in the winter semester.

Financial aid recipients are expected to attend courses throughout the semester. Aid will not disburse after courses begin unless the instructor confirms participation in courses. If participation in class is not confirmed, the amount of financial aid may be affected.

Financial aid funds are applied directly to institutional charges (tuition, fees, room and board). Any excess funds will be available within 14 days of the date the credit balance occurs or within 14 days of the first day of classes — whichever is later.

Federal Work-Study Payments: Work-study earnings are paid biweekly in the form of a paycheck. The department in which the student is employed submits a record of the hours worked to the Payroll Office, and the Payroll Office authorizes payment.

Note: Students cannot earn more than the amount of their work-study award. Spring/summer semester is separate from the fall and winter semesters. Unused funds from a fall and/or winter work-study award cannot be earned in the spring/summer semester.

Enrollment Requirements for Federal Direct Loans: A student must be enrolled at least half-time to receive a federal loan disbursement.
Admission: Graduate School

OFFICE OF GRADUATE ADMISSIONS
5057 Woodward, Suite 6305
Detroit MI 48202
Telephone: 313-577-4723; Fax: 313-577-0131
http://wayne.edu/admissions/graduate (http://wayne.edu/admissions/graduate/)

Admission: Graduate

To be considered for graduate admission, an applicant must hold or be completing an earned baccalaureate degree or its equivalent from a college or university of recognized standing and have adequate preparation with discernible ability to pursue graduate studies in the major field elected. These criteria are subject to standards set by the individual Colleges and Schools, which reserve the right to revise or amend their entrance requirements beyond the minimal requirements of the University. Note: Proof of the earned bachelor’s degree must be submitted before regular admission will be granted.

Before any student can be considered for admission to graduate study, the following must be submitted to the Office of Graduate Admissions: A completed online Application for Graduate Admission and an official transcript from any college or university at which a bachelor’s degree was earned. A transcript is considered official only if it is sent directly from the institution where the course work was completed and bears an official seal. International applicants are expected to submit additional documentation for regular admission. Note: The applicant is also responsible for arranging to take any examinations that may be specified by the Office of Graduate Admissions, the College, or the Department in which the student intends matriculation.

Some academic programs may require an additional departmental application for admission. Students are advised to contact the department to which they are applying and request full particulars on admission procedures.

In most departments (see the departmental sections of this bulletin for variants), a regular admission may be authorized for the domestic master’s degree applicant upon the department’s recommendation, if the applicant’s grade point average is 2.75 (‘C’=2.00) or above for the upper division (approximately the last sixty semester credits) of his/her undergraduate course work and if he/she holds a bachelor’s degree from a regionally accredited institution.

All baccalaureates of unaccredited institutions must present a 3.00 (‘B’) or better upper-division grade point average to be considered for graduate admission. Course work completed after the baccalaureate which is presented as the qualifying basis for graduate admission cannot be applied toward a graduate degree at Wayne State University.

Doctoral applicants must present higher entrance qualifications than those required of master’s degree applicants. A doctoral applicant is required to have an undergraduate grade point average of 3.0 (‘B’=3) or above for the upper division of the undergraduate, bachelor’s degree course work and must have completed an undergraduate major or substantial specialized work in his/her proposed doctoral major field.

Certain departments require the completion of a master’s degree with superior scholarship before considering acceptance of a student as a doctoral applicant. Applicants with less than a 3.0 grade point average in undergraduate course work may be eligible for admission to doctoral study if they have subsequently achieved a grade point average of 3.0 or better in substantial graduate course work in the proposed doctoral field.

The individual colleges reserve the right to refuse a non-resident admission if such admission prevents registration of a qualified Michigan resident. This ruling may not be invoked to secure admission to a Michigan resident if his/her grade point average entitles him/her to qualified status only.

Admission: Qualified Graduate

In most Departments, qualified admission to a master’s or certificate program may be authorized if an applicant’s grade point average is between 2.50 and 2.74 or if his/her degree is from a non-accredited institution, provided the major Department and the Graduate Officer of the appropriate School or College have reviewed the applicant’s academic experience, extra-scholastic qualifications and reasons for pursuing graduate study and have recommended his/her admission to the Graduate School.

Upon recommendation of the Department and the Graduate Officer of the appropriate College or School, qualified status may be granted to an applicant whose grade point average is below 2.5, if, since the time his/her baccalaureate degree was conferred, he/she has shown substantial evidence of academic or extra-scholastic qualifications of such merit as to warrant special consideration.

Applications from students who have completed substantial course work at, and/or graduated from, institutions which were not accredited by one of the six regional U. S. accrediting institutions (MSCHE, NEASC, HLC, NWCCU, SACS, orWSCUC) at the time studies were undertaken, will have a special review. If requested, the applicant will be required to furnish documentation of the nature and level of the credit obtained, the bases on which the credit was awarded, institutional operating practices, library holdings, physical facilities, faculty qualifications, and any other matters that may be relevant to an evaluation of credit. The director of admissions is authorized to deny admission to any applicant whose previous education does not conform to Graduate School standards. The Office of Graduate Admission may also make recommendations concerning the appropriateness for transfer of previously completed graduate course work.

All graduate admission procedures and regulations are subject to revision by the University Graduate Council at any time.

Graduate Application Dates

The Office of Graduate Admission will make every effort to process applications in time for the semester of the student’s choice. However, only complete applications received by the last recommended dates shown below are ensured academic review before the semester starts. Unless an application and all supporting materials are received by the date indicated, there may not be adequate time for the desired program to review the application and make the admission decision.

Fall Term — Classes begin Late August: apply by June 1
Winter Term — Classes begin Early January: apply by October 1
Spring Term — Classes begin Early May: apply by February 1

For international students, the application form and all transcripts and documents must be on file in the Office of Graduate Admission at least four months prior to the start of the term in which the applicant plans to begin graduate studies.

Several Colleges and Departments have earlier deadlines. Doctoral programs also have earlier application deadlines. Students should consult the School/College and Department sections of this bulletin, the program’s website, or the Office of Graduate Admissions for complete information.
Change of Graduate Status

A Change of Graduate Status is a type of admission only for those students who have previously been admitted to and registered as regular graduate students at WSU. For such students, a Change of Graduate Status is used to request:

1. to change from one graduate program or level to another graduate program or level; or
2. to add a second graduate program to the one in which the student is already enrolled.

A department’s normal admission criteria apply to Change of Graduate Status applicants. The application form (http://gradschool.wayne.edu/current/forms.php) is downloadable from the Graduate School.

Students should submit the form and transcripts, if needed, to the Graduate Office of the School/College of the new program. Other admission documents required by the department should be submitted directly to the department. The School/College Graduate Office prepares and sends the application and documents to the department for decision. The Graduate Office notifies the student of the admission decision, and, if admission was approved, notifies the Records Office of the change to be made to the student’s record. The department’s regular admission deadlines apply. No fees are charged for a Change of Status application.

The Change of Graduate Status application should NOT be used by the following students: those who have never been admitted through the Office of Graduate Admissions, those who were admitted but did not register, those who were admitted on a Permit to Register or as Guest students, and those who have been registered in graduate classes only as Non-Matriculated students through the College of Liberal Arts and Sciences.

Graduate Non-Degree Admission

An applicant who wishes to take graduate courses but does not wish to be in a degree program may request admission on a non-degree basis. The eligible applicant will be admitted to a particular College but not to an individual major program. In most instances, a non-degree student may, with the Department’s approval, register for any courses for which he/she has the necessary preparation.

The applicant for a non-degree graduate classification is cautioned that only one semester of full-time graduate study, or part-time registrations not to exceed nine credits, is normally permitted in this classification. Beyond these limits, registration as a non-degree student requires the approval of the Graduate Officer of the student’s College. Not more than nine credits, subject to the approval of the Graduate Officer, may be applied at a later date toward the residency and credit requirements for either the master’s or Ph.D. degree. For the Ed.D. degree, credit earned beyond the nine-credit limitation will be reviewed by the appropriate Division and the Education Graduate Officer for possible application toward the degree.

If a student in non-degree status decides to seek admission to a graduate degree program, he/she should apply to the appropriate College Graduate Office for a Change of Status before completing nine credits. There is no assurance that credits earned while holding a non-degree classification will be acceptable in a degree program, or that prerequisites may not have to be specified if the student later becomes a degree applicant. Also, financial aid is not available to students in Non-Degree status.

Graduate Guest Admission

Graduate students actively pursuing degrees and who are in good standing at other accredited colleges and universities may be admitted to elect a limited number of credits at Wayne State University. Interested students may obtain a Graduate Guest Application (http://wayne.edu/admissions/graduate/applying/app-instructions/) from the Office of Graduate Admissions. This must be signed by their home institution before it can be accepted for consideration. A guest admission is valid for only one semester and must be renewed with each subsequent registration. A maximum of twelve semester credits may be earned as a Graduate Guest Student. Admission as a Graduate Guest student does not constitute permission to register as a degree applicant.

Senior Rule

In their last undergraduate semester, Wayne State students with a 3.0 (or above) upper division grade point average have the option of taking a limited number of graduate credits. Graduate credit is awarded only for those courses taken in excess of baccalaureate degree requirements. Undergraduate and graduate courses combined may not exceed sixteen credits for the final semester of baccalaureate degree course work. A Senior Rule student must register for at least one credit which is required for the undergraduate degree in order to be eligible for this status. Students who have completed all required registrations for the baccalaureate may not obtain Senior Rule status. Completion of the Application for Graduate Admission is required, and students are advised to consult their advisors and the Office of Graduate Admissions. Application deadlines for Senior Rule admission are the same as for regular graduate admission. Students who qualify and are recommended by the Department or College will be admitted for one semester. Graduate admission will be regularized upon evidence that the student has completed all requirements for the bachelor’s degree; it is the student’s responsibility to provide this transcript.

As a courtesy, the University permits a student to pay undergraduate fees for the graduate courses elected in a Senior Rule status. It is recommended that students elect only courses numbered 5000–6999 in their Senior Rule semester. Senior Rule may not be used in conjunction with AGRADE.

AGRADE: Accelerated Graduate Enrollment

Several Colleges have established an accelerated combined undergraduate and graduate program (AGRADE) in which highly qualified seniors in the college may enroll simultaneously in some undergraduate and graduate programs of the College. A maximum of sixteen credits may be applied towards both undergraduate and graduate degrees in a student’s major field if that program is an AGRADE participant. Those who elect the AGRADE program may expect to complete the Bachelor’s and Master’s degrees in five years of full-time study. AGRADE may not be used in conjunction with Senior Rule.

AGRADE Credits: Students may elect a minimum of three and a maximum of sixteen AGRADE credits. These will be used to complete the baccalaureate degree as well as to serve as the beginning of graduate study. Upon formal admission to a master’s program, AGRADE credits are transferred as if they were graduate credits transferred from a graduate program at another university. The remaining graduate credits required for the master’s degree will be earned in the conventional manner following formal admission to the graduate program.

Eligibility: AGRADE applicants must have an outstanding overall g.p.a. and have performed at a superior level in their major, as determined by the major department. The earliest date by which a student may apply for the AGRADE program is during the semester in which he/she completes ninety credits toward the undergraduate degree.

Application: A student seeking AGRADE status should present to the Graduate Admissions Committee of his/her major department all of the materials which that department requires for normal admission (except...
the GRE; where required, the GRE scores should be forwarded at the normal point in the formal graduate admission process).

Admission and program requirements are described in the respective School and College sections of this bulletin, the Undergraduate Bulletin, and department advising offices.

Permit to Register Status
This is a one-term-only admission status which may be granted to applicants with incomplete applications for graduate admission, at the discretion of the academic department, and upon presentation of evidence of an earned baccalaureate degree with an acceptable grade point average and the application fee. Registration beyond the initial semester requires the submission of a regular graduate admission application, official transcripts and other required documentation as determined by the university and department. Admission as a graduate Permit-to-Register student does not obligate Wayne State University to accept the applicant in the future for a graduate degree, nor is there any assurance that credit earned in this status will be accepted toward a graduate degree.

This option is not available in all University Schools and Colleges. Applicants are encouraged to discuss admission options with the staff of the Office of Graduate Admissions. In addition, financial aid is not available to students in Permit to Register status.

Michigan Intercollegiate Graduate Studies (MIGS) Program
The Michigan Intercollegiate Graduate Studies (MIGS) Program enables graduate students of Michigan public institutions to take advantage of educational opportunities at other Michigan public institutions offering graduate degrees. Any graduate student in good standing in a master’s, specialist, or doctoral program at a member institution is eligible to participate with approval of the appropriate academic unit. Students on a MIGS enrollment pay tuition and other fees at the host institution. All credits earned under a MIGS enrollment are accepted by a student’s home institution as if offered by that institution. This type of enrollment is limited to one term for master’s or specialist degree students, or two terms for doctoral degree students. Students interested in this program should contact the Office of Graduate Admissions (https://wayne.edu/admissions/graduate/application-types/) for further information.

University of Windsor – WSU Exchange Program Agreement
Wayne State University and the University of Windsor have entered into an exchange agreement whereby students from each institution may enroll in selected courses at the other institution. Courses available are limited to those not offered at the student’s home institution. Limitations also apply to the number of courses and credits a student may take under this agreement. Wayne State University and the University of Windsor students who wish to participate in the program must be in good standing at their home institution and must have prior approval of the appropriate academic unit that the course(s) will be accepted as part of the student’s course of study. Students who participate in the Wayne State University/University of Windsor program pay tuition and fees at the home institution and receive credit for the course(s) only at the home institution. Students should consult the Director of the Office of Study Abroad for further information.

Post-Bachelor Admission
The Post-Bachelor status is granted to college/university graduates who wish to take Wayne State University courses through the 6000 level for undergraduate credit only. The status serves two groups of students:

1. Those who wish to pursue vocational or avocational interests without intending to use Wayne State University credit to earn another degree at Wayne State University;
2. Those who seek admission to a graduate program but need to raise their undergraduate grade point average and/or fulfill specific undergraduate course requirements for graduate admission consideration.

The following special rules apply to Post-Bachelor Admission:

1. Under no circumstances will credit earned in this status apply toward a graduate degree program.
2. The applicant must present evidence of a degree earned from an accredited institution (official transcript or diploma).
3. Post-Bachelor status students are not eligible for financial aid from Wayne State University, except in certain circumstances depending on the program; students should consult the Office of Student Financial Aid (http://www.finaid.wayne.edu) for a list of eligible programs.
4. Applications for Post-Bachelor status from students new to Wayne State University should be made to the Office of Undergraduate Admissions, Welcome Center, 42 W. Warren, Wayne State University.
5. An applicant who earned an undergraduate degree from Wayne State University, or who was previously admitted and registered in a Wayne State graduate program, should contact the Records Office to be re-admitted to the University as a Post-Bachelor student. Post-Bachelor applicants in the Colleges of Education and Nursing must obtain authorization directly from the College.

International Graduate Students
To be considered for graduate admission, international applicants must have completed an appropriate university-level program comparable in subject matter and credits to a program for which a bachelor’s degree is awarded at Wayne State University.

The fact that a degree in another country may have a similar name to a degree offered in the United States does not mean the two degrees require similar lengths and content of study or that they should be accepted as equivalents. All graduate applicants must:

1. present an excellent scholastic record;
2. have sufficient financial resources for minimum tuition, supplies and living expenses; and
3. have a sufficient proficiency in English (see the section on English Proficiency Requirement — International Students, below).

FINANCIAL AID: University-sponsored financial assistance for international students is extremely limited and unconfirmed awards should not be included in financial projections.

English Proficiency Requirements
Graduate applicants who graduated from colleges/universities in other countries must demonstrate proficiency in English. To fulfill this requirement an applicant must satisfy one of the following criteria:

1. Complete baccalaureate degree requirements at an accredited U.S. institution or in a country where English is the native language.
2. Present an acceptable score on the Michigan English Language Assessment Battery (MELAB).
3. Present an acceptable score on the Test of English as a Foreign Language (TOEFL) or equivalent tests such as the IELTS or PTE. Some units may elect to grant qualified graduate admission to academically-talented International Students whose TOEFL scores fall slightly below the University minimum score. Interested students should contact the chairperson or director of their prospective program, to determine whether the program offers such qualified admission. For further information on the English Proficiency policy, please consult the Office of Graduate Admissions.

Faculty Admission

Tenured Wayne State University faculty members holding the rank of Assistant Professor or above may be admitted to Wayne State graduate degree programs outside the faculty member’s school/college, under certain specified conditions. Untenured tenure-track faculty members are not eligible to pursue a graduate or professional degree at Wayne State while in University employment. Faculty members who are not tenured and not on the tenure track may enroll in degree programs outside their own unit with the approval of the dean of their college. For further information, contact the Dean of the Graduate School.

Special Status Students

Visiting Doctoral Guest

The Graduate School may issue a Visiting Doctoral Guest certificate to persons with an earned doctorate who come to Wayne State for scholarly study under the sponsorship of a department. Such Guests may obtain University library privileges and attend classes upon invitation of the department. No official record of attendance is kept on such Guests. For further information, contact the Graduate School.

Visiting Scholar

The Graduate School may issue a Visiting Scholar certificate to persons who have an advanced degree, such as an M.D., or are earning a doctoral degree, and who have come to Wayne State for scholarly study under the sponsorship of a department. Scholars may obtain University library privileges and attend classes upon invitation of the department. No official record of attendance is kept on such Scholars. For further information, contact the Graduate School.

Academic Regulations

Graduate Status

Continuance in graduate status is contingent upon the student keeping informed of and abiding by all guidelines, rules, regulations and requirements and complying with all official procedures of the university, the Graduate School, the individual college or school, and the department or program. The student is responsible for fulfilling all course and degree requirements in proper sequence with satisfactory scholarship. In case of doubt regarding any matter affecting their standing as a graduate student, students should consult with their advisor. The primary responsibility of keeping informed of policy and procedures rests with the student. Regulations contained herein should not be construed as exhaustive.

Graduate Courses

Graduate work is classified either as course work, in which students meet as an assembled group, or as research. Generally, courses numbered 5000 and above may be considered graduate level; in some departments, certain 5000 and 6000-level courses are not permitted for graduate credit and are so designated. Courses numbered 7000 and above are open only to graduate students.

Graduate Course Numbering Systems

— For the College of Education
5000-6999 — Undergraduate or graduate credit.
7000-8999 — Open to graduate students exclusively.
9000-9999 — Open to doctoral students exclusively.

— For the Faculty of Pharmacy
6000-6999 — Undergraduate/Graduate Courses.
7000-8999 — Graduate Courses.
9000-9999 — Ph.D. Courses.

— For all other Schools and Colleges
5000-6999 — Junior- and senior-level courses; also may be taken for graduate credit by students admitted to a graduate program, except where expressly prohibited.
7000-8999 — Open to graduate/professional students exclusively.
9000-9999 — Open to doctoral students exclusively.

Mike Ilitch School of Business: All courses numbered 6000-6100 and 7000 or higher are open only to students formally admitted to a Wayne State graduate program, or to qualified guest students. Enrollment in these courses must be approved by a graduate advisor or be consistent with a student’s Plan of Work. Students in an undergraduate, post-bachelor, or non-matriculated status are not eligible.

Law School: In addition to the above approvals, graduate students must obtain the written permission of the Law School Dean to elect Law School courses or directed studies.

University Grading System

Final grades are available on Academica (http://academica.wayne.edu/). Grades are not mailed to students. Final grades are recorded under the following system.

Graduate Grades

The graduate grading system is intended to reflect higher standards of critical and creative scholarship than those applied at the undergraduate level. To receive a graduate grade in courses open to both undergraduate and graduate students, the graduate student is expected to do work of
superior quality and is required to do any additional work specified by the instructor.

To be awarded a graduate degree, a student must have achieved at least a ‘B’ (3.0) overall grade point average. Grades of ‘B-minus’ and below are unsatisfactory for graduate level work. A limited number of ‘B-minus’, ‘C-plus’, or ‘C’, though unsatisfactory, may be applied toward a graduate degree provided they are offset by a sufficient number of higher grades to maintain a grade point average of 3.0. Grades below ‘B’ can constitute reason for dismissal from a program at the department or program’s discretion. Students should consult with their departments and advisors regarding unsatisfactory grades and their impact on good academic standing. All graduate teaching assistants and graduate research assistants must maintain a minimum grade point average of 3.0 in order to continue their assistantship appointments. Every effort is made to assist students whose work suffers as a result of a condition beyond their control, or interruption of study for military service.

Law School and School of Medicine: This grading system does not apply to Law School students in the J.D. program or students in the four-year M.D. program of the School of Medicine. Students enrolled in those programs should see the appropriate sections of this bulletin and should consult with appropriate Program Directors for more information.

Final grades for graduate courses are recorded under the following system.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
<th>Grade Point Average</th>
</tr>

</tr>
<tr>
<td>M</td>
<td>Marginal Pass in designated courses such as field work, practicums and internships (not considered in calculation of grade point average)</td>
<td></td>
</tr>
</tbody>
</table>

S and U Satisfactory and Unsatisfactory performance in non-degree courses and in certain designated courses such as field work, practicums and internships. The grade of ‘S’ is given for all dissertation credits upon final acceptance of the dissertation in partial fulfillment of the requirements for the Ph.D. and Ed.D. degrees. ‘S’ and ‘U’ grades are not considered in the calculation of the grade point average but courses completed with an ‘S’ grade may count toward a degree.

The mark of I (Incomplete) is given to a student when he/she has not completed all of the course work as planned for the term and when there is, in the judgment of the instructor, a reasonable probability that the student will complete the course successfully without again attending regular class sessions. The student should be passing at the time the grade of I is given. A written contract specifying the work to be completed should be signed by the student and instructor. Responsibility for completing all course work rests with the student.

The mark of I will be changed to a letter grade when the student completes the course work as arranged with the instructor or, if the instructor has left the University, with the Chairperson of the department or other instructional unit. Work must be completed within one calendar year. There are NO extensions.

The mark of I will not be awarded if, in the instructor’s judgment, it is necessary for the student to attend subsequent sessions of the class. If regular attendance is necessary to complete coursework, the student must register for the class for the semester in which attendance is planned. The student will be assessed tuition and applicable fees for the second registration. If the student decides to register for the course, subsequent to the assignment of I, then the mark of I for the original election will be changed to a Withdrawal/Passing (WP), and the student will be responsible for tuition and applicable fees for the second registration. Students are responsible for notifying their department and the department offering the course that they have reregistered for the course so that the I is not changed to an F.

Any unchanged mark of I will, within one calendar year from the time it was received, be changed to a grade of F or failure. This will not be changed after the I is replaced.

The mark of WF (Official Withdrawal Failing) is given when the student withdraws from the course in accordance with University policy and the student had earned a failing grade as of the date the withdrawal is approved.

The mark of WN (Official Withdrawal No Basis for Letter Grade) is given to students when there is no basis for a letter grade.
The mark of WP (Official Withdrawal Passing) is given when the student drops the course in accordance with University policy and the student had earned a passing grade as of the date the withdrawal is approved.

The mark of Y (Deferred) is given when the student is up-to-date in the work of a course planned to continue beyond the semester (i.e., essay, thesis, dissertation and certain courses taken in sequence).

The mark of Z (Auditor) is given when the student has formally registered for the course for audit. The student's Academic Dean or his/her designee must provide written audit authorization to the student at the time of registration.

Credit by Examination
A student wishing to obtain credit toward an advanced degree for knowledge essential to his/her program of study, acquired by means precluding formal transfer to Wayne State University, may petition for an advanced credit examination in a course or courses covering the relevant area of study. The petition requesting such advanced credit shall state the basis for the request in terms of the student's competence at the graduate level in the particular academic area. The established examination fee must be paid before the examination is taken. All grades will be recorded on the student's transcript. Such grades will not be used in computing the grade point average. The fulfillment of any requirement through credit by examination does not relieve the student of the residence requirement for degree.

Change of Grades and Marks
Once recorded in the Office of the Registrar, grades/marks will be changed only if the instructor posts the grade change in the online grade/mark change system in Academica. Most changes must be posted within one calendar year. (Deferred (Y) grades are the exception.) Failure grades that are posted as a result of a student not completing an incomplete course may not be changed. After a degree has been awarded, the grades associated with that degree may not be changed. Other change of grades or marks older than a year must be approved by the department chair and the Associate Dean of the school or college that offered the course.

Grade Point Average
The grade point average (g.p.a.) is the numerical index of the student's scholastic average across all transcript credit earned at a given student level (i.e. undergraduate or graduate). Points are assigned to each letter grade (see University Grading System, above) for each hour of credit. To compute your grade point average, multiply the grade points assigned to each course grade by the number of credits for each course; add the results and divide by the total number of credits.

For example, a grade of A in a class carrying 3 credits would be assigned 12 grade points (3 x 4), and a grade of C in a class carrying 4 credits would be assigned 8 grade points (4 x 2). In this example, the grade point average is: 20 (total grade points) divided by 7 (total credits attempted) = 2.85 g.p.a.

Credit for special examinations, transfer credit, and courses in which a mark of I, W, WF, WN, or WP or a grade of S, U, M, P and N, has been earned are excluded from grade point average computation.

Law School: This grade point system does not apply to Law School students.

Directed Study
Independent study may be authorized provided the area of interest is an integral part of the student's graduate program and is not covered by courses scheduled while completing one's course requirements.

Before Ph.D. students may register in directed study, they must complete the Ph.D. directed study petition form, Doctor of Philosophy Petition and Authorization for Directed Study, and obtain the written permission of his/her department's graduate director. The petition must contain information about the nature, scope, and significance of the course, and indicate the major requirements the student must fulfill. Master's students must provide the same information and obtain the written permission of their college/school Graduate Officer.

Definition of Credits
A credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that reasonably approximates not less than:

1. one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester hour of credit, or the equivalent amount of work over a different amount of time; or
2. at least an equivalent amount of work for other activities, including laboratory work, internships, practicums, studio work, and other academic work leading to the award of credit hours.

Major and Minor Graduate Credits
Major Credits: Credits earned in the student's major field are designated as major credits. The dissertation, thesis, or essay must be in the major field.

Minor Credits: Credits earned in departments other than the major are classified as minor or cognate credits. Election of minor credit is encouraged to enable the student to broaden his/her program. In doctoral programs, minor courses should be related to the major and six or more graduate credits approved by the unit graduate director will constitute a minor.

Normal Program Load
A full-time graduate student is one who is enrolled for eight or more credits during academic-year semesters; a graduate student is considered full-time during the spring/summer term if she/he enrolls for at least two credits. The definition of normal course load will vary depending upon the requirements of each program.

Maximum Credit Load
A student with a strong academic record who is devoting full-time to graduate study may register for a maximum of sixteen credits per semester. Graduate Assistants are required to register for at least six credits each semester. The University considers a program of eight graduate credits per academic-year semester and two credits per spring/summer semester to be full-time study. Note that students are not required to enroll over spring/summer to continue their full-time status. For students who have advanced to Ph.D. candidacy, 7.5 credits is considered as full-time study.

Auditing Courses
To audit a course, a student must indicate that they wish to audit the course rather than receive academic credit, at the time of registration. Registration to audit a course is subject to the following regulations:

1. Students must pay the tuition assessment for the course, which is the same as if it were taken for academic credit;
2. A student is not permitted to take quizzes and examinations in audited courses;
3. A student may not normally change from audit status after registering for the course. In some cases, exceptions may be
permitted during the term with the written recommendation of the instructor and the written approval of the Dean of the college/school in which the student is enrolled. The instructor’s recommendation and Dean’s approval must be included with the student’s Drop/Add Form indicating the desired change.

The Graduate School does not encourage students to audit graduate-level courses.

Retaking Courses

Graduate Students: A graduate program may, if it wishes, allow a student to retake a graduate course in which the student earned a grade of ‘B-’ or lower. This prerogative is exercised by the program through the use of the override provisions in the University’s registration system which will prevent students from independently retaking courses. The number of courses and the number times a course may be retaken is determined by the program. The original grade for the course will remain on the student’s transcript, but only the final grade received in retaking of the course will be used in computation of the student’s grade point average. Students will not receive University financial aid for courses that are retaken. It is the student’s responsibility to be apprised of his/her program’s repeat policy.

Mike Ilitch School of Business: No course in which a student has received a passing grade or mark may be retaken without the prior written approval of the Director of Student Services of the Mike Ilitch School of Business.

College of Engineering: No course may be retaken without the prior written approval of the respective department’s Graduate Program Chairperson and the Associate Dean of Engineering for Graduate Studies. Students may not retake any course in which a grade of ‘A’ or ‘B’ was received.

Dual Enrollment

Graduate Election of an Undergraduate Course: Graduate students may register for undergraduate courses, however these courses will be recorded on the undergraduate transcript. All courses elected under this status will be assessed at the graduate rate. These courses cannot be used as graduate credit nor to meet requirements for any graduate degree.

Undergraduate Election of a Graduate Course: Highly qualified undergraduate students may, under special circumstances, take a 7000-level course for undergraduate credit only (these credits may not be transferred in to a graduate program at a later date). A written petition initiated by the student’s advisor must be approved by the graduate officer of the School or College, the professor teaching the course, and the Dean of the Graduate School. The petition, with all required signatures, must be turned in at the time of registration.

Accelerated Graduate Enrollment Program (AGRADE). AGRADe programs enable highly qualified seniors in the university to enroll simultaneously in undergraduate and graduate programs and to apply a maximum of 16 credits toward both the undergraduate and graduate degrees. They encourage such students to continue to graduate school at Wayne State by reducing the time to the master’s degree. To be eligible for AGRADe, students must achieve an undergraduate GPA of at least 3.3 and complete at least 90 credits of undergraduate degree requirements (up to 16 credits can count for both undergraduate and graduate degrees). The availability of the AGRADe program differs depending on programs and departments. AGRADe may not be used in conjunction with Senior Rule.

Senior Rule Graduate School Admission: In their last semester, undergraduate students with a 3.0 (or above) upper division grade point average who have completed all general education competencies (mathematics, basic composition, intermediate composition, oral communication, critical thinking, and computer literacy), have the option of taking a limited number of graduate credits. Graduate credit is awarded only for those courses taken in excess of baccalaureate degree requirements. Undergraduate and graduate courses combined may not exceed sixteen credits for the final semester of baccalaureate degree course work. A Senior Rule student must register for at least one credit which is required for the undergraduate degree in order to be eligible for this status. Students who have completed all required courses for the baccalaureate degree may not obtain Senior Rule status. Completion of the Application for Graduate Admission form is required, and students are advised to consult their advisors and the Office of Graduate Enrollment Services. Application deadlines for Senior Rule admission are the same as for regular graduate admission. Students who qualify and are recommended by the Department or College will be admitted for one semester. Graduate admission will be regularized upon evidence that the student has completed all requirements for the bachelor’s degree.

The University permits a student to pay undergraduate fees for the graduate courses elected in a Senior Rule status. It is recommended that students elect only courses numbered 5000-6999 in their Senior Rule semester. Senior Rule may not be used in conjunction with AGRADe.

Dual Registration at the University of Michigan

A student enrolled at either Wayne State University or the University of Michigan may elect a course or courses in the other institution if the course fits his/her program but is not available in his/her home institution. The student must have written approval of the department chairperson in his/her major area at the home college and the approval of his/her Dean. The election must also be approved by the department which offers the course. Students desiring to participate in Wayne State University - University of Michigan dual registration should obtain the necessary forms from the Office of the Registrar and pay the appropriate tuition at their home institution.

Transfer of Credits — Graduate

Transfer Credits for master’s degree

In work toward the master’s degree, credit beyond the twenty-four credits which must be earned in residence may be transferred from accredited graduate schools, provided such credit is ‘B’ or better and certified as graduate-level credit on an official transcript. Up to nine credits may be used from a non-degree program at WSU or another institution. Up to 8 graduate credits from a graduate degree program (at WSU or another institution) may transfer to a student’s WSU master’s degree. Those 8 in addition to a maximum of twenty-four earned in residency will be transferred toward the Ph.D. Departments and schools/colleges may further restrict the number of credits that may be transferred.

Transfer Credits for the Ph.D. Degree

The Graduate School allows a maximum of 32 credits to be transferred to the Ph.D. These 32 credits may include up to eight master’s degree transfer credits as noted above. Departments and schools/colleges may have additional requirements and restrictions. A student wishing to transfer graduate credit toward the Ph.D. degree must file a petition with the Graduate School via the Transfer of Credit form, approved by his/her advisor and departmental graduate director, requesting such transfers. The petition must be supported by a transcript showing a minimum grade of ‘B’ for the courses to be transferred; ‘B−’ and credit earned with ‘S’ and ‘P’ (satisfactory or pass) grades are not acceptable for transfer. When students would like to transfer credits from institutions without course codes, the closest WSU equivalents must be listed. When students would like to transfer credits from institutions without letter grades, a conversion chart must be provided and used. Transfer credits must be appropriate to the student’s degree program. Doctoral dissertation credits
will not be transferred. Courses accepted for transfer credit from outside or within Wayne State University cannot have provided credit toward a prior degree except when the master’s or another pre-doctoral certificate or degree is applied to the doctoral degree. Admission to Wayne State University based upon a previously earned master’s degree does not guarantee that those credits are applicable to a graduate degree at Wayne State University.

Up to thirty-two semester credits of ‘B’ or better graduate credit earned prior to the student’s admission as a doctoral applicant may be applied toward the Ph.D., whether the graduate credit was earned at Wayne State University or another institution, degree without regard to lapse of time. Credit earned with ‘B’ minus or ‘S’ or ‘P’ (satisfactory or pass) grades are not acceptable for transfer.

Extension Credits
Credits earned at other than Michigan institutions cannot be applied toward a graduate degree nor an education specialist certificate.

Short-Term and Travel-Study Courses for Graduate Credit

Short-Term, Workshop-Institute-Conference, and Travel-Study courses offered for graduate credit must be proposed, approved and authorized well in advance via the appropriate form (obtainable from the Graduate School). After an initial authorization, courses to be repeated with no substantial change may be petitioned and approved by memorandum on the basis of the original on file.

Short-Term Courses: These are created or adapted to meet for a time period of less than one-half an academic semester – i.e., less than 7-1/2 weeks. Such courses offered for graduate credit will provide for at least fifteen contact hours and the requisite proportion of outside preparation for each hour of credit. It is assumed that short-term courses will not differ from regular fifteen-week courses in terms of objectives, content, contact hours, or academic expectations, unless such a difference is reflected by a proportioning of graduate credits.

Workshop-Institute-Conference Courses (WIC): WIC courses are those specially formulated experiences which, because of their usually ‘applied’ nature, lend themselves to an exceptionally brief but intensive time span. They differ from short-term courses in their concentration, usually spanning from a single day to two or three weekends. Offered for graduate credit, these courses provide for a minimum of twenty-five contact hours and an appropriate proportion of additional work for each hour of credit. Since these experiences vary greatly in their purposes and the degree of participation expected of the student, they are offered for credit only infrequently and enroll only those students for whose academic programs they would be directly relevant. Graduate grading will be on an ‘S’ and ‘U’ basis only.

Travel-Study Courses are courses created or adapted to take special advantage of the opportunity to relate a particular course of study to the cultures, mores, or institutions studied. Such courses may involve either domestic or foreign travel. All are offered through the Educational Outreach Division. Graduate credit for travel-study courses will be graded on an ‘S’ and ‘U’ basis only.

CREDIT RESTRICTIONS: Graduate students may not register for any course or combination of courses in these categories that permit the accumulation of graduate credits at a rate greater than one credit hour per week. Registrations that exceed this rate will be canceled in advance if discovered and, in no case will the excess credit be counted toward the requirements for a Wayne State graduate degree.

Attendance Policy
Whenever attendance forms a basis for a portion or all of a course grade, students must be provided with explicit written information concerning that fact during the first week of classes. Such information shall be specific with regard to the penalty incurred for each absence and the means, if any, to compensate for the absence. It should be recognized that there may be certain situations where the student may not be permitted to make up the absence(s). This policy shall be applicable to all courses within the University, regardless of setting.

Religious Holidays
Because of the extraordinary variety of religious affiliations of the University student body and staff, the Academic Calendar makes no provisions for religious holidays. However, it is University policy to respect the faith and religious obligations of the individual. Students with classes or examinations that conflict with their religious observances are expected to notify their instructors well in advance so that mutually agreeable alternatives may be worked out.

Responsible Attendance and Performance
Students must show diligence and are normally expected to complete the courses they elect. Irresponsible attendance is wasteful of both student and University resources. Those students who consistently receive excessive marks of ‘I’ (incomplete), ‘WF’ (Withdrawal Failing), ‘WN’ (Withdrawal No Basis for Letter Grade), or ‘WP’ (Withdrawal Passing) may be refused the privilege of further registration by the dean or the dean's designee of their school or college.

Appeal Procedures
In matters where a College’s signed final decision is based upon the evaluation of a student’s academic performance, and when review procedures available to him/her within the College have been exhausted, the student may request the Associate Provost for Academic Programs to review that decision on the record. The academic appeal form must be submitted by the student himself/herself, within thirty calendar days of the postmark of the College’s final decision, which is to be sent to the address provided by the student in the College’s review procedures. The Associate Provost’s review of the College’s decision will proceed as soon as practicable after submission by the student of his/her wish to seek review. The form is located at https://provost.wayne.edu/academic-policy/ (https://provost.wayne.edu/academic-policy/).

Grade Appeal Procedure
Students should first seek to settle grade disputes informally with the instructor. The dean’s office of each school/college has established formal grade appeal procedures. Links to these procedures are also available on the Office of the Provost website: https://provost.wayne.edu/academic-policy/ (https://provost.wayne.edu/academic-policy/). In most instances, formal grade appeals must be filed within thirty (30) calendar days of the time the student has or should have received their final grade. Note that the college of record for Ph.D. students is the Graduate School. For all other students, the college of record is the college or school in which the degree program is housed.

Academic Appeal Procedure
Ph.D. program dismissals should begin in the program or department and should be made on the basis of evidence, existing policy, and must follow due process procedures. Graduate directors must communicate with students in writing about the dismissal including a description of the evidence used to justify the dismissal. Students begin the appeal process in writing, following their unit’s grade appeal procedures. If the student is dissatisfied with the outcome of the response, the student may then appeal in writing to the Dean of the Graduate School within thirty...
(30) calendar days of receiving the program's decision. A decision by the Dean of the Graduate School is final and ends the appeal process.

Academic Misbehavior Appeal Procedure

Where the Ph.D. program dismissal is based upon academic misbehavior as defined in Section 2.1 of the Student Code of Conduct, as opposed to poor academic performance, the procedures outlined in the Student Code of Conduct under Section 10.1 (a) and (b) must be followed. Students begin the appeal process for academic misbehavior in writing as defined in Section 10.1 (a), within ten (10) school days of oral or written notice of action taken by a faculty member under 10.1(a).

In addition to any action taken under Section 10.1(a), if a charge is also filed for academic misbehavior under Section 10.1(b), the procedures set forth in section 13.0 of the Student Code of Conduct are followed. The student may initiate an appeal under Section 18.1 of the Student Code of Conduct within twenty (20) school days of the school or college's final decision. The appeal is before the Provost, who is the President's designee for all purposes under the Student Code of Conduct. A decision by the Provost is a final decision and ends the appeal process.

Disputes Regarding Graduate Student Contractual Employment

Disputes concerning contractual employment including GTA/GSA assignments should be resolved in accordance with the Graduate Employees Organizing Committee (GEOC) contract in effect. Note that for non-Ph.D. students, academic appeals move from the department/program to the college or school in which the degree program is housed.

Student Ethics

Academic Records: The submission of fraudulent academic records for admission or transfer of credit by a student may be cause for the student’s dismissal.

Academic Work: Academic work submitted by a student for credit is assumed to be of his/her own creation, and if found not to be, will constitute cause for the student's dismissal.

Student Code of Conduct

High standards of student conduct play a major role in creating an environment of excellence and the Student Code of Conduct is used to maintain these standards. The code:

1. establishes the expectations that students are accountable for their behavior;
2. describes acceptable student conduct, both academic and non-academic;
3. describes disciplinary policies and procedures;
4. specifies the rights of students and other parties; and
5. specifies prohibited conduct and sanctions to be imposed if such conduct occurs.

Examples of prohibited conduct subject to the Student Code of Conduct include, but are not limited to, academic misbehavior, knowingly furnishing false information to the University, disorderly behavior, theft, damage of property, illegal drugs, weapons on campus, physical assault, unauthorized entry, violation of criminal law, etc.

The University Student Conduct Officer, housed in the Dean of Students Office, monitors the student disciplinary process and is responsible for coordinating matters involving student discipline; describing the disciplinary procedures; and informing students and other parties of their rights. Copies of the Student Code of Conduct can be found online (http://www.doso.wayne.edu/codeofconduct.pdf) at or in the Dean of Students Office, 351 Student Center.

Obligations to the Instructional Process

Education is a cooperative effort between teacher and student, and both parties must fulfill obligations if the integrity and efficacy of the instructional process are to be preserved. In some cases, however, students are unable to meet goals, and programs must make difficult decisions about whether the student should continue in the program. These guidelines are designed to help programs define satisfactory academic progress and respond when students are not advancing appropriately.

Program responsibilities

- Definition of what constitutes academic progress and lack of progress: the expected timeframe for achieving degree milestones, enrollment expectations and the number of stopped-out terms that will lead to probation and dismissal, and the acceptable number of unchanged Y grades
- Statement of any requirement for a minimum 3.0 grade in specific courses or restrictions on the number of grades below 3.0 that will be accepted, as well as a statement of how many graduate courses may be repeated
- Statement of research and scholarship, professional and other criteria students must meet to remain in good standing in the program

Faculty responsibilities

1. To contribute to and remain abreast of the latest developments in their fields;
2. To continually pursue teaching excellence;
3. To treat all students with respect and fairness without regard to ancestry, race, color, religion, political belief, national origin, gender, sexual orientation, age, marital status, disability, or veteran status;
4. To encourage differing viewpoints and demonstrate integrity in evaluating their merit;
5. To attend regularly and punctually, adhere to the scheduled class and final examination times, and arrange for notification of absence and coverage of classes;
6. To establish and maintain appropriate office hours;
7. To present, early in the semester, the following course information:
   a. course objectives and general outline;
   b. classroom procedures to be followed, expectations concerning class attendance, and proposed dates of major evaluations (including examinations, papers, and other projects);
   c. grading policy;
   d. where appropriate, a schedule of class-related activities, including class meetings and laboratory sessions;
   e. lists of texts and/or other materials needed for the course;
   f. late enrollment, withdrawal, and other special policies.
8. To provide and adhere, within reasonable limits, to the written syllabus of the course;
9. To know course matter thoroughly and prepare and present the material conscientiously;
10. To be informed of University services and recommend their use to students when advisable;
11. To follow these policies concerning written work and grades:
    a. grade and return written work promptly;
    b. submit final grades by the scheduled time.
c. retain written materials not returned within the semester (e.g.,
final examinations, major term papers) for one academic
semester in accordance with unit policy and allow students to
examine such materials;
12. To implement unit procedures for student evaluation of faculty
teaching, with attention to preserving student anonymity;
13. To behave appropriately in dealing with students so as to maintain a
scholarly atmosphere

Student responsibilities

1. To inform themselves of and to fulfill all requirements of the
University and those of the College and Department from which they
expect to receive their degree;
2. To fulfill conscientiously all assignments and requirements of their
courses;
3. To attend classes regularly and punctually;
4. To maintain a scholarly, courteous demeanor in class;
5. To uphold academic honesty in all activities;
6. Meeting degree milestones (e.g. candidacy, prospectus approval)
in a timely manner so that completion within the degree time limit
appears likely
7. For Ph.D. students, passing the Qualifying Exam within two attempts
8. Maintain at least a 3.0 grade point average
9. To notify the instructor as early as possible if prevented from keeping
an appointment or carrying out an assignment;
10. To discuss with the instructor any class-related problem and follow
established procedures in the resolution of these problems;
11. To adhere to the instructor’s and general University policies on
attendance, withdrawal, or other special procedures.

It is expected that faculty and students will fulfill their obligations to the
instructional process. If, however, a complaint does arise, the parties
should meet in an effort to resolve the matter. When such a discussion
fails to resolve the problem or is inappropriate given the circumstances,
the head of the academic unit should be contacted. If this contact fails
to satisfy the complaint, the College’s published procedures should be
followed. Although the University Ombudsperson is not a direct part of
the appeal process, students and faculty may consult the Ombudsperson
at any point during such proceedings.

In cases of lack of academic progress, programs may place a student
on probation for a specified time, during which time the student works to
achieve the goals set for the probationary period.

• Enrolled students: Programs should notify (in writing) students who
are not making adequate progress of the specific issues involved
and set up a timetable for the student to achieve them. This period
is considered probationary, and a copy of the notification letter is to
be placed in the student’s program file and the college file (master’s
students) or Graduate School file (Ph.D. students).
• Stopped-out students: The program should contact students who
stop enrolling to determine the student’s intent to continue in the
program. The program determines the number of allowable stop-out
terms and the number that constitutes grounds for dismissal from
the program.
• GPA: Students with GPAs below 3.0 are placed on probation
systemically and automatically have a hold placed on their
registration. Such students are required to confer with their advisor
to develop a plan and timetable for elevating their GPA. If the advisor
approves the plan, they should notify the school/college to release
the GPA registration hold so the student can register for the agreed
upon course(s).

If the student meets the expectations of the probationary period, the
program should notify the college (master’s students) or Graduate School
(Ph.D. students) that the student who was on probation has returned to
good standing. If the student does not meet expectations, the program
should notify the student of their dismissal in writing and send the
college (master’s students) or Graduate School (Ph.D. students) a copy of
the dismissal letter. These offices will place a hold on the student’s future
registration.

The student may appeal the dismissal. Such appeal will follow the grade
appeals procedures, as outlined in the Graduate Bulletin, ending in review
by the provost.

If the program readmits a dismissed student, the program should send
a copy of the readmission letter to the college (master’s students) or
Graduate School (Ph.D. students) so the registration hold can be removed
by these offices.

If a student withdraws from the program, the program should
acknowledge the withdrawal in writing and put the student’s withdrawal
letter and the program’s response letter in the student’s program file. It
should send copies to the college (master’s students) or the Graduate
School (Ph.D. students). These offices will place a hold on the student’s
future registration.

Guidelines for Assigning Graduate Students to Teach Graduate Courses

Wayne State University strives, as part of its mission, to achieve
academic excellence in all graduate programs and to provide
opportunities for graduate students to teach. When selecting instructors
for courses, three key issues should be considered:

1. Competence and credentials of the instructor
2. Maintaining confidentiality of the student
3. Avoidance of potential conflict-of-interest situations.

When graduate students are employed in any teaching capacity (e.g.,
graduate assistants, part, fractional or full-time instructors or lecturers,
etc.), certain rules and guidelines are needed.

General guideline

Students enrolled in graduate programs at Wayne State University should
not ordinarily be given sole or major responsibility in the instruction and
final grade evaluation of any course in which other graduate students
are registered for credit. These guidelines are not intended to apply to
the legitimate assignment of qualified graduate students as laboratory
assistants or aids in courses that are taught by a graduate faculty
member. In such cases, the responsibility for instruction, supervision and
grading rests with the graduate faculty member.

Exceptions

If, under extenuating circumstances, a graduate student enrolled at WSU
must be assigned teaching duties that place that student in a teaching
role with regard to other graduate students, the following restrictions will
typically apply:

1. Only doctoral students who have attained candidacy may be
assigned to teach graduate courses and only provided that no
doctoral candidates are enrolled in the course for credit.
2. A graduate student may NOT be assigned for more than two
semesters to teach graduate level courses in which other graduate
students are registered.
3. A graduate student may be assigned to teach graduate-level courses
in which other graduate students are registered only in a specific area
of special competence. Graduate students who teach must otherwise
fulfill all of the credentialing, licensing, degree and experiential requirements of faculty assigned to similar courses.

Approvals
All exceptions to the general guideline shall be petitioned by the department, approved by the college dean and authorized by the dean of the Graduate School.

Academic Nepotism
Faculty members are not to place themselves, or allow themselves to be placed, in situations amounting to ‘academic nepotism’, i.e., teaching or otherwise directing the credit study or research of a student who is also a close relative. Concomitantly, students are not to take courses from close relatives or engage in research for academic credit under the direction of close relatives. All such credit will be disallowed.

Fraud and Misuse of Documents
Intentionally furnishing false information to the University is explicitly prohibited, as is forgery, alteration, unauthorized possession, or misuse of University documents, records and identification cards. The University reserves the right to rescind degrees if the award of the degree was based in whole or in part on deception, fraud, other unacceptable academic conduct, or misuse of University documents.

Data Access, Retention, and Ownership Guidelines
Purpose of these guidelines
These guidelines provide graduate students, postdoctoral trainees, faculty, staff, and research volunteers information about their rights and responsibilities and the ethical and legal framework applicable to research data produced by students and employees at Wayne State University. These guidelines are of particular importance for collaborative work involving multiple stakeholders or investigators. Download guidelines as PDF

Definitions
Research Data are the aggregated, recorded, retrievable information created or obtained through research, scholarly or creative work. Data include but are not limited to research and/or laboratory records created or maintained in the course of a research project (including paper or electronic files, interview notes, survey results, etc.), whether prepared on campus, off campus or at a research site pertaining to a research project.

Principal Investigator is a University employee or other researcher with primary responsibility for the conduct and administration of a research project.

Employee is any individual who receives salary, fellowship or other forms of remuneration for work produced or supervised at the University.

Students are individuals who are enrolled in courses at the University or are enrolled in a program of study, including individuals who have ABD status but are not registered for classes, during the period in which the research data covered under this policy is created, recorded, developed or manipulated.

Volunteers are individuals working without pay on research projects guided or directed by University staff or employees. Volunteers may be, but do not have to be, students.

Stakeholders include the Principal Investigator, Employees (including faculty and staff and administrators), Students, and Volunteers who participate on the research team or work on any aspect of the research project that produces the Research Data.

Guidelines

University Responsibilities:

Research Data ownership and/or access rights may be addressed by agreements between research sponsors and the University. In particular, researchers engaged in scholarly work that is carried out under external grants and/or contracts are required to follow the policies and guidance of the funding agency and the University and any relevant contract provisions.

In the absence of such contractual requirements or specific policies mandated by the research sponsor, Wayne State University asserts ownership of, and the right of access to, Research Data arising from all research conducted on the premises of or under the auspices of the University or supported by University resources. When necessary to assure appropriate access, the University may take physical custody of Research Data in a manner specified by the Vice President for Research or his/her designee.

Principal Investigator Responsibilities:

The Principal Investigator is the steward of Research Data and is responsible for its collection, management and retention, and has authority to make decisions regarding its dissemination. The Principal Investigator is also responsible for the maintenance and retention of research records and for compliance with any requirements of a research sponsor or funding agency related to Research Data. Appropriate record-keeping includes assurance of sufficient detail to allow replication of the research, response to questions about unintentional error or misinterpretation, establishment of the Research Data’s authenticity and confirmation of validity. The Principal Investigator must communicate in writing to all Stakeholders at the outset of a research project (and at appropriate intervals during the ongoing research) these guidelines and the applicable system of Research Data organization and retention selected by the Principal Investigator and any determinations as to the method and timing of dissemination of the Research Data.

Access by Stakeholders:

All Stakeholders participating in a research project have the right to access Research Data from the project and are responsible for complying with all requirements of a research sponsor or funding agency related to the Research Data and with applicable procedures for Research Data management, protection, security and dissemination communicated by the Principal Investigator. Access to data does not necessarily grant a right to disseminate or disclose data.

Research Data Retention:

Research Data must be preserved for a reasonable length of time, as determined by the Principal Investigator, to allow an answer to questions from the scientific community regarding the research. Based on various sponsoring agency requirements and statutes of limitation, Research Data must be retained for a minimum of six years after the conclusion of a research project: an agreement with a research sponsor may require a longer retention period.

If a Principal Investigator leaves the University, the Principal Investigator must make arrangements prior to leaving with his/her department chair or dean regarding the disposition of Research Data. In those cases in which data is appropriately transferred to the Principal Investigator's new institution, the University reserves...
the right to access the data for at least five years, unless there is an agreement between the two institutions providing otherwise.

- When a Stakeholder other than the Principal Investigator leaves the University, Research Data must remain at the University unless specific written agreements are made between the Stakeholder, the Principal Investigator, and the department chair or dean. Federal regulations including those related to HIPAA prohibit the transfer of personally identifiable health or other information without the appropriate authorization from the Human Investigation Committee, which serves as the University’s Privacy Board.

- In the event the research project results in intellectual property rights such as patents, strict documentation of Research Data—including, as applicable, original Research Data such as signed and dated original laboratory notebook pages—must be retained indefinitely for so long as the University may need such documentation to address protection and ownership issues. Stakeholders (including students and trainees) may retain copies of research notebooks only if that arrangement is consistent with any contractual agreements and arrangements with the funding agency, HIPAA restrictions, and determinations of the Principal Investigator and unit administrators such as the department chair and School or College dean. Stakeholders must meet with the Principal Investigator to discuss Research Data access and retention arrangements upon leaving the University and before pursuing any significant research and development activity in respect of the Research Data after leaving the University.

Creative Work:

- Creative work (including but not limited to musical arrangements/recordings, pieces of art, novels, etc.) resulting from collaborations between students and faculty can raise issues similar to Research Data retention and dissemination in some disciplines. It is recommended that faculty address ownership and rights of usage in advance of pursuing such collaborations, including development of written agreements outlining the intended nature of the collaboration and the roles of faculty and student Stakeholders, to ensure credit is not disputed at a later date.

Authorship and Disputes regarding Research Data Access:

- Scholarly work is typically intended for publication. Various journals and organizations associated with scholarly publication abide by authorship guidelines, such as the International Committee on Medical Journal Editors guidelines (http://icmje.org/recommendations/) and the Committee on Publication Ethics (COPE add link) that provide for broad feedback on publication and authorship issues. Each individual who has made an intellectual contribution to a body of work has a reasonable expectation to be listed as a co-author on papers, publications and other disseminations of the work.

- At the time that any dissemination project involving Research Data is initiated, Stakeholders must discuss co-authorship status among those who contributed to the work and reach a consensus regarding those who will be listed as co-authors. All co-authors must be provided the opportunity to provide input on the content and publication timelines for the work and be notified prior to submission of the work. It is the responsibility of the advisor/Principal Investigator for a project to ensure that these discussions happen in a reasonable timeframe so as not to hinder the dissemination of the work (including timely graduation for students) and that equitable decisions are made regarding publication/dissemination.

- If a graduate thesis is one of the potential forms of publication and agreement cannot be achieved among Stakeholders, the publication issue may be appealed first to the relevant dissertation committee for resolution and, if the parties remain at odds, to the graduate officer and department chair. If the matter cannot be handled within the department, the final arbiter of such disputes is the Dean of the Graduate School.

- If other situations arise in which the Stakeholders involved in the generation, analysis, and/or reporting of Research Data cannot agree on the proper action, such disputes may be appealed to the department chair and, if the dispute remains unresolved, to the dean of the college or school. Either the dean or the Stakeholders may request that the Vice President for Research assist with a recommendation. The Dean’s decision is final.

Theses:

- Doctoral and Masters theses are important publications associated with the scholarly work of the University’s students. Research Data that is included in these publications are expected to be predominantly the result of work by the primary author. A thesis may use Research Data from other Stakeholders in a research project only if the Principal Investigator or research supervisor provides a signed statement explicitly acknowledging the use as appropriate and setting forth any applicable limitations on use of the other Stakeholders’ Research Data as necessary to protect those Stakeholders’ interest in the research project.
Records and Registration

Office of the Registrar

In Person Services: Student Service Center, Welcome Center, 42 West Warren
Mailing Address: 5057 Woodward; Suite 5101, Detroit, MI 48202
Telephone: 313-577-3550, Fax: 313-577-7870
h (http://www.reg.wayne.edu/http://wayne.edu/registrar (http://wayne.edu/registrar/) 

The Office of the Registrar supports the instructional, research and service missions of the University by providing a wide variety of academic services to students, faculty and staff. The office consists of several units: The Office of the Registrar prepares academic calendars, assesses tuition and fees, determines residency, and reviews all appeals for exceptions to University enrollment policies. Records and Registration oversees registration, adds, drops, course withdrawals, grading, student personal and academic data, and transcripts/academic records. Curricular Services oversees the preparation of each term’s Schedule of Classes, degree audit tools, graduation applications and diplomas. Transfer Credit evaluates coursework from other universities for undergraduate credit at Wayne State University.

Registration

Registration (https://wayne.edu/registrar/registration/) is the process of officially enrolling in classes for a particular term. Students can view the Course Schedule (http://classeschedule.wayne.edu) online, add courses to their cart, and complete registration within Academica. A student may not attend any class for which he/she is not officially registered.

POST-BACHELOR STATUS: Students wanting graduate credit should NOT register ‘post-bachelor.’ This status allows students holding bachelor’s degrees from accredited institutions to elect only courses open to undergraduate students (numbered below 7000), which may be used to fulfill prerequisite requirements for graduate admission. Credits for courses elected as a post-bachelor student do not count toward graduate credit.

Academica

Academica (http://academica.wayne.edu) is a secure gateway that provides unified access to Wayne State information, services, and computing systems. This comprehensive environment is a one-stop location where WSU students, faculty, and staff can conveniently use online self-service functions and easily access many computing systems, such as the Wayne Connect Email system and the Blackboard Learning System. Using Academica, students also have continual access to specific information and helpful tools needed for communication, collaboration, teaching and learning, and University administration. Current students can use secure self-services to check financial aid, register for and drop/add classes, pay tuition and fees, check holds and final grades, obtain enrollment verifications and transcripts, self-register for training programs/workshops, and more.

Accessing Academica requires a valid WSU Access ID (https://tech.wayne.edu/kb/accessid-accounts/accesssid/) (e.g., xy6789) and password. As soon as a student applies for admission or an employee is hired, a unique Access ID is automatically created. The university’s Help Desk (https://tech.wayne.edu/helpdesk/) services can provide technical assistance if necessary.

Degree Works

Degree Works (http://wayne.edu/degreeworks/) is a degree tracking tool that allows you to see your progress toward graduation and help you and your advisor determine which courses you still need to take. Along with your advisor, you can also map out which courses you will take in future semesters, putting you on the right path for graduation.

Drop/Add – Adjusting Your Schedule

Registered students may drop and/or add classes on the date(s) indicated on the Registration Calendar. Note the following requirements:

1. The regulations pertaining to dropping and adding courses are stated as they pertain to regular courses fifteen weeks or more in duration. These regulations are applied proportionately to courses that are offered for less than fifteen weeks. Students can click on the Course Reference Number (CRN) on the class schedule website to view specific deadline dates for each course(s). Students can also contact the Registration Office for any questions regarding these regulations.

2. Students who do not officially drop their courses within the first two weeks of classes are financially obligated to pay for the courses even if they have not attended any class sessions.

3. Students who officially drop full term courses before the conclusion of the first two weeks of classes (for the Fall and Winter terms) are entitled to 100% tuition cancellation, and the courses do not appear on the students’ academic records.

4. Students are not permitted to add courses after the first week of the term without instructor and departmental permission. Departments are required to enter a late add permit/override for students if exceptions are made to permit adding of classes during the second week.

5. Effective Fall 2018, the withdrawal period starts after the second week of classes, and lasts through the tenth week. The withdrawal will include a notation on the academic record of ‘WP’ - Passing, ‘WF’ - Failing, or ‘WN’ - No Basis for Letter Grade. Students are required to submit their withdrawal through Academica for their instructors’ approval. Once logged into Academica, click the Student tab, under Registration from the Student Services menu, choose Withdraw from a Class, follow the prompts on each page. Before a withdrawal request is sent to the instructor, undergraduate and Masters level students will be required to complete a SMART Check. See the Financial Aid website (http://wayne.edu/financial-aid/receiving/withdrawal/) for more information.

6. Students are not permitted to withdraw from courses after the end of the tenth week of class for full term classes. The withdrawal deadlines are published in each term’s academic and registration calendar. Withdrawal dates for less than full term courses are adjusted proportionally. Late withdrawal requests will not be approved. Medical withdrawal requests have separate deadlines. Classes for which a grade has been earned cannot be withdrawn.

College of Engineering: Students are not permitted to withdraw from courses after the fifth week of classes without written approval of their advisor. Some departments have more stringent restrictions on withdrawing from courses.

Transcript Request Policy

Official transcripts (https://wayne.edu/registrar/records/transcript-requests/) bear the seal of the University and the signature of the Registrar. They are sent directly to the receiving party. Transcripts are issued free of charge, up to ten copies per year. A fee of $5.00 per transcript is charged for copies in excess of ten. A fee of $20.00 is assessed for each emergency transcript. An emergency transcript is one which is mailed for overnight delivery. The next day service only applies to street addresses (No Post Office Boxes) within North America. Next day service requests must be received by 1:00 p.m.
Students may request transcripts via Academica (http://academica.wayne.edu). There are no on demand transcript requests. Due to the signature requirement for releasing educational records, the University cannot accept telephone requests for transcripts.

Transcripts are not issued to anyone outside the University without the written permission of the student. Requests for official transcripts will not be honored if the student or former student has an outstanding financial obligation to the University.

For students who have been in attendance since the year 2000, transcripts can be sent electronically. A valid email address must be provided.

Release of Student Records
The University recognizes the educational records of students as being privileged and has a policy designed to ensure that this information is not improperly divulged without the consent of the student. The University is subject to the Family Education Rights and Privacy Act (https://wayne.edu/registrar/faculty/privacy/) (FERPA) and has promulgated regulations pursuant thereto. Copies of the regulations and a list of student records maintained by the University are available for inspection in the Office of the Registrar. The University reserves the right to provide anonymous academic information to other schools and colleges when it is to be used for curriculum evaluation purposes.

Michigan's Freedom of Information Act
The Freedom of Information Act (PA 242) provides that a member of the public, in accordance with certain guidelines, has a right to inspect and receive copies of public records maintained by the University. A public record is broadly defined and includes written documents, pictures, recordings, punch cards, magnetic cards, etc., which are maintained by the University in the course of official responsibilities. However, certain records are exempt from disclosure.

The Media Relations Office, located in 3100 Academic/Administrative Building, is responsible for accepting requests for public records, and the Director of that office is the University officer in charge of providing this service. Under statute, a fee can be charged for records released and is based on the cost of labor involved in the search, examination and duplication of records, as well as the mailing costs. Only the Office of General Counsel may authorize the denial of a FOIA request.

Student Directory Information
Under the Family Education Rights and Privacy Act (FERPA), the university can designate information as directory information, which may be released to third parties. Wayne State University considers the following information to directory information: name, university-provided e-mail address, major, classification (freshman, sophomore, etc.), enrollment status (full-time, three-quarters-time, half-time, less-than-half-time, withdrawn), dates of attendance, participation in officially recognized university activities (including sports), height and weight of members of athletic teams, degree(s) received from Wayne State, and Honors and/or academic awards received.

Wayne State does not release directory information to third parties for commercial or non-educational purposes. Requesters are expected to explain the benefit to our students.

You may opt in or opt out of the release of directory information by filing a Request to Restrict Release of Directory Information Form (https://wayne.edu/registrar/faculty/forms/) with the Records and Registration Office.

The University will release student information made under the Solomon Amendment (10 USC Section 983) by Department of Defense recruiters. Accordingly, students may not opt out of this type of release.

WSU OneCard
The WSU OneCard is a multi-purpose identification and debit card all in one. It is a convenient, easy-to-use card designed to provide students with access to a wide variety of campus services including: parking, door access, copying and printing services, food and book-store purchases, and more, without having to use cash. The OneCard is needed to access the fitness center, the complimentary campus shuttle and serves as the Library Card for the WSU Libraries. Students should contact the OneCard Office (http://www.onecard.wayne.edu/) for complete details.

Retention and Graduation Data
The Office of Institutional Research and Analysis (OIRA) submits the following retention and graduation rates to the Integrated Postsecondary Education Data System (IPEDS) on behalf of the university. More information on the university’s retention and graduation rates can be found on the OIRA website (https://oira.wayne.edu/dashboard/retention-graduation/).

Student Academic Success Services
Counseling and Psychological Services (CAPS)
552 Student Center Building; 313-577-3398
https://caps.wayne.edu/

Counseling and Psychological Services (CAPS) enhances students’ development and academic success by promoting an open, problem-solving approach to personal challenges and working collaboratively on building appropriate skills, attitudes, and actions.

Service hours: Monday - Friday 8:30 am to 5:00 pm. Registered WSU students may drop-in or call for an evaluation with a CAPS counselor Monday through Friday from 9:00 am to 4:00 pm.

Eligibility: All currently enrolled students are eligible for counseling evaluation to assess whether their needs can be addressed effectively via short-term counseling at CAPS or require more specialized or longer-term counseling at another facility. Faculty, staff, alumni, children, or spouses are not eligible.

Crisis Services: In the case of a non-life-threatening crisis, students, faculty, or staff can contact CAPS and indicate that a student needs immediate assistance. If assistance is needed during evening or weekend hours, contact the Wayne State University Police Department at 313-577-2222 or call the Wayne County crisis hotline at 313-224-7000. In the event of a life-threatening emergency at any time, contact the Wayne State Police Department.

Student Disability Services (SDS)
1600 David Adamany Undergraduate Library; 313-577-1851; 313-202-4216 (Videophone)
http://studentdisability.wayne.edu

Student Disability Services is the office at Wayne State University that determines eligibility and implements academic accommodations, services and support for students with disabilities pursuant to the Americans with Disabilities Act (ADA), the ADA Amendments Act of 2008, and Section 504 of the Vocational Rehabilitation Act of 1973. SDS is committed to teaching students to advocate for themselves in order to fulfill their academic goals. SDS also provides training and outreach throughout the university to ensure equal access to all university programs.

Disability Determination: In order to register for SDS services, students must self-identify by providing documentation of their disability. Students will meet with disability specialists to discuss appropriate and reasonable accommodations. Once accommodations are determined, students are guided through the process of providing faculty with their accommodation letters and securing appropriate services. Students receiving accommodations are held to the same academic standards as all other WSU students and are responsible for requesting services and following procedures in a timely manner.

Academic Accommodations: Accommodations and services are individualized and based upon the student's documentation. It is for this reason that students should ensure that they have sufficient documentation that supports the need for appropriate and reasonable accommodations. Some of the accommodations and services provided by SDS might include alternative testing, interpreter and CART reporting services, alternative text format, note-taking assistance, furniture requests, use of assistive technology, and use of SDS exam/study rooms. Students registered with SDS are also eligible for pre-priority registration for classes. Through the SDS liaison program with University departments and programs, SDS ensures that members of the University community understand the types of support offered to enhance collaboration in providing accommodations.

Assistive Technology: SDS will work to secure alternative text formats and similar technologies for students and teaches students how to use the various assistive technologies. SDS exam/study rooms house CCTV magnification equipment, computers with software such as Zoomtext, JAWS, Kurzweil Educational Systems, Dragon Naturally Speaking and Inspiration. Students are also informed about free downloadable software programs for reading and recording.

Community Resources: SDS collaborates with various community agencies that assist students with disabilities at the university. Students are connected to agencies such as Michigan Rehabilitation Services and the Bureau of Services for Blind Persons.

Career Services
1001 Faculty/Administration Building; 313-577-3390
https://careerservices.wayne.edu/

Career Services provides support to students and alumni in defining career and employment goals and assists them in their search for employment opportunities. In addition to the following services, Career Services offers topical workshops, career events, and group and individual career/employment counseling. Career Services welcomes the opportunity to discuss customized services to meet individual needs.

Career Development: The main focus of this service is to help students explore career options, clarify their career goals, and link those goals to appropriate academic paths. Individual and group services are available.

Cooperative Education, Internships, and Summer Employment: Comprehensive paid professional, career- and non-career related work experiences are available, including a wide variety of part- and full-time experiential learning situations. Orientation workshops are offered on an ongoing basis.

On-campus Student Employment: Students may work on-campus up to twenty hours per week as a Student Assistant or College Work-Study employee. Job openings may be viewed in-house or online via our open posting system.

Professional Employment: Graduating students and alumni may increase professional full-time employment opportunities through on-campus interviews, resume referral, career fairs, in-house and on-line job postings, along with a myriad of career-related support services.

Testing, Evaluation, and Research Services
686 Student Center; 313-577-3400; Fax: 313-577-0617
http://www.testing.wayne.edu/

Testing
We provide:

- A secure, standardized, testing environment where students can demonstrate their academic skills for placement, course credit, or high stakes decisions.
- The opportunity for students to earn course credit in courses accepted by the transfer credit office through the College Level Examination Program (CLEP).
- Placement testing for students interested in meeting general education and other requirements targeted toward their personal skill level in Biology, Chemistry, English Composition and Mathematics.
Evaluation

We collect student opinions about faculty teaching through Student Evaluation of Teaching (SET). We share SET reports with students, administrators and faculty members toward the goal of improving quality of teaching at the University.

We survey students and faculty regarding the quality of their education through

1. the Cooperative Institutional Research Program (CIRP) Freshman Survey,
2. National Survey of Student Engagement (NSSE) and
3. Faculty Survey of Student Engagement (FSSE).

Research Services

We offer consulting on best practice in testing for faculty and academic staff. We offer machine scoring of exams, including tabulation of test scores and statistical output to help faculty improve their tests.

Office of Military and Veterans Academic Excellence (OMVAE)

Suite 687 Student Center Building; 313-577-9180; Fax: 313-577-5020
http://www.omvae.wayne.edu

This office assists veterans, active-duty service members, reservists, National Guard and eligible dependents/survivors in utilizing educational benefits. Specifically, students are aided in applying for Federal benefits outlined under Title 38, and Title 10, U.S.C., including: the Montgomery G.I. Bill (chapter 30), Vocational Rehabilitation (chapter 31), Post 9/11 G.I. Bill (Chapter 33), Reserve Educational Assistance Program, the Reserve G.I. Bill (chapter 1606), REAP (chapter 1607), and the Survivors’/Dependents’ Educational Assistance (chapter 35). All eligible students must officially request (http://omvae.wayne.edu/va-certification.php) to use their educational benefits each semester.

Non-Degree Status: Students must be in a degree program to receive benefits. Those not currently admitted to a degree program and enrolled in classes must verify to the OMVAE via an academic advisor (http://advising.wayne.edu/makeappt.php) the reason for enrollment (i.e., completing foundation courses for a master’s-level program).

Transfer Credits: Wayne State University will give four transfer credits for veterans, reservists, National Guard, and active-duty service members for service in the U.S. military. The University will require military discharge document DD-Form 214 (http://www.dd214.us/).

Wayne State University will accept up to twelve transfer credits from veterans upon receiving their Joint Service Transcript of military training. These credits are to be evaluated according to the ‘Guide to the Evaluation of Educational Experiences in the Armed Services,’ published by the American Council on Education.

This policy shall be in effect for all veterans, reservists, National Guard, and active-duty service members currently enrolled Fall 2005 and thereafter.

Late Tuition and Late Registration Fee Waiver: Late fees, Partial Payment fees and Late Registration fees can be waived for all students currently receiving VA Educational Benefits. Contact OMVAE for assistance.

Licensing/Certification Reimbursement: In most instances, students receiving VA educational benefits (http://www.gibill.va.gov) are eligible for reimbursement (https://www.benefits.va.gov/gibill/licensing_certification.asp) for licensing test fees.

Tutorial Assistance is also available (https://www.benefits.va.gov/gibill/tutorial_assistance.asp) as part of all benefit packages as noted above. Eligible recipients may receive $100.00 per month, up to twelve months to help defray tutoring costs. Contact the OMVAE for further details. No charge to benefit entitlement is incurred for the first six months received of Tutorial Assistance.

In-State Tuition Waiver: Individuals on active duty in the U.S. Military who are stationed in Michigan and their dependents are eligible for Michigan in-state tuition. Stating orders and proof of relationship (for dependents) must be provided with the application.

Students utilizing Chapter 31 or Chapter 33 G.I. Bill™ benefits will be granted a deferment of tuition and fees for the current enrollment period upon submission of a corresponding Certificate of Eligibility (or suitable documentation which demonstrates benefit eligibility). The deferment will be placed proportionally based on the student’s percentage of eligibility.

Veterans and their dependents are eligible for Michigan in-state tuition. The term “veteran” means a citizen of the United States or a resident alien whose most recent separation from any branch of the armed forces of the United States was under conditions other than dishonorable after having served on active duty for 90 consecutive days or more by reason of disability incurred while serving on active duty.

Individuals who are members of the National Guard of any state, or who were separated from the National Guard of any state under conditions other than dishonorable, and their dependents are eligible for Michigan in-state tuition.

Without regard to the foregoing, any individual using educational assistance under either Chapter 30 (Montgomery GI Bill® – Active Duty Program), Chapter 33 (Post-9/11 GI Bill®), of title 38, United States Code, and/or the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311 (b)(9)) who lives in the State of Michigan while attending Wayne State University (regardless of his/her formal state of residence) is eligible for Michigan in-state tuition.

VA Work-study Program: The VA work-study (https://www.benefits.va.gov/gibill/workstudy.asp) allowance is available to all students eligible for VA Educational Benefits. Those eligible who are at least a three-quarter-time student in a college degree program, or a vocational or professional program, can ‘earn while they learn.’ Pay for VA Work-study is the equal to the Federal minimum wage or your state minimum wage, whichever is greater.

Services performed under a VA work-study program must be related to VA work. Examples of acceptable work are:

• Processing VA paperwork at any university or college having a VA Office (e.g., you may be enrolled at WSU but work at Oakland or Macomb Community College VA Offices)
• Outreach services under VA supervision
• Work at VA medical facilities or National Cemetery System offices
• Work with the Veterans counselor at any of the MESC offices
• Work in the Education or Transition offices at local base
• Work at Department of Defense facilities related to education benefits under the GI Bill®.

National Guard Students: Please note that Wayne State does not currently participate in the Guard’s Tuition Grant Program. However, if your branch provides Tuition Assistance and/or Tuition Reimbursement the OMVAE will provide assistance as necessary with regard to grade and tuition certifications to your unit.

Reserve Officer Training Corps (ROTC): Wayne State University offers an Army ROTC (http://omvae.wayne.edu/rotc/) program. Students interested in joining the Army ROTC program at Wayne State University should contact M.S.G. Nicholas Lachance 734-647-3034.

Recalled To Active Duty (Reservists / National Guard): Students serving in the Selected Reserves or National Guard who are called up to Active Duty during a semester may request full reimbursement of tuition and fees. Students must file an Exception to Enrollment Policy form and submit a copy of their orders to OMVAE. Students called up active near the end of a semester are encouraged to consider requesting Incomplete grades for coursework.

Early-Out Requests: Potential Students on Active Duty requesting a verification of enrollment to be sent to their Commands must be admitted to Wayne State University and have registered for classes. Please contact the Graduate Admissions Office and the Registration Office for assistance. Once these conditions are met, the VA Certifying Official can complete an enrollment verification for active duty members seeking an ‘early out’ from military service. Hard copy proof of student’s admittance and registration for classes is NOT required for the VA Certifying Official to complete the enrollment verification.

Training Time Equivalencies: For purposes of GI Bill® benefit use, the following tables identify the training time equivalencies for standard and non-standard enrollment periods.

Office of International Programs

4228 Faculty/Administration Building; Phone: 313-577-8968; Fax: 313-577-5666
Email: oip@wayne.edu
Vice President for Academic Student Affairs and Global Engagement: Ahmad Ezzeddine
Director of Operations: Rebecca Journigan
Associate Director: Heidi Prillwitz
Associate Director, Student Programs: Fareed Shalhout
Marketing Coordinator: Carol Baldwin
Project Coordinator: Jessica Hoffmeyer
http://www.oip.wayne.edu (http://www.oip.wayne.edu/)

The Office of International Programs (OIP) is responsible for coordinating the University’s resources and expertise to support international education on and off campus, to expand the university’s global presence, and to facilitate the engagement of students, faculty, and staff with its global agenda. It also connects the metropolitan Detroit community with other university constituencies, locally and abroad. OIP encompasses the followings programs and activities:

- Office of International Students and Scholars
- Study Abroad and Global Programs
- English Language Institute

Fellowships Initiative

The Fellowships Initiative offers services to help students gain a competitive edge in the application process and grow personally from the experience of applying to a nationally competitive fellowship. Typically, fellowships fund study, research, or teaching in the U.S. or abroad. These awards are competitive and are awarded to students who are energetic and high-achieving, with the potential to make significant contributions for the public good. More information is available on the Office of International Programs website (https://oip.wayne.edu/fellowships/).

Office of International Students and Scholars (OISS)

416 Welcome Center; 313-577-3422; Fax: 313-577-2962
Director: Kelli Dixon
http://www.oiss.wayne.edu (http://www.oiss.wayne.edu/)

The mission of OISS is to support and enhance the educational, cultural, and social experiences of the more than 1200 international students and scholars at Wayne State University. OISS is the University’s main point of contact for issues related to international students and scholars’ immigration regulation compliance.

OISS staff advise students and scholars on immigration regulations and issues of cross-cultural adjustment; provide educational, cultural and social programs and activities, including a comprehensive orientation program and written materials designed to help arriving students and scholars achieve their educational and personal goals; assist University
departments in the hiring of foreign national employees, consult and interact with University units, governmental organizations and other agencies.

**Academic Progress for International Students**

Department of Homeland Security regulations require:

1. That F-1 and J-1 students maintain a full course of study and make normal academic progress toward program completion at the institution they have been authorized to attend.
2. Graduate students must successfully complete at least eight credits each semester (excluding continuing students who qualify for an annual vacation semester during Spring/Summer or have been granted an exception to full-time enrollment). Undergraduate students must successfully complete at least twelve credits each semester (excluding continuing students who qualify for an annual vacation semester during Spring/Summer or have been granted an exception for full-time enrollment).
3. Graduate Teaching Assistants and Graduate Research Assistants must successfully complete at least eight credits each semester (excluding students who qualify for a vacation semester during Spring/Summer or an approved annual vacation). If GTAs/GRAs need to take less than eight credits, they must complete the OISS Request for Exception to Full Time Enrollment form and obtain approval from OISS. Students should consult an OISS advisor for details on compliance with this and other requirements.

**New International Students and Scholars**

New International Students and Scholars receive the OISS welcome booklet with their visa document (Form I-20 or DS 2019) before they leave their home country. The booklet provides information on a wide variety of important topics such as housing, health insurance, expenses, immigration status, local climate, and air transportation. New students and scholars from abroad must report to OISS as soon as they arrive and must participate in a comprehensive orientation program. This program is designed to meet immediate needs in terms of housing information and University registration procedures; introduce them to U.S. culture and the University’s educational system; and provide information on banking, health insurance, safety, and immigration regulations. In addition, a number of social and recreational programs and activities are planned to assist students and scholars in making a smooth transition to their new environment.

**Non-Immigrant International Students**

Upon arrival to campus when entering the US on an initial I-20, all non-immigrant international students must all non-immigrant international students must report to OISS to complete check-in procedures and have immigration documents reviewed, purchase mandatory health insurance (see below), and obtain an orientation schedule. Transferring F-1 students from other U.S. institutions must have their previous school release their Student and Exchange Visitor Information System (SEVIS) record to Wayne State University and must complete transfer procedures as provided in the federal regulations within fifteen days of the first day of class. F-1 students must notify the OISS of any change in name, address, program (including changes in level and field of study), and full-time enrollment. OISS must provide this information to Immigration and Customs Enforcement (ICE) through the Student and Exchange Visitor Information System (SEVIS). J-1 exchange visitors, including students, may not make a change in level, field, or category without the advance approval of the Department of State, and may be precluded from change of visa status until a two-year home country residency requirement is met.

**Commuting Canadian Students**

Canadian students (commuters) enrolled less than half time must obtain a part-time I-20 from OISS each semester they are enrolled and should consult with an OISS advisor to determine the impact of their status on future immigration benefits including the availability of practical training.

**International Faculty and Research Scholars**

The University provides foreign professors and research scholars with opportunities to engage in research, teaching, consulting, and lecturing with colleagues at Wayne State; to participate actively in cross-cultural activities; and to share their experience as well as increase their knowledge about the United States, Wayne State University, and the metropolitan Detroit community. OISS provides centralized support services necessary to enable and assure the employability of such non-U.S. citizens within government regulations. Offers of employment to foreign nationals must be authorized by OISS, and only this Office may sign immigration forms and petitions related to employment on behalf of the University. All foreign national employees must complete USCIS Form I-9, ‘Employment Eligibility Verification’ and present evidence of their identity and employment eligibility at OISS before commencing employment at Wayne State University.

**Health Insurance (International Students and Scholars)**

416 Welcome Center; 313-577-3422; Fax: 577-2962
Health Insurance Advocate: 313-577-0724

International students and scholars, and their dependents holding F1/F-2 status and J-1 exchange visitors and their dependents holding J-1/J-2 status are required to comply with the health insurance requirements of the University. Commuting Canadian students may waive the health insurance requirement by providing proof of OHIP coverage prior to each semester of enrollment. The mandatory international insurance program is designed to provide international students, exchange visitors, and their eligible dependents with continuous insurance protection and access to quality affordable health care services. The University is mandated by federal law to terminate from its program all exchange visitors and their dependents who do not meet minimum insurance requirements. For additional information or to purchase health insurance please access the OISS website (http://www.oiss.wayne.edu) or contact the Health Insurance Advocate in OISS; telephone: 577-0724 or e-mail oissmail@wayne.edu

**Cross-Cultural Activities**

The OISS provides cross-cultural activities in order to provide exposure to American society, culture, and institutions. Activities include: International Education Week, new international student welcome events, and international coffee hours. Coffee hour provides opportunity for dialogue with and among international students and scholars, American students, and the WSU community. Other activities include monthly sessions on employment options, internships, cross cultural adjustment and more.

**Study Abroad and Global Programs Office**

906 W. Warren Avenue; 131 Manoogian Hall; 313-577-3207
Director: Kelli Dixon
International Students requiring information on study at Wayne State University should contact the Office of International Students and Scholars (http://www.oiss.wayne.edu).

Resource Center
Books, brochures, catalogs and advising on travel/study programs in foreign countries are available at the Resource Center, including information on Wayne State sponsored study abroad programs and programs sponsored by U.S. and foreign institutions. Course credit is available on approval for many study abroad programs; credit approval usually must be obtained prior to entering a study abroad program.

Honors College
The Irvin D. Reid Honors College has study abroad experiences; for information, see the Honors College section in the WSU Undergraduate Bulletin.

Fulbright Grants and other grants for graduate study abroad
The U.S. Fulbright student program (http://us.fulbrightonline.org/) is designed to give recent B.S and B.A. graduates, masters and doctoral candidates, and young professionals and artists opportunities for personal growth and international experience. Each year the Fulbright Program allows Americans to study or conduct research in over 100 nations. Application deadline depends on the specific program but generally it must be submitted to the campus Fulbright advisor by September of the year prior to the foreign study experience.

Fulbright-Hays Doctoral Dissertation Research Abroad Program (http://eca.state.gov/fulbright/fulbright-programs/program-summaries/fulbright-hays-program/): Provides grants to colleges and universities to fund individual doctoral students to conduct research in other countries in modern foreign languages and area studies for periods of 6 to 12 months. Proposals focusing on Western Europe are not eligible.

Information about other national fellowships and scholarships may be found here: https://oip.wayne.edu/fellowships (https://oip.wayne.edu/fellowships/)

English Language Institute (ELI)
351 Manoogian Hall, 313-577-2729
Director: Bruce Morgan
http://www.Eli.wayne.edu (http://www.eli.wayne.edu/)

As the only intensive English language program in the metropolitan Detroit area, the English Language Institute (ELI) has specialized in teaching academic preparation skills, English communication, and cultural orientation to non-native speakers of English from all over the world for more than forty years. The ELI is committed to assisting individuals at all levels to develop their communication skills in the shortest possible time by using the newest language-teaching methodology and the most up-to-date audio, video, and computer technology available. Small classes and highly trained instructors make it possible for students to improve their English rapidly and effectively.

Programs
Intensive Program: For students interested in improving their academic skills in a relatively short period of time, the ELI offers up to twenty hours per week of instruction at varying levels from beginning to advanced. While beginning levels focus on basic communicative skills, advanced classes emphasize mastery of the academic skills needed to succeed in the university such as essay writing, note-taking, and presenting information to an audience.

In addition to attending class, ELI students are encouraged to participate in weekly extracurricular activities in order to become integrated into

Wayne State University Graduate Bulletin 2022-2023 - DRAFT COPY 53
the English-speaking community. Each semester the ELI offers field trips around the metro-Detroit area, conversation partner practice with native speakers, and socio-cultural activities while at the same time encouraging students to take advantage of all university facilities and services.

Graduate Teaching Assistant (GTA) Training and Testing: All prospective GTAs whose native language is not English must pass the SPEAK® test, rated by ELI faculty, with a score of at least fifty (out of sixty) to be cleared for teaching. A score of forty-five allows a person to teach while enrolling in ELI 0520, a course taught by two ELI faculty members. The final exam, also rated by ELI faculty as well as a faculty member from the academic department, is a teaching demonstration in the GTA’s field of study. The SPEAK® test is offered at various times throughout the academic year. ELI 0520 is offered fall and winter semesters.

ENG 5850 is a course supported by the Graduate School and taught by ELI faculty each semester.

English Language Institute Courses (ELI)
The following courses, numbered 0100-0999, are not offered for degree credit. For registration in any of these courses students should contact the English Language Institute.

ELI 0100 Level 1: Oral Integrated Cr. 2,4
The focus of this course is to develop students’ basic listening and speaking skills necessary for everyday life. They will learn basic listening strategies, interact with others about simple topics, and produce simple sentences and questions with target vocabulary. Students will practice articulating consonant and vowel sounds correctly and produce accurate stress and intonation patterns. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 4 Credits

ELI 0110 Level 1: Written Integrated Cr. 2,4
The focus of this course is to introduce basic writing and grammar skills. Students will produce simple sentences on topics related to their personal needs. Timed and multi-draft writings will include simple sentences, correct use of capital and lower case letters, legible handwritten letters, and appropriate vocabulary. Basic grammatical structures will be introduced. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 4 Credits

ELI 0120 Level 1: Reading and Vocabulary Cr. 2,4
The focus of this course is to increase students’ ability to read and comprehend simple material and to increase their ability to recognize familiar words in everyday contexts. Students will use a picture dictionary and develop vocabulary associated with simple topics. Students will read short texts from basic readers and ELI library books. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 4 Credits

ELI 0200 Level 2: Oral Integrated Cr. 2,4
The focus of this course is to develop students’ abilities to carry on short, sustained conversation. They will apply listening strategies to discuss simple passages. They will interact with classmates. Students will use high-frequency vocabulary to produce simple and compound sentences with correct verb tenses. Students will use connected and reduced speech. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 4 Credits

ELI 0210 Level 2: Written Integrated Cr. 2,4
The focus of this course is to introduce paragraph writing and to develop basic grammatical understanding. Students will produce paragraphs in a variety of rhetorical modes. Timed and multi-draft paragraphs will include a topic sentence, simple transitions, three main points with some supporting details, and a concluding sentence. Basic grammatical structures will be introduced. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 4 Credits

ELI 0215 Level 2: Intensive Reading and Vocabulary Cr. 1,2
The focus of this course is to increase students’ comprehension of printed material and acquire high-frequency vocabulary. Students will read simplified texts and apply reading skills, such as identifying main ideas and details, inferencing, and understanding sequence. Students will acquire vocabulary by using definitions from the text, interpreting from the context, and using dictionary skills. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 2 Credits

ELI 0220 Level 2: Communicative Grammar Cr. 1,2
The focus of this course is to build students’ communicative competence, or their ability to communicate effectively and appropriately. To that end, basic grammar points will be studied and practiced in ways that simulate everyday conversations and scenarios. Students will engage in a variety of communicative activities that focus on speaking and writing. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 2 Credits

ELI 0300 Level 3: Oral Integrated Cr. 2,4
The focus of this course is to develop students’ emerging academic listening and speaking skills. Students will apply listening and speaking strategies. They will also give short presentations. Emphasis will be on generating compound and complex sentences using simple academic vocabulary. Students will pronounce English sounds accurately and follow intonation and stress patterns appropriately. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 2 Credits

ELI 0310 Level 3: Written Integrated Cr. 2,4
The focus of this course is to produce well-developed paragraphs in a variety of rhetorical modes on academic topics. This course will culminate in an introduction to essay writing. Intermediate grammatical structures, such as complex sentences, adjective clauses, and the present perfect, will be introduced. Error-correction tasks, peer evaluations, and self-evaluations will develop self-editing skills. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 2 Credits

ELI 0315 Level 3: Intensive Reading and Vocabulary Cr. 1,2
The focus of this course is to increase students’ vocabulary and comprehension of longer and varied reading passages. Students will also be able to understand the structure of a text with transition words and the relationship between the main point(s) and supporting examples. Strategies to discern meaning of words from context will also be practiced. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 2 Credits
ELI 0320 Level 3: Extensive Reading Cr. 1,2
The focus of this course is to increase students’ reading fluency by reading large quantities of texts. Class Readers will give the teacher the opportunity to help the students acquire the art of extensive reading, to improve their skills, and to monitor their progress closely. Students will choose their own texts for independent reading. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 2 Credits

ELI 0325 Level 3: Reading and Vocabulary Cr. 2,4
The focus of this course is to increase students’ vocabulary and comprehension of longer and more varied reading passages and to increase students’ reading fluency and speed by reading multiple books from ELI library. In intensive reading activities, students will be to identify the topic, main ideas, and details in a passage as well as recognize the writers’ point of view, purpose, and tone in simple academic texts when guided by questions. Students will also be able to understand the structure of a text with transition words and the relationship between the main points and the supporting details. The focus of the extensive reading activities will be on identifying overall meaning of texts and increasing reading speed. Class Readers will give the teacher the opportunity to help students acquire the art of extensive reading, to improve their skills, and to monitor their progress closely. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 4 Credits

ELI 0400 Level 4: Oral Integrated Cr. 2,4
The focus of this course is to develop students’ academic listening and speaking skills needed for successful extended academic discourse. Students will demonstrate detailed understanding of academic listening passages. Students will use speaking strategies for academic discussions and to summarize information. They will give speeches using visuals, transitions, and grammatically-correct sentences with academic vocabulary. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 4 Credits

ELI 0410 Level 4: Written Integrated Cr. 2,4
The focus of this course is to develop students’ essay writing skills and improve accuracy in grammar, mechanics, and spelling. Essays will be produced in a variety of rhetorical modes on academic topics that include some authentic sources. Students will also be introduced to summarizing and citing authentic sources. Complex grammatical structures will be introduced. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 4 Credits

ELI 0415 Level 4: Intensive Reading and Vocabulary Cr. 1,2
The focus of this course is to increase students’ academic vocabulary and comprehension of academic reading passages. Students will identify the structure, purpose, and connection between ideas in texts. Students will use strategies to discern meaning of words from context. They will acquire knowledge of word forms and will use dictionary skills to build vocabulary. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 2 Credits

ELI 0420 Level 4: Extensive Reading Cr. 1,2
The focus of this course is to increase students’ reading fluency by reading large quantities of texts. Class Readers will give the teacher the opportunity to help the students acquire the art of extensive reading, to improve their skills, and to monitor their progress closely. Students will choose their own texts for independent reading. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 2 Credits

ELI 0425 Level 4: Reading and Vocabulary Cr. 2,4
The focus of this course is to increase students’ academic vocabulary and comprehension of academic reading passages and to increase students’ reading fluency and speed by reading multiple books from the ELI library. In intensive reading activities, students will identify the structure, purpose, and connection between ideas in academic texts by finding main ideas, topic sentences, and supporting details in a passage, and recognize the writer’s point of view, purpose, and tone in academic texts. Students will use strategies to discern meaning of words from context. They will acquire knowledge of word forms and will use dictionary skills to build vocabulary. The focus of the extensive reading activities will be on identifying overall meaning of texts and increasing reading speed. Class Readers will give the teacher the opportunity to help the students acquire the art of extensive reading, to improve their skills, and to monitor their progress closely. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 4 Credits

ELI 0500 Level 5: Oral Integrated Cr. 2,4
The focus of this course is to develop students’ academic listening and speaking skills needed for successful extended academic discourse. Students will use listening strategies to show detailed understanding of lengthy academic listening passages. They will apply speaking strategies to share information and communicate with automatic consistency. Concentration will be on consistently speaking intelligibly and fluently. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 4 Credits

ELI 0510 Level 5: Written Integrated Cr. 2,4
Students will develop critical thinking skills through reading, writing, and classroom discussion. Students will write well-developed five-to eight-paragraph essays and relate assigned readings to their own experience. Students will learn how to incorporate outside sources into their essays and use appropriate citations. Advanced grammatical structures will be reviewed and expanded as necessary Offered Every Term.
Restriction(s): Enrollment is limited to students with a major, minor, or concentration in English Language Institute; enrollment is limited to English Language Institute level students.
Repeatable for 4 Credits

ELI 0515 Level 5: Research Skills Cr. 1,2
The focus of this course is to introduce skills essential to conduct academic research at the university level. Students will learn how to search for and evaluate academic sources in the library and online databases as well as how to read, analyze, and use the information gathered. The course also focuses on paraphrasing and summarizing. Offered Every Term.
Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 2 Credits
ELI 0520 English for Teaching Assistants Cr. 1
American English language skills to improve teaching effectiveness of non-native speakers of English. Pronunciation, stress, intonation, speaking rate; oral presentation practice; cultural factors in U.S. university classroom. Not offered for degree credit. Offered Every Term. Repeatable for 4 Credits

ELI 0525 Level 5: Academic Reading and Research Cr. 2,4
The focus of this course is to increase students' comprehension of both field-specific and general academic reading passages and deepen comprehension of standard academic vocabulary as well as targeted field-specific terminology. Students will accomplish these goals while learning and practicing skills essential to conduct academic research at the university level. Students will identify the structure, the purpose, and the connection between ideas in academic texts and recognize the author's agenda as well as the conventions of the scholarly writing. They will learn how to search for and evaluate academic sources in the library and online databases as well as how to analyze and use the information gathered. Students will learn how to brainstorm and narrow the topic for research. They will also enhance their skills paraphrasing, summarizing, and citing bibliographic sources in APA format. Offered Every Term. Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 4 Credits

ELI 0530 TOEFL/Timed Essay Writing Preparation Cr. 1-2
Class designed to enhance student's ability to understand and perform on the Test of English as a Foreign Language (TOEFL) for the paper-based and iBT(Internet)-based formats. Offered Yearly. Restriction(s): Enrollment is limited to students with a major, minor, or concentration in English Language Institute; enrollment is limited to English Language Institute level students.

ELI 0540 Level 5: Media & Culture Cr. 1,2
The focus of this course is to gain a greater understanding of American culture and current events via extensive reading from print and digital media, leading to written assignments, oral presentations, and discussions. In addition, TV and radio programs, as well as podcasts and documentaries, will provide input for written and oral assignments. Offered Every Term. Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 6 Credits

ELI 0599 Directed Study Cr. 1-4
Meets the needs of English as a Second Language (ESL) students in their last stages of preparation for matriculation. Based on students' particular needs, instruction will be provided to strengthen various academic preparation skills, including listening and note-taking practice in an academic context, extensive and intensive reading, and expository and research paper writing. Offered Every Term. Restriction(s): Enrollment is limited to students with a major, minor, or concentration in English Language Institute; enrollment is limited to English Language Institute level students.
Repeatable for 8 Credits

ELI 0700 Written Communication Cr. 1,2
Through reading and writing of complex texts, students improve their understanding and use of American English grammar and mechanics (punctuation and capitalization) for academic and professional settings. Offered Every Term. Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 2 Credits

ELI 0705 American Pronunciation and Clear Communication Cr. 1,2
Course addresses the communication needs of advanced-level, non-native English speakers who want to reduce the amount of pronunciation errors produced in their speech. Offered Winter. Restriction(s): Enrollment is limited to English Language Institute level students.
Repeatable for 2 Credits

ELI 0800 Writing Skills I Cr. 2
This course integrates reading, writing, and grammar and focuses on comprehending main ideas and details, inferring in simplified reading texts, and understanding This course integrates reading, writing, and grammar and focuses on comprehending main ideas and details, inferring in simplified texts, and understanding vocabulary in context. Students will learn to organize and write paragraphs with simple grammatically correct sentences. Offered Spring/Summer. Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0810 Oral Skills I Cr. 2
This course integrates listening and speaking in English and introduces culturally appropriate interaction in speech. Students listen to dialogues, newscasts, and short lectures; give presentations on a variety of topics; and receive individualized feedback on pronunciation. Offered Spring/Summer. Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0820 Writing Skills II Cr. 2
This course integrates reading, writing, and grammar and will emphasize how reading and writing are related. Rhetorical modes of essay writing will be introduced, authentic texts will be read, and more advanced grammar points will be covered. Offered Spring/Summer. Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0830 Oral Skills II Cr. 2
This course integrates listening and speaking in English and focuses on refining students' abilities to understand academic and informal spoken language by listening to academically-themed lectures and extended dialogues. They will develop critical thinking skills for responding to questions and giving presentations. Offered Spring/Summer. Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0840 Writing Skills III Cr. 4
Course integrates reading, writing, and grammar, focuses on reading authentic materials and writing essays. Students work to improve their understanding and use of American English, grammar, and mechanisms for academic settings. Offered Spring/Summer. Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0850 Oral Skills III Cr. 4
Course integrates listening and speaking in English and will help students increase their aural/oral fluency through participation in academic/ content-based discussions and various other forms of speech in formal, informal, and academic settings. Offered Spring/Summer. Restriction(s): Enrollment is limited to English Language Institute level students.

ELI 0860 Communication and Culture Cr. 4
This course will involve writing and oral presentations based on academic readings and cultural experiences. Additional instruction in grammar and sentence structure will be provided based on students' needs. Offered Spring/Summer. Restriction(s): Enrollment is limited to English Language Institute level students.
Educational Outreach

5057 Woodward Avenue, Suite 3101, Detroit MI 48202; Telephone: (313) 577-4682
Email: educationaloutreach@wayne.edu
http://www.educationaloutreach.wayne.edu (http://www.educationaloutreach.wayne.edu/)

Vice President for Academic Student Affairs and Global Engagement: Ahmad Ezzeddine
Sr. Director, Business Affairs: Arthurine Turner
Associate Director, Administrative Services: Heather Howell
Director of Operations: Rebecca Journigan
Director, Educational Outreach and Transfer Initiatives: Michael Quattro
Associate Director, Educational Outreach: Stacy Jackson
Program Manager, Schoolcraft Center: Gail Stanford
Program Coordinator: Nevein Michail
Associate Director, Executive and Professional Development: Michael Kelly
Instructional Services Supervisor: Margaret Matyniak
Marketing Coordinator: Carol Baldwin

Educational Outreach is principally responsible for Wayne State University’s off-campus offerings including online programs and courses. This division administers academic off-campus course offerings and programs for most Schools and Colleges of the University; the University Summer Session; and the partnership degree programs at University centers located on community college campuses. Educational Outreach staff coordinate relationships with community colleges partners and oversee transfer student recruitment and retention via the Transfer Student Success Center. Additionally, the division oversees credit and non-credit executive education, certificate, professional development and continuing education programs for the University.

The Division operates several instructional centers in the Detroit metropolitan area as well as in other selected locations in Michigan, and delivers distance learning and online instructional programs. Through these outreach efforts, WSU is able to serve and meet the educational needs of a diverse student audience: working adults who are unable to pursue traditional on-campus programs of study; persons who desire courses of instruction at or near their place of employment; and others who are simply taking courses to enrich their educational background or improve their technical skills.

Dual Enrollment Cohort Programs

Educational Outreach coordinates dual enrollment cohort programs for eligible high school students in interested school districts. Dual enrollment cohort programs may be offered on site within the school district or at any of the Wayne State University campuses. For information regarding Dual Enrollment Cohort Programs, telephone: 313-577-1430.

Visitor Program (Non-Credit)

Educational Outreach also administers the University’s Visitor Program. Under this program, adults may attend a wide range of selected University courses, both on and off campus, provided classroom space is available. No grade or academic credit may be earned, and students may not be registered for courses taken for credit simultaneously with courses taken under the Visitor Program.

The Visitor Program allows any adult who is not currently enrolled in credit courses at Wayne State University to attend a wide range of University courses in a noncredit status. Visitor status students do not receive academic credit and do not receive acknowledgement on transcripts. Provided space is available and permission has been granted, adults may enroll as visitors in most of the courses listed in the Schedule of Classes.

It is not necessary to be formally admitted to the University to take advantage of the Visitor Program. Visitor status students do not submit written work or take examinations. Registration for both on-campus and off-campus classes takes place the first two weeks of classes and is processed by the Division of Educational Outreach, located on the main campus.

Students enrolled in the Visitor Program are assessed one-half of the undergraduate resident lower division credit hour rate for each credit hour plus a non-refundable Registration Fee equal to one-half of the regular Registration fee and the full per credit hour undergraduate Student Service Credit Hour Fee. Payment of tuition and fees are due at the time of registration. Tuition must be paid in full at the time of registration. Payment is accepted by money order, check, Discover, Master or Visa Card. Money orders or checks must be drawn from a United States bank and cannot be starter checks. Students may register in person or by calling: 313-577-4682.

Travel Study

Sponsoring schools and colleges in the University offer travel study programs through the Division of Educational Outreach. Most programs occur in the spring/summer sessions; times and locales vary each year. Travel study refers to programs in the United States. Please refer to the Office of International Programs (http://bulletins.wayne.edu/undergraduate/general-information/international-programs/) for study abroad programs. Recent travel study programs include:

- College of Liberal Arts and Sciences: Biological Sciences: marine lab at the Florida Keys; field studies at Fish Lake, Michigan
- College of Education: Science Education: ecology courses at Higgins Lake, Michigan
- College of Fine, Performing and Communication Arts: Fashion Merchandising: design in New York City

Extension Centers

Director, Educational Outreach and Transfer Initiatives: Michael Quattro
Associate Director, Educational Outreach: Stacy Jackson
Program Manager, Schoolcraft Center: Gail Stanford

The Division of Educational Outreach operates several instructional centers in the Detroit metropolitan area as well as in other selected locations in Michigan. Through these outreach locations, the University is able to serve and meet the educational needs of a diverse student audience. The locations of the centers are listed below.

- OAKLAND COMMUNITY COLLEGE, ORCHARD RIDGE CAMPUS
  Building D, 27055 Orchard Lake Road
  Farmington Hills, MI 48334
  Telephone: 248-522-3905

- SCHOOLCRAFT COLLEGE
  39201 W. Seven Mile Road
  Jeffress Center, Suite 320
  Livonia, MI 48152
  Telephone: 734-853-3450
  Fax: 734-853-3446
  Email: schoolcraft@wayne.edu

- MACOMB EDUCATION CENTER
  16480 Hall Road
  Clinton Township, MI 48038
  Telephone: 586-226-4291; 313-577-9632
Programs are offered at various extension centers. Students should visit convenient times and places. The following complete degree requirements are applicable to many Wayne State University degrees and certificates:

Educational Outreach offers entire curricula or selected courses as possible. Upon admission to a Wayne State school or college, credits earned in non-matriculant status may be applied toward degrees subject to the approval of the admitting school or college.

Admission Requirements
Most credit courses offered through Educational Outreach are open to all students who are qualified by virtue of meeting the prerequisites for individual courses or, in cases where there are no prerequisites, on the basis of their own assessment of their aptitudes. Those individuals who have been formally admitted to Wayne State University for a degree or certificate program, or post-baccalaureate study, and who are in good academic standing, will have course credits and grades earned through extension recorded on their transcripts in the same manner as credits earned on campus. Guest students should consult with their home institution when formulating their registration plans and submit an application for guest admission (http://admissions.wayne.edu/guest/requirements.php).

Programs Offered Through Educational Outreach
Educational Outreach offers entire curricula or selected courses applicable to many Wayne State University degrees and certificates at convenient times and places. The following complete degree programs are offered at various extension centers. Students should visit the Educational Outreach (https://wayne.edu/educationaloutreach/programs/) website for more details.

Undergraduate Degree and Certificate Programs
- Bachelor of Arts with a major in Anthropology
- Bachelor of Arts in Business Administration with a major in Global Supply Chain Management
- Bachelor of Arts in Business Administration with a concentration in Accounting or Management
- Bachelor of Arts in Information Systems Technology
- Bachelor of Arts with a major in Communication Sciences and Disorders
- Bachelor of Arts with a major in History with optional minor in Political Science or Criminal Justice
- Bachelor of Arts with a major in Public Relations
- Bachelor of Science with a major in Computer Science
- Bachelor of Science in Construction Management
- Bachelor of Science in Criminal Justice
- Bachelor of Science in: (Engineering Technology degrees)
  - Electrical/Electronic Engineering Technology
  - Electromechanical Engineering Technology
  - Mechanical Engineering Technology
- Bachelor of Science in Mechanical Engineering
- Bachelor of Social Work
- Bachelor of Science in Nutrition and Food Science
- Bachelor of Science in Nursing

Graduate Degree and Certificate Programs
- Master of Business Administration
- Master of Social Work

Transfer Student Success Center
Director, Educational Outreach and Transfer Initiatives: Michael Quattro
Manager: Ranae Hamama
Advisers: Eve Crandall, Nicole Saez
Telephone: 313-577-2487
Email: transfer@wayne.edu

The Transfer Student Success Center (TSSC) is a hub for transfer students to obtain the help they need to successfully complete their degree at Wayne State University. The TSSC is designed to help those transferring from a community college or other four-year institution navigate the administrative and academic units of the university and ensure a timely and successful completion of their degree.

The TSSC provides direct service to students, community college staff, and WSU departments.

Direct service to students includes support with:
- Transfer credit evaluation
- Academic advising
- Student organizations
- Engaging students with the larger Wayne State community
- Providing opportunities for prospective students to visit campus

Direct service to community college staff includes:
- Information about Transfer Plans and transferring of credit
- Development of articulation agreements
- Hosting/coordinating staff and faculty visits to WSU
- Providing counselors/advisors and other staff with current/updated WSU information
Direct service to WSU departments includes:

- Facilitating and coordinating the development of articulation agreements
- Acting as a resource and clearinghouse for information on transfer students
- Participating in and leading development of events and activities for transfer students

Executive and Professional Development Programs (Non-Credit)

Associate Director: Michael Kelly  
Project Manager: Abby Cheatham  
Telephone: 313-577-4665  
http://www.ExecEd.wayne.edu

Executive and Professional Development (EPD) provides proven practical solutions to business challenges through executive education, business training and consulting. Offering a unique blend of expertise and flexible design, EPD moves beyond off-the-shelf, pre-packaged education, training and consulting 'services' by applying problem-solving strategies to assess and meet the needs of its clients. EPD is committed to providing customized, fully integrated, in-depth programs to address specific organizational needs and improve individual and organizational capabilities and performance. The EPD portfolio includes:

Business Training and Executive Education
EPD offers programs that respond to problems currently facing business, government and industry. Programs are offered in a variety of formats and deliver the strategies, tools, and knowledge needed to succeed in today's changing business environment. EPD mobilizes the resources of WSU to serve the specific and unique needs of the community by offering customized degree and non-degree programs, be they an onsite MBA program offered for a specific company, an Engineering Management Master program offered for a group of engineering executives, or a master of social work offered at one of the university's extension sites.

EPD provides a blended training approach by using a variety of alternative delivery methods including on-site facilitated sessions, videoconferencing, online training and computer-based programs.

Certificate Programs
EPD responds to industry's demand for a more comprehensive approach to continuing education by offering certificate programs that encompass several current management and business issues. These multiple-session programs offer participants the opportunity for higher mastery and competency in a particular subject area and can be customized to meet each organization's specific needs.

On-Site Consulting Services
In conjunction with training, EPD's expert staff provides consulting services in a variety of areas including training and design development, leadership and organizational development, succession planning, business process improvement, strategic planning, and executive coaching.

Procurement Technical Assistance Center
The Procurement Technical Assistance Center (PTAC) works with qualified businesses in the Detroit area to prepare them to bid for government contracts. PTAC's goal is to provide small business owners with a competitive edge in selling to the public sector by educating them about opportunities, and offering marketing and technical assistance. Recently, PTAC services resulted in awarded contracts totaling more than $5 million.

For further information on any Executive and Professional Development services or activities, call: 313-577-4665.
Campus Life

Dean of Students Office
301 Student Center; 313-577-1010

The Dean of Students Office provides services and affords opportunities to enhance student life and campus activities. The Office coordinates major campus student activities and events, including Orientation Part 2 (O2), New Student Convocation and Festifall, Student Organizations Day, Homecoming, and the Finals Week Late Night Breakfast.

The office coordinates the campus calendar of student activities, community service programs; advises fraternities and sororities; and promotes student involvement in co-curricular life at Wayne State and Detroit, including the Campus Activities Team program board. The office also coordinates the Warrior Pride program focused on school spirit, and the Warrior Zone athletic events student section. The University Student Conduct Officer is housed in the Dean of Students Office and the office also coordinates the Student Care Report process.

The Dean of Students serves as the Deputy Coordinator for Title IX and the Student Life Wellness Coordinator resides in the Dean of Students Office and focuses on sexual violence prevention education, substance abuse prevention education, and digital citizenship education.

Student Organizations

There are over 400 recognized student organizations including such diverse categories as academic/professional, social action, political, sororities/fraternities, honoraries, ethnic and religious groups, as well as student governments. Student organizations use the Dean of Students Office to process their event planning and all students use the Dean of Students Office to learn about getting involved in campus life. The Office staff also assists students who want to organize new student groups. The staff also coordinates various campus publications including the online newsletter Get Involved at Wayne. Student organizations can apply to the Student Activities Funding Board for funds to present events, programs, and activities on-campus.

The official student newspaper is the South End (http://www.thesouthend.wayne.edu).

Parent and Family Services

The Dean of Students Office coordinates Wayne State’s Parent and Family Services. Through this office, parents and family members receive the twice monthly parent and family newsletter and have services available to them to help them help their students be successful, including the parents helpline: 1-877-WSU-PARENT. The office may be e-mailed at: parents@wayne.edu.

Student Senate
395 Student Center
http://www.studentcouncil.wayne.edu (http://www.studentcouncil.wayne.edu/)

The Student Senate is the recognized student government of Wayne State University. It consists of twenty-eight members, fourteen members at large elected in a University-wide election, and fourteen appointed members, one student representative appointed by the Office of Housing and Residential Life, and one representative appointed by the Associate Vice President for Educational Outreach to represent the extension centers. The Student Senate has an official advisory responsibility in policy formation for the governing of student activities at Wayne State. The Student Senate is advised by the Dean of Students Office.

Office of Housing and Residential Life
582 Student Center; 313-577-2116
http://www.housing.wayne.edu

Housing and Residential Life at Wayne State fosters student learning and success through engaging residents in an intentional living-learning community. Supported by safe, comfortable and convenient residence hall, apartment and dining environments, residents grow in self-awareness and cross-cultural understanding as they practice social and group development as members of a diverse group of Wayne State learners.

Facilities and programs administered by this Office are located just steps away from classrooms, libraries, the Student Center, and the Recreation and Fitness Center and combine the convenience and activity of the campus with the energy and pace of downtown urban living.

Parking: Faculty, Staff, and Visitor
42 W. Warren, Suite 257, Welcome Center; 313-577-2273
https://parking.wayne.edu

The Parking and Transportation Services department has the responsibility to provide well-maintained, safe parking facilities and transportation for employees, students and visitors. The present parking system is comprised of 8 structures and 26 surface lots. The current capacity of parking spaces at Wayne State University is approximately 10,000. Parking and Transportation Services provides parking services to students, staff and visitors of Wayne State University.

Campus Health Center
5285 Anthony Wayne Drive; 313-577-5041
https://health.wayne.edu/

The Campus Health Center provides comprehensive health care services for students, including physical examinations, family planning, illness visits, and immunizations (including flu, meningitis, hepatitis B, etc.). Visits are by appointment, but walk-ins are accepted for students experiencing an illness. Counseling referral services are also available. All currently enrolled students receive one free office visit per semester. Additional visits are billed to student’s health insurance with most health care plans accepted. Students without insurance have reduced fees based on a sliding scale and ability to pay for additional office visits per semester.

Police and Public Safety Services
6050 Cass; 313-577-2222
https://police.wayne.edu/

The Wayne State University Police Department patrols and services the University including the city streets, businesses, and private residences within and between the various campus areas. The Department, to the extent that resources allow, also patrols and provides other police services to the neighborhoods and businesses in the area surrounding the University.

Police service is provided twenty-four hours a day, seven days a week. All officers have, at minimum, a bachelor’s degree. They are commissioned as Detroit Police Officers, with full police authority on and off campus, after training at a State-certified Police Academy. Any matter requiring the services of a police officer can be reported at any hour of the day or night.
The University has installed outdoor emergency telephones throughout the campus. These emergency telephones are identified by bright blue lights.

Emergencies (313-577-2222): All emergencies should be reported immediately, i.e.: all crimes, missing/stolen property, automobile accidents, suspicious persons, injured persons, vandalism, break-ins or burglaries.

Accidents (313-577-2222): Ambulatory patients will be transported, by officers, to either Detroit Receiving Hospital or the University Health Center. The Police Department does not provide ambulance service but utilizes the Detroit Fire Department Emergency Medical Service to handle other than minor injuries.

Fire or Other Extreme Hazards (313-577-2222): Emergencies such as fire, smoke, explosions, broken gas or water mains, severe electrical hazards, etc., should be reported.

Crime Prevention Section (313-577-6064): The Police Department’s Crime Prevention Section provides a number of crime prevention services, including personal safety seminars, crime prevention programs, and services. Examples of services provided include:

- Security Services
- Street Smarts seminars
- Operation Identification
- Alcohol Awareness
- Rape Aggression Defense Training

The Crime Prevention Section also publishes monthly 'CampusWatch' articles. Email inquiries may be made to: campuswatch@wayne.edu.

Athletics, Intramurals and Recreation

Matthaei Facility: 126 Matthaei Building; 313-577-4295
Intramural Sports: Mort Harris Recreation and Fitness Center; 313-577-2348
Intercollegiate Athletics: 101 Matthaei Building; 313-577-4280

Wayne State University has a rich athletic tradition dating back to the fall of 1917 and recently celebrated 100 years of singular outreach and academic success. The first Detroit Junior College athletic event (precursor of Wayne State University) was a basketball game against the Detroit College of Law on January 19, 1918. Since then WSU student-athletes have captured numerous honors, including national championships awarded by the NCAA and conference championships. In the past 10 years, 254 WSU student-athletes have been recognized as All-American. In the 103 year history, 695 students have been so recognized. Over seventy-six percent (76.42%) of the nearly 400-plus student-athletes currently involved in competitive athletics have a 3.00 or better cumulative grade point average with every team having a GPA of at least 3.0 or better. According to the latest federally mandated report, WSU student-athletes Academic Success Rate is seventy-six percent (76%). The athletic department provides competitive opportunities in the following sports: baseball, men’s and women’s basketball, men’s and women’s cross country, men’s and women’s fencing, football, men’s and women’s golf, softball, men’s and women’s swimming/diving, men’s and women’s tennis, volleyball, and women’s indoor/outdoor track. During the 2018-19 academic year, 10 out of 18 programs competed in NCAA championships. In 2012, women’s swimming and diving won the NCAA National Championship joining 10 other programs to be so honored. The past 18 years WSU Athletics has had its 18 highest ratings in the annual NACDA Cup and in 13 of the past 16 years finished in the top 12% of the 319 institutions in Division II. The NACDA ranks the top overall competitive intercollegiate athletic programs in the country.

The University competes at the NCAA Division II level, while the men’s and women’s fencing programs participate in the NCAA Collegiate National Championship. WSU student-athletes have served nearly 82,000 community service hours over the last eight years.

Many new facilities adorn the WSU athletic campus, including the Harwell Museum which contains numerous exhibits which pay tribute to Ernie’s marriage to Lulu, audio and video of Harwell’s signature calls and moments and the controversial Jose Feliciano national anthem during the 1968 World Series. There are interactive areas where you can listen to other announcer’s great calls, watch Ernie’s farewell speech and read letters written to Ernie. In addition, Harwell Field has a replica Fenway Park out field fence, Major League size dugouts and through an arrangement with the Detroit Historical Society, the left field scoreboard from the former Tiger Stadium is attached to the base of the left field wall.

The Doris J. & Donald L. Duchene, Sr. Athletic Facility was the first new athletic building in over 50 years on the athletic campus. Completed in the Fall of 2011, the building has 35,000 square feet of space with a maximum ceiling height of 35 feet. Enclosed are four tennis courts, a sprint track (60 yards), locker rooms for the men’s and women’s tennis, and baseball squads along with six offices for coaches and staff.

The nearly 12,000 square foot, state-of-the-art Athletic Performance Center was completed and opened in May of 2018 and gives student-athletes access to 24 work stations.

The softball facility was completed in three phases with the complex paid entirely by private revenue sources. Phase I was completed in 2005 and established the first grandstands and press box. Phase II added a locker room, offices, foyer, training room, restrooms and a new dugout. The final phase (completed in Spring 2013) added batting and pitching cages, and outdoor bullpens. On Nov. 12, 2016, the field was named Gary L. Bryce Field in honor of the long-time head coach with the installation of a new scoreboard. In the weeks preceding the naming of the field, the home run fences were pushed back to accommodate new NCAA guidelines.

The University offers a wide and varied program of recreational and intramural activities. The Matthaei Complex, and the surrounding athletic campus on 43 acres of land, located on the west end of campus, offers a myriad of drop-in activity areas that include courts and fields for basketball, football, jogging, racquetball, soccer, squash, tennis, and volleyball, a weight training/exercise room, and swimming facilities. Use of these facilities is free with a current University ID or with a membership through the Mort Harris Recreation and Fitness Center. The Doris J. & Donald L. Duchene, Sr. Athletic Facility features 35,000 square feet of usable space, four tennis courts and a sprint track. Open recreation hours and rental information (http://rfc.wayne.edu/multipurpose/) for this facility are available online.

Ticket and schedule information is available on the Athletics website (https://wsuathletics.com/) or by calling 313-577-2779. All men’s basketball and football games are broadcast on the Warrior Radio Network at WDTK-AM 1400 and FM 101.5 and are also available for free through WDTK the Patriot (https://patriotdetroit.com/). Students are admitted free to all University-controlled WSU athletic events with a One Card.

Sports Facilities

Matthaei Building

Matthaei is normally open from 7:00 a.m. to 8:30 p.m., Monday through Friday; and is closed to recreation on Saturday and Sunday, during the fall and winter semesters. During the spring/summer semester the Building is open from 7:00 a.m. to 7:30 p.m., Monday through Friday. Outdoor tennis courts and track are available during posted hours. A facility schedule is published monthly. Operational hours are subject to change, and not all areas of the complex will be available at all times,
due to scheduled classes, intramural activities and varsity athletics. Lap swim is not available at this time due to COVID-19. When it returns, lap hours will be posted on the monthly recreation schedule, available online or hard copy at the Matthaei. Locker and towel services are available for all affiliates daily with current OneCard at no charge. Locker and towel services are not available at this time due to COVID-19. When we are able locker rental plans both semester and yearly will be available. For charges and additional facility information, visit the Matthaei Shop in the Matthaei Building; or call 313-577-4295.

**Mort Harris Recreation and Fitness Center**
The Mort Harris Recreation and Fitness Center is open from 5:30 a.m. to 11:00 p.m., Monday through Friday; and 10:00 a.m. to 7:00 p.m. on Saturday and Sunday, during the fall, winter and spring/summer semesters. Operational hours are subject to change, and not all areas of the complex will be available for open recreation at all times, due to scheduled group fitness classes, intramural activities, club sport activities, and varsity athletics. Locker and towel services are available for all students and members with a current OneCard. Locker rentals are available for semester and yearly rentals. For charges and additional facility information, please visit the Mort Harris Recreation and Fitness Center (http://rfc.wayne.edu/) website or call 313-577-2348.

**Group Fitness Classes (non-credit)**
These classes include a variety of programming, conducted by trained, certified and experienced instructors. Class options include yoga, cycling, Zumba, High Intensity, and more. Classes are in person and virtual. Checkout rfc.wayne.edu for a full class schedule and our virtual options.

**Open Recreation:** The fitness areas, multi-purpose courts, walking track and climbing wall offer opportunities for unstructured play and participation. Basketball, volleyball, and a variety of equipment and areas for working out, stretching, and socializing are also available.

**Intramural Sports Programs:** Men’s, Women’s, and Open intramural sports leagues are available for all currently enrolled WSU students as well as WSU faculty and staff members of the facility. Leagues and tournaments are available in a variety of sports, including basketball, volleyball, dodgeball, flag football, soccer, Esports and more.

**Club Sports:** The Mort Harris RFC is also the home for all Club Sports. Students interested in starting a particular club sport or joining a current team, are invited to consult our website to view the registration process and to become familiar with GPA, credit load, and insurance guidelines. All WSU Club Sports are fully funded by the participating students themselves. Current clubs include men’s and women’s soccer, men’s lacrosse, men’s and women’s volleyball, equestrian, and track.

**Fitness and Wellness Programs:** Fitness assessments, personal training, and group fitness programs for every level of fitness are available to all students and members. All students and members have a free consultation included with their membership every year.

**Climbing Wall:** The Mort Harris RFC climbing wall features both bouldering and ropes routes to climb. Our routes are changed weekly and are graded on difficulty. We have all the equipment you need to climb or you can bring your own. Our wall is designed to accommodate climbers of all skill level even if you have never climbed before. Our staff is ready to get you going. Day and year passes are available.

**Adventure Trips:** The Mort Harris Recreation and Fitness Center offers a variety of outdoor excursions for novices to seasoned adventures. Trips include but are not limited to camping, hiking, ice climbing, rock climbing, and more.

**Team Building:** The high ropes course is designed to foster interpersonal and intra-personal growth in a fun and challenging environment. Your
Computing and Information Technology Division (C&IT)

Office: 5925 Woodward Ave.
Tel.: 313-577-4722; Fax: 313-577-5500
Interim Associate Vice President and Chief Information Officer: Rob Thompson
https://tech.wayne.edu/

Computing and Information Technology (C&IT) provides IT services and resources that support and enhance Wayne State University’s teaching, learning, research, and administrative activities. C&IT’s primary goal is to provide technology services that enable our students, faculty, and staff to be successful at WSU. C&IT employees strive to provide excellent customer service, respond to the changing needs of the University community, and make it easy and convenient for everyone to use technology at Wayne State. Functional C&IT organization charts are available on our website (https://computing.wayne.edu/about/org-charts.php).

AccessID

Everyone at Wayne State receives a unique identification code (AccessID) consisting of two letters and four numbers, for example: xy1234. The AccessID and password are key to accessing many University online systems; the Access ID can be found on the One-Card; passwords are assigned with initial email communications in the admissions application process.

Email and Communication Tools

Wayne Connect: The University’s Wayne Connect system is a campus-wide method of communication. It is powered by Microsoft and features email, calendars, online storage, mobile apps, and more.

Broadcast Messaging (Emergency Alerts) (https://broadcast.wayne.edu): This University-wide service delivers emergency alerts and other significant messages to faculty, students, and staff. Recipients can register their cell phones to get emergency alerts, grades, and other important information via text messages.

Mobile Apps

Wayne State Mobile App offers students, faculty, staff, and alumni an easy way to access University information like email, calendar, parking availability, class schedules, campus maps, OneCard balances, and more. Apps are available for free download on Android and iOS devices.

Academic IT Services

Canvas (https://tech.wayne.edu/kb/academic-services/) is Wayne State’s online learning management system. Students can take quizzes, upload assignments, participate in message boards and more. Free mobile apps for teachers and students are available.

Computer Labs (http://www.computing.wayne.edu/computer-labs/): The University libraries have both open and restricted-access computing areas, with more than 600 computers and a variety of applications. Additionally, many Schools, Colleges, and academic departments provide special-purpose computers and software for their students and faculty.

Grid Computing (http://www.grid.wayne.edu): WSU researchers with projects requiring high performance computing can use Wayne State University’s scalable, Grid-enabled computing system.

Administrative IT Services

Academica is the primary online means to securely register for classes, apply for financial aid, pay tuition, and more.

Internet Access (http://computing.wayne.edu/wireless/): WSU’s wireless networks offer high-speed Internet access within campus buildings including the residence halls. We recommend connecting to WSU-SECURE whenever possible.

Research Networks: Internet2 and MiLR (http://computing.wayne.edu/research-networks/): Wayne State’s membership in the Internet2 advanced networking consortium offers researchers countless opportunities for participation and collaboration. The Internet2 Network addresses researchers’ bandwidth-intensive requirements, such as: collaborative applications, distributed research experiments, and grid-based data analysis.

Software Purchases and Discounts (https://computing.wayne.edu/helpdesk/freesoftware.php): The C&IT Help Desk provides free and discounted software to current students, faculty and staff for academic, departmental and personal use.

Computer Security (http://security.wayne.edu): Students can rely on C&IT to protect the confidentiality, integrity, and availability of information on WSU computer systems, but security is everyone's responsibility.

Help Desk (https://computing.wayne.edu/helpdesk/): The C&IT Help Desk is Wayne State's campus technology headquarters - a one-stop shop for all your tech support needs. Call, email, or live chat for one-on-one help with any of Wayne State's IT systems, like email, Canvas, or Academica.

Qualtrics Online Survey Software (http://computing.wayne.edu/qualtrics/): The Qualtrics Research Suite is a user-friendly, feature rich, web-based survey tool that allows users to build, distribute, and analyze online surveys, collaborate in real-time, and export data in multiple formats. All Wayne State students have access to a free account for this service.
University Libraries and Archives

Office: 3100 David Adamany Undergraduate Library
Tel.: 313-577-4023, Fax: 313-577-5525
Dean of University Libraries: Jon E. Cawthorne
library.wayne.edu (https://library.wayne.edu/)

The University Libraries support the education, research and service missions of the University and its communities through comprehensive, high-quality resources, services and programs. The libraries are leaders in providing accurate and timely information to Wayne State University as well as the metropolitan Detroit area and Michigan. Scholarly materials in the University Libraries offer total more than three million volumes, over 56,000 journal titles and a broad range of electronic resources, including electronic journals and over 800,000 e-books, all available through the Libraries’ website.

The Library System includes the David Adamany Undergraduate Library, the Arthur Neef Law Library, the Purdy/Kresge Library, the Vera P. Shiffman Medical Library and its Learning Resource Center at the Eugene Applebaum College of Pharmacy and Health Sciences, and the Walter P. Reuther Library of Labor and Urban Affairs and University Archives. The School of Information Sciences and the Detroit Area Library Network (DALNET) are also under the Library System’s charge.

The University Libraries offer in-person reference consultations, research support, interlibrary loan, circulation and course reserve services, document delivery and 24/7 online research support. The latest information technologies provide state-of-the-art access to instructional and research materials. The libraries provide silent and collaborative study spaces.

David Adamany Undergraduate Library

The David Adamany Undergraduate Library (https://library.wayne.edu/) (UGL) is designed to enhance the learning experience of undergraduate students by offering open spaces for collaboration and silent study as well as hundreds of computers for student use. The library features instructional labs, the Collaborative Commons, an open space with flexible furniture and technology, collaborative study rooms that can be reserved online, and course reserves. The UGL also houses the Writing Center, Student Academic Success Services, and the Irvin D. Reid Honors College. The UGL is also home to The Tech Bunker, a technologically-rich immersive learning space that invite users to develop, design, dream and discover.

Purdy/Kresge Library

The Purdy/Kresge Library (https://library.wayne.edu/) supports the research and instructional needs of faculty, graduate students and upper-level undergraduates. The library provides access to over sixty 60 computers as well as ample study space in a traditional library atmosphere.

The Purdy/Kresge Library houses a book collection of over 1.5 million volumes, an extensive microform collection, a large document collection and a number of special collections including the Leonard Simons Collection of rare Michigan history texts, the Arthur L. Johnson Endowment collection, and the Ramsey Collection of Children’s Literature. This library is also the home of the Teaching Commons, a collaborative effort of the Libraries, the Office for Teaching and Learning, and Computing & Information Technology, which assists faculty and instructors in designing and developing instructional experiences for the classroom and online teaching environments.

Arthur Neef Law Library

Located at the north end of the University’s main campus, Wayne State University’s Arthur Neef Law Library (https://library.wayne.edu/neef/) offers researchers a comprehensive legal research center. Its collection of more than 620,000 print and microform equivalent volumes, plus an expansive collection of e-books, databases and other digital resources makes it a leading legal research facility in the State of Michigan. The Law Library is also a depository for U.S. government publications and for the records and briefs filed with the Michigan Supreme Court.

Shiffman Medical Library and Learning Resources Centers

The Shiffman Medical Library (https://library.wayne.edu/shiffman/) supports the research, education and clinical and public health care information needs for the University, major hospitals within the Detroit Medical Center, and unaffiliated health care providers and trainees throughout Michigan. The library maintains access to all the major health sciences, bio-scientific and consumer health databases; a core collection of journals dating to the mid-19th century; and books in print and electronically reproduced. Health information learning programs and informatics workshops, listed on the Shiffman website, are open to all members of the University community. The Learning Resources Center focuses on the daily information and computing needs of students of the Applebaum College.

Walter P. Reuther Library of Labor and Urban Affairs and University Archives

The Walter P. Reuther Library (https://www.reuther.wayne.edu) has an international reputation as the largest labor archives in the world and additionally holds significant collections relating to social and urban affairs in the metro Detroit area. It collects and preserves records of the American labor movement, related social, economic, and political reform groups, and twentieth century urban America. The archival collections held in the Reuther Library cover a variety of topics, organizations and individuals. In all, the Reuther Library has more than 95 million documents, 20,000 books, monographs, union publications and proceedings, 2 million photographic images; and 20,000 audio and moving image recordings. Due to issues of format, size, and security, the collection stacks are not open to the public and researchers work with these materials in the Reuther reading room during established hours of business.

The Reuther Library has become the official depository for the inactive files of several labor unions and organizations, including the United Auto Workers, the American Federation of Teachers, the National Association of Letter Carriers, The Newspaper Guild, the United Farm Workers, the Service Employees International Union, the American Federation of State, County and Municipal Employees, the Air Line Pilots Association, the Association of Flight Attendants, the Industrial Workers of the World, the Society of Women Engineers, and many state and local organizations. Records have also been received from urban and civil rights groups as the Citizens Crusade Against Poverty, the Michigan Chapter of the American Civil Liberties Union, the Detroit Branch of the National Association for the Advancement of Colored People, the United Community Services of Detroit, United Way for Southeastern Michigan, and New Detroit, Inc. A unique portion of the holdings is a labor journal and newspaper collection, which has nearly 1,600 current and non-current titles dating from the late 1800s to the present. Many individuals who played leading roles in labor and urban affairs have also placed their papers in the Reuther Library.

The Reuther Library also houses the Wayne State University Archives which provides historical information about WSU and its predecessor...
Centers and Institutes

Barbara Ann Karmanos Cancer Institute

Director, President, and CEO: Gerold Bepler, M.D., Ph.D.
4100 John R Street, 2nd Floor
313-576-8670 or 1-800-527-6277
https://karmanos.org

The Barbara Ann Karmanos Cancer Institute is one of forty-five National Cancer Institute-designated comprehensive cancer centers in the country and has been serving the Detroit area for more than sixty years. The Karmanos Cancer Institute operates the Karmanos Cancer Center, an independent cancer hospital, and manages the comprehensive cancer center core grant from the National Cancer Institute, in affiliation with Wayne State University. The faculty of the graduate program in cancer biology are drawn from a number of academic departments at Wayne State University and are Scientific Members of the Cancer Center. Students are trained in the biology of cancer at the molecular, cellular, and tissue levels, as well as in translational research and population studies of cancer. The focus of the training experience can be varied to suit individual student needs. It leads to the Doctor of Philosophy degree in Cancer Biology.

The Barbara Ann Karmanos Cancer Institute is a premier, nationally-recognized cancer research, treatment, education, and outreach center. It is also home to one of the eighteen national registries of the SEER (Surveillance, Epidemiology, End Result) programs. The current research programs are as follows:

- Molecular Imaging
- Molecular Therapeutics
- Population Sciences and Disparities
- Tumor Biology and Microenvironment

Bioengineering Center

818 W. Hancock, 2208 Bioengineering Center
313-577-0252
https://engineering.wayne.edu/bme/research/

The mission of the Bioengineering Center is to promote fundamental discoveries, design and development of technologies and education in the understanding, mitigation and prevention of impact associated injuries.

The bioengineering research program at Wayne State University began in 1939 as an interdisciplinary effort between the College of Engineering and the School of Medicine. The Bioengineering Center was first established by Professor Herbert Lissner as the Biomechanics Research Center in the Department of Engineering Mechanics. In 1963, the Center was chartered by the Board of Governors of Wayne State University and appointed Professor Lissner as its first director.

Over the past 68 years, the Center has developed into a modern research powerhouse with the principal aim of promoting fundamental discoveries, designing and developing technologies for human safety, and educating students in the understanding, mitigation, and prevention of impact associated injuries. Our research includes both basic science research (such as studying the mechanisms of brain injury, biomaterial properties of the kidney capsule subject to high-speed loading, and etiology of low back pain) and practical safety research (such as evaluating the potential adverse effects of airbags and how the helmet protects an athlete from concussion). In recent years, we are applying the knowledge gained during the past half century of research in impact biomechanics towards the development of computer models of human body segments and of
the whole body. These tools are being used to design countermeasures to reduce injury.

**Center for Automotive Research**

*Director: Naiem Henein, Ph.D.*

2121 Engineering
313-577-3887
https://automotiveresearch.wayne.edu/

The Center for Automotive Research (CAR) was established in 1980 to advance, promote and support research and academic courses in areas of interest to the automotive industry. Faculty and graduate students from the College of Engineering and local industry participate in the research programs conducted at the Center.

Current research areas include the auto-ignition, combustion and emission characteristics of petroleum, alternate and renewable fuels in spark-ignition and compression-ignition engines, under different operating conditions. The research thrust areas are auto-ignition and combustion in engines, conventional, alternate and renewable fuels, cold startability at low ambient temperatures, sensors, diagnostics, electronic controls, engine dynamics, friction and wear, and simulations and mathematical modeling.

The research in the Center combines theoretical and experimental investigations. Theoretical research deals with fundamental processes of thermodynamics, heat transfer, mass transfer, and combustion kinetics, applied to combustion engines. CFD and chemical kinetics codes are used to determine the flow in the combustion chamber, the development of the auto-ignition and combustion processes, the radicals concentrations and the formation of the different engine-out emission species. In addition to the cold room and optical engine test cells, experimental research is conducted under warmed up and loaded engine conditions in six dynamometer test cells equipped with electric dynamometers, flow-meters, pressure transducers, charge amplifiers, shaft encoders, gas analysis equipment, particulate mass and characterization equipment, gas chromatograph, FTIR spectrometer, mass spectrometer, fast response flame ionization detectors, fast-response NO detectors, and fast response CO and CO2 detectors and high speed data acquisition systems.

**Center for Excellence and Equity in Mathematics**

*Director: Steven Kahn, Ph.D.*

1309 Faculty Administration Building
313-577-2558
http://clas.wayne.edu/ceem/

The Center for Excellence and Equity in Mathematics, in the College of Liberal Arts and Sciences, is a research and educational center with a two-fold mission: to find ways to significantly improve the quality of K-12 and introductory college-level mathematics instruction across the United States; and, by using mathematics as a tool, to provide students from inner cities and underrepresented minority groups with the kinds of educational and lifetime opportunities that should be available to all students.

The Center currently operates five core programs: the WSU Math Corps, an outreach program serving Detroit middle and high school students; the WSU Middle and High School Math Network, which provides day to day instructional and/or operational resources to Detroit are a middle and high school math departments; the Math Corps Learning Community at WSU, a University support and retention program for Math Corps "kids" now attending WSU; and the Emerging Scholars Program (ESP), a WSU honors-level calculus and pre-calculus program; and the Rising Scholars Program (RSP), serving WSU students at the developmental level.

**Center for Latino/a and Latin American Studies**

*Director: Jorge L. Chinea, Ph.D.*

3324 Faculty/Admin. Bldg.
313-577-4378
https://las.wayne.edu/

The Center for Latino/a and Latin American Studies is a multi-service unit engaged in teaching, research, and service. The Center plays an important role in the urban mission of Wayne State University and involves four components:

1. The Center hosts two learning communities: the CBS Scholars Program and the College-to-Career Program. The first one recruits students into the University, facilitates their transition between high school and college, and promotes increased retention. The second program supports students through completion of their degrees and beyond, especially in the areas of career development and graduate school preparedness. It also offers courses and related educational activities for students interested in Latino and Latin American Studies.

2. It promotes research on issues relevant to the Latino/a community, especially in the urban and workplace environment; and Latin American cultural studies and current issues.

3. It creates and fosters the interaction and exchange of personnel and resources between the University and the Latino/a community; and it serves as a source of expertise on Latino issues to the larger metropolitan community.

4. As an advocate for the awareness and advancement of Latino/a issues within the University, the Center contributes to the University’s continuing efforts to create a richer multicultural campus environment.

**Center for Molecular Medicine and Genetics**

*Director: Lawrence I. Grossman, Ph.D.*

3127 Scott Hall, 540 E. Canfield
313-577-5323
https://genetics.wayne.edu/

The Center for Molecular Medicine and Genetics conducts and fosters interdisciplinary health-related research and research training in three focal areas of molecular biology:

1. Structure and function of macromolecules: chemical synthesis and analytical characterization of nucleic acids and protein products with scientific and commercial potential; and genetically-engineered products with new or improved functions.

2. Structure and function of human, viral, mitochondrial and other genomes; DNA sequences of genes and their regulatory regions; genetic and physical maps of simple and complex genomes, with emphasis on those important in human health and disease.

3. Development and characterization of animal models of human disease: use of transgenic and knockout technologies in vertebrate and invertebrate model organisms to elucidate the etiology and pathophysiology of major diseases.

The research and research training activities promoted by the Center involve its own research faculty and faculty from at least twelve...
departments throughout the University. The Center is supported by the University’s Research Excellence and Economic Development Fund.

**Center for Peace and Conflict Studies**  
**Director:** Frederic S. Pearson  
2320 Faculty/Administration Building  
313-577-3453  
https://cpcs.wayne.edu/

On November 20, 1965 the Center for Teaching about War and Peace opened its doors under the leadership of Director Russell Broadhead and a committee of distinguished faculty members. The mission then was to provide interdisciplinary, University wide, academic programs in the field of domestic and international conflict and peace issues. In 1987 the WSU Board of Governors, building upon this rich heritage, created The Center for Peace and Conflict Studies.

The mission of the Center for Peace and Conflict Studies is to develop and implement projects, programs, curricula, research, and publications in areas of scholarship related to international and domestic peace, war, social justice, arms control, globalization, multicultural awareness and constructive conflict resolution. The Center addresses this mission in three ways. CPCS supports undergraduate and graduate student excellence through its academic programs. CPCS staff and students engage in scholarly research initiatives on aspects of domestic and international conflict management. CPCS provides community outreach programs that emphasize: conflict resolution, development of inter-cultural understanding, and enhance local knowledge of global affairs.

**Center for Social Work Research**  
**Director:** Joanne Sobeck, Ph.D.  
5447 Woodward  
313-577-4439  
https://socialwork.wayne.edu/research

Chartered in 2008, the goals of the Center for Social Work Practice and Policy Research are to:

1. conduct research that advances social work practice and policy in settings that range from urban neighborhoods to international contexts;
2. develop relationships with the purpose of identifying and expanding research opportunities and promoting Center sustainability; and
3. foster a commitment to the dissemination of findings that inform social work practice and expand the body of social work knowledge.

The Center fosters a culture for research within the School of Social Work by creating an infrastructure of resources for faculty scholarship and research including pre- and post-award grant support. In addition, the Center facilitates opportunities for faculty and staff engagement with community partners. The Center strongly believes in using interactive processes where researchers, practitioners and policy makers can find new ways to work together, generate innovative ideas, share knowledge and solve problems. Through our Strategic Partners Project and other Center activities, the School of Social Work continues to demonstrate its commitment to the Detroit area, researching and developing real solutions for real world problems. To this end our faculty and staff are engaged in evaluation research, grant writing, instrument development and other research-related service projects with community agencies.

Translating research and disseminating social work knowledge among practitioners is critical. The Center implements a variety of strategies to synthesize recent research findings into serviceable formats for practitioners including an enhanced web page, policy and practice briefs, and researcher-practitioner dialogue meetings. Learning communities are also provided for students interested in applying research methods to social work contexts.

**Center for the Study of Citizenship**  
**Director:** Mark Krueman, Ph.D.  
3157 Faculty/Admin. Bldg.  
313-577-2939  
http://www.clas.wayne.edu/citizenship

The Center for the Study of Citizenship at Wayne State University promotes research and intellectual exchange about citizenship among a global community of scholars; students; political, community, and business leaders; and the general public. The Center fosters research in the emerging interdisciplinary field of citizenship studies locally, nationally, and internationally. In particular, the Center encourages analysis of the relationship between citizens and the political, social, economic, and cultural communities of which they are a part. Toward these ends, the Center hosts the leading international conference in citizenship studies; publishes a book series, Citizenship Studies, in collaboration with the Wayne State University Press; sponsors a discussion network with over 2000 subscribers from over 30 countries; hosts an annual civic festival in September; and sponsors public programs about citizenship.

**Center for Urban Studies**  
**Director:** Lyke Thompson, Ph.D.  
Managing Director: Charo Hulzeza, M.P.A.  
5700 Cass Avenue, Room 2207 Academic/Administration Building  
313-577-2208  
http://www.cus.wayne.edu

The Center for Urban Studies improves understanding of and provides innovative responses to urban challenges and opportunities. The Center conducts and disseminates research, develops policies and programs, and provides training, capacity-building, and technical assistance. The Center participates in defining and influencing local, regional, State, and urban policy. The Center’s current initiatives have a real, substantial and lasting impact on Detroit’s challenges across a number of areas ranging from crime reduction to healthy homes. Committed to serving Detroit and its metropolitan area, the Center exemplifies Wayne State’s urban research and service mission. The Center employs a highly trained multi-disciplinary team consisting of social science Ph.D. and master’s-level researchers, as well as WSU graduate and undergraduate students.

**Center to Advance Palliative-Care Excellence (CAPEWAYNE)**  
4201 St. Antoine, Suite 5C-UHC  
313-576-3997  
http://www.capewayne.med.wayne.edu

CAPEWAYNE is an inter-disciplinary academic center bringing together scholars, educators, researchers and clinicians dedicated to improving the quality of end-of-life care. The main focus areas of this center are education, research and clinical practice, all of which permeated by the field of humanities.

**Education:** The Center offers an end-of-life curriculum for students, trainees and clinicians across disciplines and levels of training. A major
undertaking of the Center is to offer a highly regarded regional conference on Palliative Care annually.

**Research:** The Center gathers researchers who have a shared interest in the conduct of collaborative, interdisciplinary interdepartmental research.

**Clinical Practice:** The Center provides resources to clinicians across disciplines and settings that practice palliative care, through a paradigm of sharing and ensuring optimization of clinical care in our community.

**Cohn-Haddow Center for Judaic Studies**

*Director:* Howard Lupovitch, Ph.D.
2311 Faculty/Admin. Bldg., 656 W. Kirby
313-577-2679
https://judaicstudies.wayne.edu/

Established in 1988 as a cooperative venture between Wayne State University and the Jewish Foundation of Metropolitan Detroit/United Jewish Foundation, the Cohn-Haddow Center embodies the fruitful relationship that has long linked the University to the metropolitan Jewish community. As such, it is a model for universities and Jewish communities in a dynamic urban setting. The Cohn-Haddow Center serves as a resource to the University and to the larger community in Jewish studies and related areas. It sponsors a broad array of programs and activities related to several of the University’s wide-ranging missions. From biannual international conferences to smaller symposia, incidental lectures, and broadly-defined cultural events, the Cohn-Haddow Center has introduced the University and community to some of the world’s most distinguished academics and eminent writers, poets, artists and musicians.

**C.S. Mott Center for Human Growth and Development**

*Director:* Gil G. Mor, M.D., Ph.D.
275 E. Hancock
313-577-1337
https://mott.med.wayne.edu/

The C.S. Mott Center for Human Growth and Development, a basic, research facility housing over 24,000 sq. ft. of laboratory space, is located on the medical campus of Wayne State University School of Medicine.

Initially occupied in 1973, the building has been totally renovated through a 5-phase reconstruction project spanning the years of 2001-2008. In addition to individual Ob/Gyn investigators’ laboratories/offices and animal facilities, the renovated building now also houses the research laboratories of the Perinatology Research Branch (PRB) of the NICHD, the Implantation Laboratory of the Reproductive Biology and Medicine Branch, NICHD Intramural Research Division, the Wayne State University Genomics Facility, a Bioinformatics Center and a Systems Biology section. It also contains one of the Ob/Gyn Department’s Clinical Research areas.

**Damon J. Keith Center for Civil Rights**

*Director:* Peter J. Hammer, J.D., Ph.D.
471 W. Palmer St.
313-577-3620
https://law.wayne.edu/keith-center/

Located within Wayne State University’s Law School, the Damon J. Keith Center for Civil Rights addresses the civil rights needs of southeast Michigan and beyond. The Keith Center’s mission is to promote the educational, economic and political power of underrepresented communities in urban settings.

Our communities need institutions that call attention to today’s civil rights challenges and that nurture social conscience. The Keith Center strives to be one such institution: a hub for civil rights teaching, research and action, and a place that fuels the next generation of civil rights leaders.

At the Keith Center, stakeholders gather to analyze policy, law students teach a civil rights curriculum to high school students, and leaders dive into the equity issues of the day, such as tax foreclosures, water shutoffs and police-community relations. We welcome the public for lectures by civil rights icons, we support community-based organizations, and we publish scholarship about how the law and social justice impact one another.

**Developmental Disabilities Institute**

*Director:* Sharon Milberger, Sc.D.
Leonard Simons Building
4809 Woodward Avenue, Suite 268
313-577-2654 or 888-978-4334
https://ddi.wayne.edu/

The Developmental Disabilities Institute is one of a national network of over sixty University Affiliated Programs, nationally and in U.S. territories. The Institute’s mission is to contribute to the development of inclusive communities, which enhance the quality of life of people with disabilities and their families through a culturally-sensitive statewide program of interdisciplinary education, community support and services, and research and dissemination of information.

Staff and faculty engage in technical assistance, training, and research programs throughout Michigan via collaborative efforts with schools, community agencies, community colleges, and other Universities. Over 10,000 individuals with disabilities benefit from these activities annually. The Institute offers a wide range of opportunities for students and faculty to engage in state-of-the-art community-based research, education, and technical assistance.

The Institute develops activities and projects based on needs of persons with disabilities and the communities in which they live and work. The Community Advisory Council, composed of representatives of twenty-five key statewide organizations, meets bi-annually to provide information and assistance to Institute staff and faculty in establishing priorities and evaluating activities.

**Douglas A. Fraser Center for Workplace Issues**

249 Walter P. Reuther Library, 5401 Cass Ave.
313-577-2191
https://labor.wayne.edu/center/fraser/https://labor.wayne.edu/center/fraser/

The Douglas A. Fraser Center for Workplace Issues is a core part of Labor@Wayne. It was chartered by the University Board of Governors in 1998 to honor Douglas Fraser, former president of the United Automobile Workers (UAW). The Center has been endowed by major gifts from the UAW, General Motors Corporation, Chrysler Corporation, and Ford Motor Company, and generous gifts from many other organizations and individuals, including the United Steelworkers of America. The mission of the Fraser Center is to generate knowledge and information about best practices in the workplace through effective union representation. The Center is guided by the external and internal advisory Boards of Labor@Wayne. It supports research through the Fraser Fellows, Fraser Scholars, Fraser Paper Series, and Fraser Workshop activities. It sponsors the annual Labor Leaders on Labor Forum which honors nationally
prominent leaders for their contributions to working people and families. The Fraser Center also convenes numerous conferences and events to bring academics, labor leaders, business leaders, and policymakers together to discuss important workplace and public policy topics. It focuses on manufacturing, healthcare, and the public sector. The Fraser Center supports various topical White Papers on key issues such as employee engagement through labor-management joint initiatives.

**Humanities Center**

**Director:** Walter F. Edwards, Ph.D.
2226 Faculty/Administration Building; 656 W. Kirby; 313-577-5471
https://research2.wayne.edu/hum/

The mission of the Humanities Center is to nurture interdisciplinary, transdisciplinary and intradisciplinary work in the humanities and the arts through competitions, conferences, discussions, and programs that promote excellence in research and creative endeavors through rigorous peer review of proposals. The Center provides funding support to both faculty and students and involves community participants. The Center supports the University's urban mission. Through its various programs, the Center brings humanists of diverse talents and interests together for conversation and collaboration, and fosters innovation and creativity across the humanistic disciplines.

The Humanities Center provides funding support to both faculty members and students. Two of the Center's most prominent faculty programs are the Marilyn Williamson Endowed Distinguished Faculty Fellowship (MWEDF) and the annual themed Faculty Fellowship Competition. The Center awards either one or two Williamson fellowships a year, each worth $20,000, depending on the funds available in the budget. Other faculty fellowship programs include an annual themed Faculty Fellowship Competition with between eight and ten recipients awarded up to $6,000 each. Prominent student programs are the Doctoral Dissertation Fellowship and the Graduate Travel program. The Doctoral Dissertation Fellow will receive $15,000 plus health care coverage if it is requested. Up to three smaller awards of $500 may be made at the discretion of the Center to applicants for the award. The Graduate Travel program encourages graduate students in the humanities and the arts to present their research or artistic work at national conferences and exhibitions by offering up to $300 in travel assistance to applicants. Please check the Humanities Center Web site for additional programs that provide funding opportunities for faculty.

**Institute of Environmental Health Sciences**

**Director:** Melissa Runge-Morris, M.D.
Integrative Biosciences Center, 6135 Woodward Ave.
313-577-6590
https://iehs.wayne.edu/

The Institute of Environmental Health Sciences (IEHS) is the originator of the Center for Urban Responses to Environmental Stressors (CURES). IEHS is a core of research scientists who use state-of-the-art technologies to identify the central mechanisms that lead to environmentally-related disease.

CURES is a diverse team of scientists, clinicians, public health professionals, educators and community leaders working together to build a healthy living and working environment in the City of Detroit. Located in the heart of the “motor city” and situated on the Wayne State University urban campus, the CURES motto is “Gateway to a Healthy Detroit.”

**Institute of Gerontology**

**Director:** Peter Lichtenberg, Ph.D., A.B.P.P.
87 E. Ferry St., 226 Knapp Bldg.
313-664-2600
https://iog.wayne.edu/

The Institute of Gerontology was created in 1965 by the Wayne State University Board of Governors in response to a mandate by the State of Michigan.

The Institute of Gerontology strives to contribute relevant research and education devoted to enhancing the quality of life of older people, especially those who reside in metropolitan Detroit and the State of Michigan. The interdisciplinary team of faculty partner with academic colleagues, trainees, community organizations, and citizens to better understand aging and health. It works to promote the integration of gerontology into the broader research, teaching, and service activities of Wayne State University, and employs analytical and conceptual advances in the understanding of aging and related processes, with specific attention focused on health and health disparities in our urban environment.

**Institute for Learning and Performance Improvement**

**Director:** Ingrid Guerra-López, Ph.D.
399 Education Bldg.
313-577-5139

The mission of the Institute for Learning and Performance Improvement (ILPI) is to improve community, organizational, and individual performance in the workplace. To this end, one of ILPI's aims is to bridge research and practice through the application of systematic and scientific processes for measurably improving performance. Therefore, ILPI offers rigorous performance improvement methodologies that are based on empirical evidence, and have the scalability and flexibility to fit a variety of contexts and situations in private and public sectors. ILPI personnel are internationally recognized experts in their fields with both theoretical and applied experience in a variety of areas including: needs assessment; performance, program, and impact evaluation; performance measurement and management systems, including dashboard design; instructional and performance design; change creation and change management; training and development, including interactive technologies; leadership coaching; and customer and employee surveys.

**Labor Studies Center**

249 Walter P. Reuther Library, 5401 Cass Ave.
313-577-2191
https://labor.wayne.edu/center/labor-studies/

The Labor Studies Center is a comprehensive labor education center committed to strengthening the capacity of organized labor to represent the needs and interests of workers, while at the same time strengthening the University’s interdisciplinary research and teaching on labor and labor relations issues. The Center’s primary areas of research and practice include: training and technical assistance to unions on labor relations and workplace issues; an undergraduate labor studies major and internship program; interventions to increase the organizational effectiveness of unions; the development and diffusion of constructive
labor-management relations practices, particularly in the public sector; the formation and institutionalization of labor-community coalitions; and the impact of lean production systems on workers and labor relations practice in the North American auto industry.

**Merrill Palmer Skillman Institute**

*Director:* Peter Lichtenberg, Ph.D.
71 East Ferry Ave.
313-664-2500
https://mpsi.wayne.edu/

The Merrill-Palmer Skillman Institute is an interdisciplinary research institute focusing on urban children and families. It has a long and distinguished history as a research and educational institution, serving as a pioneer in the field of child development and early education. Since it became a part of Wayne State University in 1982, the Institute has encouraged collaborations among faculty from many departments within the University.

The Institute emphasizes research, research training and community engagement and service in the areas of children’s health and development. Current research strengths range from pre-natal exposures and child development, infant mental health, cognitive development of high risk infants as well as adolescent health and development. The service programs of the Institute are an outgrowth of its research mission. MPSI operates one of the nation’s oldest preschools. Community outreach and engagement through MPSI’s Healthier Urban Families Program includes training of mental health workers who serve very young children in the care of public and non-profit agencies; consultation to education and child care organizations; workshops for teachers, parents and the public; and the annual Metropolitan Detroit Teen Conference.

**Infant Mental Health:** Dual-title degree programs in infant mental health are offered in conjunction with degrees sponsored by the Schools of Nursing, Education and Social Work. For curricula pertaining to these programs, please refer to the individual program and school/college sections in this bulletin.
Mike Ilitch School of Business

Dean: Robert Forsythe

The Mike Ilitch School of Business is a professional school concerned with the theory and practice of business administration. The primary objectives of the School are to provide a contemporary education of high quality for business administration students, to develop new knowledge through research and to encourage application of its findings. To this end, in addition to their instructional services, the faculty has been a continuing source of notable scholarly publications and it is a special strength of the School that this research faculty teaches both undergraduate as well as graduate courses.

This School has a tradition of instructional programs exemplifying high standards for both faculty and students as is acknowledged by the accreditation of the AASCB International (the Association to Advance Collegiate Schools of Business) for both the baccalaureate and master’s degree programs. The School provides relevant, comprehensive business education through programs that serve recent high school graduates as well as more mature student populations. The student body is racially and ethnically diverse, commuting, and often working and raising families. To meet the needs of these students, the School schedules classes on campus, at the University Oakland Center and online.

The Mike Ilitch School of Business also recognizes its obligation to community service. As part of an urban university, the School makes a special commitment to foster basic and applied research that will benefit business enterprises. Equally important is the dedication to excellence in the instructional programs that create and support the business leadership that is critical to the continuing revitalization of southeastern Michigan.

Mission Statement

Our mission is to prepare our students for challenging and rewarding careers, advance the boundaries of scholarly and practitioner knowledge, and enhance the economic vitality of the city of Detroit, the state of Michigan and beyond through our programs, research and community engagement.

Undergraduate Program

The undergraduate program begins with students acquiring an educational foundation in several introductory business courses and in the basic sciences and the humanities. During the third and fourth years, students follow a program designed to provide professional education in the major. Students may select majors in accounting, finance, global supply chain management, management, information systems management, and marketing. Degrees of Bachelor of Science in Business Administration or Bachelor of Arts in Business Administration are awarded; post-bachelor certificates in accounting and information systems management are also offered. For additional undergraduate information, consult the Wayne State University Undergraduate Bulletin.

Graduate Program

The program leading to the Master of Business Administration degree educates graduate students for professional careers in business administration. The program requires a minimum of thirty-six graduate credits beyond the pre-professional foundation requirements. Graduate courses are offered at both on- and off-campus locations during the late afternoon and evening, and online. It is possible for students to complete their M.B.A. online, onsite, or through a combination of online and onsite courses.

The program leading to the Master of Science in Accounting is designed to prepare individuals for careers in accounting in public accounting firms, private industries, financial institutions, and government and nonprofit organizations. The program requires a minimum of thirty credits beyond the foundation requirements. Courses are offered in the late afternoon and evening.

The program leading to the Graduate Certificate in Business is designed to equip non-business degree holders with relevant business knowledge pertaining to the daily operations of business in corporate, non-profit and entrepreneurial settings. The program requires a minimum of thirteen credits. Courses are offered in the late afternoon and evening or online.

The Doctor of Philosophy in Business Administration prepares persons interested in careers in research and university teaching. The core goals for Ph.D. students are the creation of new knowledge through research and excellence in teaching. This program offers concentrations in finance, management, and marketing.

Accreditation

Mike Ilitch School of Business programs are accredited as follows:

School: Accreditation Council of AASCB International: The Association to Advance Collegiate Schools of Business. (AACSB)
Academic Regulations for the Mike Ilitch School of Business

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 38) of this bulletin. The following additions and amendments pertain to the Mike Ilitch School of Business. Graduate students are advised that, in addition to the policies, procedures, and rules specified by the Mike Ilitch School of Business, other regulations and requirements of Wayne State University's Graduate School may apply.

The Graduate Programs Office is responsible for credential evaluation, admissions processing, advising, and graduation certification of business administration graduate students. In addition, personnel prepare and distribute the Plan of Work for students enrolled in graduate programs. Any student seeking academic, vocational or personal counseling should make an appointment to see a member of the counseling staff: 313-577-4511.

Academic Standing

Students who have been admitted to the Graduate Program on a 'qualified' or conditional basis are expected to remove that status by the completion of the first twelve credits in course work with a minimum 3.0 grade point average. Failure to do so will result in dismissal from the program.

Students admitted to regular status or those who have attained regular status following a 'qualified' admission, will be given an academic warning at any time their graduate grade point average falls below 3.0. After an academic warning, students will be permitted nine credits to restore their cumulative grade point average to a 3.0 level. Failure to do so within this credit limit will result in dismissal from the program. The second (or subsequent) time(s) a student is placed on probation, he or she is subject to immediate dismissal from the Mike Ilitch School of Business.

Advisors

No credit will be allowed for concentration courses taken below the 7000-level or courses taken outside of the Mike Ilitch School of Business without prior written approval of the Graduate Director.

Students may not modify core course requirements without approval of the Graduate Director.

The Graduate Director retains final authority for the approval of all concentration courses.

For advising, students should contact the Graduate Programs Office at 313-577-4511.

Application for Degree

Prior to the semester in which a student intends to graduate, an online degree application must be filed with the University Records Office, 5057 Woodward. Applications and instructions are available on the University website (https://wayne.edu/commencement/apply-for-graduation/).

Attendance Policy

Regular attendance is a necessary condition for success in university study. Course content includes classroom lecture and discussion, certain aspects of which may not be covered in examinations, quizzes, term papers, or homework assignments. Each Instructor will announce his or her attendance standards at the beginning of the term.

All candidates for degrees are expected to be present at commencement.

Conduct

Each student is subject to the Student Due Process statute governing student activities and student behavior. Furthermore, it is the responsibility of each student to adhere to the principles of academic integrity. Academic integrity includes the requirement that a student is honest with him/herself, fellow students, instructors, and the University in matters concerning his or her educational endeavors. For example, a student should not falsely claim the work of another as one's own, or misrepresent him/herself so that the measures of one's academic performance do not reflect his/her own work or personal knowledge. Assignments submitted for any class are expected to be original, not resubmissions of work submitted in a previous or concurrent class.

If there are reasonable grounds to believe that a student has disregarded the regulations or student responsibilities, he or she may be disciplined. Such discipline may include suspension or dismissal, but no dismissal will be directed without reasonable opportunity for an appropriate hearing, as provided in the Student Due Process statute.

For more information, please reference the University Code of Conduct (http://doso.wayne.edu/assets/codeofconduct.pdf) or the Mike Ilitch School of Business Code of Ethics.

Course Level Requirement

Graduate business students are required to take all core and concentration/elective course work in classes reserved exclusively for graduate students. At Wayne State University, these classes are numbered at the 7000 level or above. A graduate student must obtain the specific written approval of the Graduate Officer prior to registering for a course that is not reserved exclusively for graduate students. Credit will not be applicable to the degree if prior approval has not been obtained.

Course Sequencing

The M.B.A., M.S.A. and M.S.T. curricula have been designed to provide logical sequencing of subject matter. This means that students must observe all course prerequisites and limitations, and must complete all required foundation courses prior to beginning any core or concentration/elective courses.

The Strategic Management course (BA 7080) is an integrative capstone course that may only be taken in the last twelve credits, and only after completion of the other five core courses in the M.B.A. curriculum.

Similarly, the Seminar in Tax and Accounting Policy (ACC 7998) must be elected as part of the final nine credits in the M.S.A. and M.S.T. student's program.

Students who do not adhere to these regulations will be administratively withdrawn from the out-of-sequence course(s) and may not be allowed to register for further course work.

Exception: A student taking his/her last foundation course(s) may simultaneously enroll for one or more core courses, if the relevant foundation course or prerequisite courses for the core course(s) has been satisfactorily completed.

Course Repetition Policy

Graduate business students may not routinely repeat courses taken as part of their degree program requirements. While the repetition of certain required courses may be necessary if failing or unsatisfactory grades are earned, this should not be done without first consulting the Graduate Programs Office at 313-577-4511.
Upon petition by the student, the Graduate Committee may authorize the repetition of two graduate courses during a student's graduate business program, whereby the grade earned in the initial course attempt is deleted from the grade point total and grade point average calculations.

**Directed Study**

A student can apply up to three credits of directed study course work to a Mike Ilitch School of Business degree. Credit allowances (1-3) are predicated on the amount of time and effort to be spent in the study. Prior to enrollment, students must have completed all core courses in their respective graduate program (other than the capstone course) with a passing grade. If enrolled in the Master of Science in Accounting or the Master of Science in Taxation programs, students must have completed at least twelve credits of graduate accounting courses or obtained the approval of the Chairperson of the Department of Accounting.

**Enrollment Eligibility**

Graduate-level courses offered by the Mike Ilitch School of Business are open only to students who have been formally admitted to a Wayne State University graduate program or admitted as a graduate guest student. Students having undergraduate, post-bachelor, or any non-matriculated status are not eligible to take graduate courses. Graduate business courses include all courses numbered 6000-6100 and 7000 and above. All electives must be taken in accordance with an approved Plan of Work.

**Grade Appeal Procedure**

Students disputing a final grade should first contact the instructor of the course informally. Should the dispute remain unresolved, the student may initiate a formal appeal. A copy of the Mike Ilitch School of Business grade appeal procedure is available in the Graduate Programs Office, 103 Prentis Building, and on the School's website (http://ilitchbusiness.wayne.edu/).

Non-grade-related grievances should be brought directly to the appropriate departmental chairperson or to the Graduate Programs Office. Additionally, the University Ombudsperson (p. 60) is available to all students for assistance in the resolution of University-related problems.

**Internships**

Graduate Students can earn up to three credits in internships (ACC 7990, FIN 7890, GSC 7890, ISM 7890, MGT 7895, or MKT 7890) offered as S or U grades only, which can be applied toward their elective courses. In order to satisfy requirements for these courses, the student is expected to perform assigned tasks and responsibilities in a professional manner under the supervision of an employer for a minimum of 160 hours during the semester, and abide by the rules and regulations established by the employer and expected of all employees. The student commitment is for the entire semester even if the 160 hours have been completed prior to the end of the semester. Further, to be eligible, students must have completed all core courses in the respective graduate program (other than the capstone course) with a passing grade. If enrolled in the Master of Science in Accounting or the Master of Science in Taxation programs, students must complete at least twelve credits of graduate accounting courses or obtain the approval of the Chair of the Department of Accounting in order to enroll in an internship.

**‘Incomplete’ Marks**

The mark of ‘I’ which is not converted to a letter grade within one year from the time it was received will be changed to an ‘F’ (failure).

**Maximum Credit Load**

A student employed full-time will normally not register for more than six to nine graduate credits. Graduate assistants are required to register for at least eight credits each semester.

**Online Courses**

The Mike Ilitch School of Business offers online sections of some courses available to Traditional M.B.A. students. Students who enroll in online sections of any M.B.A. course should anticipate that, at the discretion of the instructor, they may be required to attend an in-class session for the final examination in the course.

**Passed-Not Passed Registration**

Graduate students may not take graduate program requirements on a passed-not passed basis.

**Plan of Work**

All course work must be in accordance with an approved Plan of Work on file in the Graduate Programs Office, 103 Prentis Building. No credit will be granted for graduate courses in business administration taken at Wayne State University prior to admission to the graduate program in the Mike Ilitch School of Business. Only the Graduate Committee is authorized to approve changes affecting a student’s foundation requirements or core courses.

**Time Limitation for Program Completion**

Students have a six-year time limit to complete all 7000-level requirements. The six-year period begins at the start of the semester during which the student takes his/her first 7000-level courses. Students who expect to exceed the time limitation must file a written request for an extension with the Graduate Programs Office. The School reserves the right to re-validate credits which are over-age. In re-validation cases, the Graduate Committee will set a terminal date for completion of all degree requirements, including such additional requirements as may be prescribed to re-validate the over-age credits.

**Transfer of Core and Concentration/Elective Courses**

Graduate transfer credit for core and concentration/elective courses from either a Wayne State University graduate program or a graduate program at another institution is not routinely granted. Students with a non-business undergraduate degree may only petition to transfer credit from an AACSB accredited M.B.A. program. A petition for transfer credit must be initiated by the student in the form of a letter to the Graduate Committee, prior to the completion of the first twelve credits in graduate course work. To be eligible for consideration for transfer of credit, the following conditions must be satisfied:

1. The course must have been taken at an AACSB accredited college or university;
2. The course must have been taken in a class reserved exclusively for graduate students;
3. A letter grade of ‘B’ (3.0) or higher must have been awarded; passed-not passed credit is not acceptable. A letter grade of ‘Bminus’ or less is not acceptable.
4. The course must be relevant to the student’s Plan of Work as approved by the Graduate Committee.
5. The course may not be more than six years old at the time of graduation.
6. The course cannot have provided credit toward a prior degree.
A maximum of six semester credits (normally two courses) may be considered for transfer credit. In addition to evidence regarding the above six conditions, the student must submit additional supporting materials concerning any proposed transfer course. Course syllabi, examinations, class notes, texts, and the like constitute such materials.

Waiver of Course Prerequisites
Requests for waiver of course prerequisites are not routinely granted. Waiver requests must be made in writing to the Graduate Committee and must include full documentation of the case. No waiver will be granted if the supporting documentation consists solely of professional experience proposed in lieu of course work.

Waiver of Foundation Courses
Students are allowed to waive foundation course requirements (except BA 6005) based on equivalent course work taken at a regionally-accredited college or university. A grade of "C" (2.0 g.p.a.) or above must have been earned in this course work. Normally these waivers are granted after review of the student's transcript(s). Students who believe additional waivers are warranted must submit evidence of course equivalency, including course syllabi, class notes, and textbooks. Waivers will not be granted on the basis of professional experience.

Withdrawals from Class
Students should consult the instructor as to his/her policy on withdrawal from class, as well as the Drop/Add procedures (p. 47).

AGRADE - Accelerated Graduate Enrollment
The Mike Ilitch School of Business has established an accelerated combined undergraduate and graduate program (AGRADE) whereby qualified students in the Mike Ilitch School of Business may enroll simultaneously in undergraduate and graduate courses of the School. A maximum of twelve credits may be applied towards both undergraduate and graduate degrees in a student’s major field if the major department is an AGRADE participant. Those who elect the ‘AGRADE’ program may expect to complete the Bachelor’s and Master’s degrees in five years of full-time study.

AGRADE accelerated graduate program option

Save money and time toward your graduate business degree with the Accelerated Graduate Enrollment (AGRADE) program.

Highly qualified Wayne State University Mike Ilitch School of Business students are eligible to participate in the AGRADE program. AGRADE students can cut substantial time and as much as one-third off the total cost of a WSU graduate business degree program by applying up to 12 credits toward both their undergraduate and select graduate degrees.

AGRADE benefits
• Earn graduate credits at undergraduate tuition rates
• Apply up to 12 credits of selected graduate courses (https://ilitchbusiness.wayne.edu/students/agrade.php#agradecourses) as dual credit for undergraduate and eligible graduate programs
• Option to move immediately to the graduate program or rejoin the program later
• Earn both your bachelor’s and master’s degrees in as little as five years

AGRADE requirements
• Undergraduate major in accounting, finance, global supply chain management, information systems management, management or marketing
• Junior or senior standing (~90 credits earned)
• Overall GPA of 3.5 or higher at WSU
• Major GPA of 3.6 or higher at WSU
• Meet with undergraduate and graduate advisors to discuss program requirements
• Complete the Dual Credit Enrollment Form
• Courses apply to M.B.A., M.S.A., master of science in finance or executive master of science in automotive supply chain management degrees only

Transfer of courses
Only those AGRADE-approved courses in which the student has earned a B or higher will transfer to the graduate transcript. Once in the master’s program, students may be required to repeat an AGRADE course in which they earn less than a B grade. AGRADE courses will not be transferred to the student’s graduate transcript until one semester of graduate course work has been successfully completed.

Approved AGRADE courses
For students approved to participate in the AGRADE program, four of the following courses from any one of the program areas listed below may be counted toward both their bachelor’s degree and M.B.A. All courses are three credits.

Take no more than four courses or 12 credits from any one of the following program areas.

Eligibility

‘AGRADE’ applicants must have an overall g.p.a. of 3.5 through their junior year. Applicants are also expected to have performed at a superior level in their major, as determined by the major department and reflected in a g.p.a. in the major of at least 3.6 at the time of application. Students approved for AGRADE cannot complete Senior Rule.

Application

A student seeking ‘AGRADE’ status should present to the Mike Ilitch School of Business Graduate Programs Office all of the materials which that department requires for normal graduate admission, EXCEPT for the GMAT or Graduate Record Examination (GRE). Specific graduate admission requirements can be found in this bulletin or obtained from the Graduate Programs Office of the Mike Ilitch School of Business at 313-577-4511.

The earliest date by which a student may apply for the ‘AGRADE’ program is during the semester in which he/she completes ninety credits toward the undergraduate degree. AGRADE application deadlines are the same as graduate admissions deadlines as posted on the Mike Ilitch School of Business Admissions Web Page.

AGRADE Credits

Students may elect a minimum of three and a maximum of twelve ‘AGRADE’ credits. These will be used to complete the baccalaureate degree as well as to serve as the beginning of graduate study. Upon formal admission to a master’s program, ‘AGRADE’ credits are transferred as if they were graduate credits transferred from a graduate program at another university. The remaining graduate credits required for the
Accounting (M.S.A.)

Admission Requirements

Admission to any graduate program is contingent upon admission to the Graduate School (p. 35). In addition, applicants to the M.S.A. program must comply with the following:

Admission to the Master of Science in Accounting (M.S.A.) program is limited to students who demonstrate high promise of success and hold a baccalaureate degree in business administration, a discipline area of business administration, or accounting from regionally accredited institutions. Several measures of probable success that may be considered in the evaluation of an applicant include but are not limited to:

1. Performance on the Graduate Management Admission Test (GMAT) (p. 79).
2. Undergraduate grade point averages and the trend of grades earned during undergraduate education.
3. Other relevant factors such as employment and leadership experience.

The M.S. in Accounting Committee is authorized to review the credentials of each applicant. Final approval of the applicant's admission to graduate study in accounting is authorized by the Dean of the Mike Ilitch School of Business or the Dean's designee, upon recommendation of the M.S.A. Committee. Appeals to an admission denial must be made in writing to the Director of Graduate Programs, Mike Ilitch School of Business. A copy of the guidelines for formal appeals is available in the School's Graduate Programs Office.

Before an applicant can be considered for admission, the following material must be timely submitted:

1. an online W.S.U. Application for Graduate Admission (http://www.gradmissions.wayne.edu);
2. an official transcript from each college or university previously attended by the applicant;
3. an official notification of the applicant's score on the GMAT and, if required, the TOEFL. For information regarding the GMAT.

Program Requirements

The M.S.A. degree program requires completion of thirty credits in final-program coursework with a grade point average of not less than 3.0. Additional foundation coursework may also be required prior to starting the thirty credits of final-program coursework. Degrees are granted upon recommendation of the faculty of the Mike Ilitch School of Business. Consideration is given to both scholastic achievement and the extent to which the candidate has met the standards and requirements of the School. All course work must be completed in accordance with the regulations of the Graduate School and the Mike Ilitch School of Business governing graduate scholarship and degrees; see the sections beginning under Academic Regulations (p. 38) and Academic Regulations for the Mike Ilitch School of Business (p. 72), respectively. University policies on transfer of credits from other institutions will apply.

Course Distribution Requirements (M.S.A.)

The M.S.A. program consists of four course categories, as follows:

Foundation Courses are required pre-professional courses but ones for which credit is not applicable to the M.S.A. degree. Applicants who have already earned a degree in business administration or accounting may usually be able to waive most, if not all, of the foundation course requirements.

Core Courses comprise 18-24 credits, which must include each of the courses listed under the chosen concentration, providing in-depth coverage of the body of knowledge associated with studies in accounting. Applicants who have already earned a degree in accounting may be able to waive many of the core courses and substitute accounting electives in their place.

Elective Courses are 1-3 additional courses surrounding coverage of the body of knowledge associated with studies in accounting.

Capstone Course: When nearing the conclusion of the M.S. in Accounting program, the degree candidate will take ACC 7998, Seminar in Tax and Accounting Policy.

Foundation Requirements (M.S.A.)

The M.S.A. is an advanced degree. Before progressing to the core courses of the program, the student should possess a solid foundation in accounting as comprised by the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 7100</td>
<td>Financial Accounting for Decision Making</td>
<td>3</td>
</tr>
<tr>
<td>BA 7000</td>
<td>Managerial Accounting</td>
<td>3</td>
</tr>
</tbody>
</table>

However, if the applicant's business administration or accounting degree is from a college or university located outside of the United States, some or all of the foundation requirements may not be waived because U.S. generally accepted accounting principles (US GAAP) may not have been studied.

The graduate-level foundation courses (BA 7000 and ACC 7100) cited above are open only to students who have been formally admitted to a graduate program at Wayne State University. Analogous courses offered at the undergraduate level (as determined by the admission evaluation process) may be taken to satisfy foundation requirements prior to graduate admission. However, once a student has been formally admitted to the M.S.A. program, NO graduate credit will be allowed for subsequent registration in undergraduate courses.

A cumulative grade point average of 3.0 ('B') is required in foundation requirements courses. No individual grade below 'C' (2.0) is acceptable. Students may begin taking Core courses during the semester in which they elect Foundation Requirements, subject to the prerequisite and corequisite requirements of the Core courses.

Core Requirements (M.S.A.)

(18-24 Credits)

The following core courses are required of all students depending on the chosen concentration and are prerequisite or corequisite to subsequent/concurrent elective courses. ACC 7300 must be completed within the first nine credits of the program.

Total Credits  21

For students who have completed undergraduate or graduate courses equivalent to Core courses within the preceding three years with a grade point average of 3.0 or above, one or more advanced courses in accounting may be substituted for Core courses, at the discretion of the M.S.A. committee.

Elective Requirements (M.S.A.)

(3-9 Credits)

A minimum of 1-3 electives chosen from accounting courses offered at the 7000-level are required of all M.S.A. students. A student may begin to take electives once he/she has completed the foundation requirements.

Business Electives (zero to nine credits): Students may choose electives from graduate business courses (offered at the 7000 level) based on their professional interests, with prior approval from the M.S. in Accounting Committee.

Capstone Requirement (M.S.A.)

ACC 7998, Seminar in Tax and Accounting Policy, is the capstone course for all M.S.A. degree candidates; it must be elected as part of the final nine credits in the student's program. ACC 7998 provides the opportunity to combine concepts developed by students in their professional and educational experience with economic, social, industrial, administrative, and legislative policy considerations.
Automotive Supply Chain Management (Executive M.S.)

Admission Requirements

Admission to the Executive Master of Science in Automotive Supply Chain Management (EMS-SCM) program is contingent upon admission to the Wayne State University Graduate School (https://wayne.edu/apply/#fndtn-graduate). Please note: The admission application's academic programs list is alphabetical, you'll find this degree listed as Automotive Supply Chain Management.

In addition to Wayne State’s graduate school admission criteria, applicants to the EMS-SCM program must meet the following requirements:

- Baccalaureate degree or equivalent from a regionally accredited institution. If the applicant's undergraduate degree is in a non-business discipline, the applicant may be required to complete foundation courses determined by the selection committee.
- Overall undergraduate GPA of 2.75, with a 3.0 major GPA (on a 4.0 scale)
- Minimum GMAT score of 550. The Ilitch School does offer GMAT waivers to highly qualified applicants. To be considered for a GMAT waiver, you must meet one of the following criteria:
  - Acceptable score on the Graduate Record Examinations (GRE), Law School Admission Test (LSAT) or Medical College Admission Test (MCAT) entrance exam
  - GPA of 3.0 or higher from an AACSB-accredited business program or GPA of 3.2 or higher from a regionally-accredited university in any major, AND at least three years of relevant supply chain professional experience in a manufacturing organization that shows increased responsibility over that period
- Two letters of recommendation from professors or employers
- A short essay answering on the following:
  - What are your career objectives and how will an EMS-SCM help you achieve your goals?
  - Describe any special circumstances related to your academic record you think the admissions committee should consider.

On-campus or phone interviews may be required. Background in supply chain management (via undergraduate degree, professional certification or work experience) is preferred though not an absolute requirement. The committee will base its recommendation for admissions on the composite characteristics of the applicant. The applicant's work experience and an outstanding track record may be considered a positive factor to make up for deficiency in one or two numerical criteria.

Curriculum Requirements

The EMS-SCM is a 31 credit degree program that can be completed in three semesters for full-time students. By taking six credit hours (two courses) per semester, a part-time student can complete the program in five semesters. Students enrolled in the program must complete the program within six years of their start date.

Up to six transfer credits for previous equivalent graduate coursework can be applied to the degree if those credits have not been counted towards a degree, earned a B grade or better, are from an AACSB accredited institution, not older than 6 years and are equivalent substitutes. Students transferring to the program from the Ilitch School’s M.B.A. with a concentration in global supply chain management may transfer unlimited Wayne State graduate credits in global supply chain management.

A minimum grade point average (GPA) of 3.00 is required to obtain the EMS-SCM degree. A maximum of two courses in which a C has been received may be used to meet graduation requirements, provided this is offset by sufficient A grades to maintain the required 3.00 average.

All courses listed below are three credits each unless otherwise noted.

- GSC 7960 Lean Six Sigma
- GSC 7991 Principles of Quality Management
- GSC 7992 Methods of Quality Management

Directed study elective (one credit required) 1
- GSC 7995 Directed Study in Global Supply Chain

Other electives (select two)
- DSB 6200 Manufacturing & Supply Chain Analytics
- GSC 7010 Supply Chain Decision Tools
- GSC 7260 Theory of Constraints: Breakthrough Solutions
- GSC 7670 Special Topics in Supply Chain Management
- GSC 7920 Supply Chain Process Analysis and Costing
- GSC 7930 Managing Risk in Automotive Supply Chains
- GSC 7960 Lean Six Sigma
- GSC 7992 Methods of Quality Management

Total Credits 31

1 There are two critical value added activities in this program: training sessions provided in conjunction with the Automotive Industry Action Group and networking sessions with automotive industry professionals. A combination of these are required and covered as part of the 1 credit directed study in supply chain management. The directed study course is designed to provide students with automotive industry produced training programs and conferences. Students in the 1 credit directed study are required to participate in the following and provide documentation of participation:
  - Completion of 3 Automotive Industry Action Group (AIAG) online training modules related to quality, sustainability, or supply chain management in general, or other such programs agreed to by the directed study (GSC 7995) course instructor.
  - Participation in 2 conferences on broad supply chain management topics produced by the Automotive Industry Action Group (AIAG) or...
other industry related program approved by the study abroad (GSC 7995) course instructor.

International experience requirement
Students are required to have an international experience as part of the program. This can be fulfilled by taking one of the Ilitch School Study Abroad 8-12 day courses or through alternative experiences agreed on by the department chair.

Business Administration (M.B.A. Program)

Admission (M.B.A.)

Admission to any graduate program is contingent upon admission to the Graduate School (p. 35). In addition, applicants to the M.B.A. program must comply with the following:

Admission to the Master of Business Administration program is limited to holders of baccalaureate degrees from regionally accredited institutions who demonstrate high promise of success in graduate business study. Several measures of probable success may be included in the evaluation of an applicant; criteria which may be considered are:

1. Performance on the Graduate Management Admission Test (GMAT); see below.
2. Undergraduate grade point averages and the trend of grades earned during undergraduate education.
3. Other indicators of promise of success in the graduate study of business, such as relevant employment and leadership experience.

Appeals to an admission denial may be made in writing to the Assistant Dean of Graduate Programs, Mike Ilitch School of Business. Guidelines for formal appeals are available in the Mike Ilitch School of Business’s Graduate Programs Office.

Graduate Management Admission Test (GMAT)

The GMAT must be taken prior to admission to graduate study. This test is a three-hour aptitude test designed to measure certain mental abilities and skills important in the study of management. The GMAT includes verbal, quantitative analytical writing and integrated reasoning sections administered by a computer.

The GMAT is offered on a continuous basis by appointment at computer-based testing centers throughout North America and at selected international sites. Candidates can schedule a testing appointment by calling 1-800-717-GMAT (4628). A list of test centers is provided in the GMAT Bulletin (http://mba.com) and on GMAT’s website (http://gmac.com).

Most prospective graduate business students will take the GMAT for admissions, although the School of Business does offer GMAT/GRE waivers to highly qualified applicants. This is generally defined as those applicants who meet one of the following criteria:

1. Acceptable score on the Graduate Record Examinations (GRE), Law School Admission Test (LSAT) or Medical College Admission Test (MCAT) entrance exam.
2. GPA of 3.0 or higher from an AACSB-accredited business program (or GPA of 3.2 or higher from a regionally-accredited university in any major) OR at least three years of relevant professional experience that shows increased responsibility over that period.

Please contact the Graduate Programs Office for more information on GMAT waivers or equivalency requirements

Application

A completed Application for Graduate Admission (http://wayne.edu/admissions/graduate/), the application fee, and an official transcript from each college or university attended are required before a student can be considered for admission to graduate status.
Program Requirements

Candidates for the Master of Business Administration degree must complete thirty-six credits in final-program course work with a minimum grade point average of 3.0. Additional foundation course work may be required prior to beginning the thirty-six final-program credits.

Degrees are granted upon the recommendation of the faculty of the Mike Ilitch School of Business. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the Mike Ilitch School of Business (p. 72) governing graduate scholarship and degrees.

M.B.A. students who hold a baccalaureate degree in a field other than accounting and who wish to qualify to sit for the C.P.A. examination in the State of Michigan should contact their advisor in the Graduate Programs Office (313-577-4511) as early as possible. While no formal M.B.A. curriculum is offered to meet the educational requirements of the Michigan State Board of Accountancy, an individualized Plan of Work can be developed. Generally, such a Plan of Work includes more than the minimum number of courses required for the M.B.A.

Course Distribution Requirements (M.B.A.)

The master’s degree program provides a fundamental background in business administration as well as opportunities for advanced specialization in particular areas. The program beyond the common body of knowledge is broad in nature and is directed at general competence for overall business management. There are three phases of course work required:

- foundation (p. 80)
- core (p. 80)
- electives (p. 81) and/or concentrations (p. 82)

Depending on the student’s academic background, there may be no foundation courses or as many as eight foundation courses required. All students must complete six core courses. Students must also choose six elective courses which can be used as part of a general curriculum. Students in the M.B.A. program may select electives that apply toward the completion of one or more of the concentrations as listed on the Concentrations tab.

Foundation Requirements (M.B.A.)

The following foundation courses are open only to students who have been formally admitted to a graduate program at Wayne State University — undergraduate, post-baccalaureate, and non-matriculated students are not eligible. (Analogous courses offered at the undergraduate level may be taken to satisfy Foundation Requirements prior to graduate admission. However, once a student has been formally admitted to the M.B.A. program, NO graduate credit shall be allowed for subsequent registrations in undergraduate courses analogous to the Graduate Foundation Requirements without approval of the Graduate Committee or its designee. Information regarding such courses is available in the Graduate Programs Office, 2771 Woodward Avenue, Suite 137.) A cumulative grade point average of 3.00 (‘B’) is required for foundation requirements and no individual grade below 2.0 (‘C’) is acceptable. All foundation requirements must be completed before a student begins core and elective courses.

Foundation Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA 6000</td>
<td>Introduction to Accounting and Financial Reporting</td>
<td>2</td>
</tr>
<tr>
<td>BA 6005</td>
<td>Basics of Financial Management</td>
<td>2</td>
</tr>
</tbody>
</table>

In general, a baccalaureate degree in Business Administration from a regionally accredited institution fulfills most foundation requirements. However, each applicant’s background will be individually examined to determine if any foundation course work is needed. If courses proposed to satisfy the foundation requirements of the M.B.A. program are over six years old, the Graduate Committee may require the applicant to demonstrate proficiency in the subject matter either by interview with a faculty member, by taking an equivalent course, or by taking an equivalent course by examination.

Foundation Waivers: While all of the above foundation courses are required, students who have had equivalent course work in their undergraduate programs (except for BA 6005, see below) with a cumulative g.p.a. of 3.00 (‘B’) or higher may be granted waivers of certain foundation courses at the time of their admission to the graduate program.

BA 6005 Foundation Waiver Criteria:

1. Students who have earned a grade of 3.00 (‘B’) or higher in an undergraduate course that is compatible with BA 6005 and the prior course was taken within the last three years from an AACSB accredited college or university. These students must also have quantitative GMAT/GRE scores higher than the 50th percentile.
2. Students who are Finance or Accounting majors from an AACSB accredited US or Canadian university, have obtained a g.p.a. of 3.00 or higher in the major, and have graduated in the last two years.
3. Students who are not Finance or Accounting major but have completed FIN 3290 or an equivalent course from an AACSB accredited US or Canadian university within the last 12 months and passed the course with a grade of 3.33 (‘B+’) or higher.
4. Students who do not meet any of these conditions may take and pass a waiver exam administered by the Department of Finance; however, they are strongly encouraged to take BA 6005. BA 6005 (Basics of Financial Management) is a prerequisite for BA 7020.

Mathematics Proficiency: In addition to these courses, one college-level algebra or finite mathematics course is required.

Writing Proficiency: Each student admitted to the graduate business program is required to demonstrate competency in analytical writing. A score of at least 3.5 on the GMAT writing assessment will demonstrate this competency. A student who scores below 3.5 on the GMAT writing assessment may be required to complete with a grade of ‘C’ or better ENG 3050 or a writing course approved by the Mike Ilitch School of Business Graduate Programs Office. The cumulative g.p.a. of all waived courses (for example, introduction to accounting or finance) and courses taken to demonstrate competency, such as ENG 3050, must be ‘B’ (3.0) or higher.

Core Requirements (M.B.A.)

The following six core courses are required of all students:

<table>
<thead>

Concentration Requirements (M.B.A.)

The purpose of the concentration is to provide depth in a specialization that will contribute to the student’s attainment of his or her professional objectives. The Mike Ilitch School of Business currently offers eleven areas of concentration. The following are the areas of concentrations and the list of courses that must be completed to fulfill the concentration requirement.

Accounting Systems Concentration

<table>

Business Administration and Law (M.B.A./J.D. Joint Degree)

Joint degree programs are those in which credit for some courses may be applied to both degrees. The Joint M.B.A./J.D. Program leads to the receipt of both the Master of Business Administration (M.B.A.) degree from the Mike Ilitch School of Business and the Juris Doctor (J.D.) degree from the Law School. The joint program allows students to fulfill the requirements of both programs concurrently. Students will need to complete all the requirements for both degrees, but Law School courses may count for up to nine elective credits toward the M.B.A. degree.

Applicants to this program must apply to both the Law School J.D. program and the Mike Ilitch School of Business M.B.A. program. Admission to the Concurrent M.B.A./J.D. Program requires separate approval by both the Law School and the Mike Ilitch School of Business. Students must meet all admission requirements of both programs; be admitted to both programs; and obtain the separate approval of both units to participate in the concurrent degree program.

Students seeking admission into the Joint M.B.A./J.D. program may use their Law School Admission Test (LSAT) score for M.B.A. admission consideration, as long as the student makes it clear at the time of application that they would like to pursue this option. Otherwise, the student must take the Graduate Management Admission Test (GMAT) and submit that score for M.B.A. admission consideration. If the student is a current J.D. student within their first year of law school, the student may apply for the Joint M.B.A./J.D. program using the University Graduate Change of Status form and submitting all required application documents.

The first year of study is spent in the Law School; after completion of the first year, students may elect one Business School course per semester, with a maximum of four M.B.A. graduate courses applicable toward the J.D. degree. Students are eligible to apply a maximum of nine J.D. credits as M.B.A. elective credit, provided the following conditions are met:

1. The law school courses to be applied to the M.B.A. must be taken at the Wayne State University Law School, as part of the J.D. program;
2. A grade of ‘B’ (3.0) or higher must have been awarded for the courses; Passed/Not Passed credit is acceptable only for LEX 8631 and LEX 8633;
3. The courses must be relevant to the student’s Plan of Work as approved by the Graduate Committee;
4. The courses may not be more than five years old at the time of graduation;
5. The Law courses which will be considered for dual applicability are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LEX 6200</td>
<td>Contracts A</td>
<td>3</td>
</tr>
<tr>
<td>LEX 6201</td>
<td>Contracts B</td>
<td>3</td>
</tr>
<tr>
<td>LEX 7009</td>
<td>Advanced Bankruptcy</td>
<td>3</td>
</tr>
</tbody>
</table>
6. If a Joint M.B.A./J.D. student would like to apply a J.D. course to the M.B.A. that is not listed above, the student must petition in writing to the Graduate Committee for dual application of credit.

Business Administration (Ph.D.)

The Doctor of Philosophy in Business prepares persons interested in careers in research and university teaching. The core goals for the program are the creation of new knowledge through research and excellence in teaching. The Ph.D. program offers specialized tracks in finance, management, and marketing. For detailed information, please visit the Mike Ilitch School of Business (http://ilitchbusiness.wayne.edu/).

Admission Requirements

Admission to any graduate program is contingent upon admission to the Graduate School (p. 35). In addition, applicants to the Ph.D. program must comply with the following:

1. hold a bachelor’s degree with a grade point average of at least 3.0, or 3.5 upper division (junior or senior), or a graduate degree g.p.a. of 3.5.;
2. score at least a 600 on the Graduate Management Admissions Test (Attainment of satisfactory GMAT score and GPA does not guarantee admission);
3. provide at least three letters of recommendation from officials or faculty at the institution(s) most recently attended, or by a recent employer of the applicant;
4. submit a brief essay (not to exceed four pages) by the applicant on his or her career objectives.
5. Applicants from other countries must demonstrate English proficiency by obtaining at least a 550/213/79 on the Test of English as a Foreign Language.

Program Requirements

Ph.D. students in Business Administration must successfully complete at least ninety credits of graduate study, consisting of at least sixty credits of course work and thirty credits in dissertation research. The program must include at least thirty credits (excluding dissertation direction) in courses numbered 7000 or above, or as approved by the students advisor and the Ph.D. program director. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the Mike Ilitch School of Business (p. 72) governing graduate scholarship and degrees.

All Business School Ph.D. students must complete:

<table>

All Management Track students must complete:
### Business (Graduate Certificate)

#### Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, applicants must have earned a minimum g.p.a. of 3.0 in their undergraduate/graduate program. Applicants who already have a business or related degree are not eligible.

#### Program Requirements

The Graduate Certificate in Business is designed to provide non-business undergraduates fundamental knowledge in the basic functional areas of business administration: accounting, finance, management, and marketing.

The Certificate program requires successful completion of thirteen credits consisting of six courses: four functional basic required courses (eight credits); a foundation elective course (two credits); and a functional elective course (three credits). Courses are to be chosen from the following.

<table>

**Total Credits** 13
Data Science and Business Analytics (M.S. with a concentration in Data-Driven Business)

Analytics is a fast-growing STEM field with a high demand for individuals who possess the skills and expertise necessary to navigate the process of transforming data into insight for making sound business decisions. It’s the reason that the WSU College of Engineering and the Mike Ilitch School of Business launched an innovative and interdisciplinary new master’s program in data science and business analytics. Leaders in this field use data to fundamentally rethink all facets of business in many sectors, including manufacturing, supply chain, finance, and healthcare.

Admission

Admission to any graduate program is contingent upon admission to the Graduate School (p. 35). Applicants should have 3.0 or higher cumulative undergraduate g.p.a.

Interview

Prospective candidates being considered for admission may have to participate in an online interview with the admissions committee. Upon evaluating the application, admissible candidates will be contacted for scheduling these interviews.

Prerequisite Knowledge

Candidates are expected to be well-versed in basic probability and statistics and also familiar with some programming language. Courses will be available in the summer months for admitted applicants to refresh their knowledge or makeup for any deficiency in this knowledge.

Students without this prerequisite knowledge but otherwise possess good credentials will be given conditional admission and have to take this remedial coursework in the summer months prior to starting the program in the fall term.

Graduate Management Admission Test (GMAT) and Graduate Record Examination (GRE)

Applicants must complete the GRE or the GMAT with minimum scores in the top 75 percentile.

Program Requirements

Students must complete a total of 30 credits in order to earn the M.S. in Data Science and Business Analytics.

The "interdisciplinary core" includes 9 credits of coursework across business, computer science, and industrial engineering. On top of this integrated breadth of study covering the core areas of data science and business analytics, each student has 9 credits of "concentration" courses to give them depth in an engineering, business, or analytics area. Each student's 6 credits of elective choices can be personalized to support their individual career goals. The final piece of the curriculum is a 6-credit applied analytics practicum, in which students will work with companies and organizations on real analytics problems.

Entrepreneurship and Innovation (Graduate Certificate)

Program Overview

The entrepreneurship and innovation certificate program provides insights and practical experience for both current and future for-profit and not-for-profit professionals working in a wide range of settings, including business, engineering, science and technology, health care, the arts, sports and entertainment, communication and information technology, manufacturing, and community and economic development. This cross-disciplinary certificate program has been designed to provide you with the specialized knowledge, skills and experience required to develop, launch and grow a new venture. The courses offered are developed and provided in collaboration with other Wayne State University schools and colleges, and many classes can satisfy the requirements of both your degree program and the certificate program.

Students who participate in the Entrepreneurship and Innovation Certificate program are eligible to apply for support from the Belinsky Entrepreneurial Learning Laboratory (BELL). The BELL assists sustainable, investment-ready student startups and supports the development of commercialization pathways for WSU intellectual property by providing mentors and subject matter experts, direct support and limited funding to assist in the process of attracting additional funding in the form of revenue growth, grants, loans or direct investment. Direct support is provided by BELL Fellows, and certificate program students are eligible to apply for these fellowships. Contact the program director for further information.

For additional information and program updates please refer to http://ilitchbusiness.wayne.edu/entrepreneurship/department.php

Admission requirements

The graduate certificate in entrepreneurship and innovation is open only to those students who can meet the graduate admission requirements of Wayne State University. Further, those admitted to this certificate program are: 1) currently enrolled WSU graduate students who have completed at least 6 graduate credit hours and have a cumulative grade point average of 3.0 or above; or 2) students who possess a graduate degree from an accredited college or university. Students must also successfully complete an introductory course and gain approval for their elective selection and plan of work. Students can develop a full plan of work with the program advisor before registering for the introductory course, and are strongly encouraged to do so.

Formal admission to the certificate program requires that students complete an introductory course and obtain approval for their plan of work which includes three elective courses and a capstone course. Students can develop a full plan of work with the program advisor before registering for the introductory course and are strongly encouraged to do so.

The introductory course provides an integrative framework, processes and tools which must be mastered and opportunities to explore resources available within the local entrepreneurial ecosystem. The electives courses are matched to student talents and interests and provide opportunities to acquire additional breadth and depth of knowledge, skills and abilities and opportunities for additional applications of the integrative framework, processes and tools. In the capstone course students are engaged in a project-intensive learning experience in the Detroit entrepreneurial ecosystem. The capstone course is designed to help the student deepen their understanding of and appreciation for what it takes to translate ideas into reality and provides students an opportunity to celebrate and reflect on their passion and ability to launch and support startups of both a technical and non-technical nature.

Program standards

• A minimum cumulative GPA of 3.0 will be required for completion of the certificate, with no grades less than a B in each of the core courses.
• Although students are encouraged to complete the certificate in three consecutive semesters, it must be completed within three years of admission. Students may enroll on a full- or part-time basis.
• The certificate will be awarded upon completion of the related graduate program. Or, if the student already has been awarded the graduate degree, the certificate will be awarded upon completion of the certificate program.
• Up to 9 of the credit hours of coursework taken toward this graduate certificate may also be used to satisfy graduate degree requirements, assuming no credits have been applied from a second certificate and also subject to the approval of the relevant academic unit and graduate office.
• The credits earned while completing this certificate program cannot be applied toward another Wayne State University certificate program.
• Credits applied to a graduate certificate cannot be applied toward a subsequent Wayne State University graduate degree.
• No transfer credit will be accepted.

Curriculum requirements

The student must complete 15 credits, with six credits from the core, and nine elective credits selected from an approved list. Electives which will count toward the completion of the certificate program are open to students who have satisfactorily completed the introductory course and who have been admitted to the program. Students must complete 12 approved credits before enrolling in the capstone course. Students must contact the Program Director at least one month prior to registering for the capstone course so that the details of the Capstone Project can be determined.

Required core courses (6 credits)

<td>3</td>
</tr>
</tbody>
</table>

¹ Approval to take EI 7900 requires completion of nine (9) credits of electives with a minimum grade of C in addition to EI 7000 with a minimum grade of B.

Electives (9 credits)

Three elective courses are also required. A subset of the list of elective courses (free-elective courses) will carry no pre-requisite beyond EI 7000, thereby broadening accessibility to non-business students. The list of approved elective courses will also include restricted-electives, courses which may require completion of discipline-specific course prerequisites. Restricted-elective courses must meet the following criteria: (1) the course learning objectives, content and activities must be explicitly and substantially correlated with the GCEI program learning goals; (2) the course incorporates one or more of the foundation framework elements and/or skill and tool kit components; (3) the student has satisfied pre-requisites for these courses; (4) the student completes these courses after having been admitted to the certificate program; and (5) the credits
earned in these courses must also satisfy the degree requirements of the student’s graduate degree program.

Note: The list of elective courses will be updated periodically subject to the review and approval of the curriculum committee of the Entrepreneurship and Innovation program and its advisory board.

Finance (M.S.)

**Admission Requirements**

Admissions into the Master of Science in Finance program is contingent upon admissions to the Wayne State University Graduate School. In addition, applicants must meet the following requirements:

1. Baccalaureate degree in business administration, a discipline area of business administration such as accounting or finance, or in a quantitative field such as mathematics, economics, physics, engineering, statistics or the sciences from a regionally accredited institution
2. Minimum GMAT score of 550; or minimum GRE score of 155 on Quantitative Reasoning and 154 on Verbal Reasoning
3. Overall undergraduate grade point average (GPA) of 2.75, with 3.0 major grade point average (GPA) on a 4.0 scale
4. Three letters of recommendation from professors or employers

On-campus or telephone interviews may be required.

**Application**

A completed application for Graduate Admissions, the application fee, and an official transcript from each college or university attended are required before a student can be considered for admissions to graduate status.

**Course Requirements**

The M.S.F. program requires a total of 30 credit hours. Up to six transfer credits from previous equivalent graduate coursework can be applied to the degree if those credits have not been counted toward another degree, are from an AACSB accredited institution, are equivalent substitutes, have a B grade or better and are not older than 6 years.

Students can pursue the M.S.F. full time or part time. Students must complete the program within six years.

A minimum cumulative grade point average (GPA) of 3.0 or greater is required for graduation. A maximum of two courses in which a C grade has been received may be used to meet graduation requirements, provided this is offset by sufficient A grades to maintain the required 3.0 GPA.

The M.S.F. curriculum will provide the student with a solid foundation for the Chartered Financial Analyst (CFA) level one exam and will prepare them for a variety of financial roles. There are three phases of course work required:

- Foundation
- Core
- Electives

**Foundation Requirements**

Before progressing to the core courses of the program, students should possess a solid foundation in finance and accounting as comprised by the following set of courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA 6000</td>
<td>Introduction to Accounting and Financial Reporting</td>
<td>2</td>
</tr>
<tr>
<td>BA 6005</td>
<td>Basics of Financial Management</td>
<td>2</td>
</tr>
<tr>
<td>BA 7000</td>
<td>Managerial Accounting</td>
<td>3</td>
</tr>
</tbody>
</table>
The graduate level foundation courses (BA - Business Administration) cited above are open only to students who have been formally admitted into a graduate program at Wayne State University. Analogous courses offered at the undergraduate level (as determined by the admissions evaluation process) may be taken to satisfy foundation requirements PRIOR to graduate admissions. However, once a student has been formally admitted to the M.S.F. program, no graduate credit will be allowed for subsequent registration in undergraduate courses.

If the applicant’s business administration, finance or accounting degree is from a college or university located outside of the United States, some or all of the foundation requirements may not be waived because U.S. generally accepted accounting principles (US GAAP) may not have been studied.

Core Requirements

Five core courses form the backbone of the M.S.F. program, providing general analytical methods and technical tools that can be applied to a variety of sub-specialties in finance. With the exception of FIN 7220, the finance core courses shown below will be taken in the first semester, after which students may customize their program through electives according to their long-term goals and specific areas of interest.

<table>
<thead>
<tr>

<tr>
<td>FIN 7220</td>
<td>Advanced Managerial Finance</td>
<td>3</td>
</tr>
<tr>
<td>FIN 7230</td>
<td>Investment Policies</td>
<td>3</td>
</tr>
</tbody>
</table>

Electives

Students may take elective courses before finishing all the core courses as long as prerequisites such as BA 7020, FIN 7220 and FIN 7230 are completed. After taking the 15 credit finance core, students can choose from a variety of elective courses to develop expertise in their areas of interest. Students may also opt to take an elective outside the program, such as in economics, with permission from the department chair.

An innovation feature of the M.S.F. is the ability for students to tailor the program to their individual needs and interests. Students may select courses that focus on corporate finance or investments or both.

Corporate Finance Courses

The curriculum includes a study of asset, liability and capital structure management, with emphasis on valuation capital budgeting techniques; risk evaluation; working capital management, and methods of short-term, intermediate and long-term financing.

Students may take any five of the following elective courses if interested in the corporate finance area:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<tr>
<td>FIN 7777</td>
<td>Corporate Financial Consulting</td>
<td>3</td>
</tr>
<tr>
<td>FIN 7870</td>
<td>International Finance</td>
<td>3</td>
</tr>
</tbody>
</table>

Investment Courses

These courses focus on skills necessary in the financial services industry (such as banking, investment banking, consulting, or the financial service function of major corporations). Skill set involves analysis of investments, constructing investment portfolios, and advising clients on investment selection and portfolio strategy.

Students may take any five of the following elective courses if interested in the investments area:

<table>

Taxation (M.S.T. Program)

Admission Requirements

An admissions moratorium is in effect for this program.

Admission to any graduate program is contingent upon admission to the Graduate School (p. 35). In addition, applicants to the M.S.T. program must comply with the following:

Admission to the Master of Science in Taxation (M.S.T.) program is limited to students who demonstrate high promise of success and hold a baccalaureate degree in business administration, a discipline area of business administration, or accounting from regionally accredited institutions. Several measures of probable success that may be considered in the evaluation of an applicant include but are not limited to:

1. Performance on the Graduate Management Admission Test (GMAT) (p. 79).
2. Undergraduate grade point averages and the trend of grades earned during undergraduate education.
3. Other relevant factors such as employment and leadership experience.

The M.S.T. Committee is authorized to review the credentials of each applicant. Final approval of the applicant’s admission to graduate study in taxation is authorized by the Dean of the Mike Ilitch School of Business or the Dean’s designee, upon recommendation of the M.S.T. Committee. Appeals to an admission denial must be made in writing to the Director of the Graduate Programs, Mike Ilitch School of Business. A copy of the Guidelines for formal appeals is available in the School’s Graduate Programs Office.

Before an applicant can be considered for admission, the following material must be timely submitted:

1. An online W.S.U. Application for Graduate Admission (http://www.gradadmissions.wayne.edu);
2. an official transcript from each college or university previously attended by the applicant;
3. an official notification of the applicant’s score on the GMAT and, if required, the TOEFL. For information regarding the GMAT.

Program Requirements

The M.S.T. degree program requires completion of thirty credits in final-program course work with a grade point average of not less than 3.0. Additional foundation coursework may also be required prior to starting the thirty credits of final-program coursework. Degrees are granted upon recommendation of the faculty of the Mike Ilitch School of Business. Consideration is given to both scholastic achievement and the extent to which the candidate has met the standards and requirements of the School. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the Mike Ilitch School of Business (p. 72) governing graduate scholarship and degrees.

Course Distribution Requirements (M.S.T.)

The M.S.T. program consists of four course categories, as follows:

Foundation Courses are required pre-professional courses but ones for which credit is not applicable to the M.S.T. degree. Applicants who have already earned a degree in business administration or accounting may usually be able to waive most, if not all, of the foundation courses.

Core Courses are six courses providing in-depth coverage of the body of knowledge associated with studies in taxation and tax policy.

Electives comprise three additional courses providing additional coverage of the body of knowledge associated with studies in taxation and tax policy.

Capstone Course: When nearing the conclusion of the M.S.T. program, the degree candidate will take ACC 7998, Seminar in Tax and Accounting Policy.

Foundation Requirements (M.S.T.)

The M.S. in Taxation is an advanced degree. Before progressing to the core courses of the program, the student should possess a solid foundation in accounting as comprised by the following set of three courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACC 7040</td>
<td>Intermediate Financial Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>ACC 7050</td>
<td>Intermediate Financial Accounting II</td>
<td>3</td>
</tr>
<tr>
<td>ACC 7120</td>
<td>Introduction to Taxation: Individuals</td>
<td>3</td>
</tr>
</tbody>
</table>

However, if the applicant's business administration or accounting degree is from a college or university located outside of the United State, some or all of the foundation requirements may not be able to be waived as U.S. generally accepted accounting principles (US GAAP) may not have been studied.

The graduate-level foundation courses (ACC 7040, ACC 7050 and ACC 7120) cited above are open only to students who have been formally admitted to a graduate program at Wayne State University. Analogous courses offered at the undergraduate level (as determined by the admission evaluation process) may be taken to satisfy foundation requirements prior to graduate admission. However, once a student has been formally admitted to the M.S.T. program, NO graduate credit will be allowed for subsequent registration in undergraduate courses.

A cumulative grade point average of 3.0 (‘B’) is required in foundation requirements courses. No individual grade below ‘C’ (2.0) is acceptable. Students may begin taking Core courses during the semester in which they elect Foundation Requirements, subject to the prerequisite and corequisite requirements of the Core courses.

Core Requirements (M.S.T.)

(Eighteen Credits)

The following six courses are required of all students and are prerequisite or corequisite to subsequent/concurrent elective courses. ACC 7300 must be completed within the first nine credits of the program.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>

</tr>
<tr>
<td>ACC 7335</td>
<td>Taxation of Corporations and Shareholders</td>
<td>3</td>
</tr>
<tr>
<td>ACC 7340</td>
<td>Taxation of Pass-Through Entities</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 18

For students who have completed undergraduate, graduate or law courses equivalent to Core courses, within the preceding three years with a grade point average of 3.0 or above, one or more advanced courses
in taxation may be substituted for Core courses, at the discretion of the M.S.T. Committee.

**Elective Requirements (M.S.T.)**

*(Nine Credits)*

At least two electives are required of all M.S.T. students. A student may begin to take electives if he/she has completed the foundation requirements. Advanced graduate courses in taxation offered by the Accounting Department may be elected without approval of the student’s advisor. Electives outside of the field of taxation, as offered by the Accounting Department, require approval of the advisor; electives from outside the Accounting Department or the Mike Ilitch School of Business must also be approved by the M.S. in Taxation Committee.

A student may elect Law School courses with the approval of his/her advisor and the Director of Graduate Studies of the Law School. Students should be aware that registration for Law School courses takes place earlier than for the Mike Ilitch School of Business and the rest of the University, and that the Law School calendar and the regular University calendar also differ. Students should consult the Law School (p. 216) regarding courses, schedules, and calendar.

**Capstone Requirement (M.S.T.)**

ACC 7998, Seminar in Tax and Accounting Policy, is the capstone course for all M.S.T. degree candidates; it must be elected as part of the final nine credits in the student’s program, and only after completion of at least four Core courses. ACC 7998 provides the opportunity to combine concepts developed by students in their professional and educational experience with economic, social, industrial, administrative, and legislative policy considerations.
The College of Education at Wayne State University is located in, and serves the needs of, one of the nation's largest metropolitan areas. Thus, the College reflects the dynamic character of urban life, and, in its concern with urban problems, places great faith in education as the means by which human circumstances can be improved. To this end, the College prepares professional educators who have the commitment and competence to help young people achieve dignity, preserve individuality, develop democratic values, and find self-fulfillment.

As society has been altered by such factors as the development of knowledge, technological advances and population growth, the purposes and processes of education have changed. New technologies of instruction are evolving rapidly and offer the educator many opportunities for developing a high level of competence. Problems generated in our urban society are complex, and those related to education are no exception. Yet, the opportunities for curriculum innovation, experimentation and leadership have never been greater.

**Accreditation**

The College of Education's teacher certification programs are accredited by the Council for the Accreditation of Educator Preparation (CAEP).

Art Therapy is approved by the American Art Therapy Association (AATA).

Counselor Education is accredited through the Council for Accreditation of Counseling and Related Educational Programs (CACREP) and now includes Rehabilitation Counseling and Community Inclusion, which was formerly accredited through the Council on Rehabilitation Education (CORE). CORE and CACREP have merged.

School and Community Psychology is accredited through the National Association of School Psychologists.
Academic Regulations for the College of Education

For complete information regarding the academic rules and regulations of the University, students should consult the Graduate School (p. 38). The following additions and amendments pertain to the College of Education.

Financial Aid and Scholarships

Over 100 scholarships established by private donors are available through the College of Education. A number of them are targeted toward graduate students, all require a cumulative g.p.a. of at least 3.0, and all are awarded to applicants who demonstrate high academic achievement and leadership potential. Most, though not all, are also based on financial need. Application materials are available on the College of Education's website (http://coe.wayne.edu/student/scholarship.php). Review the website for more information and for the specific deadline date.

Normal Program Load

A full-time graduate student load is eight credits per semester in Fall and Winter and is limited without exception to a sixteen credit maximum by the Graduate School. In Spring/Summer full-time is two credits. If a significant portion of a student’s time is spent in outside work, corresponding adjustments must be made in the college schedule. A graduate student working full-time who desires to carry more than eight credits must secure permission from the Assistant Dean for Academic Services, who serves as Graduate Director.

Attendance

Regularity in attendance and performance is necessary for success in college work. Although there are no officially excused absences as defined by College policy, the conscientious student is expected to explain absences to the instructor. Such absences may be due to illness; to participation in inter-college activities, certified by the sponsoring faculty member; or other similar types of absence for which the student can present to the instructor evidence that he/she was engaged in authorized University activities. Each instructor, at the beginning of the course, will announce his/her attendance requirements.

Probation and Withdrawal

If, at any time, a graduate student’s scholastic grade point average falls below 3.0, the student is automatically placed on probation. A student on probation must submit a plan of action completed with their advisor to the Graduate Director of the College of Education. The plan of action addresses the necessary steps and timeline for the student to regain good academic standing and identifies the coursework to be repeated or new coursework necessary to achieve good academic standing. The plan of action must be approved by the Graduate Director before registering for subsequent work in the College. The College reserves the right to ask a student to withdraw at any time from specific courses or from the College entirely, if progress does not warrant continuance.

Readmission

Graduate students who have received a master’s degree from Wayne State University and have not registered since the degree was conferred, and who desire to pursue further non-degree graduate work must complete a Returning Student Update Record form (http://reg.wayne.edu/students/forms.php).

Criminal History Review

Students in certification or licensure programs must supply a criminal history check before admission or transfer to the College of Education, clinical experiences or internships, and when applying for licensure or certification. Criminal history checks must be completed through the Wayne State University portal from CastleBranch for a fee. A criminal history check remains valid for six months. Additional criminal history checks may be required at the discretion of the College.

Any person in a certification or licensure program who has been convicted of any offense must provide certified copies of all documents relative to his/her conviction, including the Judgement of Sentence or Register of Actions from the court(s) in which the matter was adjudicated and a narrative describing each incident from his/her perspective. Persons determined by the criminal history check process to have been convicted of any offense and do not provide the required documentation will have their admission or certification/licensure recommendation denied. In other cases, incomplete or non-submission of documentation may result in a program pause, removal from clinical experiences or internships, or exclusion from the College. After reviewing the documentation by College officials or the College's Criminal History Review Board, the applicant will be notified in writing of the decision.

Michigan Public Act 68 of 1993 Sec. 1230 requires public and nonpublic schools to conduct a criminal history check of new teachers, school administrators, school psychologists, and other personnel required to hold State Board of Education approvals.

Note the State Board of Education Teacher Certificate Code: R 390.1201 Certificates; denial, suspension, or revocation.

1. The superintendent of public instruction may refuse to grant or renew, or may suspend for a fixed term, or revoke, or may impose reasonable conditions on, a teaching certificate or state board approval granted pursuant to these rules for the following reasons:
   a. Fraud, or material misrepresentation, concealment or omission of fact in the application for, or the use of, a teaching certificate or state board approval.
   b. Conviction of an offense listed in MCL 380.1535a or MCL 380.1539b.

2. The superintendent of public instruction may refuse to grant or renew a teaching certificate or a state board approval for failure or ineligibility of the applicant to meet the criteria for the applicable certification or state board approval.

Graduation

Applications for graduate degrees, graduate certificates and the Education Specialist Certificate must be made not later than the fourth week of classes for the semester in which degree or certificate requirements are to be completed. Graduation deadline dates for the semester in which candidates are completing doctoral (Ed.D. and Ph.D.) degree requirements are established and posted online (https://gradschool.wayne.edu/phd/deadlines-requirements/) by the Graduate School.

Information concerning commencement announcements, caps and gowns, invitations, tickets, time and place, and other relevant information is posted by the Commencement Office (http://commencement.wayne.edu/). Candidates for doctoral degrees are requested and expected to attend the commencement ceremony at which the University confers upon them the degree earned. Graduate Certificate and Education Specialist Certificate students do not participate in the Commencement Ceremony, which is limited to degree-granting programs.
Master's Degrees

Master of Arts Degrees

The Master of Arts degrees offered by the College of Education are administered by the Division of Kinesiology, Health and Sport Studies, and by the Division of Theoretical and Behavioral Foundations. The generic degree requirements are listed below and specific requirements associated with individual majors and areas of concentration are described in the respective divisional sections.

Master of Science Degrees

The Master of Science degrees offered by the College of Education are administered by the Division of Kinesiology, Health and Sport Studies and the Division of Theoretical and Behavioral Foundations. The generic degree requirements are listed below and specific requirements associated with individual majors and areas of concentration are described in the respective divisional sections.

Master of Arts in Teaching Degrees

The Master of Arts in Teaching degree is administered by the Division of Teacher Education and upon program completion requires a recommendation to the Michigan Department of Education for a teaching certificate. The generic degree requirements are listed below and specific requirements associated with individual majors and areas of concentration are described in the respective divisional sections.

Master of Education Degrees

The Master of Education degree is offered in various curricular areas administered by the following academic divisions: Administrative and Organizational Studies, Teacher Education and Theoretical and Behavioral Foundations. The generic degree requirements are listed below, and specific requirements associated with individual majors and areas of concentration are described in the respective divisional sections.

Admission

Admission to these programs is contingent upon admission to the Graduate School (p. 35). In addition, applicants must satisfy program specific admission requirements.

Application information is available on the Graduate Admissions (http://gradadmissions.wayne.edu/apply.php.html) website.

Degree Requirements

The minimum requirement for a Master’s degree is thirty credits, at least twenty-four of which must be taken at the University. Some programs in the College of Education require more than the minimum, in which case those requirements take precedence. Major Requirements consist of a minimum of eight credits in the specialization selected by the student in addition to and when required the terminal seminar and thesis, essay, or project. Specific course requirements for the various majors are presented in the respective divisional sections.

Master’s Degree are offered with the following options:

- **Plan A** – A minimum of twenty-two credits in coursework, plus eight credits for the terminal seminar and thesis
- **Plan B** – A minimum of twenty-seven credits in coursework, plus three credits for the terminal seminar and essay or project
- **Plan C** – A total of thirty credits, essay/project or thesis not required

Electives are those courses recommended outside the major. The purpose of elective courses is to provide breadth to the student’s program.

See the individual programs in the following Divisional sections of this bulletin for specific courses required by certain program areas in the major, the general professional sequence, or the elective sections of Plans of Work.

Plan of Work

After consultation with the advisor, the master’s applicant prepares a Plan of Work for the program, setting forth the courses that will satisfy the requirements for the degree.

Candidacy

This status is established upon completion by the master’s applicant of nine credits toward degree requirements, and after filing an approved Plan of Work with the College Graduate Office, 489 Education Building. The Plan of Work MUST be filed prior to or during the term in which the applicant completes twelve graduate credits toward the degree. Failure to file a Plan of Work will preclude further registration for courses.

Time Limitations

Requirements for all master’s degrees must be completed within six years after completion of the first course to be applied toward the degree.

Time Extensions

The advisor and student must complete a Request for a Time Extension form (http://coe.wayne.edu/student/forms.php) and set a terminal date for completion of all degree requirements, including such additional requirements as may be indicated by the Graduate Director to revalidate over-age credits (see the Revalidation section below). Time extensions require the approval of the Graduate Director. Time extensions to complete the requirements for a master’s degree may not be granted beyond year 10 since admission.

Revalidation

Upon the recommendation of the advisor and approval of the Graduate Director, a master’s degree student may revalidate over-age credits which are between six and ten years old, and that represent courses completed at Wayne State University with grades of ‘B’ or better. Students are not permitted to revalidate credits earned at other institutions.

General Professional Requirement for Master of Education Degrees: Fundamental Areas and Core Courses

Philosophical and theoretical perspectives unite the College of Education in its mission to prepare educators and other professionals as agents of change for an equitable, inclusive, global society that improves the lives of children, adults, families, and community.

This goal is achieved in the Masters of Education by emphasizing the following Fundamental Areas and/or Core Courses in education, performance improvement, health, and human development:

- Philosophical, historical, sociocultural, and political influences;
- Impact of ecological factors on human development, health, and well-being across the lifespan;
- Research, writing, and innovation.

Preparation includes the development of knowledge, skills, and dispositions and thus can be achieved through various means, such as
coursework, field experiences, research, and community engagement. Although these fundamental areas provide an overarching umbrella that unites the College, individual Divisions and Programs may articulate these philosophical and theoretical tenets in different ways.

All students in a Masters of Education program must meet the General Professional Requirement through completion of the following Fundamental Areas and/or through completion of Core Courses, which are listed below.

**Fundamental Areas**

Philosophical, Historical, Sociocultural, and Political Influences include:

- Global/local education as social justice
- Knowledge of history and systems of discipline area and implications
- Issues of power and empowerment
- Perspectives on inclusive society
- Preparation for serving as an agent of change

Ecological Perspectives on Development, Health, and Wellbeing include:

- Psychology of learning across the lifespan
- Knowledge of human development, child/adolescent psychology
- Ecological influences on the quality of life issues

Research, Writing, and Innovation include:

- Methods of evaluation & research
- Critique of research

**Core Courses**

In addition to the Fundamental Areas above, the General Professional Requirement is met through completion of professional Core Courses. The student must complete three courses from three different areas chosen from those listed below. Courses within a student’s major area cannot be used to satisfy this requirement.

**Post-Bachelor’s Teaching Certificate**

This program provides a means of obtaining teacher certification for those who do not intend to pursue the Master of Arts in Teaching. The program incorporates classroom theory with practice, requires a minimum of four semesters to complete and is available at both the elementary and secondary levels. Courses are typically offered during the day. Admission requires a baccalaureate degree with an appropriate coursework in a teaching major earned at a regionally accredited institution. Undergraduate course work should reflect a minimal 2.5 g.p.a., provide a current criminal background check from a College of Education approved vendor, provide documentation of a current TB test, a verification of group work with children and, for World Language majors/minors and Bilingual/Bicultural Education minors, appropriate language proficiency test results. A complete list of requirements can be found on the College of Education (http://coe.wayne.edu/admissions/post-bachelor.php) website.
Education Specialist Certificate

The Education Specialist Certificate program is a thirty credit minimum curriculum beyond the master’s degree. It is a self-contained concentration, separate from other existing programs, with a distinct form of recognition at its completion. This is a planned program, not merely recognition for thirty credits of graduate study accrued beyond the master’s degree.

The Education Specialist Certificate is offered in various curricular areas administered by the following academic divisions:

- Administrative and Organizational Studies
- Teacher Education
- Theoretical and Behavioral Foundations

Specific requirements associated with individual majors and areas of concentration are presented in the Divisional sections

Admission

Admission to this program is contingent upon admission to the Graduate School (p. 35). Minimum entrance requirements established by the College of Education are:

1. A master’s degree from an accredited institution.
2. In general, applicants must present a grade point average of 2.75 or above for upper-division undergraduate work. Applicants with an undergraduate grade point average below 2.75 must have a grade point average of 3.4 or above on their master’s degree work.
3. Fulfillment of the special requirements of the area of concentration in which the student wishes to work.
4. All major areas with the exception of administration and supervision, instructional technology and counseling require a minimum of three years of teaching experience or equivalent.

Application

Application information is available on the Graduate Admissions (http://gradadmissions.wayne.edu/apply.php.html) website.

Certificate Requirements

The Education Specialist Certificate program requires a minimum of thirty credits beyond the master’s degree. The purpose of the Certificate program is to strengthen the liberal education of administrators, counselors, instructional designers and teachers to contribute to more effective productivity of professional workers in and outside the field of education. The specific content of each major is dependent upon the individual student’s needs and interests.

Plan of Work

Plans of Work are adapted to the professional needs of students and each one is developed by the individual student with the help of his/her advisor. A Plan of Work must be approved by the advisor and filed with the Education Graduate Office, 489 Education Building, before six credits have been completed following acceptance into the program. Failure to file a Plan of Work at the appropriate time may preclude further registration for courses.

Research studies, projects, or field studies may be accepted in partial fulfillment of requirements for the Certificate. Such projects will be in the nature of culminating experiences and arranged with the individual student’s advisor.

Time Limitations

Requirements for the Education Specialist Certificate must be completed within six years after admission to the program. Credit earned beyond the master’s degree which is over six years old at the time of admission may not be applied toward meeting requirements of the certificate. Credit earned after acceptance as a certificate applicant may not be over six years old at the time the certificate is granted.

Transfer Credit

A maximum of ten-semester credits of graduate post-master’s degree work earned at another accredited university, or at Wayne State University prior to admission to the Education Specialist program, may be applied to the certificate provided the courses are approved by the advisor and the College Graduate Officer as appropriate to the program plan.

A maximum of six-semester credits of graduate post-master’s degree work earned at another accredited university after admission to the Education Specialist program may be transferred and applied to the program provided no prior transfer credit from another university has been included in the program.

Coursework used toward a previously received degree, Graduate certificate, or Education Specialist certificate cannot be used toward the current Education Specialist certificate.

Time Extensions

The advisor and student must complete a Request for a Time Extension form (http://coe.wayne.edu/student/forms.php) and set a terminal date for completion of all degree requirements, including such additional requirements as may be indicated by the Graduate Director to revalidate over-age credits (see the Revalidation section below). Time extensions require the approval of the Graduate Director. Time extensions to complete the requirements for a specialist certificate may not be granted beyond year 10 since admission.

Revalidation

Upon the recommendation of the advisor and approval of the Graduate Director, a specialist certificate student may revalidate over-age credits which are between six and ten years old, and that represent courses completed at Wayne State University with grades of ‘B’ or better. Students are not permitted to revalidate credits earned at other institutions.
Doctoral Degrees

The doctoral programs of the College of Education at Wayne State are designed to afford an opportunity for advanced study and research to persons who have demonstrated superior scholarship, promise in the field of research, and potential for professional leadership. Advanced graduate degrees are conferred not merely upon the completion of a prescribed number of courses, nor necessarily after a given period of residence; but, rather, in recognition of outstanding ability and high attainment in course work, examinations, research, scholarly writing, and personal fitness for the profession.

The Ed.D. degree is typically more application-oriented; the Ph.D. degree is more research-oriented. Ed.D. study includes the development of specialized practitioner skills; application of other educational foundations and techniques to a field; or applied research that primarily addresses localized practitioner problems. Ph.D. study includes theoretical foundations in the field; application of foundational or related disciplines; or research directed toward theory-building.

Doctoral degree programs are administered by the following academic divisions of the College:

- Administrative and Organizational Studies
- Kinesiology, Health and Sport Studies
- Teacher Education
- Theoretical and Behavioral Foundations

Admission to Doctoral Programs

1. An undergraduate grade point average of 'B' or above (3.0 on a 4.0 point scale). Applicants with grade point averages of less than 3.0 for the baccalaureate must present evidence of superior academic achievement in a Master's Degree program (3.5 or above) before being considered for admission.

2. The following program requires a Master's degree from an accredited school: Counseling.

3. Admission to these programs is contingent upon admission to the Graduate School (p. 35). Application information is available on the Graduate Admissions (http://gradadmissions.wayne.edu/apply.php.html) website.

Specific admission requirements associated with individual majors and areas of concentration can be found in the respective divisional sections; generic degree requirements applicable to all Divisions are stated below.

Doctor of Education Requirements

The Doctor of Education is available in the following majors: Counseling, Educational Evaluation and Research, and Educational Leadership and Policy Studies.

Credit Requirements and Time Limitation

The minimum credit requirement for the Ed.D. degree is ninety credits in graduate work beyond the baccalaureate degree, with the exception of the Ed.D. in Educational Leadership and Policy Studies. The Educational Leadership and Policy Studies Ed.D. requires a minimum of seventy-five graduate credits beyond the bachelor's degree. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees.

All degree requirements must be completed within seven years from the time of admission as a doctoral applicant.

Residence

At least one full year of course work, i.e., thirty credits of course work beyond the master's degree and excluding dissertation research credit, must be taken in residence at Wayne State University, with the exception of the Ed.D. in Educational Leadership and Policy Studies. The Educational Leadership and Policy Studies Ed.D. requires twenty-five credits.

The Ed.D. program requires the completion of six graduate credits in regular course work in each of two successive semesters after admission as an Ed.D. applicant. The residence requirement must be completed following admission to the Ed.D. program.

At least thirty credit hours, exclusive of dissertation credit, must be taken in course work open only to graduate students (7000 course level or above).

Research Methods

A minimum of eleven credits is required in course work, approved by the College's Doctoral Advisory Committee, aimed at developing competence in statistics and research methodologies, with the exception of the Ed.D. in Educational Leadership and Policy Studies. The Educational Leadership and Policy Studies Ed.D. requires ten credits.

Electives

Electives may be chosen with advisor approval.

Concentrations (Major)

A minimum of thirty credits is required in the student’s area of concentration, with the exception of the Ed.D. in Educational Leadership and Policy Studies. The Educational Leadership and Policy Studies Ed.D. requires twenty-five credits. The courses constituting the concentration will be specified by the department.

Cognates

A cognate in professional education or in a single field is optional at the discretion of the major advisor. Courses included in the cognate are approved by the advisor.

Plan of Work

A Plan of Work must be filed and approved by the advisor and graduate officer during the semester in which the student is completing eighteen credits of work under advisement. Failure to file a Plan of Work may preclude further registration.

The Plan of Work must include thirty credit hours of Education course work with the exception of the Ed.D. in Educational Leadership and Policy Studies. The Educational Leadership and Policy Studies Ed.D. requires twenty-five credits.

Candidacy

Candidacy is achieved when the dissertation prospectus receives final approval by the Graduate Officer following approval by the Dissertation Advisory Committee through a proposal oral defense and approval by the Internal Review Board (when applicable).

Selection of Advisor and Dissertation Advisory Committee

Students will be assigned an advisor at the time of admission. The advisor acts as the chairperson of the student’s doctoral committee, which will consist of a minimum of three members: the advisor, one member representing the area of the concentration, and one member outside of the concentration area.
Two members of the committee, including the advisor, must hold a Regular Graduate Faculty Appointment. The committee must be fully constituted not later than the time the student begins active work on dissertation research or project. The main function of the doctoral committee is to advise the student in research activities and to administer the final defense. The dissertation committee chair assumes the responsibility for overseeing the procedures of the dissertation defense, serving as the advocate for the student and resolving conflicts.

**Dissertations**

The doctoral student is required to submit a dissertation on a topic satisfactory to the doctoral committee. Twenty credits are required in dissertation research (ED 9989). Prior to candidacy, students may register for up to eight (8) credit hours. The balance of hours are completed after advancement to candidate status. In each semester, registration must be completed prior to Census Day. All 20 semester hours of dissertation research must be registered prior to the Final Public Lecture-Presentation Defense.

**Final Written and Oral Examinations**

Final written and oral examinations in the major field of concentration are required. Testing in the cognate is optional at the discretion of the major advisor. The exact times of these examinations are determined by the Graduate Officer. Students will register for the examinations with advisor approval. The committee must consist minimally of three graduate faculty members from the major department (faculty from the College of Education), at least two of whom hold a Regular Graduate Faculty Appointment valid through the completion of the Qualifying Examination period. The major advisor must be one of the two members with a valid Regular Graduate Faculty Appointment. When performance on a final examination is unsatisfactory, the student may request a re-examination which must be taken within one year of the date of the examination and after one semester has elapsed since the examination. The second examination shall be considered final.

**Final Public Lecture-Presentation Defense**

A final oral examination on the dissertation is conducted by the student’s doctoral committee under the auspices of the Education Graduate Office. Students must be registered the semester of the Final Defense. Students that have completed 20 semester hours of dissertation research may register for ED 9995, Candidate Maintenance Status.

**Annual Progress Reports**

Annual Progress Reports are required and completed at the end of the winter semester (due by April 30). The annual review of student progress is an important cornerstone of quality training of doctoral students. An Annual Review from each year of the program is required when requesting a time extension.

**Time Extensions**

Time Extensions may be granted to candidates in good standing with demonstrable progress towards completion of the dissertation. The request for a time extension must be made within six months of the original 7-year completion deadline and the student’s dissertation proposal must have been approved prior to making the request. Students who have not completed the Ed.D. requirements within ten years of their application date are required to re-take the Final Qualifying Examination and may need to complete additional coursework to prepare for the examination. The total time for earning the Ed.D., including all time extensions and any required revalidation, is 12 years.

**Doctor of Philosophy Requirements**

The Doctor of Philosophy is available in the following majors: Counseling, Counseling Psychology, Educational Evaluation and Research, Educational Leadership and Policy Studies, Educational Studies, Learning Design and Technology, and Kinesiology.

Ph.D. programs in the College of Education require a minimum of ninety graduate credits beyond the bachelor’s degree, with the exception of the Ph.D. in Educational Psychology. The Educational Psychology Ph.D. requires a minimum of one hundred graduate credits beyond the bachelor’s degree. Of the minimum of ninety graduate credits (or one hundred for the Ph.D. in Educational Psychology), a minimum of twenty credits in coursework must be completed in the major field, including at least twenty-four credits of graduate work in Education. Thirty credits in dissertation research are required in the Ph.D. program. The thirty credit dissertation registration requirement is fulfilled by registering for the courses ED 9991, ED 9992, ED 9993, and ED 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The remaining credits will be assigned to research or coursework in accordance with the needs of the students and the requirements in the field of concentration. A minimum of fifteen credits in research technique courses approved by the College’s Doctoral Advisory Committee are required. A cognate in a field inside or outside the College of Education is optional at the discretion of the major advisor.

A Plan of Work, qualifying examinations, and a Final Public Lecture Presentation are required. Satisfactory completion of the full-time residency requirement must be certified by the advisor and the College graduate officer. For additional information, Ph.D. applicants should consult the Graduate School’s Graduate Degree and Certificate Requirements (p. ). Also, please consult the College of Education Doctoral Policies and Procedures handbook (https://education.wayne.edu/documents/revised_edd_phd_booklet_172_.pdf) for further specific Ph.D. requirements.
Academic Services

Office: 489 Education; 313-577-1601
Assistant Dean: Paul W. Johnson

Pre-Admission Graduate Advising: LaSondra Dawn, Deborah Gibson, KaRie Jorah-Rood, Mary Waker
Graduate Programs Outreach Specialist: Gloria McDonald
Undergraduate Advising: Fawne Allossery, Shawntae Harris Mintline, Kurt Troutman
Undergraduate Success Coach: Daniel Lewis III
Undergraduate Recruitment Coordinator: Jeffrey Lisiecki

http://coe.wayne.edu/admissions/index.php

Purposes of the Division

The Division of Academic Services in the College of Education is responsible for Undergraduate Advising, Graduate Admissions, Graduation & Certification, Curriculum: Course & Program Proposals, Course Scheduling & the Bulletin, Student Education Council, Education Scholars Alliance Program, and Graduate Faculty Appointments.

Advising Services

Advising in the College of Education is centralized for undergraduate students in the Division of Academic Services and decentralized for graduate students in the four academic divisions of the college: 1) Administrative and Organization Studies, 2) Kinesiology, Health and Sport Studies, 3) Theoretical and Behavioral Foundations, and 4) Teacher Education. Undergraduate students have professional advisors and graduate students are advised by faculty in the student's program. Every student admitted to the College of Education is assigned an advisor.

Pre-Admission Graduate Advising

Academic Services provides pre-admission advising to students interested in graduate programs. Graduate advisors provide guidance with program selection, the satisfaction of admission requirements and completion of the graduate admission application.

Graduate Student Services

- Degree and certificate audits for graduation.
- Recommendations to the Michigan Department of Education for certification and licensure (see the Certification section below).
- Plans of work for teaching endorsements in the core subject areas.
- Requests for time extensions and monitoring of the university's academic probation system.

Certification

As a liaison to the Michigan Department of Education, the Division of Academic Services recommends candidates for initial certification as teachers, administrators, and school psychologists; approvals for supervisors and directors of Special Education; and licensure for school counselors. Additionally, the division helps candidates secure endorsements to existing teacher and administrator certificates.

Administrative and Organizational Studies

Office: 341 Education Building; 313-577-1728
Interim Assistant Dean: William Hill
http://www.coe.wayne.edu/aos

The Division of Administrative and Organizational Studies has as its primary goal the development and enhancement of leadership and organizational learning. It is within the scope of this division to study emergent trends, technologies and educational innovations; to develop rationales for supporting educational change; to present viable programs of study for advanced students in education which will enable them to function skillfully as educational leaders in facilitating change, and in developing and conducting on-going programs; and to design and implement learning innovations, and the impact of instructional methodologies on the improvement of human and organizational performance. The program areas — Educational Leadership and Policy Studies and Learning Design and Technology — are under the guidance of this Division.

Educational Evaluation and Research Programs

Evaluation and Research offers concentrated programs for building careers and leadership positions in educational evaluation and statistics; computer applications; and research methodology.

Students who have already successfully achieved background, training, and experience in substantive disciplines of education and in non-education fields and who are interested in becoming more proficient in scientific inquiry, research strategies, evaluation and appraisal of studies, models and designs, and multivariate analysis, especially in conjunction with computer facilities, are afforded such opportunities in these programs. For optimum effective preparation, internships in research will be arranged upon request. The staff is available to students and faculty for consultation in research design and multivariate analysis.

Cooperative educational programs leading to training skills in Educational Evaluation and Research in Medical Education are also available. This specialized training is available in cooperation with selected faculty from the School of Medicine. Persons from the health sciences seeking educational research skills and persons from education backgrounds seeking health science education skills are brought together for their mutual growth.

Educational Leadership and Policy Studies Programs

In this area the College offers the Master of Education in Educational Leadership, an Educational Specialist Certificate program in Administration and Supervision, and Doctor of Education and Doctor of philosophy degrees with a major in Educational Leadership and policy Studies.

The Master of Education in Educational Leadership is designed for students seeking leadership roles, formal and informal, within the schools and community. Upon completion of this degree, students may apply for the Michigan School Administrator Certificate at the building level for Elementary and Secondary Administrator K-12.

The Education Specialist Certificate programs serve students aspiring to administrative positions in education and practicing administrators wishing to enhance their skills. Depending on the plan selected, these programs are designed for those seeking positions as building
administrators, central office administrators, higher education administrators, special education supervisors and directors. The College offers certification programs in all areas of administration approved by the Michigan State Board of Education.

Two doctorate programs in Educational Leadership and Policy Studies (ELPS) are available with provisions for educational leadership, including special education administration. The Doctor of Education (Ed.D.) is designed for those planning to work in the field primarily as a practitioner; interested in educational research in settings such as a school district or educational institution; interested in developing continued leadership in education; and policy-making roles.

The Doctor of Philosophy (Ph.D.) is designed for a person who is anticipating an academic career or in an area of practice that demands theoretical research expertise; who is interested in theory and conceptual analysis; and who is interested in research which has potential for advancing education theory and practice.

Learning Design and Technology Specialties

Each degree and certificate program in Learning Design and Technology is designed to prepare persons for positions in a variety of organizations and sectors including healthcare, business, education, government, military, and human services agencies. The newest technologies are incorporated into these programs, enabling the graduate to function in the ever-changing roles of this profession including:

• learning designer
• learning & development specialist
• talent development
• instructional designer, developer, or researcher
• advanced technology and e-learning specialist
• media or learning resources consultant or manager
• professor, teacher or curriculum specialist
• faculty developer
• technology coordinator and performance technologist
• trainer
• training manager
• consultant

Students can achieve advanced skills in specialty areas such as:

1. Instructional design and evaluation;
2. Performance improvement, training and organizational development;
3. Interactive technologies design and development;
4. e-learning and distance education;
5. Technology integration in the schools;
6. Instructional media design and production;
7. Research and publication in the field; and
8. Other emerging applications of learning design and technology.

Further information can be found on the Learning Design and Technology (http://coe.wayne.edu/aos/ldt/) webpage.

• Administration and Supervision (Education Specialist Certificate) (p. 101)
• Educational Evaluation and Research (M.Ed.) (p. 102)
• Educational Evaluation and Research (Ed.D and Ph.D.) (p. 102)

Administration and Supervision (Education Specialist Certificate)

Admission Requirements

Applicants must have a 2.75 Undergraduate GPA or a 3.40 Graduate GPA in the master's program for regular admission; a master's degree from an accredited institution; submission of official transcripts from the undergraduate and graduate degree institutions; a personal statement to include career/academic goals (500-1000 words); and if applicant is seeking the Special Education Administrator concentration, the following two additional requirements apply:

1. Must have current and valid certification in an area of special education including but not limited to the following: Certified Special Education teacher, School Social Worker, School Psychologist, or Speech & Language Pathologist and
2. a minimum three years of experience in Special Education

Program Requirements

Thirty credits are required for this certificate predicated on the admission status of the applicant as cited below under the concentrations A-D. Basic requirements are cited under Education Specialist Certificate (p. 94). Since this program is specifically designed to strengthen the individual background of teachers and administrators, all Plans of Work are developed in consultation with the appropriate advisor.

All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees. All Plans of Work are developed in consultation with the student's assigned advisor.

Central Office Administrator Concentration

Elementary and Secondary Administrator Concentration

Applicants with Master's Degree other than in Educational Leadership/Administration (thirty credits):
### Educational Evaluation and Research (M.Ed.)

**Admission:** Students are admitted every semester and must meet the general admission requirements for the Master of Education (p. 95).

A minimum of thirty credits is required for this degree under Plan A, B, or C. Required courses include ED 7999 if Plan B or C is elected, or ED 8999 for Plan A. In addition, a minimum of twelve credits in educational evaluation and research. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees.

### Educational Evaluation and Research (Ed.D. and Ph.D.)

An admissions moratorium is in effect for these programs, beginning Winter 2023 and remaining in place through Winter 2026.

#### Admission Requirements

Applicants to doctoral programs in this area must meet the admission requirements stated under Admission to Graduate Programs (p. 98).

An admissions moratorium is in effect for these programs, beginning Winter 2023 and remaining in place through Winter 2026.

Basic degree requirements for the Ph.D. and Ed.D. programs are stated at Doctor of Education Requirements (p. 94). All courses in the major are selected in consultation with an advisor. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees.

#### Program Evaluation (M.A.)

The Mission of the M.A. in Program Evaluation at Wayne State University is to prepare a diverse body of evaluation practitioners to positively impact local and global communities by providing high quality, effective, and holistic program evaluations in a manner that is ethical and attendant to the diverse needs and demands of stakeholders in an organization through inclusive and rigorous coursework and a practicum.

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the College of Education (p. 95).

The M.A. in Program Evaluation is an online program, offered under master's degree Plan C (coursework option). The total number of credits for the degree is 33 credits, which involves 30 credits of core/required classes and a three (3) credit practicum experience. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees.

Educational Leadership and Policy Studies (Ed.D.)

Admission Requirements

The Doctor of Education (Ed.D.) program in Educational Leadership and Policy Studies requires a master's degree from an accredited institution or 30 graduate semester hours beyond the bachelor's degree from an accredited graduate school with no grade lower than 'B' and a graduate GPA of at least 3.50. In addition, an Autobiographical Statement to include career/academic goals and research interests (1000–1500 words), three recommendations (two professional and one academic), and an interview may be required.

The Doctor of Education (Ed.D.) program with provisions for educational leadership, including special education administration, is designed for a person who is planning on working in the field primarily as a practitioner; interested in educational research in settings such as a school district or educational institution; interested in developing continued leadership in education; and policy-making roles.

Program Requirements

The general requirements for the degrees are stated in the College's Academic Regulations. In addition, all students must complete at least a fifteen-credit sequence in the major. Specific requirements for the major are determined in consultation with the assigned advisor.

The Doctor of Education (Ed.D.) program in Educational Leadership and Policy Studies requires a master's degree from an accredited institution or 30 graduate semester hours beyond the bachelor's degree from an accredited graduate school with no grade lower than 'B' and a graduate GPA of at least 3.50. Courses are available in online, hybrid and traditional format

All coursework must be completed in accordance with the academic procedures of the College of Education and the Graduate School’s regulations governing graduate scholarship and degrees.

Educational Leadership and Policy Studies (Ph.D.)

The Doctor of Philosophy (Ph.D.) program in Educational Leadership and Policy Studies require a master’s degree from an accredited institution or 30 graduate semester hours beyond the bachelor’s degree from an accredited graduate school with no grade lower than ‘B’ and a graduate GPA of at least 3.50. In addition, an Autobiographical Statement to include career/academic goals and research interests (1000–1500 words), three recommendations (two professional and one academic), and an interview may be required.

The Doctor of Philosophy (Ph.D.) with provisions for educational leadership, including special education administration, is designed for a person who is anticipating an academic career or in an area of practice which demands theoretical research expertise; who is interested in theory and conceptual analysis; and is interested in research which has potential for advancing education theory and practice.

The minimum number of credit hours for the degree is 90 hours, which may include credits from the student’s Master’s Degree and Education Specialist Certificate coursework.

Residency Requirement:

a) At least 30 semester hours beyond the Master’s Degree, exclusive of dissertation credit, must be taken in residence at WSU;

b) At least 6 semester hours of regular course work must be completed in each of 2 consecutive semesters anytime AFTER admission to the doctoral program;

c) At least 30 semester hours, exclusive of dissertation credit, must be taken in coursework open only to graduate students (”700” course level or above).

Course Requirements

Area of concentration: 30 semester hours (minimum). The courses constituting the area of concentration are specified by the ELPS program. They may include offerings from outside the College of Education, with the advisor’s approval.

Advanced EPS Courses: 18 hours in the following advanced courses.

- EPS 8710 Readings in Educational Policy Studies Cr. 4
- EPS 9600 Seminar in Theory and Research in Educational Leadership Cr. 3
- EPS 9610 Seminar in Educational Policy Development Cr. 4
- EPS 9620 Seminar in Educational Policy Initiatives Cr. 4
- EPS 8880 Workshop in Administration and Organizational Studies Cr. 3

Research Techniques: At least 15 semester hours in research techniques will be selected in consultation with the student’s advisor:

- EER 7630 Fundamentals of Statistics Cr. 3
- EER 7640 Fundamentals of Quantitative Research Cr. 3
- EER 7650 Computer Use in Research Cr. 3
- EER 8992 Research and Experimental Design Cr. 3
- EER 7870 Qualitative Research I: Introduction Cr. 3
- EER 7880 Fundamentals of Ethnographic Research Cr. 3
- EER 8520 Qualitative Research II: Design and Data Collection Cr. 3
- EER 8530 Qualitative Research III: Data Analysis and Reporting Cr. 3
- EER 7910 Qualitative Methods for Diversity and Inclusion Cr. 3
- EER 7920 Qualitative Methods for Community and Classroom Research Cr. 3
- EER 8550 Advanced Qualitative Inquiry: Innovations in Theory Cr. 3
- EER 8560 Advanced Qualitative Inquiry: Innovations in Practice Cr. 3
- EER 8700 Advanced Qualitative Program Evaluation
- EER 8710 Advanced Ethnographic Research
- EER 8720 Advanced Quantitative Program Evaluation
- EER 8900 Qualitative Design for School Research

Electives: Electives should be chosen in consultation with the student’s advisor.

Dissertation: 30 semester hours. A dissertation is required and is completed under the direction of the major advisor. The research project is to be based on theories related to policy studies.

- ED 9991 Doctoral Candidate 1 Cr. 7.5
- ED 9992 Doctoral Candidate 2 Cr. 7.5
- ED 9993 Doctoral Candidate 3 Cr. 7.5
- ED 9994 Doctoral Candidate 4 Cr. 7.5

All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees.
Learning Design and Technology (M.Ed.)

The Master of Education in Learning Design and Technology prepares students as instructional designers, e-learning specialists, multimedia specialists, user engagement designers, consultants, and training and development directors. The program encompasses the analysis of learning and performance for the design, development, implementation, evaluation, and management of processes and resources intended to improve learning and performance in various settings. The curriculum provides knowledge necessary to create, use, assess, and manage theoretical and practical applications of instructional technologies and processes. Students learn to facilitate learning by creating, using, evaluating, and managing effective learning interventions within a supportive community of practice.

Admission Requirements

- A completed WSU Graduate Application
- A brief 2-3 paragraph personal interest statement explaining how this degree will aid the applicant in his or her future career pursuits.
- Official Transcripts from previous undergraduate and graduate college/university course work showing a minimum 2.80 GPA (Transcripts must be sent directly to the University from the various institutions). The Graduate Record Examination may be required for those students with undergraduate grade point averages between 2.50 and 2.80. Contact the program area for further information.

Program Requirements

General requirements may be found under the Master of Education (p. 94) section. All coursework must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees.

A minimum of 30 credits is required for an online master's degree in Learning Design and Technology, at least 24 credits must be taken at Wayne State University. The degree can be completed by an all course work option also known as Plan C from the Graduate School and meet the General Professional Core requirements.

Students are required to meet with their academic advisor before registering for courses in the first term to develop a plan of work.

Learning Design and Technology (Ph.D.)

The Doctor of Philosophy (Ph.D.) program in Learning Design and Technology prepares researchers to apply evidence-based practices in higher education, business, healthcare, and government. The curriculum provides knowledge necessary to explore, evaluate, synthesize, and apply methods of inquiry to enhance learning and improve performance. Students apply knowledge necessary to create, use, assess, and manage theoretical and practical applications within a supportive community of practice.

The Ph.D. in Learning Design and Technology is designed for those who meet the following criteria and whose research interest align with those of our faculty to provide support and mentoring.

- Already have a Master’s degree
- Are knowledgeable and experienced in the field (either through previous academic work or significant related work experience) and
- Demonstrate scholarly promise

Admission Requirements

An informal interview with a potential faculty advisor is mandatory before completing an application for the Ph.D. program.

- A completed WSU Graduate Application
- Grade Point Average: Undergraduate 2.8 and graduate 3.4
- Valid and official Graduate Record Examination (GRE) scores (Verbal Reasoning, Quantative Reasoning, Analytical Writing)
- Three academic recommendations
- Departmental interview with faculty
- Autobiographical statement, curriculum vita, and a research plan of intent must include research alignment with a potential academic advisor.
- Research plan of intent must include:
  - What are your current research interests?
  - Who do you think among our faculty would be your best advisor and why? (You can suggest 1 - 2 people as possible advisors with a rationale for each.)
  - How do the research interests of the selected advisors fit with your own interests?
  - Additional information often included in the statement of intent includes information on the candidate's background and experiences and any anomalies in the candidate's record that need explanation.

Program Requirements

All coursework must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees. All doctoral committees must include a minimum of two faculty members from Learning Design and Technology; three LDT faculty members are preferred for Ph.D. students. All plans of work are developed in consultation with the student’s assigned doctoral advisor. Students are required to meet with their academic advisor before registering for courses in the first term to develop a plan of work.
A minimum of 90 credits are required for a Ph.D. in Learning Design and Technology. Core requirements in the major include:

Kinesiology, Health and Sport Studies

Office: 2152 Faculty Administration Building; 313-577-4249
Assistant Dean: Nate McCaughtry
https://education.wayne.edu/health-exercise-sports

Health and kinesiology, as integral parts of a general education, focus attention upon the vital needs of the human being to acquire attitudes, knowledge and skills necessary for regular participation in healthful living and physical and leisure-time activities. Accordingly, the Division provides courses of instruction both to promote physical well being through athletic and exercise programs, and to prepare teachers and practitioners to promote such health in others. The decreased demands for physical vigor, as well as the increased tensions caused by the technological progress of the modern society, demand a scientific approach to these vital phases of well-being.

The Division of Kinesiology, Health and Sport Studies (KHS) provides courses of instruction in athletic training, health and physical education pedagogy, community health, exercise and sport science and sports administration for the general student body. In addition, it provides professional curricula at the undergraduate and graduate levels for those students seeking careers in these areas. For students interested in advanced study and research the Division offers a doctoral program in Kinesiology: concentrations (Exercise and Sport Science, Community Health and Health and Physical Education Pedagogy).

Advisors

Each student admitted to the College at the graduate level and seeking a degree is assigned to a faculty member who acts as the advisor. The advisor guides the student in the selection of courses and counsels the student in solving academic problems.

Admission to Master’s Programs

Current and prospective students should always review the KHS webpage (http://coe.wayne.edu/kinesiology/), for the most current information regarding admission and degree requirements.

Admission to graduate programs in the Division of Kinesiology, Health and Sport Studies is contingent upon admission to the Graduate School (p. 35). In addition, applicants to any program in the Division must meet the following criteria, as applicable:

Regular Admission

Applicants must have an undergraduate grade point average of 3.0 or above, and an undergraduate degree directly relating to the field of specialization being applied for; or an undergraduate degree accompanied by an extensive educational background in a closely-related field.

Qualified Admission

Applicants whose undergraduate grade point average is between 2.5 and 2.9, and who otherwise meet the criteria for regular admission, will be admitted on this basis but will be required to successfully complete additional coursework and/or other requirements as stipulated by the Division Graduate Officer.

Non-Degree Admission (Pre- or Post-Master’s)

Applicants must have an undergraduate grade point average of 2.5 or above, and an undergraduate degree in any field. Non-degree applicants must include a personal statement with their initial graduate application, specifying their intent to apply to a Kinesiology, Health and Sport Studies
degree program prior to the earning of nine credit hours. Only one semester of full-time graduate study, part-time registrations not to exceed nine credits, are normally permitted in this classification. Based on the approval of the College of Education Graduate Officer, no more than nine credits taken in graduate non-degree admission status may later be applied to graduate degree program requirements.

Post-Bachelor Admission
Applicants must have an undergraduate grade point average of 2.25 or above, and an undergraduate degree in any field. Post-Bachelor status allows students to elect courses through the 6000 level, for undergraduate credit only.

Special Admission (Non-Degree or Post-Bachelor)
Upon the recommendation of an advisor and the Division Graduate Officer, an applicant whose undergraduate grade point average is below 2.25 may be admitted on Non-Degree or Post-Bachelor status, if the applicant demonstrates substantial evidence of meritorious academic achievement subsequent to the conferral of his/her undergraduate degree.

Senior Rule Admission
In their last undergraduate semester, Wayne State students with a 3.0 (or above) upper division grade point average have the option of taking a limited number of graduate credits. Graduate credit is awarded only for those courses taken in excess of baccalaureate degree requirements. Undergraduate and graduate courses combined may not exceed sixteen credits for the final semester of baccalaureate degree work. A Senior Rule student must register for at least one credit which is required for the undergraduate degree in order to be eligible for this status. Students who have completed all required registrations for the baccalaureate may not obtain Senior Rule status. Completion of the Application for Graduate Admission form is required, and students are advised to consult their advisors and the Office of University Admissions. Application deadlines for Senior Rule admission are the same as for regular graduate admission. Students who qualify and are recommended by the department or college will be admitted for one semester. Graduate admission will be regularized upon evidence that the student has completed all requirements for the bachelor's degree; it is the student’s responsibility to provide this transcript.

As a courtesy, the University permits a student to pay undergraduate fees for the graduate courses elected in a Senior Rule status. It is recommended that students elect only courses numbered 5000-6999 in their Senior Rule semester.

• Athletic Training (M.S.) (p. 107)
• Community Health (M.S.) (p. 108)
• Exercise and Sport Science (M.S.) (p. 109)
• Health and Physical Education Teaching (M.S.) (p. 109)
• Sports Administration (M.A.) (p. 111)
• Kinesiology (Ph.D.) (p. 112)

Athletic Training (M.S.)
The Master of Science in Athletic Training is a graduate level professional program for students interested in becoming an Athletic Trainer (AT). Athletic Trainers (ATs) are healthcare professionals who render service or treatment, under the direction of or in collaboration with a physician, in accordance with their education and training and the states' statutes, rules and regulations. As a part of the healthcare team, services provided by ATs include: injury and illness prevention and wellness promotion; emergent care, examination and clinical diagnosis; therapeutic intervention and rehabilitation of injuries and medical conditions. Students who complete the program become eligible for national certification and state licensure by successfully completing the Board of Certification, Inc. examination.

Admission Requirements
Admission to this program is contingent upon admission to the Graduate School (p. 35) and the Division of Kinesiology, Health and Sport Studies (p. 94). Additionally, applicants must satisfy the following criteria:

• An earned bachelor's degree from an accredited institution of higher education with a minimum cumulative g.p.a. of 3.0 on a 4.0
• Statement of professional goals
• Three professional references, with at least one from a licensed and certified AT.
• Documented observation of an AT in the professional setting for a minimum of 30 hours
• Proof of current Emergency Cardiac Care (CPR/AED) Certification and/or Basic Life Support (BLS)
• Proof of Immunizations
• Completion of the Technical Standards Agreement
• A personal interview
• Grade of C or better in the following courses:
  • Anatomy and Physiology (6 credits)
  • Exercise Physiology (3 credits)
  • Research/Statistical Methods (3 credits)
  • Physics (3 credits)
  • Chemistry (3 credits)
  • Biology (3 credits)
  • Psychology (3 credits)
  • Nutrition (3 credits)
  • Biomechanics (3 credits)

Degree Requirements
The course of study will be a 24-month program beginning during the summer semester. Students will complete a total of four semesters and two summer sessions, integrating a competency-based approach in both the classroom and clinical settings. Students are required to complete each semester sequentially, with full-time enrollment.

First Year
Spring/Sumer Semester Credits
ATR 5110 Pathophysiology of Sports Injuries 3
ATR 5115 Acute Care of Athletic Injuries 3
ATR 5149 Pre-Season Integrative Experience I 1

Credits 7

Fall Semester
ATR 5125 Orthopedic Assessment 3
ATR 5130 Therapeutic Interventions I 3
ATR 5150 Integrative Experience in Athletic Training I 4

Credits 10

Winter Semester
ATR 5140 Clinical Gross Anatomy 3
ATR 5145 Therapeutic Interventions II 3
ATR 5151 Integrative Experience in Athletic Training II 4

Credits 10

Second Year
Spring/Sumer Semester Credits
ATR 5215 Medical and Pharmacologic Interventions 3
ATR 5250 Interprofessional Practice Experience 2
ATR 5159 Pre-Season Integrative Experience II 1
Community Health (M.S.)

Mission Statement

Our mission is to advance health equity through the preparation of Community Health Education Specialists who explore the multiple levels (individual, family, community, policy, systems) and social determinants that influence behavior and health. Community health professionals focus on the community as the setting for analysis, assessment, advocacy, program planning, intervention, evaluation, and research, and are committed to developing, enhancing and using evidence-informed strategies to improve population health.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the Division of Kinesiology, Health and Sport Studies (p. 94).

Program Requirements

The Master of Science with a major in Community Health degree is offered under the following plans:

• **Plan A:** Thirty-five credits including an eight-credit thesis
• **Plan B:** Thirty credits including a three-credit project or internship
• **Plan C:** Thirty credits (neither thesis or project required)

Requirements for this degree include: general professional education courses; specialization courses and elective courses. Professional education courses and electives should be chosen in consultation with an advisor. A minimum g.p.a. of 3.0 is required for graduation. All coursework must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees.

Exercise and Sport Science (M.S.)

The Exercise and Sport Science degree provides students with a scientific-based curriculum for improving human performance and wellness; and is an ideal preparation for successful entry into a variety of graduate professional programs such as nursing, occupational therapy, physician assistant, physical therapy, athletic training, or medical school. Students develop application skills for sport and fitness activities, assessment and evaluation of various populations and fitness levels, and human movement systems from subdisciplines of kinesiology. Career options include corporate wellness, exercise physiologist, cardiac rehabilitation, strength and condition coach, and a wide variety of therapeutic exercise and recreation positions.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the Division of Kinesiology, Health and Sport Studies (p. 94).

Program Requirements

The Master of Science with a major in Exercise and Sport Science is a total of 30 credits minimum and offered under the following options:

- **Plan A**: A minimum of thirty credits including an eight credit thesis
- **Plan B**: A minimum of thirty credits including a three-credit project
- **Plan C**: A minimum of thirty credits including an internship (variable credit option)

The required courses are 15-21 credits, electives credits are between 3-9 credits, and the culminating experience is between 1-8 credits.

Select one of the following:
- KHS 7999 Master's Essay and Project Direction
- KHS 8999 Master's Thesis Direction
- KHS 8750 Internship in Kinesiology, Health and Sport Studies

**Elective Courses**

Select courses as approved by advisor to complete the thirty credits required for graduation

Health and Physical Education Teaching (M.S.)

**Degree Options**

There are four concentrations for Master’s of Science with a major in Health and Physical Education Teaching. Concentrations are selected on the basis of prior degrees and career focus.

1. Continuing Education seeking K - 12 Health and Physical Education Teacher Certification (for candidates who already have a Michigan teaching certificate to teach in other content areas, but wish to Health and Physical Education to their teaching certificate)
2. Continuing Education (for candidates who are already certified in Health and Physical Education Teaching, and would like to continue their studies in these areas by adding a Masters-level credential)
3. Initial K-12 Health and Physical Education Teacher Certification (for candidates who have a Bachelors degree in a field outside of Education and are now interested in obtaining an initial teacher certification in Health and Physical Education Teaching)
4. Adapted Physical Education Endorsement (for candidates seeking the Special Education Endorsement - Physical Education for Students with Disabilities)

**Overview**

The program emphasis is on obtaining teaching knowledge and skills Health and Physical Education Teaching. The curriculum includes classes in; curriculum development for school health and physical education programs, implementing developmentally appropriate instruction for all learners, assessing health and physical education content knowledge and skill proficiency, using instructional technology effectively, and demonstrating the qualities of a professional Health and Physical Educator. Each concentration is comprised of tailored coursework and professional experiences according the student's prior background and professional aspirations to prepare them to meeting multiple levels of disciplinary standards including:

- The Michigan Interstate Teacher Assessment and Support Consortium (MI InTASC) Model Core Teaching Standards, adopted by the State Board of Education (SBE) in 2013, define the theoretical and practical knowledge, skills, and dispositions that all entry-level teachers should possess upon completion of an approved teacher preparation program.
- Michigan-specific content standards define the central concepts, tools of inquiry, and structures of the specific discipline(s) in which teacher candidates seek endorsements, as well as pedagogical applications of that disciplinary knowledge. "Standards for the preparation of Health and Physical Education Teachers in Michigan."

**Admission Requirements**

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the Division of Kinesiology, Health and Sport Studies (p. 94). Additionally, in order to be eligible for admission, applicants must submit the following: Scores from a nationally normed test (i.e., ACT, SAT), a negative Tuberculosis (TB) test completed within the last three years, and a Criminal History Background check completed through Castle Branch, and official undergraduate transcripts.

Testing in the Health and Physical Education content areas are required for State Certification and completed near the end of the professional coursework. The Michigan Test for Teacher Certification (MTTC) examination scores must be sent directly to Wayne State University by Evaluation Systems Group of Pearson, the MTTC testing agency. When
registering for the MTTC, students should select “Wayne State University” as a “College or University to Receive Scores.”

Continuing Education
This is the concentration that it is the most flexible. Students who enroll in this program already have teacher certification and are coming back to school to obtain their master’s and gain professional knowledge. Given this focus, it is important for students to have flexibility with their options. There are two required courses for this concentration (6 credit hours) and 24 credit hours that are electives. The electives must be taken in KIN, KHS, HPE, HE, or SAM and must be approved by the advisor. This is a total of 30 credit hours to obtain the degree.

Continuing Education seeking K-12: Health and Physical Education Teacher Certification
This concentration is for students who are already certified in another subject area and are looking to add Health and Physical Education Teaching as an endorsement to their teacher licensure. This concentration has a minimum of 30 credit hours but could take up to 51 credits to complete (depending on the courses that they might have already taken). The courses that are required for certification are approved by the State of Michigan. The total number of courses/credit hours that need to be taken at WSU to be certified in Health and Physical Education K-12 is 51 credit hours or 17 courses. As these students are already certified in another area (or in a single area such as Health or Physical Education), they might be able to have equivalent courses counted toward their state certification. Given these unknowns, this degree is a minimum of 30 credit hours, but requires 51 credit hours if the student does not have any courses at previous institutions.

Initial K-12 Health and Physical Education Teacher Certification
This concentration is for those students who already have a bachelors degree in any subject area, but would like to go back to school to become a teacher. These students will earn initial teacher certification through this master’s degree. The required courses are approved and required by the State of Michigan for Health and Physical Education Teacher initial certification. There is a total of 64 credit hours/19 courses that must be taken. As with all other concentrations, the student can take a minimum of 30 credit hours for this degree if they have taken equivalent courses at other institutions. However, a total of 64 credits/19 courses with equivalent content must be accounted for to obtain recommendation for certification.

Adapted Physical Education K-12 with Certification
This is for those who already have teacher certification in Health and Physical Education or Special Education and would like to add Adapted Physical Education K-12 to their State of Michigan teaching license. There is a total of 30 credit hours needed to obtain the degree with this concentration. Twenty-one of those credit hours are required courses as stipulated by the State of Michigan for certification, and nine credit hours are electives for the student. The electives must be courses in KIN, KHS, HPE, HE, SED, and SAM and must be approved by the advisor.

Sports Administration (M.A.)

This online M.A. program is designed to prepare students for a career within the broad spectrum of sports programs, agencies, and related organizations. Students may specialize in one of four areas of concentration: interscholastic athletic administration, intercollegiate athletic administration, commercial sports administration, or professional sports administration. Students may custom-design their curriculum through internships and elective coursework as approved by their advisor.

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the Division (p. 106).

This Master of Arts degree is offered as a Plan C option. Plan C requires thirty-four credits in course work including twenty-four credits in required courses, with the remaining credits from courses to be selected in consultation with an advisor. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees.

Selected Courses: Additional courses from a list approved by the advisor to complete the minimum of thirty credits required for graduation. A minimum of twenty-four of these thirty credits required for graduation must be earned in courses within the Division of Kinesiology, Health and Sport Studies.
Kinesiology (Ph.D.)

The Ph.D. in Kinesiology prepares students to become researchers and educators in academic institutions and other industries requiring Ph.D.-trained professionals in the general areas of exercise, health, wellness, human performance and disease prevention.

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the Division (p. 106).

The Ph.D. in Kinesiology has three concentrations: a) Community Health, b) Exercise and Sport Science, and c) Health and Physical Education Teaching. Each concentration gives students the knowledge, skills and experience to succeed as a researcher and educator in higher education or related careers.

The plan of work for each admitted student is developed between the student and their major advisor with the goal being a plan of work that provides students with the most appropriate coursework and experiences to best prepare them for success in their future careers. Students align with a major advisor to design a tailored plan of work that incorporates: major courses aligned with the student’s career aspirations, 15 credits of research methods, and 30 credits of culminating dissertation. Coursework from previous master’s degrees may be included as major coursework upon discussion with the major advisor. The Ph.D. requires 90 credits beyond the undergraduate degree.

Additional general requirements for this degree are stated in the Doctor of Education Requirements (p. 94). All coursework must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees. Students may enroll on a full-time or part-time basis but must complete requirements within seven years of admission.

Interested applicants are strongly encouraged to contact Heather Ladanyi (eb3703@wayne.edu), Manager of the Division of Kinesiology, Health and Sport Studies, for guidance prior to the submission of admission applications.

Teacher Education

Office: 241 Education Building; 313-577-0902
Interim Assistant Dean: Kathryn Roberts

There are a number of pathways to teacher certification at Wayne State University, and all prepare future teachers to be knowledgeable, skillful, and caring professionals who are able to make a difference in the lives of children and youth. Students in our teacher certification programs benefit from outstanding faculty for their university coursework, and clinical experiences in Detroit and beyond that prepare them to work effectively and passionately with diverse children and youth.

In addition to teacher certification, our College of Education offers master’s degrees for those who want to extend their knowledge for teaching, and doctoral programs for students who seek positions in colleges and universities, school districts, and educational agencies.

Wayne State University is known for its commitment to its urban mission. The faculty in Teacher Education conduct research and teach courses that focus on creating school experiences that are academically rigorous, personally meaningful, and sustain a vibrant democracy.

Graduate Teacher Education

The graduate unit of the Division of Teacher Education emphasizes the development of competence in instruction, the improvement of curriculum at all levels, and the ability to conduct scholarly research. The graduate programs in teacher education are designed to prepare educators and researchers who are:

- effective in schools and other educational settings; knowledgeable in content areas for which they are responsible;
- knowledgeable about growth and development of learners, teaching and learning styles, philosophical purposes of schooling and methodologies of education;
- committed to the continuous improvement of the processes of education;
- responsive to a rapidly-changing technology and cognizant of its implications for education and schooling;
- cognizant of the uniqueness of urban and metropolitan areas;
- cognizant of the values and contributions of various racial, ethnic, gender, sexual, national, ability and linguistic groups;
- capable of promoting an understanding of the dynamics of cultural and linguistic pluralism in our society;
- able to promote collaboration between teachers, schools, parents, community and students;
- capable of creative thought and able to stimulate and promote creative thought in their students;
- able to study educational issues through the design and implementation of a research project;
- able to identify and use the results of educational research;
- able to reflect on and develop their own patterns of ethical behavior;
- able to serve educational institutions in local, national and international settings.

The Division offers degree programs for a wide range of advanced professional roles:

1. supervisory and resource teachers, coordinators, consultants, and curriculum specialists;
2. teachers and consultants in parent education in school and non-school settings;
3. college and university teachers and researchers in the field of education.

- Educational Studies (Ph.D.) (p. 115)
- Early and Elementary Education (M.A.T.) (p. 116)
- Secondary Education Major (M.A.T.) (p. 119)
- Art Education (M.Ed.) (p. 121)
- Teaching and Learning (M.Ed.) (p. 121)
- Bilingual Education (Bridge Graduate Certificate) (p. 122)
- English as a Second Language (Bridge Graduate Certificate) (p. 122)
- Elementary Mathematics Specialist: Advanced (Graduate Certificate) (p. 123)
- Elementary Mathematics Specialist: Introductory (Graduate Certificate) (p. 123)
- Curriculum and Instruction (Ed.D and Ph.D) (p. 124) (admissions moratorium)
- Curriculum and Instruction (Education Specialist Certificate) (p. 124)
- Reading (Education Specialist Certificate) (p. 123)

The division of Education provides pathways to initial certification at the masters level (Masters in the Art of Teaching, M.A.T.) and additional endorsements that can be added to an existing teaching license or initial certification (i.e., Bilingual/Bicultural, English as a Second Language, and Early Childhood General and Special Education).

Teaching Certificates (M.A.T.)

Present-day education is characterized by specialization at the secondary and elementary levels, related to both subject-matter fields and the age of school children. The Michigan Certification Code provides for specialization in either the elementary, or secondary school areas by authorizing state certification for teaching on those levels. Thus, a person who has kindergarten through grade eight endorsement is not legally qualified to teach in the secondary schools above grade eight, and a person with grades six through twelve endorsement is not legally qualified to teach below grade six. An exception is made in certain fields such as art, physical education, and music education, where the holder of a provisional certificate is qualified to teach his/her major subject in all grades, and, if indicated by his/her certificate, other subjects in other grades.

The certification code recognizes subject-matter specialization by requiring that the candidate for a teacher’s certificate present concentrations of credits called majors and minors. In general, the secondary school teacher must have a major and minor teaching field. The elementary school teacher must have one of the following options:

1. a core subject major or two minors and the Elementary Planned Program or
2. a student-centered program and the Elementary Comprehensive Major.

The Elementary Planned Program/Comprehensive Major is a series of courses designed to support the teaching of all subjects K-5: Health and Physical Education, Language-Arts, Mathematics, Science, Social Studies, Technology and the Arts. All majors and minors must be in subject-matter fields appropriate to teaching at the level for which certification is to be recommended. Individuals must pass state examinations in their major and minor fields before they begin student teaching.

Certification Requirements (M.A.T.)

Michigan State Teacher’s Certificates are granted by the Michigan State Board of Education upon the recommendation of the College of Education. The Standard Certificate is the initial certificate issued for a five-year period. Renewal of the Standard Certificate adds five years to the certificate’s validity and renewals are unlimited. Teachers may advance to a five-year Professional Certificate after completing additional requirements. As with the Standard Certificate, the Professional Certificate has unlimited renewals. Contact a College of Education advisor for additional information. Certificates will indicate in which grades and subjects the holder is eligible to teach. In certain specified nonacademic fields, however, the holder of a teaching certificate is eligible to teach his/her major subject in all grades from the kindergarten through the twelfth. The qualifications which the College requires for recommendation for the certificate are summarized below.

Standard Certificates (M.A.T.)

Teaching certificates as listed below are granted when all certification requirements have been met, which usually occurs upon the completion of the professional education sequence of the M.A.T. program.

Elementary Standard Certificate
(Kindergarten through Grade Five all subjects, Kindergarten through Grade Eight in a self-contained classroom, and Kindergarten through Eight in subjects corresponding to majors and minors)

1. The candidate must have graduated with a bachelor’s degree from an approved or accredited institution.
2. Students seeking elementary certification must meet major/minor requirements according to the curriculum guide see an academic advisor. All Elementary Programs must include the Planned Program/Comprehensive Major.
3. Completion of a professional education sequence is required.
4. Teaching candidates are required by the Michigan State Department of Education to obtain First Aid and Adult and Child CPR Certification, by a state-approved program, before they can be recommended for a teaching certificate in the State of Michigan. Also, a Criminal Background check no more than six months old is required.

Secondary Standard Certificate
(Grades Six through Twelve)

1. The candidate must have graduated with a bachelor’s degree from an approved or accredited teacher education institution.
2. In general, the academic background must include a single subject major or a group major in subjects in which the applicant expects to teach that are appropriate to the Secondary level. An additional minor is optional.
3. Completion of a professional education sequence is required.
4. Teaching candidates are required by the Michigan State Department of Education to obtain First Aid and Adult and Child CPR Certification, by a state-approved program, before they can be recommended for a teaching certificate in the State of Michigan. Also, a Michigan State Police Criminal Background check no more than six months old is required.

Certificate Endorsement

Holders of one level of certificate who wish to add another level (i.e., elementary to secondary or vice versa) must consult an advisor in the Division of Academic Services, 489 Education Building.
Professional Education Certificate (M.A.T.)

Requirements before July 1, 2018

The Professional Teaching Certificate is valid for up to 5 years and may be applied for any time requirements are met. Requirements:

1. 3 years of successful teaching since the issue date of the initial Standard Teaching Certificate, within the content areas and grade level of the Standard Teaching Certificate; and
2. 6 semester credit hours of reading methods coursework for elementary teachers and 3 semester credit hours for secondary certified teachers. If you completed your teacher preparation program in Michigan since 1985, you have met this requirement; and
3. 3 semester credit hours of reading diagnostics and remediation, which includes a field experience. This credit can be applied toward the professional learning requirement listed below assuming the credit was earned after the issue date of the most recent certificate or renewal; and
4. Education-related professional learning totaling 150 hours; or An education-related master's or higher degree earned at any time (even if previously utilized to renew the Standard Teaching Certificate) from a regionally accredited college or university.

Requirements after July 1, 2018

In addition to the requirements listed above (1-4), the following applies to teachers advancing to the Professional Certificate after July 2, 2018:

1. Effectiveness ratings in accordance with MCL 380.1531j:
   a. Consecutive: effective or highly effective ratings on your annual year-end performance evaluations for the 3 consecutive school years immediately preceding your application for a Professional Teaching Certificate; or
   b. Nonconsecutive: effective or highly effective ratings on your annual year-end performance evaluation for at least 3 nonconsecutive school years prior to applying for the Professional Teaching Certificate, including: An Effective Educator Recommendation form completed by the chief school administrator of the school where you are currently employed.

Reading Requirements for the Professional Certificate

In addition to the above requirements, all candidates for an elementary five-year professional certificate must have completed the six credits in reading instruction in either their undergraduate or postgraduate preparation, three of which must be reading in the content areas.

In addition to the above requirements, all candidates for a secondary five-year professional certificate must have completed in their undergraduate or post-graduate preparation a three-credit course in reading in the content areas.

Student Teaching (M.A.T. Students)

Application: Each student must make application for student teaching during the appropriate application period. The date a completed application form is submitted to the Office of Educational Partnerships and Experiences (221 Education Building) will determine the semester during which student teaching will take place. Student teaching application periods are as follows:

FALL SEMESTER: Applications are due by December 1 of the previous year

WINTER SEMESTER: Applications are due by April 1 of the previous year

Procedures for Student Teaching Application

1. Confer with an advisor to determine eligibility for student teaching.
2. Complete application forms provided by the Office of Educational Partnerships and Experiences, 221 Education Building, during the application period.

Prerequisites for Student Teaching Placement

1. Full admission to a M.A.T. program must be accomplished before applying for student teaching.
2. A WSU cumulative graduate g.p.a. of at least 3.0
3. Completion of the professional education sequence coursework.
4. Completion of the teaching major and minor(s) as defined by the student’s curriculum area in the College of Education.
5. Satisfactory completion of appropriate pre-student teaching courses and appropriate methods courses as outlined by the student’s Plan of Work.
6. Satisfactory tuberculosis test within six months before the assignment begins.
7. Passing scores on state examinations: (Professional Readiness Examination and Subject Area Examinations).
8. Criminal background check and fingerprinting if required by the school district.

Bilingual/Bicultural Endorsement (M.A.T. or M.Ed.)

The Bilingual Education Endorsement certifies a teacher who is qualified to teach classes of bilingual children. Students qualifying for an initial provisional certificate complete a twenty-one to twenty-four credit endorsement. Students holding existing certificates may add a bilingual endorsement by completing a minimum twenty-one credit planned program. Interested students should consult a Bilingual Education/ESL advisor.

All students in the bilingual-bicultural program must successfully complete the language proficiency examinations in English and the designated language of his/her individual program prior to taking courses for this minor.

English as a Second Language Endorsement (M.A.T. or M.Ed.)

The English as a Second Language (ESL) Endorsement certifies a teacher who is qualified to teach learners with limited English proficiency. Students holding existing certificates may add an ESL endorsement by completing a minimum twenty-credit planned program. Interested students should consult a Bilingual/ESL advisor.

Early Childhood General and Special Education (ZS) Endorsement (M.A.T. or M.Ed.)

The Early Childhood General and Special Education (ZS) endorsement is designed to ensure that teachers working with children from birth to the age of eight years and their families obtain specialty area preparation in early childhood education (ECE) to include working with children with developmental delays or disabilities. Teachers holding an elementary certificate must complete 26-credit hours of course work, lead-teaching experience with two age groups, and pass the Michigan Test for Teacher Certification (MTTC) to obtain the ZS endorsement. The endorsement program consists of a minimum of 26 credits across specified areas.
beyond the Provisional Certificate requirements and lead-teaching experience in teaching two of the following three age levels:

1. infant-toddlers,
2. preschool,
3. kindergarten to third grade, to include experience with Individual Family Service Plan (IFSP) and/or Individual Education Program (IEP) for young children receiving special education.

The courses may be part of a master’s, education specialist, or doctor of education program. Interested students should consult an ECE advisor.

Educational Studies (Ph.D.)

The doctoral program in Educational Studies is committed to preparing a new generation of researchers, educators, and leaders by engaging them in critical inquiry of educational issues and needs germane to the large cities of the 21st century. Education of new scholars capitalizes on the cultural richness of urban Detroit and its suburbs. Consistent with contemporary understandings of knowledge development and learning sciences, professional educators study the art and craft of constructing learning sequences, teaching and learning modules, assessments, and professional development models and materials. Educational tools and intellectually stimulating, empathetic environments are provided to facilitate conceptual understanding, defensible practices, and learning dispositions. Doctoral students are also supported to conduct innovative research that is centered in and informed by theory and practice, endowed with intellectual merit, and intended to have a broad impact on teaching and learning.

The doctoral program adopts an interdisciplinary approach to teaching and learning, acknowledging the relationship among the learner, the learning, and the learning environment and the consequences this approach has for educational theory, policy, and practice. The program emphasizes the interrelationship between cultural/linguistic diversity and learning and utilizes learners’ experiences in curriculum studies. The socio-cultural context of learning in the educative process promotes equity and excellence within larger political and institutional settings. The important frames guiding the doctoral study are the integration of theory and research; the importance of reflection in learning; the role of gender, race, ethnicity, culture, and class as social constructions, which profoundly impact and inform teaching and learning; and the establishment of collaborative partnerships for community-based research. The doctoral program provides a forum that brings together the latest academic and policy discussions, and promotes critical inquiry, discourse, and debate, on the often complex interconnections in education.

The cohort model of this program is designed to support students by providing opportunities for socialization into doctoral studies and research, mentorship from nationally and internationally recognized scholars, and collaboration with peers and faculty members from across concentration areas. This program offers opportunities for students to experience program-, division-, and college-level committees; engage in teaching internships, and conduct, document, and publish research in collaboration with faculty.

Admission Requirements

The College of Education has specific requirements for admission to doctoral programs (p. 98). Admission decisions are made once per year for the doctoral program. All application materials must be completed and submitted by January 15th for fall admission in the following academic year.

At the time of application, you should select an area of concentration: Science, Technology, Engineering and Mathematics (STEM); Reading, Literacy and Literature (RLL); or Curriculum and Critical Social Inquiry (CCSI).

Program Requirements

The doctoral program in Educational Studies offers three concentration areas:

- Science, Technology, Engineering and Mathematics (STEM);
- Reading, Literacy and Literature (RLL);
Ninety (90) credits are required for the program. Of these, a minimum of twenty-four (24) credits are in the major area (i.e., Educational Studies with a concentration), minimum fifteen (15) are research courses, thirty (30) credits are the dissertation. All coursework must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees.

To be awarded a graduate degree, a student must have achieved at least a ‘B’ (3.0) overall grade point average. Grades of ‘B-minus’ and below are unsatisfactory for graduate level work. A limited number of ‘B-minus’, ‘C-plus’, or ‘C’, though unsatisfactory, may be applied toward a graduate degree provided they are offset by a sufficient number of higher grades to maintain a grade point average of 3.0. Grades below ‘B’ can constitute reason for dismissal from a program at the department or program’s discretion. Students will consult with their departments and advisors regarding unsatisfactory grades and their impact on good academic standing. Up to two courses with grades of C+ or below can be retaken once in order to continue in the program. Any student receiving more than two grades of C+ or below in either his/her major area courses (including the various statistics and research courses) or in the minor area courses will not be permitted to continue in the program.

All doctoral students are required to pass the Final Qualifying Examination near or at the end of their coursework. The Exams are held during the fall and winter terms each academic year. With approval by the major advisor, students in this program have the option of taking traditional on-site qualifying exams or take-home qualifying exams.

### Early and Elementary Education (M.A.T.)

The Master of Arts in Teaching (M.A.T.) degree is designed for students who have completed a bachelor’s degree in a non-education program with appropriate teaching majors and minors, and who desire both a master’s degree and Michigan Standard Teaching Certification at either the elementary or secondary level. Teaching certification can be earned prior to completion of the master’s degree requirements (see Teaching Certification at Certification Requirements). Each of the M.A.T. programs consists of graduate-level courses (several involving work with children in a school setting) and field experiences (pre-student teaching for one semester and student teaching for one semester).

Information regarding teaching certificate requirements can be found at the Teaching Certificates (p. 113) section of this bulletin.

### Admission Requirements

Admission to the Master of Arts in Teaching is contingent upon admission to the Graduate School (p. 35) and the College of Education Division of Teacher Education. In order to be eligible for admission, all M.A.T. applicants must submit the following: Scores from a nationally normed test (i.e., ACT, SAT), verification of participation in group work with children, a negative Tuberculosis (TB) test completed within the last three years, and a Criminal History Background check completed through Castle Branch. Additional testing is required for Foreign Language majors and minors and Bilingual-Bicultural Education minors prior to
admission. Students without appropriate teaching majors and minors and other general education requirements will be required to complete the necessary coursework as post-degree students before entering the M.A.T. program.

Persons interested in the elementary or secondary education M.A.T. degrees should consult with an advisor in the Teacher Education Division regarding appropriate teaching majors and minors and the process for a formal transcript evaluation.

Testing in the content areas is required for State Certification and completed near the end of the professional coursework. The Michigan Test for Teacher Certification (MTTC) examination scores must be furnished directly to Wayne State University by Evaluation Systems Group of Pearson, the MTTC testing agency. When registering for the MTTC, students should select "Wayne State University (31)" as a "College or University to Receive Scores."

Students whose examination scores were not released to Wayne State University should request an original score report from Evaluation Systems Group of Pearson to Wayne State University. An original score report is required by the Michigan Department of Education for verification of test scores.

Degree Requirements (General M.A.T.)
The M.A.T. program is offered as a master's Plan C program only and requires a minimum of thirty credits. Total credit requirements vary based on the applicant's background in his/her teaching field at the undergraduate level and specialized requirements.

All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's regulations (p. 38) governing graduate scholarship and degrees. Requirements for the Master of Arts in Teaching degree must be completed within six years after completion of the first course to be applied to the degree.

Course work for the degree is distributed among three areas: Prerequisite courses, major courses, and concentration courses. A teaching certificate is required in order to receive a M.A.T. degree.

Common Prerequisite Courses
All M.A.T. Elementary Education students are required to complete the following courses, which are required for a Michigan Teaching Certificate.

Secondary Education (M.A.T.)

The Master of Arts in Teaching (M.A.T.) degree is designed for students who have completed a bachelor's degree in a non-education program with appropriate teaching majors and minors, and who desire both a master's degree and Michigan Standard Teaching Certification at either the elementary or secondary level. Teaching certification can be earned prior to completion of the master's degree requirements (see Teaching Certification at Certification Requirements). Each of the M.A.T. programs consists of graduate-level courses (several involving work with children in a school setting) and field experiences (pre-student teaching for one semester and student teaching for one semester).

Information regarding teaching certificate requirements can be found at the Teaching Certificates (p. 113) section of this bulletin.

Admission Requirements

Admission to the Master of Arts in Teaching is contingent upon admission to the Graduate School (p. 35) and the College of Education Division of Teacher Education. In order to be eligible for admission, all M.A.T. applicants must submit the following: Scores from a nationally normed test (i.e., ACT, SAT), verification of participation in group work with children, a negative Tuberculosis (TB) test completed within the last three years, and a Criminal History Background check completed through Castle Branch. Additional testing is required for Foreign Language majors and minors and Bilingual-Bicultural Education minors prior to admission. Students without appropriate teaching majors and minors and other general education requirements will be required to complete the necessary coursework as post-degree students before entering the M.A.T. program.

Persons interested in the elementary or secondary education M.A.T. degrees should consult with an advisor in the Teacher Education Division regarding appropriate teaching majors and minors and the process for a formal transcript evaluation.

Testing in the content areas is required for State Certification and completed near the end of the professional coursework. The Michigan Test for Teacher Certification (MTTC) examination scores must be furnished directly to Wayne State University by Evaluation Systems Group of Pearson, the MTTC testing agency. When registering for the MTTC, students should select "Wayne State University (31)" as a "College or University to Receive Scores."

Students whose examination scores were not released to Wayne State University should request an original score report from Evaluation Systems Group of Pearson. The scores must be mailed directly from Evaluation Systems Group of Pearson to Wayne State University. An original score report is required by the Michigan Department of Education for verification of test scores.

Degree Requirements (General M.A.T.)

The M.A.T program is offered as a master's Plan B and requires a minimum of thirty credits. Total credit requirements vary based on the applicant's background in his/her teaching field at the undergraduate level and specialized requirements.

All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 38) regulations governing graduate scholarship and degrees. Requirements for the Master of Arts in Teaching degree must be completed within six years after completion of the first course to be applied to the degree.

Course work for the degree is distributed among three areas: Prerequisite courses, major courses, and concentration courses. A teaching certificate is required in order to receive a M.A.T. degree.

Common Prerequisite Courses

All M.A.T. Secondary Education students are required to complete the following courses, which are required for a Michigan Teaching Certificate.

<table>

Concentration Requirements

Two specific methods courses are required for each of the concentrations below and must be selected in consultation with an advisor. Some programs require a third methods course.

The student teaching assignment (TED 5780) for this program requires a full-time assignment to a public school for a minimum of one University semester.

Applicants should consult with the appropriate advisor prior to filing an admissions application in order to determine the appropriateness of various major and minor areas of study to the student’s interest.

1 TED 7000 is not required for students with an English Education Concentration.
To be considered for the M.Ed. program in Art Education, applicants must present evidence of:

1. A bachelor's degree or higher in Visual Arts Education, Studio Art, or Fine Arts from an accredited college or university.
2. Verification of Teacher Certification.
3. An overall grade point average of 3.0 or higher.
4. Portfolio demonstrating student's competence in art. Portfolio requirements can be obtained by contacting Anita Rick-Bates, Program Coordinator for Art Education, via e-mail at ad8045@wayne.edu

**Art Therapy Concentration (M.Ed.)**

Art Therapy is a concentration available in the Master of Education in Art Education degree program. In addition to the admission requirements stated above, students must submit letters of recommendation, an autobiographical statement, and a digital portfolio. A teaching certificate is NOT required for the Art Therapy program. A concentration in Art Therapy is also available as part of the M.A. in Counseling in the Division of Theoretical and Behavioral Foundation.

**Art Education (Visual Art Education) (M.Ed.)**

This program requires thirty credits in course work:

K12 Endorsement: A major in a world language and additional courses are required for the K12 option. Please see an advisor for more information.

Students must complete the language proficiency examination in the designated language of his/her program prior to taking courses for this program.

**Admission Requirements**

Students applying to this program must have a Michigan teaching certificate in Visual Arts Education. It is possible to teach and work full-time while pursuing coursework toward the Master in Education degree.

To be considered for the M.Ed. program in Art Education, applicants must present evidence of:

1. A bachelor’s degree or higher in Visual Arts Education, Studio Art, or Fine Arts from an accredited college or university.
2. Verification of Teacher Certification.
3. An overall grade point average of 3.0 or higher.

The Master of Education degree is designed to assist teachers who possess certification in visual arts education in developing greater skills in various media, innovative teaching methods, and curriculum development. This level of preparation will increase their level of effectiveness and innovation as teachers, assist in the creation of a diverse and interdisciplinary curriculum, and provide opportunities for advancement at the school and district levels.

The Art Education program is committed to creating effective art educators in both traditional and contemporary instructional pedagogies and techniques. Emphasis is placed on developing high-quality educators with respect to teaching, personal disposition, and content knowledge.

While recognizing that the teacher preparation process is unique to each individual, we believe that the best teachers are those who continually examine their practice to effectively impact today's learners.

The Master of Education degree is designed to assist teachers who possess certification in visual arts education in developing greater skills in various media, innovative teaching methods, and curriculum development. This level of preparation will increase their level of effectiveness and innovation as teachers, assist in the creation of a diverse and interdisciplinary curriculum, and provide opportunities for advancement at the school and district levels.

Eighteen of the thirty credits required must be in the art education major. The intent is that the thirty credits will comprise a unified, meaningful curriculum extending each student's ability as an artist, a scholar, and a teacher. All coursework must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees.

**Art Therapy (M.Ed.)**

This program is offered as a master's Plan B. A minimum of forty-eight credits is required for this concentration:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

A related essay or project of substantial quality concludes the program. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees. Interested candidates should contact the Art Education & Art Therapy office for additional information: Room 163, Community Arts Building; telephone: 313-577-1823.

**Teaching and Learning (M.Ed.)**

The Master of Education (M.Ed.) in Teaching and Learning is for teachers and other professionals who wish to enhance their content and pedagogical knowledge, as well as research skills in teaching and learning. Program activities engage students in the study of teaching and learning using current theoretical developments in order to:
1. develop curriculum illustrating best practices and
2. research inquiries in areas of their interest.

The theoretical knowledge and research skills acquired in this program are an important aspect of an educator's professional growth and essential to those interested in taking on leadership roles and/or pursuing another advanced degree in the future.

Admission Requirements

Applicants must meet requirements for admission to the Graduate School (p. 35) (a minimum undergraduate GPA of 2.75 for regular admission and a GPA of 2.50 for qualified admission). In addition, prior coursework or a teaching endorsement in the field of study is required for admission to the following concentrations:

- Elementary Education
- Foreign Language Education
- Mathematics Education
- Science Education
- Social Studies Education
- Special Education

The Master of Education degree requires a minimum of thirty credits, at least twenty-four of which must be taken at Wayne State University. The program is offered under master's degree plan 'B', which includes completion of a terminal seminar and essay or project.

The following courses are required of all students in the program (12 credit hours): The remaining credit hours will come from the area of the concentration (18 to 24 credits). The total number of credit hours for the degree will vary from 30 to 36 depending on the area of the concentration.

Concentrations include:

- Bilingual/Bicultural (BBE), which may lead to a teaching endorsement; Online
- Early Childhood Education (ECED), which may lead to a teaching endorsement
- Elementary Education (ELED), which may lead to a teaching endorsement
- English as a Second Language (ESL), which may lead to a teaching endorsement; Online
- Foreign Language (FLED):
- Mathematics Education (MATE)
- Peace and Conflict Studies (PCOS)
- Science Education (SCIE)
- Social Studies Education (SSE)
- Special Education (SPE), which may lead to a teaching endorsements in one of two areas:
  - Cognitive Impairment
  - Autism Spectrum Disorder

Bilingual Education (Bridge Graduate Certificate)

The Graduate Bridge Certificate in Bilingual Education leads to an endorsement to an existing Michigan teaching certificate. Students who complete this Graduate Bridge Certificate Program as well as successfully pass the appropriate Michigan Test for Teacher Certification subject area examination will earn this endorsement. As a bridge program this Graduate Certificate allows students to apply all of their course work from this certificate to the Master of Education in Teaching and Learning degree with a concentration in Bilingual-Bicultural Education. The Graduate Bridge Certificate courses should be applied to a masters degree program within five years of the first course completed.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Additionally, applicants must possess a valid Michigan teaching certificate and must have successfully completed the American Council on the Teaching of Foreign Languages’ (ACTFL’s) Oral Proficiency Interview (OPI) in the (nonEnglish) designated language. For more information, please review the following website: http://www.testing.wayne.edu/

The Bridge Certificate in Bilingual Education requires a minimum of twenty-one credits as listed below. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees.

English as a Second Language (Bridge Graduate Certificate)

The Graduate Bridge Certificate in English as a Second Language (ESL) leads to an endorsement on an existing Michigan teaching certificate. In order to be eligible for the program, students must have an existing Michigan teaching certificate. Upon the completion of the Bridge Certificate Program, students are encouraged to take the appropriate Michigan Test for Teacher Certification subject area examination to earn the endorsement.

This Graduate Bridge Certificate program allows students to apply all of their coursework for the Certificate to the Master of Education in
Teaching and Learning degree with a concentration in English as a Second Language if they decide to pursue that degree. The Graduate Bridge Certificate courses can be applied to a masters degree program within five years of the first course completed.

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the College of Education (p. 94). Additionally, applicants must possess a valid Michigan teaching certificate.

Elementary Mathematics Specialist: Advanced (Graduate Certificate)

The GCEMS-Adv prepares candidates to be curriculum specialists, teacher leaders, or coaches who are responsible for supporting effective mathematics instruction and student learning at the classroom, school, district, or state levels. The program will provide professionals with a deep and broad knowledge of mathematics content and pedagogy.

Admissions Requirements

Applicants must have completed the Graduate Certificate in Elementary Mathematics Specialist: Introductory (p. 123), hold an elementary teaching certificate and must meet requirements for admission to the Graduate School (p. 35).

Program Requirements

A total of 12 credit hours is required for the GCEMS-Adv, including one MAE course not previously completed and one course from CED, EDA or LDT. Course selections are made from a list of courses in consultation with a program advisor, and are tailored to the student's background and school needs.

No transfer credit will be accepted for a certificate program, and no more than nine semester credits taken in this classification may be applied toward a graduate degree, subject to the approval of the relevant academic unit and graduate office.

Elementary Mathematics Specialist: Introductory (Graduate Certificate)

The GCEMS-Intro prepares candidates to be instructional specialists who are responsible for supporting effective mathematics instruction and student learning at the classroom or school level. This program will provide teachers with enhanced knowledge of mathematics content, expertise in using and helping others use effective practices, and the ability to support efforts that help all students learn mathematics in school settings.

Admission Requirements

Applicants must hold an elementary teaching certificate and must meet requirements for admission to the Graduate School (p. 35).

Program Requirements

A total of 12 credit hours is required for the GCEMS-Intro, including the two required courses (MAE 6400 and MAE 6150) and at least one course at the 7000 level or higher. Course selections are made from the Mathematics Education (MAE) courses in consultation with a program advisor, and are tailored to the student's background and school needs.

No transfer credit will be accepted for a certificate program, and no more than nine semester credits taken in this classification may be applied toward a graduate degree, subject to the approval of the relevant academic unit and graduate office.

Reading (Education Specialist Certificate)

The Teacher Education Division offers a number of education specialist programs at the elementary and secondary levels. These certificate programs are designed to strengthen the educational background of teachers, administrators, and other education professionals.

Admission Requirements

Admission to this program is contingent upon admission to the College of Education (p. 97) and the Graduate School (p. 35).

Program Requirements

These certificate programs require thirty credits beyond the master's degree. The individual student's professional needs and interests are taken into account in determining the specific content of his/her program. The typical plan includes course work in the specialized professional area and subject matter areas supportive of a major or minor. All course requirements for the various majors are selected in consultation with an advisor. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees.
Curriculum and Instruction
(Education Specialist Certificate)

The Teacher Education Division offers a number of education specialist programs at the elementary and secondary levels. These certificate programs are designed to strengthen the educational background of teachers, administrators, and other education professionals.

Admission to this program is contingent upon admission to the the College of Education (p. 97) and the Graduate School (p. 35).

These certificate programs require thirty credits beyond the master's degree. The individual student's professional needs and interests are taken into account in determining the specific content of his/her program. The typical plan includes course work in the specialized professional area and subject matter areas supportive of a major or minor. All course requirements for the various majors are selected in consultation with an advisor. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees.

Curriculum and Instruction (Ph.D. and Ed.D.)

An admissions moratorium is currently in effect for this program.

The Doctor of Education (Ed.D.) and the Doctor of Philosophy (Ph.D.) programs prepare professional educators and researchers for positions in institutions of higher learning, educational research centers, state and national education agencies, and intermediate and local school districts. Advanced programs are designed for those individuals who are committed to the educational renewal of urban America; whose career goals emphasize the development and improvement of curriculum and instruction; who desire to prepare themselves for leadership roles in various areas of curriculum and educational research; and who will serve as agents of change, creating and expanding the varied institutions and programs needed for the continuing development of educators. This program also serves those interested in the educational aspects of business and industry, health and social services, and other areas that require expertise in curriculum and instruction.

Based on pure and applied research in instruction and curriculum, doctoral study incorporates formal classroom instruction, independent study, and direct, clinical experience in a variety of field settings. It reflects

1. the legitimacy of the emerging pattern of inter-institutional partnerships in teacher education at all levels;
2. the significance of the diverse nature of metropolitan society; and
3. the importance of the integration of theory, research, and practice as the basis for sound professional development.

Admission to certain majors and concentrations in the doctoral program may be limited by the availability of faculty advisors. Prior to applying, students should consult with an advisor in 489 Education to discuss current admission limitations.

The College of Education has specific requirements for admission to doctoral programs (p. 98).

Courses in the field of concentration in each program are selected in consultation with an advisor to develop a Plan of Work. All students in content-specific concentrations under the major of Curriculum and Instruction are required to complete TED 8280 and TED 8350; TED 9130 is recommended but not required. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees.

The K-12 curriculum (Curriculum Studies) area of emphasis, within the curriculum and instruction program, requires the following courses in the major area:

K-12 Curriculum Concentration (Ph.D. and Ed.D.)

The doctoral program adopts an interdisciplinary approach to teaching and learning, acknowledging the relationship among the learner, the learning, and the learning environment and the consequences this approach has for educational theory, policy, and practice. The program emphasizes the interrelationship between cultural/linguistic diversity and learning and utilizes learners' experiences in curriculum studies. The socio-cultural context of learning in the educative process promotes equity and excellence within larger political and institutional settings.

The important frames guiding the doctoral study are the integration of theory and research, the importance of reflection in learning, the role of gender, race, ethnicity, culture, and class as social constructions, which profoundly impact and inform teaching and learning; and the establishment of collaborative partnerships for community-based research. The doctoral program provides a forum that brings together the latest academic and policy discussions, and promotes critical inquiry, discourse, and debate, on the often complex interconnections in education.

Theoretical and Behavioral Foundations

Interim Assistant Dean: William Hill
Office: 361 Education Building; 313-577-1805
http://coe.wayne.edu/tbf/

The Division of Theoretical and Behavioral Foundations includes degree programs in educational evaluation and research, counseling, educational psychology, school and community psychology, counseling psychology, and rehabilitation counseling and community inclusion. The Division is designed to facilitate a realization of the following aims:

1. to integrate the educational experiences and course offerings;
2. to perform a service function in meeting the needs of those enrolled in other divisions within the College;
3. to provide degree and specialist programs for those who are majoring in a particular field of the division;
4. to provide students with an opportunity to study those aspects of educational thought and practice that are interdisciplinary as well as foundational;
5. to formulate programs looking toward the development of new combinations of specialties, as in
   a. counseling-psychology,
   b. pupil personnel managers in school systems,
   c. utilization of theoretical and behavioral foundations in teacher education,
The counselor education unit offers graduate counseling programs for those professionals committed to being effective counselors in elementary and secondary schools, colleges, universities, and private and public agencies. The unit offers degree programs appropriate for counseling work in K-12 school settings, community agencies, substance abuse treatment centers, sports and exercise facilities, corporate structures, medical institutions, nursing homes, rehabilitation agencies/centers and independent practice.

All applicants will be evaluated with respect to their potential for being effective counseling professionals. Admission decisions are based on a review of the application and a personal interview with the appropriate admission committee. Acceptance is dependent upon the applicant's professional potential, academic and professional background, and professional career goals.

The counselor education unit offers a Master of Arts program with a major in clinical mental health and school counseling. Additional training may be completed in art therapy, and rehabilitation counseling. A rehabilitation counseling major in the Master of Arts program includes training in disability management, disability leadership, career development, job placement supported employment, adjustment counseling and vocational evaluation.

All programs include a practicum and internship clinical experience and a terminal masters seminar and project.

Counseling Accreditation: The Council for Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council on Postsecondary Accreditation (COPA), has conferred accreditation to the M.A. in Counseling with concentrations in Clinical Mental Health and School Counseling, and the Ed.D and Ph.D programs in counselor education and supervision. In addition, the Council on Rehabilitation Education accredits the Rehabilitation Counseling major (CORE).

The Education Specialist Certificate program is intended for guidance professionals who want to improve their competence in counseling. Since this is a professional certificate program, persons considering applying should confirm that they have the prerequisite education and experience prior to making formal application. This certificate is not an entry level program, but builds on master's level preparation in counseling.

The Doctor of Philosophy is generally required for those intending to teach, conduct research, or provide counseling services in universities and colleges. In addition, those desiring counseling positions in governmental or community agencies, and the like, may be required to take advanced training in counseling theory and practice, consultation, scholarly research, and supervision of counselors.

The Doctor of Education program consists of advanced courses designed for those persons who wish to become directors of guidance or pupil personnel programs and coordinators or consultants in guidance and counseling programs in K-12 and intermediate school districts. The Ed.D. provides opportunities to improve skills and competencies as school counselors in counseling, program development, career development, consultation research, and supervision of counselors.

Time Limitation: Requirements for the Master of Arts or Master of Education degree must be completed within six years after completion of the first course applicable toward the degree. All degree requirements for the doctoral program must be completed within seven years from the time of official admission.

Writing Style: The counselor education unit has adopted the Publication Manual of the American Psychological Association as the style guide for preparation of all papers submitted in fulfillment of program requirements.

Class and Internship Scheduling: All counseling program courses are offered only in the evening hours (4:00 p.m. to 10:15 p.m.), permitting working students the opportunity to pursue their educational endeavors. Additionally, the counseling program will arrange with community settings (i.e., agencies, schools, institutions) whereby working students may complete the clinical portions of their programs as well as fulfill employment obligations elsewhere.

Licensure: Individuals in the counseling profession who practice in Michigan must seek professional licensure. Satisfactory completion of degree requirements in the counselor education master’s and doctoral programs allows the student to apply for the Limited Licensed Professional Counselor (LLPC) credential in the State of Michigan. The Educational Specialist Certificate program does not meet Michigan eligibility requirements for the professional counselor licensure. Information on licensure may be obtained from the:

Michigan Department of Community Health
Board of Counseling
P.O. Box 30670
Lansing, Michigan 48909
telephone: 517-335-0918

Effective with the passing of PA 288 (July 10, 2000) an amendment in Act 451 of the Public Acts of 1976 (the Revised School Code), individuals who complete the school counseling specialization (with or without a teaching certificate) may be employed as school counselors and recommended for the new School Counselor License (SCL). All applicants for the School Counselor License (SCL) must have received a passing score on the State of Michigan, Department of Education’s Michigan Test for Teacher Certification (MTTC) Guidance Counselor Examination. MTTC examination scores must be furnished directly to Wayne State University by the MTTC testing agency, Evaluation Systems Group of Pearson. When registering for the MTTC, select "Wayne State University (31)" as a "College or University to Receive Scores."

Students whose examination scores were not released to Wayne State University should request an original score report from Evaluation Systems Group of Pearson. An original score report is required by the Michigan Department of Education for verification of test scores.

Counseling Accreditation: The Council for Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council on Postsecondary Accreditation (COPA), has conferred accreditation to the following programs in the counselor education program: M.A. with various specializations and the Ed.D. and Ph.D. programs in counselor education and supervision. In addition, the Rehabilitation Counseling and Community Inclusion major is accredited by the Council on Rehabilitation Education (CORE).

Educational Psychology

The Master’s Degree programs in Educational Psychology are primarily concerned with the preparation of individuals working in settings such as schools, behavioral mental health care settings, business and other fields, who wish to develop skills and knowledge in the application of psychology. At the doctoral level, our program is focused on research
and university teaching contexts. The Applied Behavior Analysis training emphasized working in clinical settings with people with Autism.

There is one Master of Education (M.Ed.) program in Educational Psychology, geared toward those who want to apply psychology/educational psychology to their current professions (e.g., teaching). Two majors are offered for the Master of Arts (M.A.) degree: School and Community Psychology and Counseling Psychology. The School and Community psychology program offers two years of course work, plus a one-year internship. Satisfactory completion of the School and Community Psychology program allows the student to be certified as a school psychologist by the State of Michigan. It also allows the student to apply for a Limited License to Practice as a Psychologist (L.L.P.) in the State of Michigan. The major in Counseling Psychology has an emphasis in individual and marriage and family therapy and offers two years of course work plus one or two semesters of a clinical internship. Satisfactory completion of the Counseling Psychology program allows the student to qualify for the Limited License to Practice as a Psychologist in the State of Michigan and, with additional coursework, a State of Michigan license as a Marriage and Family Therapist. The Ph.D. in Educational Psychology has a concentration in Learning and Instruction science and is focused on educational psychology theory and research. Additionally, an Applied Behavior Analysis Graduate Certificate is offered for those who already hold a master’s degree, or it can be accomplished as part of the M.Ed. in Educational Psychology. Through this training, students become eligible to sit for the Board Certified Behavior Analyst (BCBA) exam, which is part of earning the BCBA credential. All of these programs are described in more detail below.

The prospective student should recognize that a grade point average of 3.0 with no more than one earned grade of ‘C’ plus is required to continue in all of these programs and to graduate. The majors of School and Community Psychology and Counseling Psychology involve, in addition to course requirements, clinical experience in school and/or agency settings. Due to the clinical nature of the courses and the internship, both majors require students to have active liability coverage throughout the program. Retention in the program, graduation, and recommendation for certification/licensing approval depend upon demonstrated clinical skill as well as on the student’s academic achievement. The staff will try to arrange for psychological practicums and internships in either a school system or a community mental health facility in keeping with program requirements. The Applied Behavior Analysis training also involves intensive training working with children in clinical settings and thus requires successful demonstration of both clinical and academic skills.

In addition to completing all procedures for admission to the Graduate School, each applicant must complete an applications form obtained from the program area website (http://coe.wayne.edu/tbf/) for the program of interest, and follow those instructions carefully. Applicants are strongly encouraged to contact the program area secretary to ensure they have received complete and updated application and program information.

All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees.

Applied Behavior Analysis (Graduate Certificate)

An admissions moratorium is currently in effect for this program.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). A 2.75 minimum GPA is required for consideration for the program. Applicants apply both online to Graduate Admissions and directly to the program. In addition to uploading transcripts, program area application with essay, and letters of recommendation with the online application; these materials must also be mailed directly to the

Advanced Studies in School Psychology (Graduate Certificate)

Admission Requirements

Admission to this program is only for students in the M.A. program in School & Community Psychology. Admission is contingent upon admission to the Graduate School (p. 35). Students must be in good academic standing in the School and Community Psychology M.A. program to apply and enroll in the Certificate program. Students will be admitted concurrently to the Certificate program for the Spring/Summer of second year of the Master's program.

Program Requirements

The last twelve credits of the School and Community Psychology program are the internships, which are the basis for this Graduate Certificate and are required for full completion of this program and for recommendation for state school psychology certification and state psychology limited licensing (L.L.P.). Students are required to complete a professional portfolio, to attend supervision meetings, and to conduct a comprehensive case study and presentation at the end of the Certificate program. Students are evaluated by both university faculty and field supervisors on both their professional skills and their professional behaviors and attitudes as outlined by the National Association of School Psychologists. During Spring/Summer of the second year, students will complete their Master’s requirements by enrolling in EDP 8320 and EDP 8330 for a total of six credits and during this time period, students will be concurrently enrolled in the M.A. and Graduate Certificate program, and these credits will count toward both the Master’s degree and the Certificate. Graduate School policy permits nine credits to be applied to fulfill the requirements of both a Certificate and a Master’s degree. Students will complete the final six credits of the Certificate by enrolling in EDP 8360 during the third year of the program. The curriculum is outlined below.
Admission to this program is contingent upon admission to the Admission Requirements Campus in Farmington Hills.

This program is calendar controlled in that all students begin and end together, taking the same courses as a cohort. Required courses are:

Additional practicum experiences are offered that are not part of the actual degree or certificate requirements. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees.

**Applied Behavior Analysis (M.S.)**

The Master of Science in Applied Behavior Analysis trains practitioners extensively in applied behavior analysis with a focus on treating autism. Recent Michigan legislation mandates insurance companies to cover therapeutic services for autistic persons by BCBA credentialed treatment providers. To earn a BCBA credential, a master’s degree in psychology, education/special education, or applied behavior analysis is required, plus a specific sequence of 6 classes (22 credit hours total) and 5 field experiences/practica (10 credits total) across three semesters as described below. Our course sequence has received full approval by the Behavior Analytic Certification Board (BACB). Either way, this set of courses that will meet the requirements for students to sit for the BCBA exam. Students who successfully complete the courses are eligible to sit for the BCBA examination, which, upon passing, would lead to the BCBA credential.

Students enter the program as a cohort and must take their classes in sequence together as outlined by the program—it is a block scheduled program with no variations permitted. The cohort model includes a combination of supported and independent learning through classroom based and practiced-based hands-on learning. Cohort-mates work collaboratively throughout their training. Thus, all classes in the BCBA course sequence are live, classroom-based courses. Online and hybrid classes are not available for the courses in this sequence. Although some students find the online and hybrid courses convenient, the interactive learning environment and the hands-on learning activities offered in the BCBA course sequence classes at Wayne State University will help students take their learning experiences into the workplace for a more seamless crossover between classroom and field placement activities. This instills a sense of professional community not only during the program, but as students move into the field as practitioners. Our program emphasizes the importance of intensive learning while in the program as well as the need for collaborative lifelong learning. Our cohorts begin each fall and primarily run during the day. Most classes are typically taught at the Oakland Community College Orchard Ridge Campus in Farmington Hills.

**Admission Requirements**

Admission to this program is contingent upon admission to the Graduate School (p. 35). A 2.75 minimum GPA is required for consideration for the program. Applicants apply both online to Graduate Admissions and directly to the program. Additionally, applicants must provide three letters of recommendation, complete a program area application including a professional essay, and attend a personal interview.

**Program Requirements**

There are a total of 40 credits for full program completion. Students are required to complete each semester sequentially, with full-time enrollment. Transfer credits are not accepted into this program.

All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees.

**Counseling (Education Specialist Certificate)**

The Educational Specialist Certificate program in Counseling is intended for those who are presently counseling professionals who want to improve their competency in counseling and/or receive training in counselor clinical supervision. The Specialist Certificate does not meet eligibility requirements for the Professional Counselor License in the State of Michigan.

**Admission Requirements**

Admission to this program is contingent upon admission to the Graduate School (p. 35). After admission to the College, program requirements also include a master’s degree from an accredited graduate school in counseling, rehabilitation counseling, or a closely related field that includes entry-level curricular experiences and demonstrated knowledge and competency in each of eight common counseling areas required by CACREP.

- human growth and development
- social and cultural foundations
- helping relationships
- groups
- life and career development
- appraisal
• research and evaluation
• professional orientation

A minimum grade point average of 3.0 ('B' or above) on the master's degree is required for admission consideration. Additionally, applicants to the educational specialist certificate program must hold professional counselor licensure (LLPC or LPC) prior to admission.

Applicants are also required to conduct a single 45-minute counseling session in the College of Education Counseling and Testing Center. This session will be audio and/or video taped for evaluation by the Advanced Admissions Advisory Committee. An interview with the Advanced Admissions advisory Committee is also required.

Program Requirements
A minimum of thirty credits is required for this certificate. Course requirements for the program are determined in consultation with an advisor. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees.

Counseling (M.A.)
Admission Requirements
Admission to this program is contingent upon admission to the Graduate School (p. 35). Admission to the counselor education program requires a grade point average of 2.50 or above for the undergraduate course work. Program admission requirements include: a personal interview with an admission committee and a typewritten autobiographical statement reflecting the applicant's respective personal and professional history with a statement of rationale for seeking admittance to the program.

Admission to the Art Therapy concentration also requires submission of a portfolio of original artwork, to be evaluated by art therapy faculty, that demonstrates competence with art materials.

Program Requirements
The various specializations in counseling require a set of core courses and individual requirements depending on the goals of the student. All specializations require a foundation program of sixty credits under Plans A or C. Additional credits may be required for students completing more than one specialization area. Outlines of recommended minimum programs in the specialization area may be secured from the unit secretary. Cognate course work within and /or outside the College of Education supportive of a major in counselor education is required of all candidates. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees.

Counseling Education (Ed.D. and Ph.D.)
An admissions moratorium is currently in effect for this program.

Admission Requirements
In addition to meeting the basic admission requirements of the Graduate School (p. 35) and those of the College (p. 98), a master's degree from an accredited graduate school is required. The master's program must be in counseling, school counseling, rehabilitation counseling, or a closely related field that includes entry-level curricular experiences and demonstrable knowledge and skill competency in each of the eight areas required byCACREP:

• human growth and development
• social and cultural foundations
• helping relationships
• groups
• life and career development
• appraisal
• research and evaluation
• professional orientation

In addition to either a grade point average of 3.5 or above in the master's degree, or a grade point average of 3.35 or above in a master's degree and a grade point average of 3.75 in the Counseling Educational Specialist Certificate program, admission criteria include consideration of academic aptitude for doctoral work, previous professional experience, demonstrated counseling skills, knowledge of counseling concepts, and potential for professional leadership.

A department-written examination is required. Doctoral program applicants are also required to take the Graduate Record Examination and have the results forwarded to the program area. In addition, a demonstration of counseling skills is required using the Counseling and Testing Center. A single 45-minute session is audio- and/or video-taped and reviewed by the Advanced Admission Committee.

Applicants must make up any deficits or remedial work as listed on their approved application for admission form before beginning advanced doctoral course work. Specifically, those persons who have master's degrees from closely-related fields (psychology, social work, nursing) must complete all academic and clinical prerequisites required before beginning advanced doctoral course work.
Program Requirements

The doctoral program is individually developed with a major advisor. Within the guidelines of the Graduate School and the college, students build a specialized curriculum. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees.

All students complete:

1. two doctoral seminars from foundation areas;
2. a concentration in counselor education;
3. at least two doctoral level supervised internships;
4. course work aimed at developing competence in statistics and research methodologies;
5. course work selected by the student, major advisor and cognate advisor which supports an additional area of professional expertise;
6. and electives chosen from the major field or the cognate area.

Additional requirements for the doctoral degrees are explained in greater detail in program materials available from the program area.

Counseling Psychology (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). A minimum of fifteen credits in psychology or related field approved by admissions committee and a minimum undergraduate point average of 3.0 are prerequisite to admission. A program application, Graduate Record Examination (GRE), three letters of recommendation, undergraduate/graduate transcripts, and a personal interview with the admissions committee are required. Applications are accepted after September 1 with a rolling deadline starting February 15 through March 15. Applicants are encouraged to apply early and will be interviewed by the Admissions Committee until a class of fifteen students is admitted. Students are admitted once each year and begin the program in the summer semester of the year for which they are admitted. It is strongly suggested that applicants reference the Counseling Psychology (http://coe.wayne.edu/tbf/educational-psychology/counseling/) website to obtain program and scholarship information and a program application. Application for graduate admissions must be made online.

Program Requirements

This program is calendar controlled in that all course work must be completed in semester sequences commencing with the Summer term. Students should refer to the program for current plans of work and course requirements (http://coe.wayne.edu/tbf/educational-psychology/counseling/).

A 500-hour clinical practicum is required for the degree. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees.

Counseling Psychology (Ph.D.)

The Wayne State University Counseling Psychology (WSU-CP) Ph.D. prepares the scholar-practitioner to advance the practice of psychology and improve mental health recovery and wellness through research and reflective practice. The WSU-CP doctoral program was formally established in 2018. The WSU-CP doctoral program resides within the Theoretical and Behavioral Foundations division of the College of Education. The training prepares practitioners to make professional judgments that take into consideration best practices derived from research and theory, social, political, and policy contexts, ethical principles, and multicultural awareness. Courses emphasize the broad applications of normal and abnormal development, multicultural and ecological approaches such as family and community. Students may also elect to take courses in couples, family therapy, and/or trauma to augment their clinical training. Training offers a balance of both urban and metropolitan experiences for all students to ensure familiarity with a range of socioeconomic and cultural backgrounds.

The curriculum and practical experiences are designed to ensure professional competency and knowledge integration as it relates to scholarship, clinical practice, and advocacy. Program graduates will be prepared for employment within a variety of settings including academic departments, university counseling centers or clinics, community mental health agencies, hospitals, the non-profit sector, and/or independent practice. The program prepares students to meet the licensing requirements as a psychologist in the State of Michigan.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Applications are accepted after September 1 with a deadline of January 15. Applicants must complete a Counseling Psychology program application form, three letters of recommendation, curriculum vitae/resume, personal statement, transcripts, and online application required by the Graduate School. Applicants will not be considered for admission until all documents have been received and evaluated by the admissions committee. Admissions decisions are generally made by March 15 and applicants have until April 15 to notify of acceptance.

The program considers both direct admission from the baccalaureate degree and those with advanced degrees in psychology or a strongly related field. (If you are applying as a Canadian citizen and may be practicing in Canada, you are required to have a bachelor’s degree in psychology to be considered for admission, based on Canadian psychology licensing requirements.) The work of students who had advanced degrees upon entering this program will be evaluated on a case-by-case basis by the directors to meet the required clinical experience and training.

Application policies and procedures are available on the Counseling Psychology program website (https://education.wayne.edu/counseling-psychology/phd/). The General Record Exam is not required, but highly recommended. The admission committee uses a holistic review process that does not rely solely on standardized tests. Assessment of the applicant’s transcripts, letters of recommendation, writing sample, personal statement and research interests aligned with faculty, and availability of faculty mentorship are used to make admission decisions. Strong applicants will demonstrate academic promise in scholarship and practice, discipline and commitment to ethics and human rights, tolerance for professional and skill development, as well as an interest in social justice and multiculturalism. Review of applicants is based on combined holistic assessment including: (1) academic excellence; (2) writing skill; (3) alignment of academic, employment, and/or service-related experiences, and faculty research interests; (4) quality of recommendation and references. The number of applicants recommended for admission each year varies and is determined primarily by the availability of faculty advisors for incoming students.
Curriculum Overview

WSU-CP doctoral students will participate in coursework and training activities that to develop knowledge, skills, and professional competencies in core areas related to the discipline of psychology:

1. Research Methods and Statistics
2. Biological Bases of Behavior
3. Cognitive-Affective Bases of Behavior
4. Social Bases of Behavior
5. Individual Behavior and Human Development
6. History and Systems of Psychology
7. Professional Issues and Ethics in Counseling Psychology
8. Theory and Practice in Psychotherapy
9. Supervision, Outreach and Consultation
10. Intellectual and Personality Assessment
11. Social Justice and Multiculturalism
12. Professional Values and Behaviors

Program Requirements

The Doctor of Philosophy requires a minimum of 90 credits of coursework beyond the baccalaureate degree, thirty of which must be earned as dissertation credits. All coursework must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Education (p. 94). In addition to coursework and clinical training (practicum), students must complete written and oral qualifying exams, dissertation, and a 2000-hour doctoral internship during the final years of study.

The WSU-CP includes the following coursework:

### Elective in Systems

Students matriculating in the program, either directly from their baccalaureate or advanced degrees, select one or more of the following electives in systems:

- **EDP 7190** Couples Therapy
- **EDP 7200** Systemic Theories and Family Therapy
- **EDP 7220** Psychotherapy with Children and Adolescents

### Required Courses

- **CED 6015** Diversity, Multicultural Competence, and Social Justice Advocacy for Human Service Professionals
- **CED 9120** Seminar and Internship Supervising Counselors
- **EDP 7370** Psychopathology and Diagnosis*
- **EDP 7400** Foundations of Social Psychology
- **EDP 7420** Introduction to Behavioral Psychology*
- **EDP 7430** Applications of Behavioral Psychology and Social Learning
- **EDP 7520** Professional Ethics and Standards for Psychologists*
- **EDP 8319** Pre-practicum in Clinical Procedures (depends on entry point/terminal masters only)
- **EDP 8320** Practicum in Clinical Procedures I (Two consecutive semesters)
- **EDP 9000** Doctoral Seminar in Counseling Psychology*
- **EDP 9319** Advanced Practicum in Clinical Procedures*
- **EDP 9320** Internship in Clinical Procedures (Doctoral internship; 1 cr. per semester, and min. 3 total credits)

* Students matriculating in the program, either directly from their baccalaureate or advanced degrees, must complete this course.

Plan of Work

The Plan of Work reflects a systematic and organized series of courses, seminars, field experiences, etc., designed to assist students in organization and planning the course of their matriculation through the doctoral program.

Following formal acceptance into the program, students are provided a preliminary Plan of Work for their first academic year and assigned a research advisor. The Plan of Work must be approved by the program director and the major advisor along with the College of Education graduate director in the semester the student is completing the first 18 credits.

The Plan of Work must conform to the Policy and Procedures stated in this document. Plans of Work can be revised due to changes in course scheduling changes, or personal goals. However, students must discuss any potential changes with their major advisor and obtain permission from the program directors before a substitution is made. A change in the Plan of Work can be found on the College of Education website under the Students Tab (https://education.wayne.edu/students/).
Residence

The program requires a minimum of three full-time academic years of graduate study (or the equivalent) plus internship prior to receiving the doctoral degree; at least two of the three academic training years (or the equivalent) must be at the program from which the doctoral degree is granted; and at least one year must be in full-time residence at the program.

Examinations

The qualifying examination is a two-part exam in the College of Education. Part I is a written examination covering the student's major area the discipline of Counseling Psychology. Part II is an oral examination demonstrating profession – wide competencies in clinical assessment and treatment. Qualifying exams are typically taken following the completion of the majority of coursework.

Training, Teaching, and Research

Doctoral students are encouraged to participate in a research or training assignment each academic year they are in residence. This is required of all full-time students, irrespective of whether the training assignment includes a stipend. The student's area committee is responsible for seeing that this requirement is met each year. The training assignment involves appropriate teaching, research (other than dissertation research) or professional activities.

Educational Psychology (M.Ed.)

Admission to this program is contingent upon admission to the Graduate School (p. 35). A minimum undergraduate GPA of 2.75 is required. GRE scores are not required. In addition to uploading transcripts to an online Graduate Admissions application, contact the program secretary for a program area application and guidance with your application.

This program requires a minimum of thirty credits, including the basic degree requirements for the Master of Education (p. 95). All course work is selected in consultation with an advisor and must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees.

Educational Psychology (Ph.D.)

An admissions moratorium is currently in effect for this program.

Admission Requirements

Applicants should refer to the admission requirements for doctoral degrees (p. 131) in the College of Education. The Educational Psychology Doctor of Philosophy Program has a concentration in Learning and Instruction Sciences. Successful applicants sitting admission to the Learning and Instruction Sciences concentration should have a master's degree in Educational Psychology, or a closely related field. In addition to uploading materials to an online Graduate Admission application, materials must be submitted to the chairperson of the Learning and Instruction Sciences concentration.

Learning and Instruction Sciences

The concentration in Learning and Instruction Sciences is a full-time program adhering to the scientist-practitioner model and prepares students in the systematic study of human learning and educational instruction. This concentration integrates interdisciplinary training in instructional technology and educational evaluation and research to prepare graduates to design, implement, and evaluate learning in various contexts. The Learning and Instruction Sciences concentration prepares students for research, service, and administrative careers, teaching in diverse educational settings, and consultation in the private sector. In addition to the departmental requirements for the doctoral degree, students take courses in ethics and professional standards, advanced theories of learning and development, instructional technology, and program evaluation. Students may also select a number of courses in the psychology department.

Program Requirements

Research course requirements include a minimum of fifteen credits in research and evaluation (EER). The remaining plan of work is arranged with an advisor depending on master's level training and future goals, and includes 30 dissertation credits, which is a requirement set by the university.

All doctoral students will complete a comprehensive examination at the end of coursework and a final report and defense after completion of the dissertation. All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School's (p. 19) regulations governing graduate scholarship and degrees. All Plans of Work are developed in consultation with the student's assigned advisor.

School and Community Psychology (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). A minimum of fifteen credits in psychology or educational psychology is prerequisite to admission. A program area application, the verbal and quantitative sections of the Graduate Record Examination (GRE), three letters of recommendation and a personal interview are required for admission consideration. Applications are accepted between September 1 and February 1. Students are admitted once each year and must begin the program in the fall semester of the year for which they are admitted. It is a cohort program so students are given a sequence in which to take classes. In addition to uploading transcripts to an online Graduate Admission application, there are additional items to be submitted directly to the program. Contact the program secretary for guidance in applying. As part of the completion of the master's program, students move into a graduate certificate program that culminates at the end of year 3.

All course work must be completed in accordance with the academic procedures of the College of Education (p. 94) and the Graduate School’s (p. 19) regulations governing graduate scholarship and degrees.
College of Engineering

Dean: Farshad Fotouhi

Graduate education is important to the engineer interested in keeping pace with rapid growth in science and technology and in preparing for changes in job responsibilities. In the midst of greater Detroit's large community of professional engineers, Wayne State University's College of Engineering has an important mission to provide opportunities for study in contemporary areas and the latest developments in technology.

The College of Engineering is a leading research institution in Michigan and the nation. This is reflected in its instructional programs, which are supported both by its own research and by that of other institutions, and in the suitability of its industrial/educational environment for advanced study. Engineering graduate students are drawn both from the upper ranks of graduating seniors in various disciplines and from established engineers interested in pursuing advanced degrees. Criteria for admission are restrictive, and a high standard of performance is expected of successful candidates. In short, the challenges are great, but the potential rewards are equally promising.

The College of Engineering offers the Master of Science and Doctor of Philosophy degrees in biomedical, chemical, civil, computer science, electrical, industrial, mechanical, and materials science and engineering. In addition, a Master of Science may be earned in alternative energy technology, electric-drive vehicle engineering, engineering management, engineering technology, and manufacturing engineering. Graduate certificate programs are also available in a number of areas for additional specialization after completion of an undergraduate or graduate engineering degree. These programs are described generally below and specifically in the subsequent, departmental sections.

The College provides support for the various instructional and research laboratories in the construction, modification, repair, calibration and installation of experimental equipment. In addition, the College offers sophisticated assistance in the design of electronic and instrumentation equipment and devices. Qualified students use these facilities under the supervision of trained professionals.

Excellent research programs are available in this college; graduate students can write a thesis or dissertation based on their participation in these programs to fulfill part of their degree requirements.

Many graduate students pursue their studies in the College while working full or part-time in local industry, where they have available to them unique facilities not found within the University. Students in such situations are encouraged to pursue their graduate research at their places of employment, under the joint supervision of the faculty advisor and a company representative. Such research may be applicable as credit earned for directed study courses, master's theses, or doctoral dissertations. However, after completion of a Bachelor of Science degree and one or more years of on-the-job experience, additional training at the graduate level is often desirable without participation in a research program, and the College provides an optional master's degree program without a thesis research requirement.

Research Centers

Opportunities exist at both the graduate and advanced undergraduate levels for students to participate in the programs of the research centers.

Bioengineering Center

The Bioengineering Center is an interdisciplinary group engaged in biomedical research, utilizing the principles of mechanical, chemical, electrical, and computer engineering. Faculty members from the College of Engineering collaborate with colleagues from the Wayne State Medical School in joint efforts to solve both basic and clinical problems. The principal area of research in the Center is injury biomechanics, with major areas of research include trauma biomechanics, the mechanical basis for low back pain, human locomotion studies, and orthopedic biomechanics. Other activities include the development of advanced anthropometric test dummies and impact studies using horizontal accelerometer test sleds.

Center for Automotive Research

The Center for Automotive Research coordinates a variety of programs in different automotive areas, such as combustion engines, dynamics, acoustics, vibrations, and electronic controls. The engine research deals with the basic processes of thermodynamics, heat transfer, mass transfer and chemical kinetics which affect the performance, fuel economy, startability and emissions of different types of engines. A fully-instrumented cold room is used for some of these studies. Research is also conducted on diesel engine combustion and alternate fuels. The research consists of extensive theoretical analysis, supported by experimental investigations. The Center combines expertise from the Departments of Mechanical, Chemical, and Electrical and Computer Engineering.

Facilities of the College

Wayne State University has been identified as a PACE Partner, a group of fifty universities world-wide who have been selected by the PACE (Partnership for the Advancement of Collaborative Engineering Education) consortium to offer educational programs that are centered around the concepts of product life cycle management and the design, analysis, and planning processes in the artifice of virtual worlds with relevance to real world situations. PACE provides Wayne State students with access to the same state-of-the-art computer software and tools that are used in industry. In addition, opportunities for collaborative project development exist within the College, with other PACE institutions in Michigan, and with universities across the globe. This provides College of Engineering students with an advantage when entering the workforce or when transitioning to new roles following their graduate education.

Stimulating productive research and teaching methods are the goals of the Engineering Computer Center. These goals are met by providing and supporting the latest technologies in computer hardware, software, and networking including those associated with PACE. All curricula are designed to take advantage of these advancements and students feel the impact of these tools in their coursework. The latest in simulation, analysis, and design software are provided for students to use and master.
College of Engineering facilities include five separate buildings with over 330,000 square feet of classroom, office and laboratory space. The primary home of the College of Engineering is a three-story office building directly attached to a laboratory wing and connected to the Engineering Development Center. This has created a stimulating and productive research and teaching facility for the College. Among these facilities are multimedia classrooms, a comprehensive computer center, electronics and machine shops, dedicated teaching laboratories, and sophisticated research laboratories. The four multimedia classrooms support innovative course delivery techniques, including interactive distance learning with classrooms at a variety of sites within WSU, at other colleges and universities, and at industrial locations. The computer facilities include dedicated computer graphics, design, and personal computing hardware and software. The Marvin I. Danto Engineering Development Center, which opened in 2009, provides 80,000 square feet of space dedicated to advanced research and student collaborative projects. This includes the PACE Teaming Center, a classroom that is designed to support student team-based collaboration. The Division of Engineering Technology is housed in a separate building of approximately 24,000 square feet, located at 4855 Fourth Street. This recently remodeled facility houses labs and classrooms, including a teaching machine shop.

Research Facilities

The College oversees a wide range of undergraduate, graduate, and faculty research laboratories and excellent support facilities, housed in its five-building complex. The Bioengineering Center operates in close collaboration with Wayne’s Medical School, employing unique equipment, in particular its own massive horizontal accelerator, to conduct impact studies emphasizing biomechanics. The College’s Manufacturing Engineering Building (MEB) is home to the Department of Industrial and Systems Engineering. The most striking feature of MEB is its multi-story High Bay Lab, Wayne’s largest research space, capable of accommodating full-scale production machinery. The MEB includes eighteen other labs currently in use by faculty from several departments. The Marvin I. Danto Engineering Development Center, which opened in 2009, provides significant new research space that focuses on interdisciplinary research and collaboration. EDC laboratories are focused on the urban infrastructure, alternative energy and advanced propulsion systems, nanotechnology, and smart sensors. The main Engineering Building, one of the largest structures on campus, houses specialized labs of many types. The Center for Automotive Research conducts interdisciplinary investigations of diesel and gasoline engines in a series of specialized test cells, including the engineering cold room a fully-instrumented lab capable of reaching a temperature of minus-40 C. The College’s anechoic chamber is a walk-in scale facility dedicated to advanced research on vibrations and noise, particularly in automobiles. Other labs house research on diesel and gasoline combustion, structures and earthquake systems (utilizing the two-story structures lab, capable of testing multi-ton building components), soil mechanics, pollution and remediation models, polymers and composite materials, environmental kinetics, electron microscopy, catalysis, surface science, biomedical sciences, high-performance computing, neural networks, communication and information systems, materials/ fluids/metallurgy testing, solid-state electronics, robotics and computer-aided manufacturing, microprocessors, optical computing, and molecular beams and laser light scattering. Of particular note is the nano-fabrication (n-Fab) Laboratory, along with a Class 10 clean room, built with a $7.0 million equipment grant from Delphi Automotive and a $3.0 million investment by Wayne State University for infrastructure development. This investment provides the College of Engineering with one of the nation’s leading nano-fabrication research laboratories. The College’s research equipment is maintained, modified, and, in many cases, constructed by its in-house electronics shop and machine shop.

Accreditation

All of the undergraduate curricula of the Division of Engineering leading to a Bachelor of Science degree in engineering are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET) (415 North Charles Street, Baltimore, MD 21201, 410-347-7700). Electrical/ Electronic Engineering Technology and Mechanical Engineering Technology programs are accredited by the:

Technology Accreditation Commission (TAC) of ABET
1415 North Charles Street
Baltimore, MD 21201
410-347-7700

Details of these programs are provided in the Undergraduate Bulletin. Curriculum accreditation is based upon careful periodic appraisal of the faculty, educational program, and facilities of the College. This approval provides assurance of an up-to-date, high quality education pertinent to the engineering profession. Such accreditation is recognized by other universities, prospective employers, and state professional licensing agencies.
Academic Regulations for the College of Engineering

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 38) section of this bulletin. The following additions and amendments pertain to the College of Engineering.

Matriculation

After receiving credentials from the Office of Admissions, and before registration, a student should contact the graduate advisor in his/her major department (see the following list) for details of program planning and to discuss requirements and course work.

Academic Scholarship

A graduate degree is evidence of scholarly achievement, academic excellence, critical and creative abilities, the capacity to apply and interpret what has been learned, and proper use of the work of others. Continuance in graduate status is contingent on satisfactory scholarship with grades of 'B' or better. Every effort is made to assist the student whose work suffers as a result of conditions beyond his or her control.

Graduate students are required to earn a g.p.a. of 3.0 ('B' average) or better in all graduate-level subjects taken at WSU in order to satisfy degree requirements. Students whose cumulative g.p.a. falls below 3.0 are placed on probation, and the performance of these students is closely monitored by the departmental graduate committee. Students who fail to remediate this probationary status within eight credits after being placed on probation are subject to termination from the graduate program.

Any grade lower than 'B-minus' in a core course MUST be repeated. (The Industrial and Systems Engineering Department requires students to repeat core courses in which they have received a grade of 'B-minus' or lower. The Biomedical Engineering Department will not count any course with a grade lower than a 'B-minus' towards degree requirements.) No more than two courses may be repeated in a graduate program (the Electrical and Computer Engineering and the Mechanical Engineering Departments permit the repetition of only one course), and a student must have the appropriate approvals BEFORE the repeat registration takes place. These two repeats may consist of a second attempt of two separate courses or two repeat attempts of a single course. Per University policy, any course in which a mark appears on the student's transcript (including WN, WP, and WF) counts as an attempt to earn credit in that course. These attempts are therefore factored into the assessment of allowed repeats unless an exception is granted during the semester of the withdrawal (see below). 'F' grades earned while in the College of Engineering may be the basis for immediate termination. Consult each department for additional requirements.

All course work must be completed in accordance with the academic procedures of the College of Engineering and the Graduate School (p. 38) governing graduate scholarship and degrees. University rules require an overall g.p.a. of 3.0 or higher for graduation, in all graduate work completed at Wayne State.

Plan of Work

Students who have been admitted into a graduate program in the College of Engineering are required to meet with their graduate program advisor before registering for their first term, and then to enroll in those courses mutually decided upon. During the first semester of their graduate program, in consultation with their graduate advisor, all graduate students must develop a Plan of Work that determines their anticipated schedule for each term.

Students who fail to meet with their graduate advisor before registration or who do not have an approved Plan of Work may be administratively withdrawn from their classes if, in the opinion of the graduate program advisor, they are not taking classes appropriate to their program.

If a student has been admitted to one graduate program and decides not to pursue that program, the student MUST obtain admission to another graduate program, or he/she must withdraw from the University. To obtain admission into another program, the student must meet all the admission requirements for that program and must provide the required admission documents. Approval of the transfer of program by the original admitting program is required. International students on a student visa must also amend their I-20 form at the University Office of International Students and Scholars to reflect the change in program.

Directed Study

Independent study may be authorized and applied to completion of degree requirements provided the area of interest is an integral part of the student's graduate program and is not covered by scheduled courses. Students who elect a directed study are required to submit a Directed Study Authorization Form, which includes a description of the proposed directed study, with the necessary signatures, prior to registration.

Withdrawal from Courses

Engineering students are expected to assess early in the semester if they have appropriate time and background to successfully complete a course. Therefore, following University policy, all courses for which a grade or mark (including WN, WP, and WF) appears on the transcript will count as an attempt at a course. Students may drop a course within the first two weeks of the semester without a notation appearing on the transcript. Starting with the fifth week of the semester, a withdrawal will be noted on a student's transcript. If a student feels that extenuating circumstances beyond his or her control justify the withdrawal and support its not being counted as an attempt at the course, a petition must be submitted for consideration to the Associate Dean for Academic Affairs during the semester in which the course is taken. If the petition is approved, the withdrawal mark will remain on the transcript but a notation will be made in the student's advising record to not count it as an attempt for assessment of allowed repeats.

Cross-Registration Opportunities

Students are encouraged to consider incorporating into their course of study up to two courses elected in any of three exchange arrangements: the Michigan Intercollegiate Graduate Studies Program (MIGS) (p. 35), the University of Windsor — WSU, Exchange Program Agreement (p. 35), and Dual Enrollment with the University of Michigan (p. 35). The latter enrollment may be utilized at both the Ann Arbor and Dearborn campuses. Consult the graduate advisor and the Dean's Office for information and application forms applicable to these programs.

The Master of Science is offered in alternative energy technology, biomedical, chemical, civil, computer, and electrical engineering; engineering management, engineering technology; industrial, manufacturing, and mechanical engineering; and materials science and engineering.

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 35). Applicants to the engineering master's degree programs must also satisfy the following criteria.
In addition to the minimum requirement for admission of an overall grade point average of 2.8 from an institution accredited by the Accreditation Board for Engineering and Technology (ABET), a minimum grade point average of 2.8 in all junior and senior year (upper division) courses is required. Applicants from abroad will be judged on the basis of their academic record and on the credentials of the school from which they graduated. Individual departments and interdisciplinary programs may require a higher minimum upper division or cumulative g.p.a., please refer to the departmental sections of the Graduate Bulletin. Regular admission may also be granted to applicants with undergraduate degrees from regionally (non-ABET) accredited institutions in engineering, physics, chemistry, mathematics and computer science who meet the equivalent of the above minimum standards. Additional course work will generally be required of such applicants.

Degree Requirements
The College of Engineering’s minimum requirement for the master’s degree is thirty credits. Some programs require more than this minimum. Master of Science degrees are offered under the following degree plans approved by the College:

Plan A: A minimum of twenty-four to twenty-six credits in course work, a minimum of six credits of thesis, and a seminar or an oral presentation on the thesis research.

Plan B: A minimum of thirty to forty-two credits, including a four to six credit project. (Engineering Management and Engineering Technology ONLY.)

Plan C: A minimum of thirty to forty credits in course work. A thesis is not required.

Major Credits
Credits earned in the student’s major field are designated as major credits. Of the minimum of thirty credits required for the master’s degree, at least one-half of the course work, exclusive of thesis credit, must be in the major field. At least six credits in the major must be in upper level graduate courses, as designated by the graduate program.

Thesis Degree Plan
Students who elect the thesis degree plan (Plan A) are required to file a Thesis Outline Approval Form for approval by the advisor and the program’s Graduate Officer before writing the thesis. Final recommendation of approval for the thesis requires an oral defense of the thesis material in the presence of a departmental faculty committee of at least three persons, including the advisor and one faculty member from outside the department.

Transfer Credits
Every Wayne State student pursuing the M.S. degree must complete at least twenty-four credits in residence. As a privilege, a student may file a Petition for Transfer of Graduate Credit, provided that the credits were earned in residence at another accredited graduate school, are certified as graduate credit with grades of ‘B’ or better on an official transcript, and are certified by the advisor to be acceptable in the student’s degree program. Courses transferred may NOT have been used as applicable credit toward any other degree. In order to transfer grades from another institution, that institution has to be listed on the student’s WSU Admissions Application, or specifically mentioned in correspondence to the College prior to matriculation. Special documentation is necessary to transfer credits earned outside of North America. A student whose Petition to transfer credits is denied may still receive credit by examination.

All transcripts supporting the transfer of credits must be for credits earned prior to the student’s first semester at WSU. While enrolled in a degree program in the College of Engineering, graduate-level courses taken at another institution may not be applicable to the College of Engineering degree without approval prior to registration for any such courses. A Transfer of Credit request should not be submitted before the completion of eight credits in residence at Wayne State. All credits transferred must conform to the six-year time limitation for completion of requirements.

Since twenty-four credits of any M.S. program must be earned at WSU, the number of transfer credits from a related, uncompleted graduate program at another institution are limited to eight credits for a thirty credit M.S. program and twelve credits for a thirty-six credit M.S. program. Exceptions to this limit are made only for identified collaborative programs with partner universities.

The Doctor of Philosophy (Ph.D.) degree is offered by the College of Engineering in the following major areas: biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, electrical engineering, industrial engineering, materials science and engineering, and mechanical engineering.

Admission Requirements
Admission to the doctoral programs of the College is contingent upon admission to the Graduate School (p. 35). For admission into an engineering doctoral program, the student’s overall grade point average is expected to be 3.2 or better, with a 3.5 in the last two years as an undergraduate student if being admitted directly from a bachelor’s program. Students who do not satisfy these minimum standards may not be considered for admission to the program until they have completed a master’s degree and have earned a grade point average in courses taken for graduate credit that is not less than 3.5. Individual departments may have higher admission requirements.

Generally, students applying for admission to the doctoral program should have first achieved an M.S. degree. Students completing their M.S. degree programs who wish to enter the doctoral program must have a minimum grade point average of 3.5 at the graduate level.

Degree Requirements
A minimum of ninety credits beyond the bachelor’s degree is required for the doctoral program, including thirty credits for the dissertation. The thirty credit dissertation registration requirement is fulfilled by registering for the courses 9991, 9992, 9993, and 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively) offered under various subject area codes, in consecutive academic year semesters. For specific course requirements, students should consult the departmental sections of this bulletin, which follow.

There are no general foreign language requirements for the doctoral degree. Specific requirements can be made by the Ph.D. advisory committee and are designed to suit individual Ph.D. applicants.

If the student fails to meet the doctoral requirements, he/she may transfer appropriate credits toward the Master of Science degree program in the discipline in which credits were accrued.
Biomedical Engineering

Office: 818 W. Hancock; 313-577-1861
Chairperson: Cynthia Bir
Associate Chairperson: Harini Sundararaghavan (COE)
http://engineering.wayne.edu/bme/

The field of biomedical engineering applies engineering science and design to the solution of problems related to human physiology and pathophysiology. Working at the interface of engineering and medicine, biomedical engineers work to prevent injury, diagnose disease, and treat illnesses or injuries that occur. Built on a strong research foundation that stretches back more than eighty years, the biomedical engineering program at Wayne State provides coursework and research opportunities in a broad range of areas in biomechanics, tissue engineering and biomaterials, biomedical imaging, bioinstrumentation, and computational biology.

• Biomedical Engineering (M.S.) (p. 137)
• Biomedical Engineering (Ph.D.) (p. 137)
• Biomedical Imaging (dual-title program) (p. 139)
• Injury Biomechanics (Bridge Graduate Certificate) (p. 139)

Biomedical Engineering (M.S.)

Program specialization in this master’s degree may be undertaken in these areas:

• biomaterials and tissue engineering
• biomechanics of injury
• biomedical imaging
• biomedical instrumentation
• computational and systems biology
• interdisciplinary

These specializations are available to both part-time and full-time students, in either research or non-research degree programs.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, the minimum requirements for admission into the M.S. Program in Biomedical Engineering are:

1. Official transcripts from an accredited institution showing completion of an engineering baccalaureate degree. Students with a baccalaureate degree from a non-engineering discipline will be considered for admission to the program if they have the prerequisite coursework in Calculus (1, 2, and Differential Equations) and Physics (1 and 2). Students without subsequent mathematical application coursework (e.g. life science) must have passed these courses with a grade of ‘B’ or better.
2. A Grade Point Average (GPA) of 3.0 or higher on a 4.0 scale will be considered for Regular Admission and GPA between 2.8 and 3.0 will be considered for Qualified Admission.
3. International applicants are required to submit a WES Evaluation (http://wayne.edu/admissions/graduate/international/).

Program Requirements

This Master of Science degree in Biomedical Engineering is offered under the following options:

Plan A: minimum of thirty credits in course work including an eight credit thesis.

Plan C: minimum of thirty credits in course work.

Core Requirements

For either plan, students must complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BME 5010</td>
<td>Quantitative Physiology</td>
<td>4</td>
</tr>
<tr>
<td>BME 5020</td>
<td>Computer and Mathematical Applications in Biomedical Engineering</td>
<td>4</td>
</tr>
<tr>
<td>BME 8070</td>
<td>Seminar in Biomedical Engineering</td>
<td>1</td>
</tr>
</tbody>
</table>

Thesis Degree Plan (Plan A)

13 credits of general courses (at least 6 credits in BME)
Minimum of 6 credits at the 7000-level or above (with at least 3 credits at 7000 level or above in BME)
Maximum of 4 credits in BME 5990 or 7990 (Directed study)
8 credits of BME 8999 - Master's Thesis Research
Maximum of 6 credits of Non-BME Grad level courses from Engineering or Medical School programs

Non-Thesis Degree Plan (Plan C)

21 credits of general courses (at least 12 credits in BME)
Minimum of 6 credits at the 7000-level or above (with at least 3 credits at 7000-level or above in BME)
Maximum of 4 credits in BME 5990 or 7990 (Directed Study)
Maximum of 4 credits in BME 6991 (Internship)
Maximum of 6 credits of Non-BME Graduate level Engineering or Medical School courses

* BME 7990 and BME 8999 credits cannot be counted towards the minimum number of 7000-level credits in either the thesis or non-thesis program.

Students enrolled in the master’s degree program are required to file a Plan of Work with the Graduate Program Director of the program by the time eight graduate credits have been earned. Following this, the applicant will petition his/her advisor to advance his/her rank to ‘candidate.’ Candidate status must be authorized by the time ten graduate credits have been earned, or else subsequent registration will be denied.

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135). Courses to be applied to the degree requirements must be completed with a grade of B minus or higher. A maximum of 6 credits may be taken from Engineering or Medical School graduate-level courses with prior approval from the department.

Biomedical Engineering (Ph.D.)

Program specialization in this Ph.D. degree may be undertaken in these areas:

• biomaterials and tissue engineering
• biomechanics of injury
• biomedical imaging
• biomedical instrumentation
• computational and systems biology
• interdisciplinary
These specializations are available to both part-time and full-time
students.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate
School (p. 35). In addition, the minimum requirements for admission into
the Doctoral Program in Biomedical Engineering are:

1. A student seeking admission to the doctoral program must have
a Bachelor’s or Master’s degree in Biomedical Engineering, or other
closely related fields from an accredited institution.
2. A GPA of at least 3.5/4.0 in the applicant’s Bachelor’s degree or a GPA
of at least 3.3/4.0 in the applicant’s Master’s degree is required.
3. All applicants must submit Graduate Record Examination (GRE)
scores.
4. Three letters of recommendation.
5. Curriculum Vitae
6. An approved faculty member who agrees to be the student’s Ph.D.
advisor. The student must contact the faculty member with whom
they want to work and obtain this approval before their application is
considered for admission.
7. A statement of research interests and goals.
8. For admission and full funding consideration, please have your
application completed by March 1st. Most decisions will be released
by April 1st.
9. Current master’s students in the WSU BME program must have:
   a. At least 12 earned credits in the BME courses
   b. A GPA of at least 3.3/4.0 in the BME courses
   c. An approved faculty member who agrees to be the student’s Ph.D.
      advisor

General Requirements

An approved Plan of Work should be filed with the Office for Graduate
Studies in the first year of the doctoral studies. The student must have
filed the Plan of Work before being recommended for candidacy status.
Courses to be applied to the degree requirements must be completed
with a grade of B minus or higher.

Academic Scholarship: All course work must be completed in accordance
with the regulations of the Graduate School (p. 38) and the College of
Engineering (p. 135).

Examinations: All Ph.D. students must pass the examinations outlined
below. After successful completion of the written qualifying examination,
a student may be admitted to the status of the doctoral candidate.

Written Qualifying Examination: All Ph.D. students are required to pass
the written qualifying examination (Ph.D. Qualifying Exam (PQE)) before
completion of forty-eight credits after their baccalaureate degree. Each
student has two chances to pass the examination; if the exam is not
passed by the second attempt, the student will be dismissed from the
program (the option of obtaining a terminal master’s degree will apply).
The examination is offered once a year during the Winter semester
(students must register for BME 8080 to write the PQE).

Dissertation Prospectus Defense (Oral Qualifying Examination): This
examination shall be a presentation of the student’s proposal for
dissertation research, and will be administered by the student’s Doctoral
Dissertation Committee. This Oral Examination MUST be satisfactorily
completed AT LEAST twelve months prior to the Dissertation Defense.

Dissertation requirements are satisfied by the successful completion
of thirty credits of dissertation research. The thirty-credit dissertation
registration requirement is fulfilled by registering for the courses
BME 9991, BME 9992, BME 9993, and BME 9994(Doctoral Dissertation
Research and Direction I, II, III, and IV, respectively), in consecutive
academic year semesters. All Ph.D. students must pass the written
qualifying examination and apply for doctoral candidacy before the
election of dissertation credits. All Ph.D. students must register for
dissertation credits or doctoral candidacy maintenance status
(BME 9995) for any semester in which they utilize campus facilities or
consult with faculty, even though they may not be enrolled in a formal
lecture course.

The dissertation defense will be publicized by public notice to the
academic community; at this session, the candidate presents his/ her
doctoral research for final approval by the Doctoral Dissertation
Committee.

A minimum of one first-author peer-reviewed journal publication is
required before defending the Doctoral Dissertation.
Biomedical Imaging (Ph.D. Dual-Title)

The objective of this program is to prepare students who are currently enrolled in any biomedical related Ph.D. program or in an M.D./Ph.D. program to become strong imaging researchers. With an excellent imaging background, they have the potential to obtain positions in either industry or academia and tackle problems in engineering and science with new insights and new equipment.

Biomedical Engineering Ph.D. students by the end of the first year of their program may submit a written request to the Biomedical Engineering Graduate Program Director to add the Biomedical Imaging dual-title program to their plan of study.

Core Courses (16-18 credits): Students should select 16 to 18 credits (5 or 6 courses) from the course list (please see the program director for an updated course list). Note that these courses can be counted as part of the Ph.D. requirements.

Seminar Courses (0-1 credits): Doctoral seminar series related to imaging can be taken by the student and counted toward 1 credit for the dual title program.

Special Laboratory Rotation (2-3 credits): The student will be expected to gain at least one semester's experience in an imaging laboratory, different from their advisor's laboratory, to broaden their imaging experience.

Injury Biomechanics (Bridge Graduate Certificate)

This Bridge Graduate Certificate program aims to provide specialized skills and training engineers will need to address impact biomechanics and motor vehicle trauma in the automotive and defense industries as well as blast-induced injury biomechanics and countermeasures. Those enrolled in the program will take a core program in physiology and impact biomechanics, with additional electives to broaden the educational program.

As a Bridge Graduate Certificate, students who complete this program have the option to continue into the M.S. program in Biomedical Engineering. Credits earned as part of the Bridge Graduate Certificate in Injury Biomechanics can be applied towards the M.S. degree requirements as long as they were completed with at least a B (3.0 G.P.A.) and within six years of the completion date for the M.S.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). A minimum grade point average for regular admission to Graduate Certificate Program is 3.0. However, those with a G.P.A. of 2.70 can be admitted conditionally requiring that they maintain a 3.0 G.P.A. for the first two consecutive semesters. Applicants should have a Bachelor of Science degree in engineering. Applicants with degrees in chemistry, physics, or life sciences who wish to be considered for admission must have completed the undergraduate engineering calculus sequence and the calculus-based undergraduate physics sequence.

Program Requirements

Students must complete sixteen credits in BME courses related to injury biomechanics, including three required courses.

Select one of the following: 4

- BME 5130 Vehicle Safety Engineering
- BME 6130 Accident Reconstruction
- BME 6480 Biomedical Instrumentation
- BME 7120 Applied Finite Element Methods in Biomechanical Analysis
- BME 7150 Biomechanics of Blast-Related Injuries
- BME 7170 Experimental Methods in Impact Biomechanics
- BME 7180 Advanced Topics: Impact Biomechanics

All requirements must be completed within a three-year period. The minimum cumulative grade point average must be 3.0 at the time of graduation. No grade lower than a B-minus will be accepted for credit towards certificate requirements. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).
Chemical Engineering and Materials Science

Office: 1100 W. Engineering Building; 313-577-3800
Chairperson: Jeffrey Potoff
http://engineering.wayne.edu/che/

Chemical Engineering
The field of chemical engineering embraces those industries in which matter is treated to effect a change of state, energy content, or composition, and in which chemical engineers may be concerned with either the processes or the process equipment used for them. Examples of such industries are: fuels and petroleum processing; heavy, fine and pharmaceutical chemicals; textiles and fibers; food processing and products; natural and synthetic rubbers and plastics; explosives, pulp and paper; surface coatings; disposal of chemical plant wastes; atomic energy processes; environmental control and medical systems; and the general fields of biotechnology.

Areas of specialized research and support for graduate students include thermodynamics and transport properties of polymer solutions and melts, processing, rheology and separations of polymers, heterogeneous catalysis, surface science of catalytic and polymeric materials, environmental transport and management of hazardous waste, process design, control, and manufacturing based on sustainability principles, renewable energy, biocatalysis in multiphase systems, bioremediation for waste treatment, tissue engineering, and pharmacokinetics.

Materials Science and Engineering
Materials problems constitute an important area of research and development in the complex technology of our industrial society. The use of advanced materials, such as thermoplastic and thermoset polymers, intermetallic alloys, reinforced plastic or metal composites, ceramics and electronic materials, in the manufacturing of durable goods and devices has presented challenges to the professions of materials science and engineering. Materials engineers must understand the behavior of advanced materials, their chemical, mechanical, optical, thermal, and electrical properties, and the atomic or molecular structure that determines these properties. They can then apply their knowledge to the synthesis and processing of materials into useful products by controlling and improving their properties.

Areas of specialized research and support for graduate students include processing and rheology of polymers, thermodynamics and transport properties of polymer solutions and melts, computer simulation of polymeric and microporous materials, deformation and fracture of materials at elevated temperatures, effects of processing on mechanical properties of intermetallic alloys, influences of microstructure on fatigue, fracture toughness, stress cracking and corrosion in metals, nondestructive mechanical testing of composites, surface science of catalytic and polymeric materials, electronic materials and sensors for automotive applications.

• Polymer Engineering (Graduate Certificate) (p. 142)
• Chemical Engineering (M.S.) (p. 140)
• Materials Science and Engineering (M.S.) (p. 141)
• Chemical Engineering (Ph.D.) (p. 141)
• Materials Science and Engineering (Ph.D.) (p. 141)

Chemical Engineering (M.S.)
The Master of Science program is open to students with a bachelor’s degree in engineering, and other mathematics-based sciences. The program is designed to accommodate those students employed in local industries, as well as full-time students, by offering a majority of its courses in the evening.

Admission Requirements
Admission to this program is contingent upon admission to the Graduate School (p. 35). Regular admission requires a 3.0 grade point average or the equivalent as determined by the Department Graduate Officer.

Program Requirements
This Master of Science degree is offered under the following options:

Plan A: Thirty credits including a six credit thesis.
Plan B: Thirty credits of course work.

Both options require the following core courses:

<table>

• A maximum of 9 approved credits can be taken from other Departments in Engineering (excluding Engineering Technology), Chemistry, Physics, Mathematics, Biology Departments
• No more than 3 credits can be taken in combination of CHE 7990, CHE 8996, CHE 8510
• No more than 1 credit per semester of CHE 8510

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

Combined B.S./M.S. for Students with a B.S. in Chemistry
This program is designed for individuals who have earned a baccalaureate in chemistry from an accredited United States institution with a minimum grade point average of 3.0. Students are first admitted into the undergraduate program and are then eligible to earn both the B.S. in Chemical Engineering and, once admitted to the Graduate School, the M.S. degree. Evaluation of prerequisite requirements and applicable transfer credit will be determined by the departmental advisor.

A combined total of sixty-three credits is required: a minimum of thirty-three credits for the second baccalaureate and thirty credits for the master’s degree.

School

Admission to this program is contingent upon admission to the (M.S.) Materials Science and Engineering regulations the doctoral dissertation. Students should consult the outline and prospectus, and a final oral examination after completion of the equivalent of one year of course work), an approved dissertation outline and prospectus; and a final oral examination after completion of the Master of Science degree or in the Bachelor of Science degree, from an accredited U.S. institution, and the written approval of the student's advisor (selected from the departmental faculty). Evaluation of admission prerequisites will be determined by the Department Graduate Officer. Except for students whose undergraduate preparation is evaluated as insufficient, may be required to elect additional courses prior to admission.

The master's degree is offered by this department under the following options:

- **Plan A:** thirty credits in course work, including a six credit thesis.
- **Plan B:** thirty credits in course work.

Both options require the following core courses:

- A maximum of 9 approved credits can be taken from other Departments in Engineering (excluding Engineering Technology), Chemistry, Physics, Mathematics, Biology Departments
- No more than 3 credits can be taken in combination of MSE 7990, MSE 8996, CHE 8510
- No more than 1 credit per semester of CHE 8510

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

### Materials Science and Engineering (Ph.D.)

Admission to this program is contingent upon admission to the Graduate School (p. 35). Regular admission requires a 3.5 grade point average in a Master of Science degree or in the Bachelor of Science degree, from an accredited U.S. institution, and the written approval of the student's advisor (selected from the departmental faculty). Evaluation of admission credits is determined by the Department Graduate Officer. A minimum of ninety credits beyond the Bachelor of Science degree is required in the Doctor of Philosophy program, including thirty credits in dissertation direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses MSE 9991, MSE 9992, MSE 9993, and MSE 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. Credit distribution must also include at least thirty credits in graduate courses numbered 7000 and above, including the core courses:

- A maximum of 9 approved credits can be taken from other Departments in Engineering (excluding Engineering Technology), Chemistry, Physics, Mathematics, Biology Departments
- No more than 3 credits can be taken in combination of MSE 7990, MSE 8996, CHE 8510
- No more than 1 credit per semester of CHE 8510

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

### Materials Science and Engineering (M.S.)

Admission to this program is contingent upon admission to the Graduate School (p. 35).
the Ph.D. dissertation. Students should consult the Graduate School's regulations (p. 35) governing doctoral study.

**Polymer Engineering (Graduate Certificate)**

This program provides specialized formal education for working engineers and scientists. Those enrolled in the program will learn the fundamentals of polymer science and engineering, extend their knowledge of current polymer research topics, and maintain technical competitiveness by broadening their polymer expertise.

**Admission** to this program is contingent upon admission to the Graduate School (p. 35). Applicants must have a Bachelor of Science degree in engineering, chemistry, or physics.

Students must complete twelve credits:

<table>
<thead>
<tr>
<th>Code</th>

<tr>
<td>Select six credits in electives</td>
<td></td>
<td>6</td>
</tr>
<tr>
<td><strong>Total Credits</strong></td>
<td></td>
<td><strong>12</strong></td>
</tr>
</tbody>
</table>

The minimum grade point average must be 3.0. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135). For additional information and advice about electives, contact Dr. Z. Cao (zcao@wayne.edu).

**Civil and Environmental Engineering**

**Office:** 2100 E. Engineering Building; 313-577-3789  
**Chairperson:** William Shuster  
http://engineering.wayne.edu/cee/

In an increasingly pluralistic society, our urban centers and infrastructure is under a great deal of pressure to provide services that are equitable, affordable, and flow uninterrupted. This condition has brought into sharp focus the profession of civil engineering and the responsibilities of its practitioners. The civil engineer is a leader in such diverse areas of concern as the design of structural systems; water resources planning; the treatment and ultimate processing of solid and liquid wastes; design of building systems which will provide adequate housing for urban dwellers, commerce and industry; the development of transportation systems that serve all; construction methods and management; and the implementation and management of public works infrastructure projects designed to improve the overall urban environment. The responsibilities of the civil engineer directly involve the health, safety and welfare of the public.

The Department of Civil and Environmental Engineering offers graduate degree programs (MSCE, Ph.D.) in which students may specialize in the following areas: structures, environmental engineering, transportation, and in cooperation with the Engineering Technology Division, construction management.

- Civil Engineering (M.S.) (p. 142)
- Environmental and Sustainability Engineering (M.S.) (p. 143)
- Civil Engineering (Ph.D.) (p. 144)
- Civil Engineering and Urban Sustainability (Ph.D. Dual-Title) (p. 144)

**Civil Engineering (M.S.)**

The civil engineering graduate program at Wayne State University is designed to accommodate the needs of both full-time on-campus students and part-time students concurrently employed by local industry or government. To this end, a majority of graduate classes are held in the evening. Full-time students have the opportunity to participate in research and experimental work with the faculty, while pursuing their graduate courses.

**Admission Requirements**

Admission to this program is contingent upon admission to the Graduate School (p. 35). Additionally, all applicants must satisfy the following:

1. The student must have earned a Bachelor of Science (or Bachelor of Engineering) degree. The undergraduate degree should be from an Accrediting Board for Engineering and Technology (ABET) institution or from a comparable foreign institution. In the event that the undergraduate degree is from a field other than civil engineering or from a non-ABET accredited institution, the student may be required to complete a set of prerequisite undergraduate courses before graduate degree credit may be accrued
2. The student must have an overall grade point average (g.p.a.) of 3.2 for regular admission. Qualified or probationary admission may be granted to students with a lower g.p.a. Conditions of such admissions are specifically mandated and applicants should contact the Department for details.

**Program Requirements**

The Master of Science is offered by this department under the following options:
Plan A: Thirty credits including a six-credit thesis.

Plan C: Thirty credits of coursework.

For either plan, credits must be distributed as follows: at least twenty credits must be taken in the major (CE courses). There must be two courses numbered 7000-8999, and a cluster of courses which will constitute a core, to be selected from one of the following areas: environmental engineering, geotechnical engineering, structures, transportation, and construction management.

Students must have an overall grade point average (g.p.a.) of 3.2 for regular graduates, as well as experienced professionals. Students will be required to have significant mathematics-based science capabilities. Students should have an overall grade point average (g.p.a.) of 3.2 for regular admission. Qualified or probationary admission may be granted with a lower g.p.a. As noted above, field/professional experience will be viewed positively in the application review process.

Program Requirements

The M.S. in Environmental and Sustainability Engineering requires a minimum of thirty credits under one of two degree plans approved by the College of Engineering:

Plan A: consists of a minimum of twenty-four credit hours of course-work in combination with a minimum of six credits of thesis.

Plan C: consists of a minimum of thirty credits of course-work.

MS students may take a maximum of three credits of CE 7990 and a maximum of three credits of CE 7996. Registration in CE 7990 and/or CE 7996 must be approved by a faculty advisor and the graduate program director.

The program is designed to provide graduates a core of systems, treatment, process, and exposure/risk skills in research and applied situations.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 38) and the College of Engineering (p. 135).

M.S. students may take a maximum of three credits of CE 7990 and a maximum of three credits of CE 7996. Registration in CE 7990 and/or CE 7996 must be approved by a faculty advisor and the graduate program director.

Environmental and Sustainability Engineering (M.S.)

The Master of Science in Environmental and Sustainability Engineering aims to advance environmental engineering and sustainability to enhance human well-being through the development, application, and dissemination of relevant knowledge. The curriculum is arranged into four themes:

1. Systems & Resources – topics within this area vary in scale and include: modeling of groundwater, surfacewater, and air systems; engineered systems such as drinking water distribution systems; and interactions between the environment and urban systems (e.g. stormwater management).

2. Treatment & Sensing Technologies – topics within this area focus on the mitigation and quantification of pollutants loads to the environment, including humans, within all media (air, water, soils).

3. Bio-chemical-physical Processes – topics within this area focus on fundamental process that control the fate and transport of pollutants, including remediation techniques.

4. Environmental Exposure and Risk – topics within this area focus on identifying, quantifying and reducing risk.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35).

The M.S. in Environmental and Sustainability Engineering will admit students with bachelor's degrees or the equivalent in engineering and other qualified science programs if there is a demonstrated aptitude for quantitative analysis. The degree program is suitable for new or recent graduates, as well as experienced professionals. Students will be required to have significant mathematics-based science capabilities. Students should have an overall grade point average (g.p.a.) of 3.2 for regular admission. Qualified or probationary admission may be granted with a lower g.p.a. As noted above, field/professional experience will be viewed positively in the application review process.

Program Requirements

The M.S. in Environmental and Sustainability Engineering requires a minimum of thirty credits under one of two degree plans approved by the College of Engineering:

Plan A: consists of a minimum of twenty-four credit hours of course-work in combination with a minimum of six credits of thesis.

Plan C: consists of a minimum of thirty credits of course-work.

MS students may take a maximum of three credits of CE 7990 and a maximum of three credits of CE 7996. Registration in CE 7990 and/or CE 7996 must be approved by a faculty advisor and the graduate program director.

The program is designed to provide graduates a core of systems, treatment, process, and exposure/risk skills in research and applied situations.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 38) and the College of Engineering (p. 135).

M.S. students may take a maximum of three credits of CE 7990 and a maximum of three credits of CE 7996. Registration in CE 7990 and/or CE 7996 must be approved by a faculty advisor and the graduate program director.

The graduation requirement is completion of the M.S. courses with an overall GPA of 3.00 or higher. All core classes in the program must be completed with a 3.00 score or better. And all course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

Civil Engineering (Ph.D.)

The Department offers doctoral programs in all the major areas listed as core specializations under the Master of Science degree: environmental engineering, geotechnical engineering, structures, transportation, and construction management.

To gain admission to the Ph.D. program in civil engineering, students should have a Bachelor of Science (or Bachelor of Engineering) degree from an ABET accredited institution (or from a comparable foreign institution) with an overall GPA of 3.3 or greater. Students who do not satisfy these minimum requirements must earn a Master of Science (or Master of Engineering) in civil or environmental engineering, or in a closely related field, with a GPA in graduate courses no less than 3.5 (or equivalent). Only regular admission may be granted to the Ph.D. program. After completing a B.S. degree, if a student in the Ph.D. program fails to meet all subsequent requirements thereof, they may elect to transfer appropriate credits towards the M.S. Civil Engineering (MSCIV) or M.S. Environmental and Sustainability Engineering (MSESE) degree program.

Candidates for the doctoral degree must complete ninety credits beyond the baccalaureate, including thirty credits of dissertation direction, and sixty credits of course work and directed study. The thirty credit dissertation registration requirement is fulfilled by registering for the courses CE 9991, CE 9992, CE 9993, and CE 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. All doctoral students are required to submit a Plan of Work indicating their course work (with major/minor designation), and developed in consultation with an advisor. Additionally, students should consult the Graduate School’s regulations (p. 135) governing doctoral study.

Doctoral students may take a maximum of six credits of CE 7990 and a maximum of six credits of CE 7996. Registration in CE 7990 and/or CE 7996 must be approved by a faculty advisor and the graduate program director.

Civil Engineering and Urban Sustainability (Ph.D. Dual-Title)

Students admitted to the Ph.D. program in Civil and Environmental Engineering can apply to earn a Ph.D. with a major in Civil and Environmental Engineering and a dual-title in Urban Sustainability. This dual-title degree is designed to prepare professionals to solve challenging urban problems that require working across disciplines. Students enrolled in the dual-title program take courses in topics and develop specific skills relating to urban sustainability. Students in Civil and Environmental Engineering will also conduct an internship or science exchange in Urban Sustainability, help develop and participate in colloquia and seminars, perform community service, and write funding proposals. The dual-title coursework follows competencies outlined by the Transformative Research in Urban Sustainability Training program.

Coursework for the Civil and Environmental Engineering-Urban Sustainability Degree is currently offered in ten departments across campus. To earn the urban sustainability dual title, students first must be admitted into the doctoral programs in Civil and Environmental Engineering. Coursework must include five of six core courses shown in Table 1 (BIO 7310/CE 7311 and GS 0900 are required) plus 8 credits of urban sustainability coursework selected from Table 2 with the approval of their doctoral advisor, who will review the courses for adequate interdisciplinary representation. Alternative elective courses can be substituted for those shown in Table 2 with the approval of the Civil and Environmental Engineering Urban Sustainability Leader, Dr. Carol Miller. Of the core courses, a seminar course, “Sustainability of Urban Environmental Systems,” is suitable for cross-listing in all departments that offer the urban sustainability dual title degree (currently listed as BIO 7310/CE 7311).

Doctoral students may take a maximum of six credits of CE 7990 and a maximum of six credits of CE 7996. Registration in CE 7990 and/or CE 7996 must be approved by a faculty advisor and the graduate program director.

Other activities required for the Civil and Environmental Engineering-Urban Sustainability Degree are the following:

1. Community service: participate in two events per year or an equivalent commitment to citizen science, stewardship or outreach/education projects with community group partners.
2. Participate in Colloquium: help develop and attend an annual series of talks given by visiting lecturers across disciplines.
3. Prepare and submit an external proposal to a funding agency.

These requirements will be satisfied in the core courses. Specifically, participation in colloquia and seminars is a requirement in Sustainability of Urban Environmental Systems and Urban Anthropology, partaking in community service is an activity in the Environmental Planning and Urban Ecology class, and writing funding proposals is a course assignment in Sustainability of Urban Environmental Systems and Environmental Systems, Economics and Society. In addition, the requirement of community service will also be part of the course requirement for Essential Research Practices: Responsible Conduct of Research (GS 0900).

In addition, doctoral students will be strongly encouraged to:

1. Participate in an internship in an applied setting with a partner organization in urban sustainability. Example eligible organizations with which the Civil and Environmental Engineering Department has previously partnered include Southwest Detroit Environmental Vision, Macomb County, U.S. Army Corps of Engineers and Great Lakes Water Authority, but participation is not limited to these.
2. Produce a video documentary with their doctoral research team about the interdisciplinary sustainability problem their research is addressing, translating scientific content for a wide audience.
3. Participate in the WSU Research and Academic Development Seminar Series, which provides graduate training and career development workshops, to help prepare students to complete the required funding proposal and to envision perspectives to consider during documentary and publication preparation.
4. Produce a collaborative publication with a doctoral research team.
5. Develop a 2 credit capstone seminar course in collaboration with other students pursuing the Urban Sustainability Dual Title Degree that they will co-teach with the guidance of faculty. The capstone course will tie together and demonstrate the interconnected nature of urban sustainability topics and will be available to fellow Dual Title Degree students and other graduate and undergraduate students.
6. Include undergraduate students in field work, laboratory analysis and report-writing, both to foster greater participation in later graduate studies by those students, and also to develop the mentoring skills of the doctoral students.
Computer Science

Office: 5057 Woodward, Suite 3010; 313-577-2477
Chairperson: Loren Schwiebert
http://engineering.wayne.edu/cs (http://www.cs.wayne.edu/)

The mission of the Department of Computer Science at Wayne State University is to provide excellence in teaching, research, public service, and leadership in the computer science profession and the community. The Department provides a high-quality, innovative, baccalaureate and graduate education that emphasizes the fundamentals of computer science as well as the most recent technological innovations, preparing students for employment and advanced studies. Students are encouraged to become involved in research programs in order to enhance their education and their employment opportunities. Through the use of our state-of-the-art laboratory facilities, students can conduct basic and applied research of high quality, influence, visibility, and potential community impact. The Department continues to develop cooperative research relationships within and outside the computer science discipline, as well as with industry, government and alumni, and local community organizations. This worldwide interaction with professional organizations provides our students with the highest standards, goals, and professional practices.

The Department of Computer Science operates eight instructional and multiple research laboratories comprising about 300 state-of-the-art workstations and servers.

- Computer Science (M.S.) (p. 146)
- Computer Science (Ph.D.) (p. 148)
- Data Science and Business Analytics (M.S.) (p. 149)
- Robotics (M.S.) (p. 150)

## Computer Science (M.S.)

The Department of Computer Science awards the degree of Master of Science with a major in computer science under two plans. The two plans are distinguished on the basis of the breadth and depth of the material covered. The Master of Science degree under the Plan A option is granted to students who pursue a more concentrated set of topics culminating in a master's thesis. The Master of Science degree under the Plan C option offers students experience in many areas of computer science.

The great variety of subjects that are part of computer science, together with the immense diversity of their applications, makes it imperative that students in the master's program maintain close contact with their advisors in order to achieve a coherent plan of study directed toward a specific goal. In particular, elections of courses should be made after consultation with and the approval of the student's advisor.

## Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 35). In addition, applicants are expected to have attained a level of scholarship in the baccalaureate program equal to a grade point average of 3.0 or better, including adequate preparation in computer science and supporting courses in mathematics. Normally, the entering student will be expected to have fulfilled the equivalent of the requirements for the Bachelor of Science degree at Wayne State University and to have satisfied any deficiencies by successfully completing necessary prerequisite course work, before becoming an applicant for an advanced degree. The Graduate Record Examination (GRE) is not required for admission to the Master of Science program.

Applicants must submit official transcripts from each college or university attended, three letters of recommendation, Graduate Record Examination scores, a statement of approximately 300 words describing the applicant's academic and professional goals, and the Computer Science Graduate Admission Evaluation Form.

Students planning to pursue some of the more theoretical courses may find it necessary to have additional preparation in mathematics and/or computer science. The student should make a careful examination of the prerequisites for advanced courses in his/her areas of special interest before seeking admission. Prerequisite course work which is required as a condition of admission must be completed prior to electing graduate courses.

Upon admission, each student is assigned an advisor for guidance and direction in meeting degree requirements and academic goals. As the student's interests in computer science become more focused, a change in advisor may be necessary; forms for this purpose are available from the Department office. Such a change must be done prior to submitting the Plan of Work.

## Areas of Research

**Information and Intelligent Systems**: Databases, Machine Learning, Artificial Intelligence, Pattern Recognition, Computer Graphics & Visualization, Bioinformatics and Health Informatics.

## Degree Requirements

The Master of Science degree is offered under either Plan A or Plan C. Plan A requires thirty credits and includes eight credits for the completion of a thesis. A thesis is a technical paper describing the original creative work of the author. The master's thesis work is directed by the student's advisor together with a committee of at least two additional faculty members. All committee members must read and approve the thesis, after which time it must be presented at a public session prior to final acceptance. The thesis must conform to the Graduate School's specifications on format and presentation (p. ). Plan C requires thirty credits in course work. There is no thesis required for the Plan C Master's degree.

1.  

The Code columns in the table are placeholders and should be replaced with actual course codes as provided in the document.
At least twenty-four credits must be taken in residence.

The following two focuses (real-time and artificial intelligence) are used across the two focuses.

AI Concentration Requirements
A master student (Plan A or C) must fulfill both breadth requirement (outlined above) and depth requirement described here, i.e., at least four lecture courses must be selected from the following list and a course can used to fulfill both breadth and depth requirements.

AD Concentration Requirements
A master student (Plan A or C) must fulfill both breadth requirement (outlined above) and depth requirement described here, i.e., at least four lecture courses must be selected from the following electives and a course can be used to fulfill both breadth and depth requirements.

AD Elective Courses
The following two focuses (real-time and artificial intelligence) are used only as a guideline for the students; students are free to select courses across the two focuses.

1 Select at least one course that must be taken at or above the 7000 level. CSC 7990 does not satisfy the 7000 level requirement.

All credits must be taken from CSC designated courses.

At least twenty-four credits must be taken in residence.
Candidacy
By the time twelve credits have been earned, a Plan of Work must be
developed with the student's advisor and submitted to the Chairperson
of the Computer Science Graduate Committee. In the Plan of Work the
student indicates his/her choice of master's program, either Plan A
or C (see below). Upon approval of the Plan of Work by the Graduate
Committee, the student is considered a degree candidate. The student is
not permitted to take more than twelve credits in the master's program
unless candidacy has been established. If the student has not graduated
after two years as a candidate, the Plan of Work will be reviewed for
possible adjustment.

Scholarship/Academic Probation
Students must maintain a minimum overall 3.0 grade point average.
Failure to do so for one semester places the student on academic
probation. Failure to do so for two semesters will result in the student's
dismissal from the graduate program. All course work must be completed
in accordance with the regulations of the Graduate School (p. 38) and
the College of Engineering (p. 135). The above requirements are those in
force as of the publication date of this bulletin; however, students should
keep in mind that the degree requirements for any particular student are
those in force at the time of his/her admission.

Computer Science (Ph.D.)
The Doctor of Philosophy degree is conferred upon individuals who have
demonstrated the ability to make original contributions to the knowledge
in the field of computer science.

The Ph.D. program develops experts and professionals who will continue
in academic work, industry, or government. It encourages the attainment
of excellence in research and scholarship necessary to catalyze the
advancement of computer science. The fulfillment of the doctoral degree
requirements is monitored primarily through the proficiency, qualifying,
and prospectus examinations, and the presentation of the dissertation.

The doctoral program emphasizes research and the Department
encourages prospective Ph.D. candidates to involve themselves in faculty
projects at their earliest possible opportunity.

Admission Requirements
Admission to this program is contingent upon admission to the Graduate
School (p. 35). The successful applicant should possess a bachelor's
or master's degree with a major in computer science or related field. In
addition, applicants are expected to have attained a level of scholarship
equal to a 3.3 grade point average or better in their most recent degree,
along with adequate preparation in the computer science field and
supporting courses in mathematics. Normally, the admitted student will
be expected to have fulfilled the equivalent requirements for the Bachelor
of Science in Computer Science, and to have satisfied any deficiencies in
course content by successfully completing the pre-requisite course work
prior to becoming an applicant for the advanced degree.

Applicants must submit to the Department official transcripts from
each college or university that they have attended, three letters of
recommendation, Graduate Record Examination scores, a statement
of approximately 300 words describing the applicant's academic and
professional goals, and the Computer Science Graduate Evaluation Form.

Program Requirements
The Doctor of Philosophy degree requires ninety credits beyond the
baccalaureate degree, thirty of which must be earned as dissertation
credit. All course work must be completed in accordance with the
regulations of the Graduate School (p. 38) and the College of Engineering
(p. 135).

The computer science doctoral program is designed to be flexible, in
order to meet the individual student's interests and to reflect the dynamic
nature of the field. It is comprised of seven major stages:

1. Advisor/Program Selection: The first stage is devoted to the selection
of a faculty advisor, taking course work, and the production of a
Plan of Work in consultation with the student's faculty advisor.
Students are encouraged to investigate the different areas of
research available by talking with various graduate faculty members
and attending research seminars held by the Department. Advisor
selection must be done within the first semester of admission. The
student will then begin course selection and outlining the Plan of
Work. The approved Plan of Work must designate a primary area of
research and a minor field outside the Department. The student is
encouraged, in consultation with their advisor, to define his/her own
primary and minor fields of interest by the selection of a cohesive
grouping of available graduate courses. The Plan of Work must
include at least thirty credits in course work at, or above, the 7000
level. Twenty-one of these credits must be in course work other than
directed study (CSC 7990). Both CSC 6500 and CSC 6580 must be
part of the students' plan of work.

2. Proficiency Examination: In order to demonstrate knowledge of
undergraduate-level computer science fundamentals, Ph.D. students
admitted in a fall semester are required to pass the proficiency
examination within the first year of starting the program. Ph.D.
students admitted in a winter semester may elect to, with approval of
the research adviser, take the proficiency examination either in March
of the same year or in March of the next year. This exam is given
in March of each winter semester. All three subject tests (Discrete
Mathematics, Data Structures, and Computer Programming) must
be attempted. Students are given a single attempt to pass the exam.
The final pass/fail decision will be made by the graduate committee,
which considers exam scores in the three subject areas, GPA after
admission to the graduate program, the research adviser’s input and
other evidence as determined appropriate by the graduate committee.
The graduate committee may render a decision of conditional pass
if necessary, in which the student must take a remedial course in
the following semester, as determined by the graduate committee.
This remedial course must be passed with a grade of 'B' or better.
Otherwise, the student will not be allowed to continue in the Ph.D.
program.

3. Qualifying Examination: The Qualifying Exam is designed to
determine the student’s capacity for critical thinking as evident in
both written and oral presentations. By the end of the second year
in the program, students are required to make their first attempt at
this exam. The exam consists of two parts. In the first portion of the
exam the student must demonstrate his/her knowledge of theoretical
computer science at the graduate level in each of the two core
theory areas taught in CSC 6500 and CSC 6580, both of which the
student must have passed with grades of 'B' or better, or must take
an additional written exam on each subject. In the second portion of
the exam, the competency of the student in their major area of the
research is to be demonstrated in the form of a written document and
accompanying oral presentation. The exam is offered in March and
November, and the student will have two opportunities to pass both
parts. Failure to pass both parts of the qualifying examination by the
end of the fifth semester will result in the student's removal from the
program.
Ph.D. program. Upon successful completion of this requirement, a Report on Doctor of Philosophy Oral Examination form is submitted to the Graduate School.

4. **Dissertation Committee Formation:** With the approval of the Department Graduate Committee, the student establishes a Dissertation Committee that consists of four members. If there are co-chairs, the committee will consist of five members. At least two committee members are from the student’s home department, Computer Science. The Chairperson and one additional member must hold a Regular Graduate Faculty appointment in the Department of Computer Science. The committee will also include an external member from outside the department. This Committee is responsible for administering the prospectus and the dissertation defense of the candidate.

5. **Candidacy:** Candidacy is reached after the Plan of Work has been approved, the written qualifying examination has been passed, approximately fifty credits in course work have been completed, and the dissertation committee has been formed. Upon completion of these requirements, a Recommendation for Doctor of Philosophy Candidacy Status form is submitted to the Graduate School in order to advance the Ph.D. applicant to Candidate Status.

6. **Prospectus:** After completion of the written qualifying exam, the student will continue to develop the dissertation prospectus, a document that provides evidence that the prospective doctoral candidate has completed adequate preliminary research on the topic of the proposed doctoral dissertation. The principles for determining the scope of the prospectus are detailed in the Doctoral Dissertation Outline and Record of Approval form (http://wayne.edu/gradschool/).

7. **Dissertation:** The final stage is devoted primarily to the research and preparation of the dissertation. The thirty credit dissertation registration requirement is fulfilled by registering for the courses CSC 9991, CSC 9992, CSC 9993, and CSC 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The dissertation research is presented and defended before the Dissertation Committee in a public lecture presentation.

**Bioinformatics and Computational Biology (Ph.D.)**

The concentration in bioinformatics and computational biology is intended for doctoral students in computer science who wish to receive research training in this specialization. Students will be prepared to do inter-disciplinary work in computer science, biology, and biomedical research. They will be trained to identify important biological problems that require bioinformatics and computational solutions, and to identify and apply appropriate approaches to address these problems. This concentration has been developed to provide outstanding and highly-motivated students with the specialized training needed to initiate productive work in their chosen careers. General admission and degree requirements are the same as cited above for the Ph.D. program. Concentration requirements are as follows:

<table>

</tr>
</tbody>
</table>

**Electives** appropriate to each student’s background and interests will be selected by the student and his/her advisor and could include courses such as: IBS 7030/MGG 7030, Functional Genomics and Systems Biology.

**Note:** students must complete MGG 7010 before enrolling in the Bioinformatics CSC courses and CSC 7300 and CSC 7301 must be completed before CSC 7410.

**Data Science and Business Analytics (M.S. with a concentration in Data Computing)**

Analytics is a fast-growing STEM field with a high demand for individuals who possess the skills and expertise necessary to navigate the process of transforming data into insight for making sound business decisions. It’s the reason that the WSU College of Engineering and the Mike Ilitch School of Business launched an innovative and interdisciplinary new master’s program in data science and business analytics. Leaders in this field use data to fundamentally rethink all facets of business in many sectors, including manufacturing, supply chain, finance, and healthcare.

**Admission**

Admission to any graduate program is contingent upon admission to the Graduate School (p. 35). Applicants should have 3.0 or higher cumulative undergraduate g.p.a.

**Interview**

Prospective candidates being considered for admission may have to participate in an online interview with the admissions committee. Upon evaluating the application, admissible candidates will be contacted for scheduling these interviews.

**Prerequisite Knowledge**

Candidates are expected to well-versed in basic probability and statistics and also familiar with some programming language. Courses will be available in the summer months for admitted applicants to refresh their knowledge or makeup for any deficiency in this knowledge.

Students without this prerequisite knowledge but otherwise possess good credentials will be given conditional admission and have to take this remedial coursework in the summer months prior to starting the program in the fall term.

**Graduate Management Admission Test (GMAT) and Graduate Record Examination (GRE)**

Applicants must complete the GRE or the GMAT with minimum scores in the top 75 percentile.

**Program Requirements**

Students must complete a total of 30 credits in order to earn the M.S. in Data Science and Business Analytics.

The "interdisciplinary core" includes 9 credits of coursework across business, computer science, and industrial engineering. On top of this integrated breadth of study covering the core areas of data science and business analytics, each student has 9 credits of "concentration" courses to give them depth in an engineering, business, or analytics area. Each student’s 6 credits of elective choices can be personalized to support their individual career goals. The final piece of the curriculum is a 6-credit applied analytics practicum, in which students will work with companies and organizations on real analytics problems.

Robotics (M.S.)

Admission Requirements

Applicants must meet requirements for admission to the Graduate School (p. 38). Students must have a bachelor’s degree or the equivalent in engineering from an accredited college or university. Students from all science, technology, engineering and math (STEM) disciplines will be considered for admission.

All applicants must be admitted to the Graduate School, the College of Engineering (p. 135), and a department within the college, meeting all applicable admission requirements, including a minimum grade point average of 2.75 for regular admission and 2.5 to 2.74 for qualified admission. Professional experience will be considered in admission.

Program Requirements

The program requires students to complete a minimum of thirty credits using master’s degree Plan A (24 course credits plus a 6 credit master’s thesis) or Plan C (30 credits of coursework). Plan A is intended for students planning to go on to pursue a Doctoral degree. All courses must be graduate-level courses offered within the College of Engineering. The program requires applicants to declare one of three majors:

- Industrial Automation, hosted by the Engineering Technology (ET)
- Intelligent Control, hosted by the Electrical and Computer Engineering (ECE)
- Smart Mobility, hosted by the Computer Science (CSC)

The M.S. in Robotics requires competency in three foundational areas for all three majors. A student must take one of the two courses in each of the 3 foundational areas. In addition to fulfilling the general scholarship requirements of the Division, all course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

Electrical and Computer Engineering

Office: 3100 W. Engineering Building; 313-577-3920
Chairperson: Mohammed Ismail Elnaggar
http://engineering.wayne.edu/ece/

In the field of electrical and computer engineering, basic physical and mathematical principles are utilized to develop new devices, technologies, and techniques of constantly broadening and rapidly changing applications. Examples include:

- Microcomputers, parallel processing systems, and embedded systems, and their utilization in a growing range of system applications
- Signal processing techniques in telemetry and communication networks
- Image processing techniques in industrial material diagnostics and medical imaging
- Information processing techniques for data analytics and machine learning
- Photonics and fiber optic devices for applications in optical data processing, sensing, and communication
- Sophisticated control techniques, transducers, and robotics for advanced automation and electric systems
- Energy conversion devices and power systems, including smart grid, electric vehicles, and alternative energy systems
- Micro and nano-fabricated smart sensors for biomedical and environmental applications
- Systems on chip for the internet of things, cyber physical systems, wearable and implantable medical devices
- Microelectronics and integrated smart systems for a wide variety of applications, including self-driving vehicles, wireless communications, consumer electronics, instrumentation, multimedia, future smart homes and smart cities

Part-time study in courses offered in the evening allows professionals working in local industry to pursue graduate degrees concurrently with their employment.

- Computer Engineering (M.S.) (p. 151)
- Computer Engineering (Ph.D.) (p. 152)
- Electrical Engineering (M.S.) (p. 152)
- Electrical Engineering (Ph.D.) (p. 152)
- Robotics (M.S.) (p. 153)

Computer Engineering (M.S.)

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 35). All applicants whose B.S. degree is not from an ABET-accredited college or university are required to submit additional pertinent information, including results of the general test of the Graduate Record Examination (GRE), publications, and/or inventions.

Students with B.S. degrees from selected science and engineering undergraduate programs not specifically related to this discipline may be admitted into the master’s program after completing a sequence of undergraduate courses designed to prepare them for the graduate curriculum.
ECE AGRADE Program

Outstanding undergraduates in the ECE department who meet eligibility criteria may enroll in the ECE AGRADE program. This program allows students to count up to 16 credits towards both the B.S. and M.S. degrees, enabling students to complete the B.S. and M.S. degrees within 5 years of full-time study. More information about eligibility, degree requirements, course selections, and policies may be found at https://engineering.wayne.edu/ece/programs/agrade.php

In the areas of electrical engineering and computer engineering the Master of Science degree is offered by this department under the following options:

**Plan A:** Thirty credits including a six credit thesis.

**Plan C:** Thirty credits of course work.

For either plan, students may choose from courses in one or more areas of specialization within the ECE curriculum. Detailed degree requirements, academic policies, and the course curriculum may be found at https://engineering.wayne.edu/ece/programs/ms.php.

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

Computer Engineering (Ph.D.)

Admission to these programs is contingent upon admission to the Graduate School (p. 35). Applicants must have an overall grade point average of 3.6 in a Master of Science degree program. It is possible for outstanding students to enter the Ph.D program with only a Bachelor of Science degree. All applicants whose B.S. degree is not from an ABET-accredited college or university are required to submit additional pertinent information, including results of the general test of the Graduate Record Examination (GRE), publications, and/or inventions.

Candidates for the doctoral degree must complete ninety credits beyond the bachelor’s degree, including thirty credits of dissertation direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses ECE 9991 (http://bulletins.wayne.edu/search/?P=ECE%209991), ECE 9992 (http://bulletins.wayne.edu/search/?P=ECE%209992), ECE 9993 (http://bulletins.wayne.edu/search/?P=ECE%209993), and ECE 9994 (http://bulletins.wayne.edu/search/?P=ECE%209994) (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The division of these credits includes 60 credits of pre-candidacy coursework, and 30 credits of dissertation research. Students are required to complete a preliminary exam, prospectus exam, and a public defense of a doctoral dissertation, completed with a research advisor. Students entering the program with an MS degree may transfer up to 30 credits towards pre-candidacy coursework. Details about degree requirements and course curriculum may be found at https://engineering.wayne.edu/ece/programs/phd.php.

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135). For additional information, students should consult the Graduate School's regulations (p. 38) governing doctoral study.

Electrical Engineering (M.S.)

**Admission Requirements**

Admission to these programs is contingent upon admission to the Graduate School (p. 35). All applicants whose B.S. degree is not from an ABET-accredited college or university are required to submit additional pertinent information, including results of the general test of the Graduate Record Examination (GRE), publications, and/or inventions.

Students with B.S. degrees from selected science and engineering undergraduate programs not specifically related to this discipline may be admitted into the master’s program after completing a sequence of undergraduate courses designed to prepare them for the graduate curriculum.

ECE AGRADE Program

Outstanding undergraduates in the ECE department who meet eligibility criteria may enroll in the ECE AGRADE program. This program allows students to count up to 16 credits towards both the B.S. and M.S. degrees, enabling students to complete the B.S. and M.S. degrees within 5 years of full-time study. More information about eligibility, degree requirements, course selections, and policies may be found on the department’s website (https://engineering.wayne.edu/ece/programs/agrade.php).

**Interdisciplinary Physics-ECE AGRADE Program**

Outstanding seniors in Physics (both Applied Physics option and Fundamental Physics option) who meet eligibility criteria may apply for the cross-college AGRADE program between the Physics undergraduate program (College of Liberals Arts and Sciences) and Electrical Engineering (EE) Master’s programs (College of Engineering). The Physics-ECE AGRADE program allows students to count up to 16 credits of selected graduate courses towards a B.S. degree in physics as well as an M.S. degree in Electrical Engineering. This enables students to complete both degrees within 5 years of full-time study. More information about eligibility, degree requirements, course elections, and academic policies may be found on the department’s website (https://engineering.wayne.edu/ece/programs/agrade.php).

In the areas of electrical engineering and computer engineering the Master of Science degree is offered by this department under the following options:

**Plan A:** Thirty credits including a six credit thesis.

**Plan C:** Thirty credits of course work.

For either plan, students may choose from courses in one or more areas of specialization within the ECE curriculum. Detailed degree requirements, course selections, and policies may be found on the department’s website (https://engineering.wayne.edu/ece/programs/agrade.php).

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

**Electrical Engineering (Ph.D.)**

Admission to these programs is contingent upon admission to the Graduate School (p. 35). Applicants must have an overall grade point average of 3.6 in a Master of Science degree program. It is possible for outstanding students to enter the Ph.D program with only a Bachelor of Science degree. All applicants whose B.S. degree is not from an ABET-accredited college or university are required to submit additional pertinent information including GRE scores, publications and/or inventions.

Candidates for the doctoral degree must complete ninety credits beyond the bachelor’s degree, including thirty credits of dissertation direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses ECE 9991 (http://bulletins.wayne.edu/search/?P=ECE%209991), ECE 9992 (http://bulletins.wayne.edu/search/?P=ECE%209992), ECE 9993 (http://bulletins.wayne.edu/search/?P=ECE%209993), and ECE 9994 (http://bulletins.wayne.edu/search/?P=ECE%209994) (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The division of these credits includes 60 credits of pre-candidacy coursework, and 30 credits of dissertation research. Students are required to complete a preliminary exam, prospectus exam, and a public defense of a doctoral dissertation, completed with a research advisor. Students entering the program with an MS degree may transfer up to 30 credits towards pre-candidacy coursework. Details about degree requirements and course curriculum may be found at https://engineering.wayne.edu/ece/programs/phd.php.

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135). For additional information, students should consult the Graduate School's regulations (p. 38) governing doctoral study.
search/?P=ECE%209991), ECE 9992 (http://bulletins.wayne.edu/search/?P=ECE%209992), ECE 9993 (http://bulletins.wayne.edu/search/?P=ECE%209993), and ECE 9994 (http://bulletins.wayne.edu/search/?P=ECE%209994) (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The division of these credits includes 60 credits of pre-candidacy coursework, and 30 credits of dissertation research. Students are required to complete a preliminary exam, prospectus exam, and a public defense of a doctoral dissertation, completed with a research advisor. Students entering the program with an MS degree may transfer up to 30 credits towards pre-candidacy coursework. Details about degree requirements and course curriculum may be found on the department's website (https://engineering.wayne.edu/ece/programs/phd.php).

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135). For additional information, students should consult the Graduate School's regulations (p. ) governing doctoral study.

Robotics (M.S.)

Admission Requirements

Applicants must meet requirements for admission to the Graduate School (p. 38). Students must have a bachelor's degree or the equivalent in engineering from an accredited college or university. Students from all science, technology, engineering and math (STEM) disciplines will be considered for admission.

All applicants must be admitted to the Graduate School, the College of Engineering (p. 135), and a department within the college, meeting all applicable admission requirements, including a minimum grade point average of 2.75 for regular admission and 2.5 to 2.74 for qualified admission. Professional experience will be considered in admission.

Program Requirements

The program requires students to complete a minimum of thirty credits using master's degree Plan A (24 course credits plus a 6 credit master's thesis) or Plan C (30 credits of coursework). Plan A is intended for students planning to go on to pursue a Doctoral degree. All courses must be graduate-level courses offered within the College of Engineering. The program requires applicants to declare one of three majors:

- **Industrial Automation**, hosted by the Engineering Technology (ET)
- **Intelligent Control**, hosted by the Electrical and Computer Engineering (ECE)
- **Smart Mobility**, hosted by the Computer Science (CSC)

The M.S. in Robotics requires competency in three foundational areas for all three majors. A student must take one of the two courses in each of the 3 foundational areas. In addition to fulfilling the general scholarship requirements of the Division, all course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

* CSC 7991 should be taken with the topic area, Embedded Wireless Networking for Cyber-Physical Systems. Students should consult an advisor before choosing this course as an elective.
The Division of Engineering Technology, founded in 1973, stresses the application of current technology to typical industrial problems. The curricula maintain a close relationship between theoretical principles taught in the classroom and their applications.

Engineering technology is a profession closely related to engineering. It deals with the application of knowledge and skills to industrial processes, production and management. Technologists are organizers of people, materials, and equipment for the effective planning, construction and maintenance of technical facilities and operations. Their responsibilities require technical and practical knowledge. Graduates of Wayne State’s engineering technology programs are employed in such areas as manufacturing engineering, engineering production, marketing, maintenance, quality control, product testing, field engineering, consulting engineering, design, and technical supervision.

Admission Requirements and Student Selection Procedures

Admission to the M.S.E.T. degree program is contingent upon admission to the Graduate School (p. 35). Additionally, all applicants must:

1. Hold a bachelor’s degree in engineering technology or a related discipline from a college or university of recognized standing, or the equivalent;
2. Have maintained at least a ‘B’ average (3.0 g.p.a.) in undergraduate coursework;
3. Provide at least two letters of recommendation from persons acquainted with the applicant’s academic achievement at the institution most recently attended (applicants whose academic references date back more than five years may substitute other references, if desired);
4. Submit with his/her application a preliminary proposal for the intended plan of study which includes a general set of objectives and an outline of types of coursework or other educational projects to be pursued;
5. Applicants who do not meet the 3.0 g.p.a. requirement but whose g.p.a. does fall within the Graduate School’s qualified admission span (2.5 to 2.9 g.p.a.) may be admitted with a conditional status. Immediately upon successful completion of two graduate-level courses with a grade of ‘B’ or above, the candidate must request in writing that his/her status be changed to regular status.
6. Students will be required to submit a finalized Plan of Work, listing all the courses the student intends to take to fulfill the degree requirements. The Plan must be developed with the aid of the student’s faculty advisor and is generally submitted by the time the student has earned eight credits.

Program Requirements

The Master of Science in Engineering Technology degree is offered under the following options:

**PLAN B:** A minimum of thirty credits in graduate-level (numbered 5000 and above) course work, including a four- to six-credit Master’s Project (ET 7999).

**PLAN C:** A minimum of thirty credits of graduate level course work (numbered 5000 and above).

For either plan, students must complete the core requirement, ET 7430. A minimum grade of ‘B’ is required in this core course, and the grade of ‘F’ grade is not acceptable in any course. In addition to fulfilling the general scholarship requirements of the Division, all course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

**Master’s Project:** ET 7999 integrates the knowledge gained in coursework, laboratory studies, and prior work experience to provide a focused activity demonstrating the student’s ability to perform...
master's-level work. The master's project should include elements of design, synthesis, fabrication, modeling and simulation, CAD/CAM, and empirical and theoretical analysis balanced in a manner appropriate to the student’s specific project.

A member of the Division of Engineering Technology faculty holding a graduate faculty appointment chairs the student’s Master’s Project Advisory Committee. (Individuals outside the Division directing master’s project research must hold an adjunct graduate faculty appointment.) An adjunct graduate faculty member may co-chair the Committee. Using the form provided by the Division, the student must submit a proposal indicating the scope of the project, the problem to be solved, the nature of the system to be studied, the plan of approach and work plan for the activity, facilities and resources to be employed, and the student’s qualifications for performing this work. The Master’s Project Advisory Committee may accept, decline, or request resubmission of the proposal as explained to the student.

Only students with accepted proposals are allowed to register for ET 7999. Requests to elect additional credits in ET 7999 beyond those originally allowed by the Master’s Project Advisory Committee must also be approved by the Committee.

Residency Requirement: Of the required credits for the M.S.E.T. degree, a minimum of eighteen must be Division of Engineering Technology courses. A maximum of eight transfer credits may be allowed for graduate courses taken at other accredited institutions, if they are appropriate to the student’s plan of study. Up to eight credits in graduate courses completed at Wayne State as a non-degree graduate student may be applied toward degree requirements and must be included in the applicant’s preliminary Plan of Work. Minimum completion period for the degree is three semesters.

Robotics (M.S.)

Admission Requirements
Applicants must meet requirements for admission to the Graduate School (p. 38). Students must have a bachelor's degree or the equivalent in engineering from an accredited college or university. Students from all science, technology, engineering and math (STEM) disciplines will be considered for admission.

All applicants must be admitted to the Graduate School, the College of Engineering (p. 135), and a department within the college, meeting all applicable admission requirements, including a minimum grade point average of 2.75 for regular admission and 2.5 to 2.74 for qualified admission. Professional experience will be considered in admission.

Program Requirements
The program requires students to complete a minimum of thirty credits using master's degree Plan A (24 course credits plus a 6 credit master's thesis) or Plan C (30 credits of coursework). Plan A is intended for students planning to go on to pursue a Doctoral degree. All courses must be graduate-level courses offered within the College of Engineering. The program requires applicants to declare one of three majors:

- **Industrial Automation**, hosted by the Engineering Technology (ET) Department
- **Intelligent Control**, hosted by the Electrical and Computer Engineering (ECE) Department
- **Smart Mobility**, hosted by the Computer Science (CSC) Department

The M.S. in Robotics requires competency in three foundational areas for all three majors. A student must take one of the two courses in each of the 3 foundational areas. In addition to fulfilling the general scholarship requirements of the Division, all course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

---

**Industrial and Systems Engineering**

*Office: 2143 Manufacturing Engineering Building 4815 Fourth St.; 313-577-3821
Chairperson: Ratna Babu Chinnam

**Industrial Engineering** is a broadly-based integrated field concerned with enabling complex systems to function effectively. Managing the inventory of a production facility, for example, involves issues of production and stocking policy, manufacturing equipment, human resources, customer demand, and supplier relationships. The industrial engineer must understand the interaction of the components of a system, and coordinate the flow of materials and information to effectively manage the operation. He/she plays an important role in defining information needs and developing strategies for improving decision making in existing systems. The skills of the industrial engineer, however, can be applied in more than just the traditional production environment. In the growing service sector of the economy including health care delivery, public safety, air transportation, energy, and banking issues of resource management, scheduling, quality of service, and systems design are of increasing importance.

**Manufacturing Systems Engineering** was traditionally involved in developing process capabilities to realize the output of design engineering. Today, design and manufacturing systems engineering is becoming reciprocally integrated and both groups work together in teams to assure the soundness of design and producibility of goods and services. The manufacturing systems engineer must have an understanding of the design process as well as special expertise in the knowledge and understanding of the production process, which is now computer-based and provides flexibility through numerical control. The manufacturing systems engineer is responsible for designing and implementing the cells and production lines which become the basic units of manufacture. Increasingly, such production units are becoming parts of an integrated factory system, and are not simply islands of automation. The manufacturing systems engineer must understand the multi-layered control architecture of the integrated factory, and the computer-based technologies which enable it.

**Engineering Management** has grown in importance as today’s engineer must possess the necessary tools for effective technical management. Inherent in successful leadership is an understanding of the business functions of an organization, tools used in the decision-making process, and skills for efficient project management, among others. An effective engineering manager will utilize industrial engineering skills to develop strategies that improve the product development process, manage quality and productivity, and advance techniques in world-class manufacturing. More often, a business overview is critical to developing and improving these processes.

**Systems Engineering** is an interdisciplinary approach and means to enable the realization of successful systems. It focuses on defining customer needs and required functionality early in the development cycle, documenting requirements, then proceeding with design synthesis and system validation while considering the complete problem.

**Data Science & Business Analytics** is an interdisciplinary program with Computer Science and Mike Ilitch School of Business that is designed to provide a broad range of data science and analytics knowledge and skills. This fast growing field is quickly becoming a key facet of business strategy with increasing need for employees who can think uniquely across disciplines to transform data into relevant insights for making better decisions.
Facilities: The Department maintains laboratories in systems simulation, computer-aided manufacturing, smart engineering systems, big data, design, and concurrent engineering.

Master’s Degree Programs of this department offer the flexibility of full or part-time study. Most of the courses are offered in the evening, allowing students to continue full-time employment in local industries. Some program classes are offered at off-campus sites. Many of the graduate-level courses are also offered in the evening, allowing graduate students also to continue full-time employment in local industries. To further accommodate the working student population, several engineering courses are offered online (refer to the schedule of classes to determine availability).

All incoming M.S. students must demonstrate competency in undergraduate probability and statistics, through successful completion of BE 2100, or equivalent courses. If the student fails to show competency, he or she may be required to complete a pre-requisite course in probability and statistics.

- Systems Engineering (Bridge Graduate Certificate) (p. 164)
- Industrial Engineering (M.S.) (p. 160)
- Manufacturing Engineering (M.S.) (p. 163)
- Engineering Management (M.S.) (p. 158)
- Data Science & Business Analytics (M.S.) (p. 158)
- Industrial Engineering (Ph.D.) (p. 161)

Data Science and Business Analytics (M.S. with a concentration in Advanced Analytics)

Analytics is a fast-growing STEM field with a high demand for individuals who possess the skills and expertise necessary to navigate the process of transforming data into insight for making sound business decisions. It’s the reason that the WSU College of Engineering and the Mike Ilitch School of Business launched an innovative and interdisciplinary new master’s program in data science and business analytics. Leaders in this field use data to fundamentally rethink all facets of business in many sectors, including manufacturing, supply chain, finance, and healthcare.

Admission

Admission to any graduate program is contingent upon admission to the Graduate School (p. 35). Applicants should have 3.0 or higher cumulative undergraduate g.p.a.

Interview

Prospective candidates being considered for admission may have to participate in an online interview with the admissions committee. Upon evaluating the application, admissible candidates will be contacted for scheduling these interviews.

Prerequisite Knowledge

Candidates are expected to well-versed in basic probability and statistics and also familiar with some programming language. Courses will be available in the summer months for admitted applicants to refresh their knowledge or makeup for any deficiency in this knowledge.

Students without this prerequisite knowledge but otherwise possess good credentials will be given conditional admission and have to take this remedial coursework in the summer months prior to starting the program in the fall term.

Graduate Management Admission Test (GMAT) and Graduate Record Examination (GRE)

Applicants must complete the GRE or the GMAT with minimum scores in the top 75 percentile.

Program Requirements

Students must complete a total of 30 credits in order to earn the M.S. in Data Science and Business Analytics.

The "interdisciplinary core" includes 9 credits of coursework across business, computer science, and industrial engineering. On top of this integrated breadth of study covering the core areas of data science and business analytics, each student has 9 credits of "concentration" courses to give them depth in an engineering, business, or analytics area. Each student’s 6 credits of elective choices can be personalized to support their individual career goals. The final piece of the curriculum is a 6-credit applied analytics practicum, in which students will work with companies and organizations on real analytics problems.

Total Credits 30

* Elective courses (https://engineering.wayne.edu/data-analytics/curriculum/electives.php) can come from other tracks of the Data Science & Business Analytics program or from outside the program.

Engineering Management (M.S.)

The department offers two options for a Master of Science in Engineering Management (EMMP). Students should read both sections carefully to determine which program they are eligible for.

On-campus Program

The on-campus Master of Science in Engineering Management program is designed to build both technical competence and business acumen. The program builds understanding and skills critical to the support of fast-to-market strategies, which also guarantee product quality, and cost minimization. A systematic analytical framework is developed and coupled with tools for managing the engineering and technical functions within manufacturing-based companies. This cross-disciplinary program draws from the expertise of the College of Engineering and the School of Business Administration.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). The program is intended for the practicing engineer or technical leader with an undergraduate degree from an accredited
engineering program, who possesses at least two years of full-time work experience. The work experience requirement is waived for U.S. based students who are currently working full-time in an engineering type job.

**On-site Program (Automotive Supplier)**

The on-site (automotive supplier) Master of Science in Engineering Management program is limited to working professionals at organizations with a partnership agreement with the Department of Industrial and Systems Engineering. Engineers with high potential are selected by management to participate in a three-year, two-every even-week curriculum. The courses are team based, and include two years of class studies and team projects in areas such as leadership, quality management, global marketing, robust design, and information systems. The final year of the program involves a team capstone project, which provides application of the knowledge gained to a current strategy or opportunity within their organization.

**Admission Requirements**

Admission to this program is contingent upon admission to the Graduate School (p. 35) and is limited to management selected individuals from partner organizations. For more information on admission or becoming a partner organization, please contact the EMMP program chair.

**On-site Program (Automotive Supplier)**

**Plan B:** Thirty-nine credits including a six to nine credit final project. There are four core segments: engineering management, business cognate, engineering cognate, and capstone project. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

**On-campus Program**

**Plan A - Thesis**

Minimum thirty-six credits including six to eight thesis credits (IE 8999). To register for ISE thesis credits, students must submit the thesis credit registration approval form to their appropriate M.S. program chair or graduate advisor. To register for business courses, students need to talk to Gail Evans about signing up for a graduate business certificate. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135). Up to six additional credits may be earned in courses outside the Industrial and Systems Engineering Department, and require approval of the graduate advisor.

**Total Credits**: 36-42
Prospective students should contact M.S. Industrial Engineering application.

For program information or Graduate Program Coordinator Beth Madigan (https://engineering.wayne.edu/profile/bb4879/) for admissions and application concerns.

The Master of Science in Industrial Engineering is offered under the following options: Plan A (thesis option) and Plan C (coursework option).

**Plan A - Thesis**

Minimum thirty credits including six to eight thesis credits. If a thesis option (Plan A) is selected, six to eight credits of Master's Thesis Research and Direction (IE 8999) is required. Students pursuing Plan A must take nine credits of IE core courses and design an individual program of study that must be approved by both the thesis research advisor and the appropriate MS program chair or graduate advisor. To register for ISE thesis credits, students must submit the thesis credit registration approval form to their appropriate MS program chair or graduate advisor. Up to two courses (six to eight credits) may be earned in courses outside the Industrial and Systems Engineering Department, but require approval by the appropriate MS program chair or graduate advisor. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

**Note:** M.S. student pursuing IE 6991 Industrial Internship for curriculum practical training (CPT) may use a maximum of two IE 6991 credits towards the M.S in Industrial Engineering degree requirements (M.S. students may apply for more than two IE 6991 credits during their course of study but only two IE 6991 credits may count towards degree requirements).

<td>3</td>
</tr>
</tbody>
</table>

**Electives:** 13-15 credits

**Plan C - Coursework**

Minimum thirty credits of course work. Plan C requires nine credits of IE core for the general option and nine credits of IE core if a concentration is pursue. While ISE core courses provide fundamental IE knowledge, depth within a specific IE field can be acquired by completing an MS IE concentration in Lean Systems, Analytics, or Systems Engineering. Students interested in an area not among the concentrations listed should elect the general option. Up to two courses (six to eight credits) may be earned in courses outside the Industrial and Systems Engineering Department, but require approval by the appropriate MS program chair or graduate advisor. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

**Note:** M.S. student pursuing IE 6991 Industrial Internship for curriculum practical training (CPT) may use a maximum of two IE 6991 credits towards the M.S in Manufacturing Engineering degree requirements (M.S. students may apply for more than two IE 6991 credits during their course of study but only two IE 6991 credits may count towards degree requirements).

---

**Industrial Engineering (M.S.)**

The M.S. program in industrial engineering is built on a core designed to provide breadth of experience in systems modeling, analysis, and applications common in industrial engineering and operations analysis.

**Program objectives**

Graduates will be able to:

1. Integrate, model, continuously improve, control, and if necessary redesign, enterprise activities
2. Perform data analysis and optimization for enterprise decision making
3. Develop business cases for justifying process, organizational and technological projects
4. Support enterprise performance, quality, efficiency and productivity enhancement activities
5. Facilitate systems engineering and project management
6. Communicate effectively (written, verbal and presentation) across all levels in the enterprise
7. Develop an ability to grow through life long acquisition of knowledge

Students must achieve at least a 'B' (3.0) grade point average and achieve 'B' or greater in MS IE core courses. A limited number of grades below 'B' and 'B-', though unsatisfactory for graduate level work, may be applied toward a graduate degree provided they are offset by a sufficient number of higher grades to maintain a grade point average of 3.0. Unsatisfactory grades can constitute reason for dismissal from the MS IE program at the department or program's discretion.

**Admission requirements**

Admission to ISE MS programs is contingent upon admission to the Graduate School (http://wayne.edu/apply/#fndtn-graduate). The MS in Industrial Engineering requires a baccalaureate degree in engineering and an approximate 2.8 GPA or its equivalent in the upper division of their undergraduate program. Conditions to admission or prerequisites may be assigned in the admissions process. The GRE is NOT required, however, high GRE scores will be considered in application evaluation. Students with degrees in related disciplines with a strong analytical base are also considered. Applicants whose undergraduate education is deficient in prerequisites for graduate classes may be required to take background courses that will NOT count toward the 30-credit degree requirement.

Applicants can provide supplemental materials such as resume, personal statement, GRE scores, and letters of recommendation to support their application.

Prospective students should contact M.S. Industrial Engineering Program Chair Dr. Jeremy Rickli (https://engineering.wayne.edu/profile/fm9822/) for program information or Graduate Program Coordinator Beth Madigan (https://engineering.wayne.edu/profile/bb4879/) for admissions and application concerns.

### Industrial Engineering (Ph.D.)

The Doctor of Philosophy degree is conferred upon individuals who have demonstrated the ability to make original contributions to the knowledge in this field. The Ph.D. program develops experts and professionals who will continue in academic work, industry, or government. It encourages the attainment of excellence in research and scholarship necessary to catalyze the advancement of industrial engineering.

### Traditional Ph.D. Program - Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). In general, applicants are required to have a Graduate degree in engineering or a related discipline (e.g., operations research, MBA, information systems, or mathematics) with a 3.5 GPA or higher. Students with an undergraduate degree in one of these areas and a grade point average of 3.5 or above may apply for direct admission to the Ph.D. program. While such direct admissions will be rare, admission will be predicated on the specific courses and strength of the undergraduate curriculum as well as interests of faculty.

Applicants with an undergraduate major in mathematics, computer science, or the physical sciences, completed at an accredited institution, are also eligible for admission to this program, provided an evaluation concludes that the educational background includes sufficient background in analytically-oriented course work. Please visit the Doctor of Philosophy in Industrial & Systems Engineering (https://engineering.wayne.edu/industrial-systems/academics/phd/) website for more information.

### Global Executive Track Ph.D. Program - Admission Requirements

This is a unique track/curriculum designed to accommodate the busy schedule of working executives. Applicants for this cohort-based program are expected to bring ten years of experience with five years or more of significant managerial experience and management span of control, global experience, a technical B.S. Degree, and a relevant graduate degree. Admission to this program is contingent upon admission to the Graduate School (p. 35). Upon completion of the program, the candidate earns a Ph.D. in Industrial Engineering. Every year, a limited number of highly qualified, full-time working professionals are admitted for the Winter term (limited admissions in Summer or Fall terms). Please visit the Global Executive Track Ph.D. (https://engineering.wayne.edu/industrial-systems/academics/get-phd/) website for more information.
Industrial Engineering (Ph.D. Program)

The Doctor of Philosophy degree requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credits. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

The Industrial & Systems Engineering doctoral program is designed to be flexible, in order to meet the individual student's interests and to reflect the dynamic nature of the field. It is comprised of five major stages:

1. **Advisor/Program Selection:** The first stage is devoted to the selection of a faculty advisor, taking course work, and the production of a Plan of Work in consultation with the student’s faculty advisor. Students are encouraged to investigate the different areas of research available by talking with various graduate faculty members and attending research seminars held by the Department. Advisor selection should be done within the first semester of admission. The student will then begin course selection and outlining the Plan of Work. The approved Plan of Work must designate a primary area of research. The student is encouraged, in consultation with their advisor, to define his/her own primary and minor fields of interest by the selection of a cohesive grouping of available graduate courses. The Plan of Work must include at least thirty credits in course work at, or above, the 7000 level. Twenty-one of these credits must be in course work other than directed study (IE 7990).

2. **Examination:** All Ph.D. students must pass the examinations outlined below. After successful completion of the written qualifying examination, a student may be admitted to the status of doctoral candidate.
   a. **Written Qualifying Examination (Preliminary Exams):** The exams are scheduled once each year in late May. The exam includes three separate tests: 1) probability; 2) statistics and 3) operations research. The material tested by the exams is generally covered in master's level or advanced undergraduate courses. Relevant courses include BE 2100, IE 6210, and IE 6560. The math course MAT 5700 is also good preparation for the probability exam. Students must take the preliminary examination before completing three academic year semesters of work after their masters degree. Doctoral students entering the program in Fall are expected to take the exam the following winter. Students who enter in winter would take the exam, a year later in their second winter semester. A student must take all three parts of the examination. If the student passes only two of the exams, the student will be required to retake only the third exam the next time it is offered. If a student fails at least two exams, the student will have to take all three exams the next time they are offered. Once a student has taken the preliminary exam once and failed all or part of the exam, the student MUST take the exam the next time it is offered; not doing so will count as a second failed attempt. Students will have two chances to pass the entire preliminary examination. If all or parts of the exam are not passed by the second attempt, the student will be asked to leave the doctoral program.
   b. **Oral Qualifying Examination (Proposal Defense):** This examination shall be a presentation of the student’s proposal for dissertation research, and will be administered by the student’s Doctoral Dissertation Committee. The Oral Examination must be satisfactorily completed at least twelve months prior to the Dissertation Defense. After completion of the written qualifying exam, the student will continue to develop the dissertation prospectus, a document that provides evidence that the prospective doctoral candidate has completed adequate preliminary research on the topic of the proposed doctoral dissertation. The principles for determining the scope of the prospectus are detailed in the Doctoral Dissertation Outline and Record of Approval form (http://wayne.edu/gradschool/).

3. **Dissertation Committee Formation:** With the approval of the Department Doctoral Committee, the student establishes a Dissertation Committee that consists of four members. If there are co-chairs, the committee will consist of five members. At least two committee members are from the student's home department, Industrial & Systems Engineering. The Chairperson and one additional member must hold a Regular Graduate Faculty appointment in the Department of Industrial & Systems Engineering. The committee will also include an external member from outside the department. This Committee is responsible for administering the prospectus and the dissertation defense of the candidate.

4. **Candidacy:** Candidacy is reached after the Plan of Work has been approved, the written qualifying examination has been passed, approximately fifty credits in course work have been completed, and the dissertation committee has been formed. Upon completion of these requirements, a Recommendation for Doctor of Philosophy Candidacy Status form is submitted to the Graduate School in order to advance the Ph.D. applicant to Candidate Status.

5. **Dissertation requirements are satisfied by the successful completion of thirty credits of dissertation research. The thirty credit dissertation registration requirement is fulfilled by registering for the courses IE 9991, IE 9992, IE 9993, and IE 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. All Ph.D. students must pass the written qualifying examination and apply for doctoral candidacy before election of dissertation credits. All Ph.D. students must register for dissertation credits or candidacy maintenance status (IE 9995) for any semester in which they utilize campus facilities or consult with faculty, even though they may not be enrolled in a formal lecture course. The dissertation defense will be publicized by public notice to the academic community; at this session the candidate presents his/her doctoral research for final approval by the Doctoral Dissertation Committee. A minimum of one first author peer reviewed journal publication is required before defending the Doctoral Dissertation. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135). Students should consult the Graduate School's regulations governing doctoral study.

**Required Courses** (must pass at least two)

**Global Executive Track PhD Program**

The Global Executive Track (GET) PhD Program follows the same requirements as the traditional PhD Program as detailed above. The only differences between these two tracks is they have an alternative option for completing the Written Qualifying Examination and different core courses that are required.

**Written Qualifying Examination - Global Executive Track Program Option**

To enhance writing skills and provide the learning partners with the opportunity to contribute to the body of teaching knowledge in industrial and systems engineering, each Executive Track cohort will draw on their years of relevant experience to develop and defend two (2) original Teaching Case Studies throughout the program. Successful development
Manufacturing Engineering (M.S.)

The M.S. degree program in manufacturing engineering is built on a core designed to provide a firm foundation in the various elements of manufacturing and systems engineering. Building on this preparation, the student constructs a concentration in one of five areas.

Program Objectives

Graduates will be able to:

1. Understand and integrate the design, test and build product life cycle
2. Model, analyze and control design and production activities
3. Understand the impact of quality, cost and timeliness metrics on manufacturing performance
4. Demonstrate a basic understanding of manufacturing processes and technologies
5. Perform data analysis and optimization for decision making
6. Develop business cases for justifying process, organizational and technological projects
7. Support for systems engineering and project management
8. Communicate effectively (written, verbal and presentation) across all levels in the enterprise
9. Develop an ability to grow through life long acquisition of knowledge

Students must achieve at least a ‘B’ (3.0) grade point average and achieve ‘B’ or greater in MS ME core courses. A limited number of grades below ‘B’ and ‘B’-, though unsatisfactory for graduate level work, may be applied toward a graduate degree provided they are offset by a sufficient number of higher grades to maintain a grade point average of 3.0. Unsatisfactory grades can constitute reason for dismissal from the MS ME program at the department or program’s discretion.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Applicants with a baccalaureate degree in engineering from an institution accredited by the Accreditation Board for Engineering and Technology (ABET) and who have earned a grade point average of at least 2.8 in the upper division of their undergraduate program are eligible for admission. GRE Exam is not required for applicants. However, a high GRE score will be considered as an incentive for the evaluation process. Additionally, applicants with an undergraduate degree in mathematics, physics, computer science, or another discipline with a strong analytical base may be considered for admission.

Applicants whose undergraduate education is deficient in prerequisites for graduate classes may be required to take background courses that will NOT count toward the 30-credit degree requirement.

Applicants can provide supplemental materials such as resume, personal statement, GRE scores, and letters of recommendation to support their application.

Prospective students should contact M.S. Manufacturing Engineering Program Chair, Dr. Kyoung-Yun Kim (https://engineering.wayne.edu/profile/ay4142/), for program information or Graduate Program Coordinator, Beth Madigan (https://engineering.wayne.edu/profile/bb4879/), for admissions and application concerns.

The Master of Science in Manufacturing Engineering is offered under the following options: Plan A (thesis option) and Plan C (coursework option).

Plan A - Thesis

Requires a minimum of thirty credits including six to eight thesis credits. If a thesis option (Plan A) is selected, six to eight credits of Master’s Thesis Research and Direction (IE 8999) is required. Student pursuing Plan A must take nine credits of IE core courses and design an individual program of study that must be approved by both the thesis research advisor and the appropriate M.S. program chair or graduate advisor. To register for ISE thesis credits, students must submit the thesis credit registration approval form to their appropriate M.S. program chair or graduate advisor. Up to two courses (six to eight credits) may be earned in courses outside the Industrial and Systems Engineering Department, but require approval by the appropriate M.S. program chair or graduate advisor. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

Note: M.S. student pursuing IE 6991Industrial Internship for curriculum practical training (CPT) may use a maximum of two IE 6991 credits towards the M.S in Manufacturing Engineering degree requirements (M.S. students may apply for more than two IE 6991 credits during their course of study but only two IE 6991 credits may count towards degree requirements).

Electives 13-15

Total Credits 30

Plan C - Coursework

Requires a minimum of thirty credits of course work. Plan C requires nine credits of IE core for the general option and nine credits of IE core if a concentration is pursue. While ISE core courses provide fundamental IE knowledge, depth within a specific IE field can be acquired by completing a M.S. in Manufacturing Engineering concentration in Advanced Manufacturing Systems, Quality Engineering, or SMART Manufacturing Systems. Students interested in an area not among the concentrations listed should elect the general option. Up to two courses (six to eight credits) may be earned in courses outside the Industrial and Systems Engineering Department, but require approval by the appropriate M.S.
program chair or graduate advisor. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

**Note:** M.S. student pursuing IE 6991 Industrial Internship for curriculum practical training (CPT) may use a maximum of two IE 6991 credits towards the M.S in Manufacturing Engineering degree requirements (M.S. students may apply for more than two IE 6991 credits during their course of study but only two IE 6991 credits may count towards degree requirements).

### Systems Engineering (Bridge Graduate Certificate)

This program is designed for technical professionals with work experience and a degree in engineering. The program consists of twelve credits of coursework scheduled for completion by working engineers in two years. The certificate can serve as a bridge to the M.S. degree in Engineering Management or Industrial Engineering.

### Admission Requirements

Applicants must meet the requirements for admission to the Graduate School (p. 35), and either the M.S. program in Industrial Engineering (p. 157) or Engineering Management (p. 157). They must hold a baccalaureate degree in engineering from an institution accredited by the Accreditation Board for Engineering and Technology (ABET). In addition, they must have earned a grade point average of at least 2.8 in the upper division of their undergraduate program or have at least three years of full-time engineering work experience. International students are required to complete the GRE exam.

Students must complete fifteen credits consisting of one required foundation course in systems engineering; two core courses in systems engineering, one elective course, and a required capstone course.

As a bridge certificate, students may later apply all certificate credits toward Master’s degree requirements in Engineering Management or Industrial Engineering, provided any such credits have been earned with a minimum “B” grade and are within the six years time limit for completing the Master’s degree.

### Graduation Requirements

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135). Students may enroll on a full-time or part-time basis but must complete requirements within three years of admission.

Mechanical Engineering

Office: 2100 W. Engineering Building; 313-577-3843; Fax: 313-577-8789
Chairperson: Nabil G. Chalhoub
Director ME Graduate Studies: Ming-Chia Lai
http://engineering.wayne.edu/me/

The opportunities and challenges in the field of mechanical engineering are diverse and virtually unlimited. The broad variety of career possibilities includes research and development, design analysis and synthesis, manufacturing and production engineering, testing, sales, engineering, maintenance and administration. The challenge of a mechanical engineer may lie in the perfection and reliability of a device that will be duplicated a million-fold or in the control optimization of a single complex system of unique design. The mechanical engineering curriculum is designed to prepare graduate students in many applied fields, including such important areas as biomechanics, energy conversion, combustion engines, emissions controls, machine tool design, manufacturing, computer graphics, structural analysis, automatic controls, vehicle dynamics and design, continuum mechanics, fluid dynamics, environmental design, mechanisms, acoustics and noise control, laser diagnostics, and composite materials. Faculty members in the Department are currently engaged in state-of-the-art research in all of these areas. Specialized areas of research support for graduate students include: manufacturing processes, composite material behavior, combustion, acoustics and noise control, vibrations, laser diagnostics, biomechanics, control of mechanical systems, sheet metal stamping, and engine research.

Part-time study (with most courses offered in the evening) and cooperative programs allow professionals working in local industry to pursue graduate degrees while employed.

- Mechanical Engineering (M.S.) (p. 165)
- Mechanical Engineering (Ph.D.) (p. 168)

Mechanical Engineering (M.S.)

Program specializations at the master's degree level may be undertaken in many areas, including acoustics, vibrations, machine tool design, biomechanics, combustion engines, controls, composite materials, and fluid and solid mechanics, among others. These program specializations are available to both part-time and full-time students, in either research or non-research degree programs.

Admission Requirements

Applicants must apply for admission online. The applicant must have a bachelor's degree from an ABET accredited institution in the United States or a comparable degree from an officially recognized institution outside the United States to apply for graduate admission. He/she must have adequate preparation and discernible ability to pursue graduate study in the selected major field.

All applicants for the master's program, whose B.S. degree is not from an ABET-accredited university, are required to submit Graduate Record Examination (GRE [http://www.ets.org/gre/]) scores. International applicants are required to submit a WES Evaluation (http://wayne.edu/admissions/graduate/international/) for their transcripts. Note that the official transcript evaluation must be transmitted directly from WES to the Office of Graduate Admissions. Along with the application, the applicant must upload an official transcript from every college and/or university attended. All students who have earned degrees from a country where English is not the native language must have a minimum score of 79 on
the internet-based TOEFL (iBT) or 550 from a paper-based TOEFL (pBT) or IELTS score of 6.5.

To be admitted into the Mechanical Engineering graduate programs, an applicant must satisfy all Graduate School requirements (https://wayne.edu/admissions/graduate/admission-requirements/). In addition, a regular admission for Master’s degree may be authorized if the applicant’s grade point average (g.p.a) is 3.0/4.0 or better and if they hold a degree from an ABET accredited or equivalent institution. Students with an overall g.p.a. between 2.8 and 3.0 out of 4.0 in their B.S.M.E. degree program will be considered on a case-by-case basis.

Students with degrees in fields other than Mechanical Engineering or degrees from non-accredited institutions may be admitted to the post-bachelor program where students will be expected to complete a set of assigned courses with a grade of B or better in each course. The set of assigned courses will be selected from the following list of courses based on the student’s field of interest:

A successful completion of all post-bachelor program requirements will earn the student a regular admission to the Master’s degree program in Mechanical Engineering.

All applicants must pay the $50 Application Fee. Note that your application will not be assessed until all necessary items are submitted via our online application. For questions about your application or requirements, please contact the Graduate Program Coordinator Ms. Carly Braxton at (313) 577-0409 or carly.braxton@wayne.edu and include your Access ID or Application ID. For additional questions, please contact Professor and Chair Dr. Nabil Chalhoub at nchalhoub@eng.wayne.edu or b9714@wayne.edu.

Program Requirements

The master’s degree in mechanical engineering is offered under the following options:

**Plan A (Thesis Option):** A minimum of thirty-two credits in course work including an eight-credit thesis.

This program requires a minimum of 32 semester credits that can be selected as follows

- ME 8999 - MS Thesis (8 Cr.)
- A minimum of 8 credits (2 courses) should be taken at the 7000-level. At least 4 credits should be selected from the ME curriculum. Directed study and directed research courses (ME 7990 and ME 7996) cannot be used to satisfy this requirement.
- ME 5000 - Engineering Analysis I (4 Cr.) is a required core course
- A maximum of 8 credits may be taken from other Departments in Engineering (excluding Engineering Technology), Chemistry, Physics or Mathematics Departments
- A maximum of 4 credits may be taken in Directed Studies (ME 5990)
- A minimum of 4 courses (16 Cr.) should be taken from one of the three thrust areas of the ME Department

**Plan C (Coursework Option):** A minimum of thirty-two credits in course work.

This program requires a minimum of 32 semester credits that can be selected as follows

- A minimum of 12 credits should be taken at the 7000-level. At least 8 credits should be selected from the ME curriculum. Directed study and directed research courses (ME 7990 and ME 7996) cannot be used to satisfy this requirement.
- ME 5000 - Engineering Analysis I (4 Cr.) is a required core course
- A maximum of 8 credits may be taken from other Departments in Engineering (excluding Engineering Technology), Chemistry, Physics or Mathematics Departments
- A maximum of 4 credits may be taken in Directed Studies (ME 5990)
- A minimum of 4 courses (16 Cr.) should be taken from one of the three thrust areas of the ME Department

Students can choose up to three semesters of internship with the permission of both the ME Graduate Advisor and the Office of International Students and Scholars (OISS). ME 6991 credits must be taken in addition to the minimum 32 credits required for the MSME under either plan A or plan C. The student is responsible for arranging the internship in the industry. Students are eligible to enroll in ME 6991 after successfully completing 16 credits in their graduate program.

Course Group Requirements

The Department of Mechanical Engineering has three research thrust areas, namely the “Noise and Vibration Control”, the “Advanced Materials and Manufacturing”, and the “Advanced Propulsion and Energy Systems”. In addition, many Biomedical Engineering courses are cross listed with ME courses and are available for ME Graduate students to take and be considered towards their degree. Graduate students must select a field of study in one of the three thrust areas of the ME Department.

All MSME students must select at least four courses from one of the three thrust areas listed above. The core course (ME 5000) is considered to be one of the four courses required from the selected thrust area.

**Noise and Vibration Control Thrust Area**

Courses offered in the *Noise and Vibration Control* Thrust area are:

Student Performance Requirements

- A grade of B or better must be earned for the core course ME 5000 – Engineering Analysis I.
- The Graduate GPA will be calculated using all graduate courses taken at Wayne State University. It must always be maintained at 3.0/4.0 or better; otherwise, the student will be placed under academic probation.
- Students on academic probation have one semester to raise their GPA to at least 3.0/4.0. Failure to do so will result in the student being excluded from the ME graduate program.

The overall GPA for completing MSME Degree is 3.0/4.0 or higher (i.e., “B” grade or better) with no more than two courses with grades less than C and no more than two courses can be repeated throughout the MSME program. A passing grade for any course is “B-” or better with the exception of the core course (ME 5000, which must be passed with a grade of “B”). Thesis credit requirements are met by satisfactory completion of ME 8999. Note that three “C+” or lower grades will result in termination of the student from the ME graduate program. All course work must be completed in accordance with the regulations of the Graduate School and the College governing graduate scholarship and degrees.

Graduate students may register for a maximum of 8 credits per semester unless they have permission from the ME Director of Graduate Studies.

The overall GPA for completing MSME Degree is 3.0/4.0 or higher (i.e., “B” grade or better) with no more than two courses with grades less than C and no more than two courses can be repeated throughout the MSME program. A passing grade for any course is “B-” or better with the exception of the core course (ME 5000, which must be passed with a grade of “B”). Thesis credit requirements are met by satisfactory completion of ME 8999. Note that three “C+” or lower grades will result in termination of the student from the ME graduate program. All course work must be completed in accordance with the regulations of the Graduate School and the College governing graduate scholarship and degrees.

M.S. Thesis
The Master’s Thesis Committee will consist of three graduate faculty members from the Department of Mechanical Engineering, including the advisor. Upon approval by the ME Director of Graduate Studies, one graduate faculty member of the Department of Mechanical Engineering may be replaced by a member from another department.

The Master’s Thesis Committee will administer the final oral examination. A public final oral examination based on the M.S. thesis is required. The examination will be administered by the advisor and two other graduate faculty members from the Department of Mechanical Engineering. One member of the thesis committee may be replaced by a non-ME graduate faculty member, if the thesis topic is multi-disciplinary, with the approval of the ME Director of Graduate Studies. Passing of the examination requires a majority vote of the committee.

Time Limitations
Students have a six-year time limit to complete all requirements for the Master’s degree. The six-year period starts at the beginning of the semester during which the student has taken work that applies toward meeting the requirements of the degree. The College of Engineering reserves the right of re-valuation of over-age credits. In re-
Admission Requirements

Applicants must apply for admission to the Ph.D. program online. Along with the application, the applicant must upload an official transcript from every college and/or university attended. All students who have earned degrees from a country where English is not the native language must have a minimum score of 79 on the internet-based TOEFL (iBT) or 550 from a paper-based TOEFL (pBT) or IELTS score of 6.5. Deadline dates for filing an Application for Admission are published by the Office of Graduate Admission (http://www.gradschool.wayne.edu/).

Doctoral applicants must present higher entrance qualifications than those required of master’s degree applicants. To be admitted into the ME Ph.D. program, an applicant must satisfy all Graduate School requirements (https://wayne.edu/admissions/graduate/admission-requirements/). The applicant must have a grade point average (g.p.a.) of at least 3.5/4.0 in a master’s degree program in mechanical engineering (M.S.M.E.) and must have completed a bachelor’s degree from an ABET accredited institution in the United States or a comparable degree from an officially recognized institution outside the United States. The applicant must have adequate preparation and discernible ability to pursue graduate study in the major field he/she elects.

Applications to the Ph.D. program can also be submitted by students who have completed a bachelor’s degree from an ABET accredited institution in the United States or a comparable degree from an officially recognized institution outside the United States with a g.p.a. of at least 3.6/4.0. Students with an undergraduate g.p.a. less than 3.6/4.0 must complete a master’s degree in mechanical engineering prior to consideration for admission to the Ph.D. program.

Admission to the Ph.D. program is contingent upon satisfying the following requirements:

• All students must have a M.S. in Mechanical Engineering or a very similar field. Applicants without a M.S. in Mechanical Engineering are considered on a case-by-case basis.

Course Requirements

A minimum of ninety credits beyond the baccalaureate degree must be earned in the Ph.D. program. These credits are distributed in the following way:

1. Thirty credits dissertation requirements are fulfilled by successfully completing ME 9991, ME 9992, ME 9993, and ME 9994 (Doctoral Candidate Status: Dissertation Research and Direction I, II, III, and IV, respectively). All Ph.D. students must have achieved the status of doctoral candidate before they will be allowed to register for dissertation credits. They are required to register for thesis or dissertation credits in 4 consecutive academic year semesters without any interruption (7.5 credits per semester). If a student has registered for all Doctoral Dissertation Research credits but has not completed dissertation requirements then he/she may register in ME 9995 - Candidate Maintenance Status until the requirements are completed, the time limit for degree is reached, or the student withdraws from the program.

2. A minimum of 30 credits must be earned in formal lecture credits.

3. At least 30 credits of course work beyond the Bachelor’s degree must be in courses open only to graduate students (i.e., courses at 7000-level or higher).

4. At least half of all course work exclusive of dissertation credits must be earned in the Mechanical Engineering Department.

5. All Ph.D. students are required to take the following core course:

   • ME 5000 – Engineering Analysis I

6. All Ph.D. students are required to select a minor field and complete at least 6 credit hours in courses numbered 5000 or above in the selected field.

7. A maximum of 30 credits may be earned in Special Topics courses.

8. A maximum of 8 credits may be earned in ME 7990 - Directed Study.

9. A maximum of 8 credits may be earned in ME 7996 - Research.

10. All course work must be completed in accordance with the regulations of the Graduate School and the College governing graduate scholarship and degrees.

Note:

• A grade of B or better must be earned in all ME courses.

• A grade of B- or better must be earned in all non-ME courses (Minor).

• The Graduate GPA will be calculated using all graduate courses taken at Wayne State University.
The Mechanical Engineering Department has three research thrust areas, namely the "Noise and Vibration Control", the "Advanced Materials and Manufacturing", and the "Advanced Propulsion and Energy Systems". In addition, many Biomedical Engineering courses are cross listed with ME courses and are available for ME graduate students to take and be considered towards their degree. Graduate students must select a field of study in one of the three thrust areas of the ME Department.

Dissertation Committee

At the time the doctoral plan of work is being prepared, the Doctoral Committee which serves as both the Final Qualifying Examination Committee and the Dissertation Committee for each Ph.D. student should be formed. The permanent advisor of the student will serve as chairman of the Doctoral Committee. The Committee will be made up of at least three graduate faculty members from Mechanical Engineering and one graduate faculty member from outside the department. The other members will be selected by the student's permanent advisor subject to approval by the ME Director of Graduate Studies and the Office for Graduate Studies. The Doctoral Committee will administer the Final Written and Oral Qualifying Examinations and the Dissertation Public Lecture Presentation-Defense. Upon approval by the ME Director of Graduate Studies and the Graduate School Ph.D. Office, a graduate faculty member of the Mechanical Engineering Department may be replaced by a member from another department as long as the committee meets the minimum Graduate School requirement.

A "Doctoral Dissertation Outline" form, approved by all members of the Doctoral Committee and the Director of Graduate Studies, should be filed with the Graduate School PhD office at or near the beginning of the student's dissertation work.

Ph.D. Candidacy Requirements

An approved Ph.D. Plan of Work must be filed with the Office for Graduate Studies within one semester after passing the preliminary qualifying examination (PQE). A student must have completed 50 graduate credits that count toward the Ph.D. program, formed a Ph.D. committee and submitted a "Recommendation for Candidacy" form to the Graduate School. Changes in the Plan of Work must be approved by the advisor and the ME Director of Graduate Studies.

Requirements For All Ph.D. Students

- **Preliminary Qualifying Examination**: This is a three-part written examination administered twice per year by the ME Graduate Program Committee during the first week of the months of October and February. All Ph.D. applicants must pass this examination within their first year after joining the Ph.D. program at WSU. Students must fill out the "PQE Registration Form" that can be downloaded from the ME web site and submit it to the ME Graduate Program Director or at the ME front desk no later than one week prior to the exam date.

- **Final Qualifying Examination**: This examination consists of written and oral parts covering the student's major and minor areas and other related fields. The oral part of the examination shall include a presentation of the proposal for the dissertation research. The Final Qualifying Examination is administered by the student's Doctoral Committee.

- Under ordinary circumstances, the committee members may not be changed before the Qualifying Examination (written and oral) have been passed. Under extraordinary circumstances the Office for Graduate Studies may approve a committee change, but such change shall require written justification and approval in advance of the examination.

- If the student fails the final qualifying examination, he/she must be re-examined before the end of the semester that follows the one in which the failure occurred. The student is allowed only one re-examination. Successive failure of the examination will result in dismissal.

- The student passes the final qualifying examination upon the recommendation of his/her Ph.D. Committee with no more than one dissenting vote.

- An approved Plan of Work should be filed with the Office for Graduate Studies. The Plan of Work form can be downloaded from the Graduate School web site at https://gradschool.wayne.edu/phd/forms/https://gradschool.wayne.edu/phd/forms/.

- A Doctoral Dissertation Outline, approved by all members of the Doctoral Committee and the Departmental Graduate Program Committee, should be filed by the student immediately after completing the oral part of the Final Qualifying Examination.

- The Conflict of Interest Form must be turned in twice, once with the Prospectus and again with the pre-defense paperwork (Final Report Form). The Conflict of Interest Form can be downloaded from the Graduate School web site at https://gradschool.wayne.edu/phd/forms/https://gradschool.wayne.edu/phd/forms/.

- The Safe Assign form must be turned in three weeks prior to the Dissertation Defense.

- Pre-Defense Presentation: At least four weeks before the planned Dissertation Public Lecture Presentation-Defense, the student will present a preliminary dissertation defense lecture to the members of his/her Ph.D. Committee, who will provide a feedback to the student within two weeks for the purpose of incorporating any changes/corrections in the thesis.

- Before graduation, each Ph.D. student is expected to have one journal paper accepted.

- Dissertation Public Lecture Presentation-Defense: The dissertation format and appearance must be approved by the Office for Graduate Studies before the Dissertation Public Lecture Presentation-Defense is to be arranged. Additionally, each committee member must have certified, in writing (using the Dissertation Public Lecture Presentation-Defense form), that the dissertation has been read and approved for a Public Lecture Presentation-Defense.

  - The final lecture is to be publicized by public notice to the academic community. This responsibility rests with the student’s advisor. At the final lecture, the candidate will outline his/her methodology, research and the results of the investigation. Members of the committee will lead the discussion following the presentation.

  - At the conclusion of the oral defense of the dissertation, the Graduate Examiner shall poll the Dissertation Committee and report in writing to the Office for Graduate Studies. The Graduate Examiner is the presiding officer at the Defense and is responsible for its conduct. The role of the Graduate Examiner may be assumed by the dissertation advisor or an external member of the committee.

  - For additional information, students should consult the Graduate School's regulations (p.) governing doctoral study.
**Time Limitations**

Students have a seven-year time limit to complete all requirements of the Ph.D. degree. The seven-year period starts at the beginning of the semester during which the student was admitted to doctoral study and was working toward fulfilling the requirements of the degree. Up to thirty-two graduate credit hours with a grade B or better earned prior to the student’s admission as a doctoral applicant may be applied toward the degree without regard to lapse of time. Credits earned beyond these thirty-two semester hours will not be counted towards the Ph.D. degree at the time of admission to the Ph.D. program. Credits earned after acceptance as a Ph.D. applicant may not be over seven years old at the time the degree is conferred, except when, on the recommendation of the advisor, up to ten semester hours of credit previously earned at Wayne State University may be specified for revalidation by examination. In the event that any courses have been previously revalidated in connection with the earning of the Master’s degree, these shall be counted as a part of the total ten. Time extensions beyond these limitations can only be approved by the Graduate School on a yearly basis. The extension requests should reflect conditions that are clearly beyond the student’s control.

**Graduation**

Each degree candidate must file an Application for Degree at the beginning of the semester in which he/she plans to complete degree requirements at [https://reg.wayne.edu/students/degrees](https://reg.wayne.edu/students/degrees). The candidate should consult the academic calendar of the Graduate Division Bulletin. If an application for a degree was filed for a previous semester in which the student did not graduate, a new application is necessary. The student must be registered in the semester he/she plans to graduate.

---

**Programs Offered by the College of Engineering**

**Alternative Energy Technology**

The Alternative Energy Technology (AET) programs are interdisciplinary, involving faculty from the Departments of Chemical Engineering and Materials Science, Civil and Environmental Engineering, Electrical and Computer Engineering, Industrial and Systems Engineering, and Mechanical Engineering. These programs were established in 2005, and developed in close cooperation with governmental agencies, industry, and Next-Energy. The mission of the AET program is to educate and prepare the technical and scientific workforce for emerging alternative energy technologies; to promote and mobilize/align available resources to develop interdisciplinary research programs; and to disseminate technical information and raise public awareness on emerging AETs.

Programs offered:

- Alternative Energy (M.S.) (p. 172)
- Alternative Energy Technology (Graduate Certificate) (p. 172)

**Electric-drive Vehicle Engineering**

The Electric-drive Vehicle Engineering (EVE) programs are interdisciplinary, involving faculty from the Departments of Chemical Engineering and Materials Science, Electrical and Computer Engineering, Industrial and Systems Engineering, and Mechanical Engineering. These programs were established in 2009, and developed in close cooperation with governmental agencies, industry, and the U.S. Department of Energy. The mission of the EVE program is to educate and prepare the technical and scientific workforce for the emerging electric-drive vehicle industry; to promote and mobilize/align available resources to develop interdisciplinary research programs; and to disseminate technical information and raise public awareness on the emerging electric-drive vehicle technology.

Programs offered:

- Electric-drive Vehicle Engineering (M.S.) (p. 172)
- Electric-drive Vehicle Engineering (Graduate Certificate) (p. 172)

**Mobility**

People require mobility, because it empowers them to conquer the distance that separates their homes from the locations where they study, work, shop, seek medical treatment, do business, or visit friends. In the meanwhile, Wayne State University is demonstrating a commitment to improve quality of life for individuals and communities through excellence in mobility-related research, teaching, and service. This certificate program is the first of its kind in Michigan, focusing on mechanisms known as mobility, which is the ability to meet the needs of society to move freely, gain access, communicate, commute, and establish connectivity with the advanced mobility technologies today or in the future.

Programs offered:

- Mobility (Graduate Certificate) (p. 173)

**Sustainable Engineering**

Students will learn the fundamentals of sustainable engineering, extend their knowledge in the application of sustainable engineering principles, and maintain their technical competitiveness by broadening their sustainability expertise.
Alternative Energy Technology (Graduate Certificate)

This program is designed to prepare the scientific and technological workforce for the emerging alternative energy technologies. It offers an efficient way to obtain a certified level of training, especially for working engineers and researchers. It may be taken as a free-standing program or concurrently with a master’s degree program.

Admission to this program is contingent upon admission to the Graduate School (p. 35). The program will be open to students with a Bachelor’s degree in engineering, chemistry, and physics, and in other mathematics-based sciences in exceptional cases.

The Alternative Energy Technology Graduate Certificate requires a minimum of twelve credits. The core course, AET 5120, is required, and a maximum of four credits is allowed in Research or Directed Studies. Certification procedures in place in WSU’s Graduate School will be followed and students must earn a cumulative g.p.a. of at least a 3.0. Should a student become interested later in pursuing the master’s degree after completing the graduate certificate, up to nine of the twelve certificate credits can be transferred toward the master’s degree. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

Alternative Energy Technology (M.S.)

The Master of Science program is open to students with a bachelor’s degree in engineering, and in other mathematics-based sciences in exceptional cases. Admission to this program is contingent upon admission to the Graduate School (p. 35). Grade Point Average for regular admission to M.S. Degree Program is 3.0 or above. Qualified admission is possible for applicants with a grade point average of 2.5 - 3.0 if the applicant has significant professional experience. No other specific admission requirements are needed, however, letters of recommendation, statement of objectives, and Graduate Record Examination (GRE) scores are encouraged to aid the admission evaluation process.

This Master of Science degree is offered under the following options:

**Plan A:** Thirty-two credits, including an eight-credit thesis.

**Plan C:** Thirty-two credits of course work in an approved AET Plan of Work.

Requirements for both options include at least twenty-four credits in Alternative Energy Technology courses and at least eight credits of 7000-level course work. The 7000-level course requirements can be satisfied through directed study, directed research, or thesis credits or approved classes from other engineering departments. Both options require two core courses: AET 5110 and AET 5120. Students pursuing Plan A are excluded from Research (AET 8996) and Directed Study (AET 7990) credits. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

Electric-drive Vehicle Engineering (Graduate Certificate)

This program is designed to prepare the scientific and technological workforce for the emerging electric-drive vehicle engineering field. It offers an efficient way to obtain a certified level of training, especially for working engineers and researchers. It may be taken as a freestanding program or concurrently with a master’s degree program.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). The program will be open to students with a Bachelor’s degree in engineering, chemistry, and physics, and in other mathematics-based sciences in exceptional cases.

Program Requirements

The Electric-drive Vehicle Engineering Graduate Certificate will require a minimum of twelve credits. The core course EVE 5110 is required, and a maximum of four credits is allowed in Research or Directed Studies. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135). Should a student become interested later in pursuing the proposed master’s degree after completing the graduate certificate, eight of the twelve certificate credits can be transferred toward the master’s degree.

Electric-drive Vehicle Engineering (M.S.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35) for requirements. Additionally, the Grade Point Average required for regular admission to M.S. degree program is 3.0 or above. Qualified admission (2.5 - 3.0) is possible if an applicant has significant relevant professional experience. The program will admit students with Bachelor’s degrees or the equivalent in engineering from an accredited college or university. Students with mathematics-based science degrees will be considered for admission on a case-by-case basis. No other specific admission requirements are needed, however, letters of recommendation, a statement of objectives, and Graduate Record Examination (GRE) scores are encouraged to aid the admission evaluation process.

Program Requirements

A minimum grade point average of 3.00 is required for the M.S. in Electric-drive Vehicle Engineering. A maximum of one course in which a “C” has been received may be used to meet graduation requirements, provided the “C” is offset by equivalent credits of “A” to maintain the required 3.00 average.

This Master of Science degree is offered under the following options:

**Plan A:** Thirty credits, including a six-credit thesis.

**Plan C:** Thirty credits of course work in an approved EVE Plan of Work.

Both options require at least twelve credits of any Electric-drive Vehicle Engineering (EVE) courses, including two core courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EVE 5110 or EVE 5115</td>
<td>Fundamentals of Electric-drive Vehicle Engineering or Modeling</td>
<td>3</td>
</tr>
<tr>
<td>EVE 5120</td>
<td>Fundamentals of Battery Systems for Electric and Hybrid Vehicles</td>
<td>4</td>
</tr>
</tbody>
</table>

Requirements for both options include at least six credits of 7000-level or higher course work. The 7000-level or higher course requirements can be satisfied through EVE courses, directed studies (EVE 7990), industry internship (EVE 7991), or thesis credits (EVE 8999) of EVE-
related projects, or approved 7000-level or higher classes from other departments in the College of Engineering.

The elective eighteen credits can be from other departments in the College of Engineering, such as:

<table>

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

**Mobility (Graduate Certificate)**

People require mobility, because it empowers them to conquer the distance that separates their homes from the locations where they study, work, shop, seek medical treatment, do business, or visit friends. In the meanwhile, Wayne State University is demonstrating a commitment to improve quality of life for individuals and communities through excellence in mobility-related research, teaching, and service. This certificate program is the first of its kind in Michigan, focusing on mechanisms known as mobility, which is the ability to meet the needs of society to move freely, gain access, communicate, commute, and establish connectivity with the advanced mobility technologies today or in the future.

**Admission Requirements**

Admission to this program is contingent upon admission to the Graduate School (http://bulletins.wayne.edu/graduate/general-information/admission/). A student needs to hold a bachelor's degree in a discipline of engineering from an accredited institution. The program is also open to students who are currently enrolled in a graduate degree program in the College of Engineering at Wayne State University.

**Program Requirements**

Students must complete CSC 5280/ECE 5280: Introduction to Cyber-Physical Systems (CPS) or CSC 5100: Introduction to Mobility as well as two-intermediate-level courses and one advanced course in one of the Mobility tracks: Sensing, Computer and Networking, Control and Robotics, Smart Transportation, Smart Grid, Connected Autonomous Vehicles, or Smart Health.

A maximum of nine credits taken in the Mobility Graduate Certificate Program may be applied toward a graduate degree subject to approval of the relevant academic unit and Graduate Office. All requirements must be completed within three years with a minimum 3.0 GPA required in the certificate coursework. All course work must be completed in accordance with the regulations of the Graduate School (http://bulletins.wayne.edu/graduate/general-information/academic-regulations/) and the College of Engineering (http://bulletins.wayne.edu/graduate/college-engineering/academic-regulations/).

### Sustainable Engineering (Graduate Certificate)

Admission to this program is contingent upon admission to the Graduate School (p. 35). Students currently enrolled in a graduate program in the College of Engineering, or students who have already completed a Bachelor’s degree in engineering can be admitted to the program. Admission into the graduate program requires a minimum grade point average of 3.0.

Students must complete a minimum of twelve credits of sustainable engineering courses. A maximum of eight credits may be counted towards both this certificate program and a related M.S. or Ph.D. program. All requirements must be completed within three years with a minimum 3.0 g.p.a. required in the certificate coursework. All course work
must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Engineering (p. 135).

College of Fine, Performing and Communication Arts

Dean: Matthew Seeger

The College of Fine, Performing and Communication Arts at Wayne State University provides the highest quality education for practitioners, scholars and consumers in art, art history, communication, dance, music and theatre. This education leads to careers, uses for the arts in other disciplines, enhanced critical abilities, the enrichment of everyday life and the building of new generations of artists, professionals and scholars. Programs of study focus on the integration of theory and practice through the creation, discovery, preservation and transmission of knowledge in fine, performing and communication arts.

The College serves the University and the larger community by creating partnerships that emphasize its own rich, diverse curriculum, interdisciplinary studies, reciprocal professional interaction and outreach activities appropriate to each area of work. Special emphasis is placed on forging alliances with local, state and national constituencies such that the College is both a leader and a resource providing expertise, information and guidance.

Within an appropriate and attractive academic environment the College promotes an atmosphere conducive to intellectual and artistic growth, risk-taking and personal and professional development at all levels in both individual and collaborative endeavors. This environment also assists the College in its role as a national center for creative, research and teaching excellence.

As the cultural gateway of the University, the College provides public events and curricular offerings that nurture creative development, enrich aesthetic values and sensitivity, heighten awareness of the arts experience and reflect the disciplinary diversity of its areas of study. Cultural, racial, ethnic and gender diversity is an important commitment in public events and educational efforts.

Ultimately, the mission of the College is the integration of theory and practice through the creation, discovery, preservation and transmission of knowledge in the fine, performing and communication arts.

**Campus Resources:** Traditional courses of study are augmented by a variety of performance and presentation resources considered integral to many of the creative programs. Included in these are the Hilberry Repertory Theatre, the Symphonic Band and University Orchestra, plus exhibitions in the Elaine L. Jacob Gallery, which features national and international artists and designers, and the Art Department Gallery, all of which usually feature work created by students, faculty, and alumni. These are only a few of the campus resources that are especially important for majors in the College. A more comprehensive listing can be found under each of the specific departments.

**Detroit Resources:** The proximity of the Wayne campus to institutions of the Detroit Cultural Center (which includes the Detroit Institute of Arts, the Museum of Contemporary Art Detroit, the Detroit Public Library, the Charles Wright Museum of African American History, Michigan Opera Theatre and Orchestra Hall, among other institutions) provides further unique and enriching benefits for students; professional staff members of these institutions often serve as adjunct faculty in College programs. Nearby, too, are major print and electronic communications resources that similarly provide both adjunct faculty and professional assistance to other programs in the College.

**Accrediting Agencies:** Programs in the Music Department are accredited by the National Association of Schools of Music. The Dance program in the Maggie Allesee Department of Theatre and Dance is accredited by the National Association of Schools of Dance. The Public Relations program offered by the Department of Communication is accredited by the Public Relations Society of America.

Graduate Degree Requirements

The Graduate School sets the general requirements for graduate degrees.
In addition to these and to the information below, other requirements
are specified by the individual graduate departments. Students should
consult the program and requirements of the departments in which they
plan to major.

Candidacy is an advanced status that is recommended by the student's
advisor and authorized by the Graduate School upon evidence of the
applicant’s superior scholarship, appropriate personal qualities and
promise of professional competence. Admission as an applicant does
not assure acceptance as candidate for a degree. Also, candidacy is a
necessary but not sufficient requirement for graduation.

To be eligible for candidacy, the student must file an official, approved
Plan of Work. The Plan of Work should provide for effective concentration
in a major field, with proper supporting courses in related fields. All
master's applicants should file the Plan of Work with their respective
department's Graduate Officer. In preparing a Plan, students should
evaluate with care their personal and professional objectives as well as
all degree and departmental requirements. Normally, students enrolled
in master's degree programs are expected to file a Plan of Work by the
time the equivalent of eight to twelve graduate credits have been earned.
In the Master of Fine Arts program, however, the Plan of Work should be
filed by the time the equivalent of fourteen to eighteen credits have been
earned. Candidacy must be authorized by the time twelve to eighteen
graduate credits have been earned (dependent upon the applicant's
degree program) or subsequent registration may be denied. Plans are
filed with the department's Graduate Officer. Once the Plan of Work has
been approved, the form to change the student's classification from
'applicant' to 'candidate' will be processed by the department Graduate
Officer.

Ph.D. applicants should file the Plan of Work with the Graduate School,
when approximately forty credits beyond the baccalaureate degree have
been earned. In addition to filing the Plan, the student must have passed
the Final Qualifying Examination (written and oral), and must have
submitted and received the Graduate Dean's approval on the Dissertation
Outline before the doctoral committee will recommend candidacy.

Commencement: Students are required to file an Application for
Graduation online through Academica no later than the end of the
fourth week of classes in the intended term of graduation. Information
concerning commencement announcements, caps and gowns,
invitations, tickets, time and place, assembling and other relevant
items will be sent via email to graduates prior to the event. Candidates
for advanced degrees are requested and expected to attend the
commencement at which the University confers upon them the honor of
the degree earned.

Master's Degree Requirements

The Master of Arts and Master of Music programs range from 30 to 32
credits under one of the following plans:

Plan A: In addition to coursework, a thesis is required with registration in
the department's Thesis Direction course.

Plan B: In addition to coursework, a three-credit essay is required with
registration in the department's Essay course.

Plan C: Coursework only. The essay or thesis is not required for this plan;
however, a department may require a final comprehensive examination.
Students should consult an advisor for details.

These requirements vary slightly depending on the department and major
curriculum; students should see the degree programs outlined in the
following pages for specific information.

COURSE REQUIREMENTS: At least twenty-four credits must be taken in
residence. At least six credits in the major field, in addition to the essay
or thesis, must be in courses open only to graduate students (7000 and
above).

Master of Fine Arts Degree Requirements

In the Master of Fine Arts degree programs, the minimum requirement is
sixty graduate credits under Plans A or C as follows:

Wayne State University Graduate Bulletin 2022-2023 - DRAFT COPY 177
Plan A (Studio Art): In addition to coursework, a thesis is required.

Plan C (Theatre and Dance): Coursework only.

For specific requirements, students should consult the Art and Art History or Theatre departmental sections of this bulletin.

All M.F.A. degree requirements must be completed within three years.

**Doctoral Degree Requirements**

Candidates for the doctoral degree must complete ninety credits beyond the baccalaureate degree including thirty credits of dissertation direction. The thirty credit dissertation registration requirement is fulfilled through registration in the courses 9991, 9992, 9993, and 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

**Examinations (Ph.D.)**

Preliminary Qualifying Examinations: Responsibility for the requirement of a preliminary qualifying examination is vested in the graduate faculty of each department and specifically its committee on doctoral study. Accordingly, each committee may require this examination of all of its candidates or of any candidate at any time it may determine prior to the final qualifying examination.

Final Qualifying Examination: The final qualifying examination is required of each applicant. The applicant may request his/her doctoral committee to authorize the final qualifying examination after an approved Plan of Work has been filed with the Graduate School, AND after the Dean of the Graduate School has approved the Dissertation Outline. The examination will be in part written and in part oral. When this examination has been passed, the applicant will be advanced to the status of 'doctoral candidate'.

The Written Qualifying Examination will cover the applicant's major and minor areas and may include such other related matters as the doctoral examining committee may prescribe. Within thirty days after the written examination has been passed, the oral qualifying examination will be conducted by the doctoral examining committee, in the presence of the chairperson of the departmental committee on doctoral study or his/her designee. This examination will relate to the subject matter of the written examination, the applicant’s major and minor areas and other pertinent matters.

If an examining committee does not certify that the applicant has been passed in either the written or oral examination, it must make specific recommendations with reference to admitting the applicant to a second examination and specify any additional work that should be completed prior to such an examination. If a second examination is held, it must be scheduled within one calendar year and shall be considered final.

The student's doctoral committee is selected at the time the doctoral Plan of Work is prepared. At this time, and upon consultation with the chairperson of the student's doctoral committee, a member outside of the student's major department is appointed to the committee and is expected to meet as a member of the student's committee while the research and preparation of the dissertation are in process. He/she, along with all members of the committee, will also be present at the final oral presentation. The chairperson of the student's committee files a brief report to the Graduate School detailing the conduct of the oral presentation.

**Essays, Theses, and Dissertations**

There is no prescribed form for the essay. Title page format as given in the Graduate School’s Guide for Preparing Theses and Dissertations may be used for essays. Standard style manuals may be consulted for form, as desired by the student or department.

One copy of the essay should be approved and signed by the advisor. This copy will reside with the department.

The thesis or dissertation must be an original work, either in or definitely related to the student's major area of specialization. If proper standards or quality, objectivity, originality, and independence are maintained, the candidate may use data, which he/she has derived from his/her University research. Neither the results of the research nor the publication of findings can be restricted by any non-university agency nor can they be published prior to acceptance by the Graduate School, unless prior approval of such publication has been secured from both the advisor and the Graduate School. Advisors have primary responsibility for approval of the essay or thesis, but every member of a doctoral committee must read, approve and sign the dissertation.

A thesis student may not begin work on a manuscript until he/she has submitted an approved Plan of Work and outline form. He/she may then register for the thesis or dissertation and pay regular fees in the same manner as for all other course work.

Master's degree candidates under the essay plan register for the course numbered 7999, Master's Essay Direction, in the department of their major.

Master's candidates under the thesis plan register for the course numbered 8999, Master's Thesis Research and Direction, in the department of their major.

A master's candidate must register for thirty credits in their major field in the courses numbered 7999 in the department of their major.

The publication and dissemination of research findings will not be restricted by the University after the manuscript has been received and accepted by the Graduate School.
Art and Art History

Our Mission
The James Pearson Duffy Department of Art and Art History is a community of students, staff, and faculty that advances the study and practice of art history, design, and fine art.

Our Vision
We sustain and further these disciplines through rigorous research, creative production, instruction, and community engagement within the context of an urban research university.

To realize this vision the department will:

1. Offer relevant and innovative programs grounded in faculty expertise
2. Support the research and creative activity of students and faculty
3. Develop lectures, workshops, exhibitions, and events that engage diverse audiences
4. Cultivate a supportive and collaborative environment for critical thinking, visual literacy, and creative practice
5. Provide safe and professional facilities for our students, staff, and faculty
6. Promote the importance of an arts education within a university context

The James Pearson Duffy Department of Art and Art History is dedicated to the understanding, production and presentation of works of art in all media. It seeks to explore and develop visual literacy as well as technical, critical and conceptual skills. The curriculum combines history, theory, practice and technology with interdisciplinary learning that aims to nurture a balance between technical proficiency, experimentation with new ideas and studying the visual arts as a means of understanding the intellectual and cultural history of humanity. By receiving a comprehensive training in the visual arts within the context of a liberal arts education, students are encouraged to master the various avenues of creative investigation and learning within the Department as well as in other departments of the College and the University at large. Each student is thereby able to progress from fundamentals to creative and intellectual maturity and given the tools of professionalization in a variety of different areas while immersed in the rich diversity of cultural and research opportunities offered by the University as a whole.

Academic Work Retention Policy
The Department reserves the right to retain, for its permanent collection, the work submitted by students for credit in any course, and to exhibit or reproduce such work in University publications. Students are encouraged to retain work as they proceed through their program, so as to have at least twenty works for a final portfolio review and demonstration of progress.

Program Offerings

Studio Art

Faculty Graduate Officer: Heather Macali, Associate Professor
Email: graduateartanddesign@wayne.edu

The James Pearson Duffy Department of Art & Art History offers the Master of Arts with a major in Art (M.A.) and the Master of Fine Arts with a major in Art (M.F.A.).

- Art (M.A.) (p. 180) — The M.A. program in the James Pearson Duffy Department of Art and Art History is a multidisciplinary program where students pursue a wide range of media through studio coursework. Students may use the M.A. degree to develop technical skills and a portfolio of work as a pathway to an M.F.A. degree or to advance in an existing career or industry.
- Art (M.F.A.) (p. 182) — The M.F.A. program in the James Pearson Duffy Department of Art and Art History is a multidisciplinary program where students pursue a wide range of media in an intensive studio environment. Students will have the ability to work deeply within one discipline or more broadly across media. Students develop critical capacities to advance their practice-based research and situate their work within larger cultural contexts.

Art History

Faculty Graduate Advisor: Margaret Franklin, Associate Professor of Art History
Email: ai4589@wayne.edu (ai4589@wayne.edu?subject=Art%20History %20Graduate%20Program)

- Art History (M.A.) (p. 186)

How to Apply:
Complete the Wayne State online graduate application (https://gradschool.wayne.edu/admissions/). For admission consideration, submit the completed application, official transcripts, application fee, and other materials as directed.

Deadlines
The art department has two application deadlines: October 1 (for the M.A. programs for study beginning in January) and January 15 (for the M.A. and M.F.A. programs for study beginning in August). Applications for M.F.A studies will only be accepted for the January 15 deadline. The department deadlines supersede any other published deadline.

Graduate Teaching Assistantships
The department deadline for Graduate Teaching Assistantships (GTAs) is January 15. The department has six GTA’s Current Students should apply by following the directions on the Graduate Teaching Assistantship (GTA) Application Form (https://forms.wayne.edu/5e7a04184a59b/).

Prospective Students should follow the directions in your graduate program application. To apply for a GTA your application will require the completion of a supplemental written statement summarizing the GTA applicant’s purpose and goals. (no more than 500 words).

For all applications completed by the deadline, the applicant will receive a notification letter stating the department’s decision.
Art (M.A.)

Eligibility
The applicant must hold a Bachelor of Fine Arts (B.F.A.) degree or another degree and equivalent course work and/or experience. These requirements can be obtained from the Graduate Officer of the department: graduateartanddesign@wayne.edu.

Note: The Graduate Record Examination (GRE) is not required for admission.

Admission Requirements
Admission to the Master of Arts program is an online process. Admission to this program is contingent upon admission to the Graduate School (p. 35). Admission to the Graduate School means only that the applicant has satisfied the academic standards required for general University Graduate admission.

The applicant must hold a Bachelor of Fine Arts degree or another degree and equivalent course work. Admission by the Graduate School of the University means only that the applicant has satisfied the academic standards required for general admission. Final admission to the Master of Arts program is determined by the department and based on the following ranked criteria.

- Portfolio
- Personal Interview
- Academic Record and Experience
- Reference Letters
- Statement of Intent
- Supporting Materials

The final admission decision rests with the department’s faculty admissions committee.

Composition of Faculty (Admissions Committee)
Admissions committees are composed of three (3) full-time faculty minimum. Admission offers begin with a simple majority of positive votes from committee members. A positive vote should be understood as an agreement to serve as a graduate committee member.

Application Procedure
If an admissions interview is scheduled, the applicant should expect to present actual examples of his/her/their recent work (unless this is not feasible due to size). The applicant should expect to speak and to answer questions concerning his/her/their work, experience and plans for graduate study. The admissions committee will make one of the following decisions:

- ADMIT
- ADMIT WITH SPECIAL REQUIREMENTS: The applicant’s preparation is acceptable but requires certain specific courses to be taken. These courses may or may not carry graduate credit depending on the level specified by the committee.
- PRE-MASTERS: The applicant’s preparation is not sufficient for admission but shows promise. The committee will outline the specific courses that must be taken prior to another admissions interview. These courses are taken at the 5000 level and graduate tuition is paid. If the student is subsequently admitted, up to 9 credits may be accepted as graduate credit.
- DO NOT ADMIT: The applicant lacks sufficient preparation for the program. Frequently, Post-Bachelor’s status is recommended.

However, Post-Bachelor’s course work cannot be applied towards any degree.

Advisor
At the time of admission, the student will be assigned an Advisor by the admissions committee. The Advisor will explain the program and help the student plan the course of study. It is the student’s responsibility to know the program and to maintain close contact with the Advisor, in order to keep him/her/them informed as to the student’s progress. In addition, a graduate advising form is available from the department to help with matters such as the plan of work, the graduate essay and other specifics.

Studio Space
The department is not able to provide individual studio space for students in the Master of Arts program. Individual disciplines, however, make every effort to accommodate the needs of their graduate students. Please consult with the Advisor to see what space, if any, is available.

Transfer of Credits
No credits can be transferred to the program from any other institution or program at the time of admission. A student may receive up to three (3) credits from another program during the course of his/her/their course of study at WSU. The student must submit a request form and provide an official transcript to the Graduate Officer; the student’s review committee must agree to accept this work.

Credit by Examination
No credits toward graduate degrees may be obtained by examination.

Role of the M.A. Advisor
The Advisor’s responsibilities are to explain the program and help the student plan her/his/their course of study. Aspects of the Advisor’s role include the following points.

The Advisor must:

- Be in the area of concentration desired by the student;
- Be appointed by the student's admissions committee. (Change of Advisor must be approved by both a student's current and requested advisor);
- Approve a student's list of review committee members each semester (student must submit a list to the Advisor), sending the list to the area coordinator, who sends the list on to the graduate officer;
- Approve changes in a student's review committee, sending the list to the area coordinator, who sends the list on to the graduate officer;
- Moderate a student's reviews (including time-keeping for each section of the review);
- Approve and supervise a student's M.A. Essay and submit the results to the graduate officer;
- Approve a student's plan of work;
- Approve any electives that the student seeks to take outside of the department;
- Approve a student's course schedule each semester;
- Arrange for studio space, if the student's concentration provides studio space.

It is also the student’s responsibility to know the program and to maintain close contact with the Advisor, in order to keep him/her/them informed as to the student’s progress.
Spring / Summer Semester
Master of Arts course work may be done during the Spring/Summer semester only if courses are offered at the appropriate level and are taught by faculty who have been approved to teach graduate courses.

Graduate Advising
The student must meet with his/her/their Advisor every semester to review, plan, and approve the student's course of studies. If desired, the Graduate Officer is also available for advising.

Financial Aid and Scholarships
For information concerning financial aid and scholarships, please contact the WSU Financial Aid office. Applications for graduate teaching assistantships can be obtained from the Department office.

Program Requirements
A minimum of thirty credits in art, including at least three credits of Graduate Studio, six credits in electives, three credits in art history, and eighteen credits in Studio Electives. All course work must be completed in accordance with the regulations of the Graduate School and the College of Fine, Performing, and Communication Arts.

This program is offered under the following option:

Plan C: Thirty credits in coursework.

Candidacy: All graduate students begin their work as Master's Applicants. After twelve credits have been completed, a Plan of Work must be signed by the faculty advisor and submitted to the Department Graduate Officer. If the student has maintained a 3.0 grade point average and the Plan is accepted, his/her status is changed to Master's Candidate.

Plan of Work (POW)
All graduate students begin their work as Masters Applicants. After 12 credits have been completed successfully (B average or better) a Plan of Work is filed with the College of Fine, Performing and Communication Arts. If approved, the student’s status is changed to Masters Candidate. The Plan of Work lists courses taken and projects the remainder of the program and anticipated length of the program. Failure to submit the Plan of Work during the semester in which the student registers for his/her/their 12th credit may result in an academic “hold” which will prevent further registration. The University strongly enforces this policy, so the student must not neglect this procedure. The Plan of Work is done in conjunction with the Advisor. The Plan of Work must be signed by the student’s Advisor, who then forwards the Plan of Work to the Graduate Officer.

If the student wishes to change his/her/their course of study after the Plan of Work has been filed, another Plan of Work with the “Change of Plan of Work” line marked should be filed. The POW form is available online or in the art department office.

Any deviations from this course of study requires the approval of the faculty Graduate Committee in Art. Such requests should be addressed in writing to the Graduate Officer.

Reviews
As a requirement for the degree, the Master of Arts student must meet a faculty review committee at the end of their final semester of graduate study. The student must keep his/her/their Advisor informed as to the student’s progress so that the reviews can be scheduled at the appropriate times.

Composition of the Faculty Admission Committee
Admissions committees are composed of three (3) full-time faculty minimum. Admission offers begin with a simple majority of positive votes from committee members. A positive vote should be understood as an agreement to serve as a graduate committee member. Graduate advisors must be drawn from the student’s primary discipline.

MA Advisor
The student should select a permanent advisor by 14th #week of their first semester, with agreement from the newly selected faculty and formal approval from the student’s current advisor and graduate officer. The advisor must align with the student’s primary discipline. In the case of Interdisciplinary Art focus, a student may choose to work with any full-time faculty member within the department.

Composition of the Review Committee
Graduate Student Review Committees are composed of three (3) full-time faculty members. Each committee includes full-time faculty members, one of whom is the Advisor. The student may add or replace one faculty member per term with the support of his/her/their Graduate Advisor. Requests for graduate committee adjustments should made to the Graduate Officer by the 3rd week of the term. Committee membership may also be adjusted according to faculty schedules and assignments.

Procedure
Reviews are normally one hour in length. The student is expected to present all work done during the period under review, as well as answer questions. The following format is used for reviews.

1. Opening Statement (10 minutes): The student should prepare a brief presentation about the works under review, focusing on those issues that he/she/they wish(es) the committee to address.
2. Discussion Period (up to 30 minutes): An open discussion, moderated by the Advisor, addressing the works under review and focusing on the issues raised by the student during the opening statement.
3. Formal Action (10 minutes): Following the discussion, the student will be requested to leave the room so that the committee can discuss and vote a formal action.
4. Feedback (10 minutes): The student is invited back to rejoin the review and will be apprised of the action taken. The following is a list of formal actions that can be taken by the review committee.
5. Pass: Work is proceeding without any problems.
6. Pass With Warning: Work is only satisfactory. An additional review is called for at a time interval to be determined by the review committee.
7. Hold: Work is not acceptable. Student may not register for additional course work until the student has met with the review committee at a specified time.
8. Dismiss: Work is failing. Graduate candidacy and standing is revoked.

Graduation Requirements
When registering for the final semester, the student must file for his/her/their degree at the University Graduation Office. The student must file prior to the first day of classes of his/her/their final semester. Once the student has filed for a degree, the student is then a Candidate for Graduation.

Image Portfolio
Prior to graduation, the candidate must provide his/her/their advisor with a portfolio of 15 images of works executed during graduate studies. Images are due by the end of the student’s final semester and are used for program assessment. These images will also be added to the permanent collection of the Department’s visual resource center.
**Disciplines**

- Ceramics
- Digital Art
- Drawing
- Fashion Design
- Fibers
- Graphic Design
- Industrial Design
- Metalsmithing
- Painting
- Photography
- Printmaking

**Art (M.F.A.) Eligibility**

The applicant must hold a Bachelor of Fine Arts (B.F.A.) degree or another degree and equivalent course work and/or experience. The M.F.A. degree program demands superior qualification, potential, and commitment as an artist. These requirements can be obtained from the Graduate Officer of the department: graduateartanddesign@wayne.edu.

Note: The Graduate Record Examination (GRE) is not required for admission.

**Admission Requirements**

Admission to the Master of Fine Arts program is an online process. Admission to this program is contingent upon admission to the Graduate School (p. 35). Admission to the Graduate School means only that the applicant has satisfied the academic standards required for general University Graduate admission.

The applicant must hold a Bachelor of Fine Arts degree or another degree and equivalent course work. Admission by the Graduate School of the University means only that the applicant has satisfied the academic standards required for general admission. Final admission to the Master of Fine Arts program is determined by the department and based on the following ranked criteria.

- Artist Statement
- CV/Resume
- Image List
- 20 Images (specific criteria must be met)
- 3 Letters of Recommendation
- Link to Work or Time-Based Media (Optional)
The admissions committee will make one of the following decisions.

- **Direct Admission with the BFA**: If the applicant is of clearly superior quality and preparation, direct admission is possible. However, applicants are often initially placed in the M.A. program. At the earliest appropriate time, transfer to the M.F.A. program may be recommended.
- **Direct Admission with the MA Degree**: Any individuals having already completed the M.A. degree in art (a studio discipline) may apply directly for admission to the M.F.A. program. An admission committee will determine qualifications and admissibility.
- **Transfer from the WSU MA Program**: Once in the M.A. program, the student is eligible for transfer to the M.F.A. at his/her/their first review (12 credits) or second review (24 credits). If, at either of these reviews, the faculty review committee determines that the work is approaching M.F.A. level, an invitation will be issued to meet the larger M.F.A. admission committee. If admitted, it is possible to transfer up to 15 credit hours of M.A. studio course work; the number of transfer credits accepted is at the discretion of the student's M.F.A. admissions committee. (Art History credits transfer automatically, as does the M.A. Seminar -the student then must take the MFA 2 Seminar). As with the M.A. program, direct M.F.A. admission is a two-part process. The applicant must apply to the Graduate School of the University and the Department of Art & Art History.

Admission by the Graduate School means only that the applicant has satisfied the academic standards required for general graduate admission. The final decision rests with the department's faculty admissions committee.

### Composition of Faculty (Admissions Committee)

Admissions committees are composed of three (3) full-time faculty minimum. Admission offers begin with a simple majority of positive votes from committee members. A positive vote should be understood as an agreement to serve as a graduate committee member.

### Application Procedure

At the time of application, the prospective student must submit a portfolio of twenty (20) images of recent work, a list or descriptions of images, a statement of intent, a curriculum vita (CV), and three (3) letters of recommendation through the application upload process. These are examined by the faculty admissions committee, along with the applicant's academic record, in order to make a preliminary admissions decision. If this decision is positive, a formal admissions interview may be scheduled, except in cases where distance makes it impossible. The applicant will be informed as to the date and place for the meeting.

If an admissions interview is scheduled, the applicant should expect to present 10–20 actual examples of his/her/their recent work (unless this is not feasible due to size). The applicant should expect to speak and to answer questions concerning his/her/their work, experience and plans for graduate study. The interview normally is scheduled for approximately 45 minutes.

The admissions committee will make one of the following decisions.

- **ADMIT TO MFA**: Note: any applicant transferring from the WSU M.A. program will be informed as to whether he/she/they will be permitted to transfer credits and, if so, how many.
- **ADMIT TO MA**: The faculty admissions committee determines whether the M.A. program is a more appropriate place for the applicant to begin graduate studies. Once in the M.A. program, a student can again apply for admission to the M.F.A.
- **DO NOT ADMIT**: The applicant lacks sufficient preparation for the program.

### Advisor

At the time of admission the student will be assigned an initial Advisor by the admissions committee. The student selects a permanent Advisor during his/her/their first semester; both the initial and permanent advisors must agree to the student's selection. The Advisor will explain the program and help the student plan the course of study. It is the student's responsibility to know the program and to maintain close contact with the Advisor, in order to keep him/her/them informed as to the student's progress.

### Studio Space

The department ordinarily provides individual studio spaces to all M.F.A. students. These are assigned on the basis of seniority, area concentration, and space availability. Since graduation provides a constant turnover of studios, anyone desiring to upgrade his/her/their studio assignment may do so by requesting, in writing, a new studio. These requests should be addressed to the Graduate Officer. If, in the opinion of the faculty, a student is not sufficiently utilizing his/her/their studio, a request to vacate may be made. Such a request can be appealed to the department’s Graduate Committee in Art.

### Transfer of Credits

No credits can be transferred to the M.F.A. program at the time of admission from any M.A. program outside of WSU. A maximum of 15 credits can be transferred from the WSU M.A. program to the M.F.A. program; the number of transfer credits accepted is at the discretion of the applicant's admissions committee. Once enrolled in the M.F.A. program, a student may petition the department’s Graduate Committee in Art to accept up to three (3) credits from educational institutions outside of WSU. The student must submit a formal request, signed by his/her/their advisor, and a copy of the transcripts for the coursework credits requested to the Graduate Committee in Art.

### Credit by Examination

No credits toward graduate degrees may be obtained by examination.

### Role of the MFA Advisor

The Advisor's responsibilities are to explain the program and help the student plan his/her/their course of study. Aspects of the Advisor's role include the following points.

The Advisor must:

- Be in the area of concentration desired by the student;
- Be appointed by the student's admissions committee (change of advisor must be approved by a student's current and requested advisor);
- Approve a student's list of review committee members each semester (student must submit a list to the advisor), sending the list to the area coordinator, who sends the list on to the graduate officer;
- Approve changes in a student's review committee, sending the list to the area coordinator, who sends the list on to the graduate officer;
- Moderate a student's reviews (including time-keeping for each section of the review);
- Approve a student's plan of work;
M.F.A. candidates must also meet the following requirements:

- A minimum of four semesters of study, excluding the summer term. All Full-time attendance is required in the program which requires a recommendation by the graduate review committee.

Graduate Officer. An applicant becomes a degree candidate only upon being selected from that Committee. The student must meet with his/her/their Advisor every semester to review, plan, and approve the student’s course of studies. If desired, the Graduate Officer is also available for advising.

Financial Aid and Scholarships

For information concerning all available financial aid and scholarships, please consult the WSU Financial Aid office. Applications for graduate teaching assistantships (GTAs) are available through the department office.

Program Requirements

The Master of Fine Arts degree is offered under the following option:

Plan A: Sixty credits in art, including a thesis exhibition held in final semester.

Plan A must be completed within three years. A minimum of sixty credits in art should include twenty credits of Graduate Hours, nine credits of Graduate Seminar, nine credits of Graduate Studio, twelve credits in electives, six credits in art history (one of which is to be contemporary art), and four credits of MFA Thesis. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Fine, Performing, and Communication Arts (p. 177).

Candidacy: After twelve credits have been completed, a Plan of Work must be signed by the faculty advisor and submitted to the Department Graduate Officer. An applicant becomes a degree candidate only upon recommendation by the graduate review committee.

Full-time attendance is required in the program which requires a minimum of four semesters of study, excluding the summer term. All M.F.A. candidates must also meet the following requirements:

1. Final Review - The student must receive a satisfactory review (S, passing) for the review in their final semester. This review will be held at the student’s thesis exhibition.

2. Thesis Exhibition - As a degree requirement, the M.F.A. student must present a final thesis exhibition prior to graduation. All M.F.A. exhibitions are to be held in the WSU Community Art Gallery during the Winter term. The design, presentation, and publicity for the show is done in conjunction with other graduating candidates. The Graduate Officer and the Exhibitions Curator are available to assist with the exhibition.

3. Image Portfolio - Prior to graduation, the candidate must provide his/her advisor with a portfolio of 20 images of works executed during graduate studies including images of the thesis exhibition. Images are due by the end of the student’s final semester.

4. Written Thesis Document - The student will produce a thesis, essay, book, or other writing to accompany their thesis exhibition in consultation with their advisor. The writing should be a minimum of eight pages (4000 words) in length. The writing is due by the end of the student’s final semester.

This program provides the student with the opportunity for intensive work toward personal artistic goals. The entire graduate staff is available to the student for consultation and instruction.

Plan of Work (POW)

All graduate students begin their work as Masters Applicants. After 12 credits have been completed successfully (B average or better) a Plan of Work is filed with the College of Fine, Performing and Communication Arts. If approved, the student’s status is changed to Masters Candidate. The Plan of Work lists courses taken and projects the remainder of the program and anticipated length of the program. Failure to submit the Plan of Work during the semester in which the student registers for his/her/their 12th credit may result in an academic “hold” which will prevent further registration. The University strongly enforces this policy, so the student must not neglect this procedure. The Plan of Work is done in conjunction with the Advisor. The Plan of Work must be signed by the student’s Advisor, who then forwards the Plan of Work to the Graduate Officer. If the student wishes to change his/her/their course of study after the Plan of Work has been filed, another Plan of Work with the “Change of P.O.W.” line marked should be filed. The Plan of Work is available online or in the art department office. Any deviations from this course of study requires the approval of the faculty Graduate Committee of the Department. Such requests should be addressed in writing to the Graduate Officer.

Reviews

The M.F.A. student must meet with a faculty review committee each semester of study. By the 8th week prior to each semester’s review, the student must have had a studio visit with each member of his/her/their committee (i.e., the student meets with committee members individually to discuss his/her/their work). Reviews are usually held in the 12th or 13th week of each semester with the dates varying each term. The Graduate Calendar, available in the Department office will list the exact dates for each academic year. (The Final Review is held in the 8th week to facilitate College and University graduation deadlines.)

Composition of the Faculty Admission Committee

Admissions committees are composed of three (3) full-time faculty minimum. Admission offers begin with a simple majority of positive votes from committee members. A positive vote should be understood as an agreement to serve as a graduate committee member. Graduate advisors must be drawn from the student’s primary discipline.

Composition of the MFA Review Committee

For the students first semester the Graduate Student Review Committee will be comprised of the members of the student’s Admission Committee and their first semester advisor will be selected from that Committee.
The student should select a permanent committee by 14th week of their first semester, with agreement from the newly selected faculty and formal approval from the student’s current advisor and graduate officer. The advisor must align with the student’s primary discipline. In the case of Interdisciplinary Art focus, a student may choose to work with any full-time faculty member within the department. Graduate Student Review Committees are composed of three (3) full-time faculty minimum.

MFA Progress Review

The initial Progress Review takes place during a student’s first term in the MFA program and is not a graded review. The student presents to their MFA committee members and a visiting artist or critic the culmination of all work created during the fall semester, (then the 3rd and 5th semesters) including any written material/research projects. The student receives a written summary of the review and an evaluation by committee as: S Satisfactory (pass/fail), U Unsatisfactory (pass/fail). Pass/Fail, attendance and participation is considered Pass (S). This review is a 0 credit hour gateway.

MFA Assessment Review

In the winter semester, the student formally presents to their MFA committee members the culmination of all work created during the course of the year, including any written material/research projects. A 500-word artist statement is required and must be submitted to committee members one week prior to reviews. The student is evaluated by committee as: Pass (S) / Pass with Warning (S) / Move to MA program (U) / Dismissal from program (U) (S Satisfactory, U Unsatisfactory). The Assessment Review will also serve as the Department of Art and Art History MFA program assessment. The 6th semester review serves as the final review, and will be held at the student’s thesis exhibition. The student must receive a satisfactory review (S, passing) for the review in their final semester.

Changes in the Review Committee

The student may add or replace one faculty member per term with the support of his/her/their Graduate Advisor. Following the student’s first semester, requests for graduate committee adjustments should made to the Graduate Officer by the 3rd week of the term. Committee membership may also be adjusted according to faculty schedules and assignments.

Visiting Artist/Critic

Each semester, the Department’s Faculty Graduate Committee in Art invites to campus a visiting artist/critic specifically to serve on graduate reviews. This individual attends all M.F.A. reviews and serves without a vote. Recommendations for visiting artist/critic are made to the committee by faculty and graduate students.

Procedures

Reviews are normally one hour in length. The student may choose to have an open review with other M.F.A. students attending or a closed review with only the review committee. The schedule is prepared by the Graduate Officer, in consultation with the various concentrations. The schedule is distributed and posted several weeks in advance. The following format is followed for reviews.

1. Opening Statement (10 minutes): The student should prepare a brief presentation about the works under review, focusing on those issues that he/she/they wish(es) the committee to address.

   2. Discussion Period (up to 30 minutes): An open discussion, moderated by the Advisor, addressing the works under review and focusing on the issues raised by the student during the opening statement.

3. Formal Action (10 minutes): Following the discussion, the student will be requested to leave the room so that the committee can discuss and vote a formal action.

4. Feedback (10 minutes): The student is invited back to rejoin the review and will be apprised of the action taken. The following is a list of formal actions that can be taken by the review committee.

5. Pass: Work is approved. Consistent level of quality is being maintained.

6. Pass With Warning: Work is only satisfactory. The possibility of a Hold or Dismiss exists.

7. Hold: Work is unsatisfactory. The student may not register for further course work but should instead concentrate on bringing his/her/their work up to a satisfactory level. A repeat review will be scheduled for the following semester to determine continuance or dismissal.

8. Return to the Masters of Art Program: Though acceptable, the work is not at the M.F.A. level. The accumulated degree credits may be applied to the M.A. degree.

9. Dismiss: Work is failing. Graduate candidacy and status is revoked.

All actions of a review committee may be appealed in writing to the Graduate Committee in Art. This committee, in conjunction with the Department Chair, may overrule a Review Committee. The student is to receive a copy of the committee’s review summary. The student is encouraged to follow-up with committee members after the review for more discussion. The student has the right of access to his/her/their graduate files. Students are welcome to review 8000-level grades and the written summary of their reviews.

Graduation Requirements

When registering for their final semester, the student must File for Degree at the University Graduation Office. The student must file prior to the first day of classes of her/his/final semester. Once the student has filed for a degree, the student is then a Candidate for Graduation.

1. Final Exhibition (Designate Plan A on the Plan of Work) - As a degree requirement, the M.F.A. student must present a final thesis exhibition prior to graduation. All M.F.A. exhibitions are to be held in the WSU Community Art Gallery during the Winter term. The design, presentation, and publicity for the show is done in conjunction with other graduating candidates. The Graduate Officer and the Exhibitions Curator are available to assist with the exhibition. The M.F.A. student must write an expanded artist’s statement, in consultation with the Advisor. The statement will accompany the thesis show. The student will document the exhibition with digital images and submit these along with other selected images from his/her/their graduate career to the Graduate Officer (see no. 3, below).

2. Final Review - This summary review is held at the student’s thesis exhibition.

3. Image Portfolio - Prior to graduation, the candidate must provide his/her/their advisor with a portfolio of twenty images total, including works executed during graduate studies and the thesis exhibition. The images become part of the permanent collection in the Department’s visual resource center. The portfolio is due in the Department office no later than two weeks after a student’s final exhibition.

Graduate Record Exam (GRE) and Funding Opportunities

While GRE scores are not required for admission to the program, students wishing to apply at any point in the course of their studies for a Graduate Teaching Assistantship offered by the department or for the Graduate-Professional Scholarship offered by the University must have their GRE scores reported to the appropriate representative at that time.

The Art History program offers a one-year Graduate Teaching Assistantship. The GTA may be renewed for second year. The program also offers the Alice L. and Albert W. Steinbach Endowed Scholarship Fund for Art History Graduate Students. This fund may vary but generally offers approximately $1,500 to two students for travel/research or for tuition assistance. In addition, approximately five graduate students are hired as Graders for the 1000-level Survey courses each semester. The pay varies but is approximately $1,300 per semester.

M.A. Comprehensive Exam

The M.A. Comprehensive Exam is designed to test the skills and knowledge acquired during the student’s coursework, to better prepare the student to write the M.A. paper (essay or thesis), and to better prepare the student for work in the field as a museum or arts professional or in a Ph.D. program. The M.A. exam will consist of two essays. Students will write one essay in their selected major field and a shorter essay in a secondary field. Secondary field questions will be more general than questions in the major field. Students will develop, with their essay/thesis advisor in their primary area and a faculty member in the secondary area, three questions in each area, primary and secondary, and will choose one of two from each area on the day of the exam.

The exam should be taken after 24 credits toward the M.A. degree have been completed (and language requirements have been completed) and must be successfully completed before writing the M.A. paper.

Questions will be written by the faculty specifically for each individual and the student will discuss with the faculty members in their primary and secondary areas possible essay areas and receive guidance on how to study and prepare. This may include a reasonable list of readings from coursework as well as additional articles or texts. This preparation also should provide a foundation for the student’s M.A. paper in their primary area.

Primary area: In consultation with the faculty member in the primary area, three questions are prepared for this portion of the examination. These questions guide the preparation for the examination over the summer, which, for most students, is the best time to prepare for the exam. One week prior to the examination, the primary area faculty member submits a list of two questions to the Graduate Advisor who approves the questions and administers the exam. The examinee writes an essay in response to one of the two questions posed. The student has 90 minutes to answer the question of choice.

Secondary area: In consultation with the faculty member in the secondary area, three questions are prepared for this portion of the examination. These questions will be more general than those in the primary area. One week prior to the examination, the primary area faculty member submits a list of two questions to the Graduate Advisor who approves the questions and administers the exam.

For both the primary and secondary areas, the examinee writes an essay in response to one of the two questions posed. The student has 45 minutes at the end to review the exam. The total exam time is 2 1/4 hours. The break and review period bring the total time to 2 3/4 hours.

Grading: The faculty member in the primary area will grade that portion of the exam; the faculty member in the secondary area will grade that portion of the exam. The Graduate Advisor in consultation with the primary area and secondary area instructors will determine whether the examinee has passed or failed the exam. Where the Graduate Advisor is also the primary or secondary area advisor, the Area Coordinator or another faculty member may serve as a consultant on the exam.

Program Requirements

M.A. candidates may choose either of two plans to complete the degree requirements: Plan A (Thesis) or Plan B (Essay). All course work must be completed in accordance with the regulations of the Graduate School and the College of Fine, Performing, and Communication Arts governing graduate scholarship and degrees; see the sections beginning under Academic Regulations (p. 38) and Academic Regulations for the College of Fine, Performing, and Communication Arts (p. 177), respectively.

Plan A (Thesis) Requirements

Plan A requires thirty-two credits in coursework, including at least six credits at the 7000-level and eight credits in thesis. The thesis is expected to be a more in-depth and original contribution to art historical studies. This option must be approved by the student’s essay/thesis advisor, and a special form must be submitted to the Graduate Office. Students may concentrate in one of the following areas, but must take at least one course in four of the five core areas, for a total of four core courses (12 credits): African Arts, Classical, Medieval, Renaissance-Baroque, and Modern-Contemporary; two courses must be taken at the 7000-level (6 credits). Students must fulfill the language requirement and pass the M.A. Comprehensive Exam before completing their Thesis.

Plan B (Essay) Requirements

Plan B requires thirty-three credits in course work, including at least six credits at the 7000-level, three credits in essay, and six credits in elective or cognate areas (e.g. classics, English, history, film, anthropology) or Directed Study. Students may concentrate in one of the following areas, but must take at least one course in four of the five core areas, for a total of four core courses (12 credits): Classical, Medieval, Renaissance-Baroque, Modern Contemporary, and African Arts; two courses must be at the 7000-level (6 credits). The M.A. Essay counts for 3 credits. Students must fulfill the language requirement and pass the M.A. Comprehensive Exam before completing their Essay. Up to six graduate credits (two courses) in Art History may be transferred from a graduate program at another institution.

Complete 2 elective courses 6

8 credit hours of Plan B Essay: 8

AH 7999  Master’s Thesis Research and Direction 3

Total Credits 33

Candidacy

All graduate students begin their work as Master’s Applicants. After twelve credits have been completed, a Plan of Work must be signed by the faculty advisor and submitted to the Department Graduate Officer. If the student has maintained a 3.0 grade point average and the Plan is accepted, his/her/their status is changed to Master’s Candidate.

Language Requirement

Students must submit a statement of reading proficiency in one foreign language for approval by the faculty as appropriate to scholarly study. Students who have not completed this requirement upon admittance to the program must fulfill the language requirement as quickly as possible, and must do so by the end of coursework and before registering for the M.A. Essay or Thesis credits. Students may demonstrate reading proficiency in the selected foreign language by one of the following two methods:

1. Completion of three terms of university-level coursework in an approved language with a “B” average or better, as recorded on submitted transcripts. These courses do not count toward the degree credit requirement.
2. Passing the Reading portion of a Language Proficiency Exam administered in the Department of Classical and Modern Languages, Literatures, and Cultures, with a grade of 70% or higher.

Students who plan to pursue a Ph.D. in Art History should be aware that admission to such programs often requires reading ability equivalent to four terms of coursework in at least one of the languages of German or French, and are encouraged to pursue these languages.

Progress toward the M.A.

In order to progress to candidate status in the graduate program, a student must file a Plan of Work by the time they accumulate 12 credits in the program and have attained a minimum GPA of 3.00. Students achieve candidacy when they file a Plan of Work that is approved by the art history Graduate Advisor and the college/school Graduate Office.

A candidacy hold is automatically generated for students who have not attained candidacy by the time they accumulate 12 credits. Students will not be able to register until they file a Plan of Work.

Students should therefore meet with the Graduate Advisor in their first semester to complete a Plan of Work, insuring that they will meet program requirements. The Plan of Work will be adjusted to reflect any changes in the final semester. All courses applied to the M.A. degree need a grade of not less than B. Earning a grade of B- or less in any course may be cause for probation, which would require raising the average to B in the immediately following term. A subsequent grade of B- or less could, at the discretion of the art history faculty, be grounds for dismissal from the program. Each student will be assessed during a first year review by the art history faculty.

Additionally, a part-time student must complete a minimum of one course in each academic term until completion of course work. A student may request a leave of absence from the program should circumstances make continued progress towards the degree impossible. Requests must be
made in writing to the Graduate Advisor. No more than two consecutive semesters of leave will be granted at any one time.

It should be noted that the art history Graduate Advisor works with all art history graduate students and may be separate from the essay/thesis advisor. Once a student has achieved candidate status and has determined a primary area of study, he or she may petition for an essay/thesis advisor.

**Time Limit**

The student must complete all degree requirements within six years of initial enrollment (including approved leaves of absence). It is expected that a full-time student will normally complete all of the requirements for the degree within three years, but that part-time students will require more time.

**Essay or Thesis Detailed Requirements and Standards**

The program defines an Essay as a research study that synthesizes the literature, while a Thesis is research with an original contribution. The exact nature of the Essay or Thesis is to be arrived at in consultation with the individual essay/thesis advisor. The topic may develop out of a research or seminar paper, but the candidate embarking on the Essay or Thesis should have had at least one course with the instructor supervising the final paper.

The length and structure of the Essay or Thesis will depend on the type of material involved and be arrived at in consultation with the essay/thesis advisor. It should generally be approximately fifty pages for the Thesis but may be less for the Essay (but not less than thirty pages). While a rigorous approach to research and writing is expected for both the Essay and Thesis, a shorter length for the Essay reflects the fact that the Essay is 3 credits while the Thesis is 8 credits. This project, whether Essay or Thesis, is the culminating work of the MA candidate and should demonstrate mastery of the methodology of the field. Both the Essay and Thesis must include the normal scholarly apparatus of footnotes, bibliography, a careful record of the works of art that may be discussed in the Essay or Thesis must be kept; it should include not only the physical data and locations of the works, but also notes on sources of good reproductions.

Writing is a highly individual process, and it is not the intention of these instructions to set up rigid guidelines for either style or content. Questions of format should be worked out with the essay/thesis advisor. Some general guidelines may be helpful, however. It is recommended that the student follow as nearly as possible the model of a reputable scholarly journal such as Art Bulletin. For footnotes and bibliography, the forms in any approved style manual are recommended (such as The Chicago Style Manual).

**Prerequisites**

All course requirements, as well as language requirements and the MA Comprehensive Exam, must be completed before the Essay or Thesis proposal is submitted. It may be advantageous, of course, to begin research on a possible topic well before the final course requirements are met, particularly in cases where seminar papers seem to be promising topics. Students should feel free to consult with individual faculty members about such possibilities at an early stage and be sure to allow ample time to do the necessary bibliographical research before defining a topic. While any student may choose the Essay option, the Thesis option must be approved by the student’s essay/thesis advisor, and a special form must be submitted to the Graduate Office.

**Proposal and Second Reader**

The student must select a Thesis (if approved) or Essay topic in consultation with a faculty member who will be the major advisor and reader of the paper. After general agreement concerning the scope and organization of the paper has been reached, the student will write a formal proposal or thesis statement of three to five pages, which should include:

1. a clear statement of the topic and its significance;
2. a claim or argument about the topic;
3. a working outline;
4. the bibliography used to write the proposal.

It is important to discuss a first draft of the proposal with the essay/thesis advisor. The student will then consult with his or her essay/thesis advisor before asking another faculty member to serve as a Second Reader for the Essay or Thesis.

In addition, the student should compile a preliminary working bibliography (i.e., an extensive list of all the sources the student has been able to find that may be relevant to the topic - including sources that must be requested through Interlibrary Loan, or require travel in order to use, and foreign language sources).

**Research and Writing**

After the proposal has been accepted, the student should meet with the essay/thesis advisor to work out a practical schedule of work for completing the Essay or Thesis. This should include enough time for draft revisions and for the Second Reader to read and comment on the revised draft.

Once the topic has been determined, the first step in research is the development of a working bibliography through a wide-ranging search for all sources that are likely to contain relevant material. It is most important at this stage to consult a wide range of indexing sources, library catalogues and electronic databases. In addition to the working bibliography, a careful record of the works of art that may be discussed in the Essay or Thesis must be kept; it should include not only the physical data and locations of the works, but also notes on sources of good reproductions.

Writing is a highly individual process, and it is not the intention of these instructions to set up rigid guidelines for either style or content. Questions of format should be worked out with the essay/thesis advisor. Some general guidelines may be helpful, however. It is recommended that the student follow as nearly as possible the model of a reputable scholarly journal such as Art Bulletin. For footnotes and bibliography, the forms in any approved style manual are recommended (such as The Chicago Style Manual).

Essays must be revised and completed by the end of the semester in which the student is registered to graduate. The Essay will be submitted to the department. The Thesis must be submitted to both the department and the Graduate School to meet a University deadline. This is usually three weeks before the end of the semester in which the student is registered to graduate. It is the student’s responsibility to keep track of these deadlines, which can be found at www.gradschool.wayne.edu. Students must also keep the essay/thesis advisor informed on the progress of the Essay or Thesis, arrange for consultations, and turn in sections or chapters of the draft well in advance of the date on which they wish to discuss them.

**Format and Technical Requirements**

The Graduate Office establishes the guidelines for the format and technical requirements of the M.A. Thesis only. Students should consult the Graduate School website and Graduate School Handbook at www.gradschool.wayne.edu for the appropriate guidelines.

Although minor details of format may vary, the completed final draft of the Thesis submitted to the faculty advisor and second reader must contain the following:

1. title page;
2. table of contents (without page numbers);
Illustration pages must be numbered consecutively and display a figure or plate number and page number. The captions must also include the image source.

Example:

Paul Cezanne, *Mt. Ste. Victoire from Bibemus Quarry* ca. 1898, oil on canvas, 25 1/2" x 32".

MA Essays are not submitted to the Graduate Office and therefore are not held to the same strict formatting specifications; however, MA Essays should also follow the same general format.

---

**Communication**

Office: 585 Manoogian Hall; 313-577-2943  
Chairperson: Katheryn Maguire  
http://comm.wayne.edu (http://www.comm.wayne.edu/)

The Department of Communication, in the College of Fine, Performing, and Communication Arts, offers graduate study leading to a doctoral degree, master’s degree, and graduate certificate. The Department includes about thirty full-time faculty members with strong backgrounds in scholarly and professional approaches to the study and practice of communication. The Department has about 650 undergraduate majors and 150 graduate students. Approximately twenty-five graduate assistantships are offered each year to doctoral students.

The Department and faculty offices are in Manoogian Hall, located near the intersection of the John C. Lodge Freeway and Warren Avenue, in the heart of Detroit’s Cultural Center. There are two media production facilities associated with the Department: the Midtown Studio (developed in partnership with Detroit Public Television, Channel 56) on the main floor of 5057 Woodward and the Media Arts production labs in the Old Main building, at the intersection of Warren and Cass Avenues. Most graduate courses are offered in the evening in Manoogian Hall.

**Departmental Philosophy**

Communication is a human activity in which ideas, information, and perceptions are shared. The study of human communication involves the theory, research, and practice of human interaction among individuals, groups, institutions, and cultures, using quantitative, qualitative, rhetorical, and critical approaches.

The graduate program in communication is designed to establish and maintain high standards of scholarly research and creative/professional activity, while providing excellence in academic instruction at both the theoretical and applied levels. The graduate program encompasses the full range of empirical, rhetorical, and creative approaches, in which each student is focused through a personal Plan of Work.

Alumni of the program are skilled researchers, practitioners, critical consumers, and thoughtful observers of communication processes. While many serve as recognized scholars and educators throughout the country and world, others occupy responsible positions as communication professionals in business, government, and industry.

The research interests and methodological approaches of the faculty are diverse. Faculty members and graduate students have written extensively on computer-mediated communication, critical and cultural studies, dispute resolution, health and risk communication, interpersonal communication, journalism studies, media effects, media studies, organizational communication, public relations, and rhetorical theory and criticism. Faculty members also have diverse professional backgrounds and experiences and have won numerous state, regional, national, and international creative/professional awards. The graduate program is deeply committed to research and scholarship on the interrelations of theory, practice, research, experience, strategy, and ethics.

- Communication (Ph.D.) (p. 191)
- Communication and Urban Sustainability (Ph.D. Dual-Title) (p. 191)
- Communication (M.A.) (p. 192)
- Dispute Resolution (M.A.D.R.) (p. 195)
- Dispute Resolution (M.A./J.D. Joint Degree) (p. 196)
- Dispute Resolution (Graduate Certificate) (p. 196)
- Communication and New Media (Graduate Certificate) (p. 196)
Communication (Ph.D.)

At the Ph.D. level the primary aim of the Department is to help students develop the theoretical basis and the analytical and research skills necessary for scholarly inquiry into various communication acts, processes, and contexts. Courses in the Department are designed to serve several specific purposes:

1. To promote research and study into all aspects of communication process and effects.
2. To provide intensive inquiry into communication areas such as computer-mediated communication, critical and cultural studies, dispute resolution, health and risk communication, interpersonal communication, journalism studies, media effects, media studies, organizational communication, public relations, and rhetorical theory and criticism.
3. To prepare students for communication related careers in public service organizations and private business.
4. To prepare communication educators.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Admission to the Department’s Ph.D. program is competitive and is based on an applicant’s entire academic record; requirements stated below are minimum standards for consideration and do not guarantee admission. The Department requires an M.A. degree in communication or a related field, with a minimum 3.5 grade point average on a 4.0 scale. In those instances where an applicant’s M.A. is not communication-related, or there are fewer than fifteen semester credits in communication, the applicant may be admitted to the department’s master’s degree program until such time as sufficient background for doctoral study is demonstrated. The determination of sufficiency is rendered at an appropriate time by the Director of Graduate Studies, normally after the completion of 12 to 15 graduate hours in communication.

Application: There are six parts to the Ph.D. application process including submission of the following:

1. The Application for Graduate Admission (http://wayne.edu/admissions/graduate/)
2. Three letters of recommendation from persons qualified to assess the applicant’s scholarly potential
3. A two- to three-page statement of the applicant’s academic interests and professional goals identifying faculty with whom the applicant would like to work
4. A sample of sole-authored written scholarship, such as a research paper or a master’s thesis
5. Graduate Record Examination (GRE) scores (minimum 50th percentile required). International students are also required to submit scores from Test of English as a Foreign Language (TOEFL) (minimum 100 on Internet-based Test required) or equivalent tests
6. Official transcripts from each college and university previously attended.

An academic curriculum vitae or professional resume is recommended but not required.

Doctoral Degree Requirements

Doctoral degree requirements consist of a minimum of ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credit. The thirty credit dissertation registration requirement is fulfilled by registering for the courses COM 9991, COM 9992, COM 9993, and COM 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Fine, Performing, and Communication Arts (p. 177).

All students must complete COM 8000: Introduction to Ph.D. Studies in Communication in the first semester of coursework with a grade of B or better. Students must also complete COM 7810: Seminar in Communication Education in their first semester of coursework, but this can be waived. The student’s Coursework Worksheet and Plan of Work must be developed in consultation with the advisor; the Worksheet must be filed within the first eighteen credits and the Plan of Work within the first twenty-seven credits of study.

Additional requirements include:

• Minimum five Tool/Methods courses. Up to two graduate-level transfer courses may be applied, but these will not count toward the required minimum sixty credits of coursework. Foreign language reading and writing proficiency as determined by appropriate tests can count as one Tool course, if the adviser judges the language directly relevant to the dissertation project.
• Minimum four Content courses in the Department of Communication that together constitute a research area specialization
• Additional Elective Content courses as needed to achieve minimum sixty credits of coursework (includes up to thirty credits transferred from prior graduate-level coursework, if applicable).
• Content courses (minimum nine credits) outside the Department of Communication that together constitute a Minor/Cognate.
• Minimum thirty dissertation credits (COM 9991, COM 9992, COM 9993, COM 9994, each seven and half credits, to be taken in consecutive semesters).
• Successful completion of the written and oral parts of the Qualifying Examination.
• Successful presentation and defense of the Dissertation Prospectus.
• Successful presentation and defense of the Doctoral Dissertation.

Communication and Urban Sustainability (Ph.D. Dual-Title)

Students admitted to the Ph.D. program in Communication can apply to earn a Ph.D. in Communication with a dual title in Urban Sustainability. This dual title degree is designed to prepare researchers and professionals to solve challenging urban problems that require working across disciplines. Students enrolled in this dual title program will take courses in topics and develop specific skills relating to urban sustainability across several departments. Students in the program will also undertake activities such as community service, participate in colloquiums, and prepare a funding proposal related to urban sustainability. The dual-title coursework follows competencies outlined by the Transformative Research in Urban Sustainability Training program.
Admission Requirements

Applicants must meet the admissions standards of the Graduate School (p. 35) and the Department of Communication and be first offered admission to the Communication doctoral program.

Program Requirements

Students in the Communication and Urban Sustainability dual-title program are required to take eight core classes, at least three research methods/tools courses, and two electives from a list of elective courses (one of which must be from outside the Department of Communication).

Communication (M.A.)

The Department offers a master’s degree in Communication with concentrations in the following areas:

- Communication Studies
- Journalism
- Media Arts and Studies
- Public Relations & Organizational Communication

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Admission to the M.A. program is competitive and is based on an applicant’s entire academic record; the following requirements are minimum standards for consideration and do not guarantee admission. The Department requires that the applicant have a B.A. or B.S. in communication or a related field with a minimum 3.2 (‘B’=3.0) grade point average for the upper-division of coursework (usually the coursework in the major) and a minimum of fifteen credit hours in communication.

The department also closely evaluates the sample of written work and academic/professional statement of purpose for evidence of potential to do graduate-level work.

In instances where an applicant’s B.A. is not in communication and the transcript shows fewer than 15 credit hours of coursework in communication, the applicant may be admitted with a requirement to take specific and/or additional coursework. The Director of Graduate Studies for the Department should be contacted for further information.

Applicants with a grade point average below 3.2 for the upper-division coursework (usually the coursework in the major) may submit Graduate Record Examination (GRE) scores as additional evidence of academic ability. Applicants may also seek admission as a post-bachelor student to the university and take upper-division classes in the Department of Communication to raise their undergraduate GPA. The Director of Graduate Studies for the Department should be contacted for further information.

The M.A. application requires a completed application form, transcripts, academic/professional statement of purpose, and writing sample. Applications are reviewed on a rolling basis throughout the academic year.

Applicants should complete the online Application for Graduate Admission (wayne.edu/admissions/graduate), and upload the following to the application site:

- Degree transcripts from each college and university previously attended. Official transcripts should be sent directly from the degree-granting institution to the Office of Graduate Admissions, Wayne State University, Detroit MI 48202. Unofficial transcripts should be uploaded prior to the document being officially sent to
Graduate Admissions. Information for international applicants for the verification of their degrees is available here: https://gradschool.wayne.edu/admissions/international (https://gradschool.wayne.edu/admissions/international)/

- Academic/professional statement of purpose (approximately 500 words) that presents the applicant’s academic and professional preparation for and interest in the preferred M.A. program and concentration area, academic/professional goals, and explanation of how the graduate degree fits the academic/professional goals.
- Scholarly/academic writing sample, which serves as evidence of preparation to do graduate-level work. The typical writing sample is an individually written final paper or project report of a minimum 8-10 page length from a university course. Applicants are encouraged to submit additional writing samples such as newspaper and magazine articles, excerpts from documentary and movie scripts, press releases, and public relations communications.
- International students whose native language is not English or applicants whose undergraduate degree is not from an English-speaking country also are required to submit official Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores to the Office of Graduate Admissions. Scores must be within five years of the date of proposed admission. Unofficial scores should be uploaded to the online application site prior to the official scores being sent. The minimum acceptable score is 100 on the TOEFL Internet Based Test (iBT) and 6.5 on the IELTS.

Current Wayne State University graduate students wishing to change to a new graduate program from their current graduate program or add a new graduate program to their current graduate program should submit an online application. Students must submit a Change of Graduate Status form (comm.wayne.edu/files/changeofstatus.pdf) to the Director of Graduate Studies. Application materials (unofficial and official degree transcripts, academic/professional statement of purpose, and as appropriate, writing sample and letters of reference) as described above should be submitted with the online application by the application deadline.

M.A. applicants are admitted for the fall and the winter semesters. Deadline for application materials for fall semester admission is August 1; and for the winter semester it is December 1.

Program Requirements
The Master of Arts degree is offered by the Department of Communication. Please see the concentrations for specific degree requirements.

Students must plan a program of study as early as possible in consultation with the assigned advisor. Candidacy must be established by filing an approved Plan of Work by the time twelve credits have been earned. COM 7000 must be included in the Plan of Work and must be taken during the first semester of coursework. All students must complete COM 7000 with a grade of B or better in order to continue in the program. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Fine, Performing, and Communication Arts (p. 177).

Essays or theses may be chosen when allowed as an option in the concentration, after consultation with the advisor. A final oral examination will be held for those writing theses.

Courses that relate to a student’s particular area of interest are selected in consultation with the advisor and are formalized by filing the Plan of Work. The Plan of Work must be approved by the advisor and the Director of Graduate Studies.

Concentrations
Communication Studies
The Master of Arts in Communication with a Concentration in Communication Studies program is designed for students with a general interest in the study of human communication. It is intended primarily for students preparing for doctoral study in communication, or desiring in-depth study of research and analytical skills (a highly desired skill set by employers). The degree requires minimum 30 credits.

Wayne State University Graduate Bulletin 2022-2023 - DRAFT COPY 193
The M.A. concentration in Media Arts and Studies is designed to immerse students in the technological, creative, societal, research and analytical considerations of our globalized, multi-platform, multi-screen media environment. Students matriculating through the program will demonstrate a strong foundation in digital media technology and its applications, along with research and analysis skills that will grant them flexibility to enter a broad range of professional and creative contexts. These include working in public relations, employee relations, and related activities in business, industry, non-profit, and governmental settings. The degree requires a minimum of 30 credits. Requirements include:

**One research methods course:**
- COM 6530 Audience Measurement and Survey Techniques
- COM 7260 Quantitative Research Methods in Communication
- COM 7360 Qualitative Research Methods in Communication
- COM 7365 Ethnographic Methods for Communication Research
- COM 7580 Content Analysis

**Two additional content courses:**
- COM 5200 Special Topics in Advanced Reporting
- COM 5310 Investigative Reporting
- COM 5381 TV News Reporting and Digital Editing
- COM 5410 Producer’s Workshop
- COM 5460 Magazine Writing
- COM 5500 Journalism and New Media
- COM 5610 Advanced TV Production
- COM 6190 Internship

Select one of the following capstone plan options: **9 credits**

**Plan A: Thesis**
- COM 8999 Master’s Thesis Research and Direction (6 credits required, distributed across two or three semesters)

Any one course from the department as elective, minimum 3 credits

**Plan B: Essay**
- COM 7999 Master’s Essay Direction (elected for 3 credits)

Any two courses from the department as electives, totaling 6 credits

**Plan C: Coursework**
- Any three courses from the department as electives, totaling 9 credits

Total Credits: 30

1 Unused Journalism Core Courses can be taken as additional content courses.

**Public Relations and Organizational Communication**

The Public Relations and Organizational Communication concentration emphasizes the theory and application of communication in a variety of contexts. These include working in public relations, employee relations, media relations, public affairs, issue and crisis management, technical and employee communication, and related activities in business, industry, non-profit, and governmental settings. The degree requires a minimum of 30 credits.

**Required courses:**

**Media Arts and Studies**

The M.A. concentration in Media Arts and Studies is designed to immerse students in the technological, creative, societal, research and analytical considerations of our globalized, multi-platform, multi-screen media environment. Students matriculating through the program will demonstrate a strong foundation in digital media technology and its applications, along with research and analysis skills that will grant them flexibility to enter a broad range of professional and creative environments, as well as a foundation for potential doctoral work. The concentration offers electives in media storytelling and production, media studies, media entrepreneurship and management, and media in strategic and applied communication; enabling students to design a program to specifically meet their needs and goals, and the opportunity to explore creative and scholarly approaches to multiple screens. Students may complete the M.A. in Media Arts and Studies with a minimum of 30 credits. Requirements include:

**Code** | **Title** | **Credits**
---|---|---
COM 7000 | Introduction to MA Studies in Communication | 3

**Plan C:**
- Electives (12 cr.)

Total Credits: 30
The earliest date by which a student may apply for the AGRADE program is during the semester in which he/she completes 90 credits toward the undergraduate degree.

AGRADE Credits: Students may elect a minimum of three and a maximum of twelve AGRADE credits. These credits will be used to complete the baccalaureate degree as well as to serve as the beginning of graduate study. Upon formal admission to a master’s program, AGRADE credits are transferred as if they were graduate credits transferred from a graduate program at another university. The remaining graduate credits required for the master’s degree will be earned in the conventional manner following formal admission to the graduate program. Formal admission to the graduate program occurs as AGRADE students complete their baccalaureate degree.

Students admitted into an AGRADE program will develop a Plan of Work for the master’s program, specifying the courses that will be taken in the AGRADE status as well as the courses required for the balance of the undergraduate degree. Note that COM 7000 must be taken in the first semester of AGRADE coursework. The remaining AGRADE courses must be approved by both the student’s undergraduate program advisor and the graduate director of the master’s program. In courses permitting both undergraduate and graduate students to enroll, AGRADE students will be held to the graduate standard.

For more details about the AGRADE program, contact the Graduate Advisor in the Department of Communication (313-577-2959)

**Dispute Resolution (M.A.D.R.)**

*An admissions moratorium is currently in effect for this program.*

The Master of Arts in Dispute Resolution (MADR) is an interdisciplinary master’s degree program housed in the Department of Communication.

The MADR offers a challenging program, informed by a multicultural perspective, in the growing and recognized field of dispute resolution. As an interdisciplinary field, grounded in the fundamental idea that dispute resolution techniques are inherently democratic in giving voice to disputants, the program provides practical and academic experience that constitutes the range of dispute resolution activities: community, civil and school mediation, organizational and family dispute intervention, legal or business negotiation, and international peacemaking and diplomacy.

Applicants must meet the admission standards of the Graduate School (p. 35). In addition, at least a 3.0 grade point average in the upper division of undergraduate coursework is required. Applicants must submit a personal statement of one-two pages outlining their interest in the program and three letters of recommendation.

This master’s degree is offered as a Plan C program only. It requires the completion of the core curriculum (twenty-four credits) plus a minimum of two approved elective courses (minimum of six credits). All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Fine, Performing, and Communication Arts (p. 177). A 3.0 grade point average is required; if a grade below ‘B’ is received in any core course, the course must be repeated promptly and a grade of ‘B’ or above obtained. A grade of ‘B’ or below in any two graduate courses will constitute a sufficient basis for dismissal from the program. Students are expected to file a Plan of Work upon successful completion of nine graduate credits. Upon approval of the Plan, the student’s rank will be changed from ‘applicant’ to ‘candidate,’ provided the grade point average is at least 3.0
Dispute Resolution (Graduate Certificate)

An admissions moratorium is currently in effect for this program.

The Department of Communication Dispute Resolution Program in cooperation with the Law School offers a joint degree program leading to a Master of Arts degree in dispute resolution and a Juris Doctor (J.D.) degree. Students in this program must be admitted to both the Law School and the M.A. program in dispute resolution.

Students in this program must first be admitted to the Law School and then apply to the M.A. program in Dispute Resolution (M.A.D.R.). During their first year of Law School, joint degree seeking students should apply to the M.A.D.R. program using the online Application for Graduate Admission form (see admission requirements for M.A.D.R. listed above).

This degree requires the completion of a minimum 102 credits with the master's degree. Students in the program offered only under Plan C. The first year of study is spent in the Law School. Following completion of the first year and after consultation with the Academic Director of the Law School, students may elect one course per semester, up to a total of four courses, in the graduate M.A.D.R. program. Credit for which is applicable toward the J.D. degree. In addition, Law School courses LEX 7016 (Alternative Dispute Resolution) and LEX 7616 (Negotiation) are considered equivalent to the M.A.D.R. core courses DR 7220 (Neutral Intervention) and DR 7210 (Negotiation), respectively, and their credit may be applied toward the M.A.D.R. Finally, students in this program may apply one Law School course (three credits) toward the satisfaction of the M.A.D.R. elective requirement.

For further information, contact the Academic Director of M.A.D.R. or the Law School Admissions Office.

NOTE: The Law School has an academic calendar and registration process separate from those in the Graduate School. Students must ensure they meet all appropriate application requirements and deadlines.

Communication and New Media (Graduate Certificate)

The Communication and New Media Graduate Certificate emphasizes theory, production, and application of new media technology. The program reflects developments in communication, computer, and telecommunications technologies. Students completing the Certificate will be exposed to and have a basic understanding of the theoretical and applied aspects of new media and communication. Competencies achieved will include, but are not limited to:

1. Awareness of trends toward new media convergence and communication theories;
2. Knowledge of new media effects and audiences; uses of new communication modes; and
3. Recognition of multi-media methods used in online and mobile communications.

Additionally, the program will familiarize students with the design and evaluation of communication messages and software applications.
Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, at least a 3.0 grade point average in the upper division of undergraduate coursework and a personal statement of one-two pages regarding interest in the program and career goals are required.

Certificate Requirements

The Certificate requires satisfactory completion of twelve credits from the curriculum outlined below. Courses must be completed with a minimum grade point average of 3.0 or better, and must be completed within three years of the enrollment. The Certificate allows maximum six credits to count toward both the Certificate and a relevant M.A. program. Transfer of credit from other institutions may NOT be applied toward the credits required for the certificate. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Fine, Performing, and Communication Arts (p. 177).

Total Credits 12

Health Communication (Graduate Certificate)

The Graduate Certificate program in Health Communication is designed to provide research-based, professional study for graduate students interested in the role of communication in the health professions. The twelve-credit certificate focuses on components of health communication and their influence on individuals and communities as well as on knowledge creation and research translation and publication. The program emphasizes the role of theory, methods, and strategies in developing messages designed to improve health outcomes for individuals and communities. The Certificate provides both depth in the study of health communication and breadth through the inclusion of a set of elective health-related courses in Anthropology, Family Medicine and Nursing. The program is sufficiently flexible to accommodate students with broad interests and diverse backgrounds.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, at least a 3.0 grade point average in the upper division of undergraduate coursework and a personal statement of

Certificate Requirements

Twelve credits in the program as outlined below including a required three-credit communication course, six credits of electives and a three-credit elective health-related course. The Certificate allows maximum six credits to count toward both the Certificate and a relevant M.A. program. Transfer of credit from other institutions may NOT be applied toward the credits required for the certificate. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Fine, Performing, and Communication Arts (p. 177).

Risk and Crisis Communication (Graduate Certificate)

The graduate certificate provides professionals and graduate students research-based knowledge and best practices of risk and crisis communication especially in the context of public health emergency events.

Admission Requirements

Applicants must meet the admission standards of the Graduate School (p. 35). A bachelor's degree from a US institution or its equivalent from international colleges and universities. Students with a master's degree or its international equivalent also may enroll. Applicants must have a minimum of a 3.0 grade point average in upper division undergraduate coursework. In addition, preference will be given to students who have worked for a minimum of two years in government, non-governmental organizations, or private firms that focus on emergency management and response, health communication, and risk management.

Certificate Requirements

The Risk and Crisis Communication certificate requires 12 credits of coursework.

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Fine, Performing, and Communication Arts (p. 177). A course substitution may be allowed with a strong rationale for the change and consultation with a faculty advisor. Students in the department enrolled in the M.A. and the graduate certificate program concurrently may have a maximum of 6 credits double-count toward both the M.A. and graduate certificate.

Music

Office: 1321 Old Main; 313-577-1795; e-mail: music@wayne.edu
Chairperson: Norah Duncan IV
Associate Chairperson: Russell Miller
Graduate Officer: Joshua S. Duchan
http://www.music.wayne.edu (http://www.music.wayne.edu/)

Mission Statement

The Department of Music cultivates music as a contemporary and global art, grounded in a long historical tradition, by combining higher education with professional training and experience for its undergraduate and graduate/professional students.

The Department offers serious students of music opportunities to learn, grow, and develop their skills and disciplines in an urban cultural setting. With close proximity to Detroit’s cultural center, students have access to the resources of such premier institutions as the Detroit Institute of Arts, the Detroit Public Library, the Detroit Opera House, and Orchestra Hall.

The long historical relationship between the Detroit Symphony Orchestra and the Department allows students to study and coach with exceptional guest artists and resident artist-faculty who are specialists in all musical styles and media.

Building on the strengths of its geographic and cultural setting, the Department maintains public access to its performances and degree programs, offers high-level professional and academic standards, as well as unique creative and scholarly opportunities appropriate to a large research university. The Department also cultivates a deep aesthetic understanding of music in our students and the larger urban arts community.

- Master of Arts in Music (M.A.) (p. 198)
- Master of Music (M.M.) (p. 198)

Music (M.A.)

The Master of Arts degree is designed for students who wish to pursue an academic career in music through a broad liberal arts curriculum.

Admission to this program is contingent upon admission to the Graduate School (https://wayne-curr.courseleaf.com/graduate/general-information/admission/). In addition, applicants in music must:

1. apply to the Graduate School as a Music Major;
2. possess an undergraduate degree in the same field for which he or she wishes to pursue graduate study, or its equivalent in course work, private study, or experience;
3. complete a pre-admission interview. Interview requirements are available from the Department of Music (http://music.wayne.edu/master-arts/auditions.php).

All students admitted to Master’s degrees are required to pass departmental placement examinations (http://www.music.wayne.edu/graduate_curr.php) in theory and history.

The MA in Music is offered under Plan A: Twenty-four credits in course work, plus an eight-credit thesis.

Prerequisite: Prospective students should present a minimum of forty-five acceptable undergraduate credits in music distributed according to the requirements for the Bachelor of Arts degree with a major in music or its equivalent in course work, study, and experience. All students applying to the MA must complete a pre-admission interview.

Candidacy must be established by the time twelve credits have been earned toward the master’s degree. Applicants become degree candidates only upon recommendation of the Departmental Graduate Officer and submission of an approved Plan of Work. Before a student can be admitted to candidacy in the MA curriculum, satisfactory completion of a reading examination in a foreign language (preferably German or French) is required.

Oral Examination: An oral examination is required of all students in the MA program.

Academic Scholarship: The University requires that each student achieve a minimum grade point average of 3.0, in order to be eligible for a graduate degree. All courses in the student’s major must be completed with a grade of ‘B-minus’ or higher to be counted towards program credit. Grades below ‘B-minus’ are unsatisfactory and constitute valid cause for dismissing a student from a graduate program. The Department of Music permits a student to accumulate a maximum of six credits of ‘B-minus’ grades (in courses other than the area of concentration) as long as they are offset by higher grades so that a 3.0 grade point average is maintained at all times. Additionally, credits of B-minus and below in excess of six credits may result in dismissal from the program, regardless of whether the courses are included in the student’s Plan of Work. All course work must be completed in accordance with the regulations of the Graduate School (https://bulletins.wayne.edu/graduate/general-information/academic-regulations/) and the College of Fine, Performing, and Communication Arts (https://bulletins.wayne.edu/graduate/college-fine-performing-communication-arts/academic-regulations/).

Notes

1. All electives must be approved by the Program Advisor and Department Graduate Officer and listed on the Plan of Work.
2. MUH 7370 and MUH 7991 are not approved for History Electives.
3. MUT 7100 is not approved for Theory Electives.

Music (M.M.)

The Master of Music degree provides a program for students pursuing a professional concentration in:

- Composition/Theory
- Conducting
• Instrumental Performance
• Jazz Performance
• Vocal Performance

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (https://wayne-curr.courseleaf.com/graduate/general-information/admission/). In addition, all master’s degree applicants in music must:

1. apply to the Graduate School as a Music Major;
2. possess an undergraduate degree in the same field for which he or she wishes to pursue graduate study, or its equivalent in course work, private study, or experience;
3. complete pre-admission auditions or interviews. Audition and interview requirements are available from the Department of Music (http://music.wayne.edu/grad-auditions/).

All students admitted to master’s degrees are required to pass departmental placement examinations (http://www.music.wayne.edu/graduate_curriculum.php) in theory and history.

Program Requirements

The Master of Music degree is offered under the following options:

Plan A (concentration in Composition/Theory): Twenty-four credits in course work, plus an eight-credit thesis. Students may choose the composition track or the theory track. For composition-track students, an original composition, separate from the work completed in MUH 7100 and approved by the Program Advisor, serves as the thesis. For theory-track students, a written thesis drawing on current research in theory and analysis, applied toward a project of the student’s choice with approval by the Program Advisor, serves as the thesis.

Plan C (concentrations in Conducting, Instrumental Performance, Jazz Performance, and Vocal Performance): Thirty-two credits in course work, plus a graduate recital.

Candidacy must be established by the time twelve credits have been earned toward the master’s degree. Applicants become degree candidates only upon recommendation of the Departmental Graduate Officer and submission of an approved Plan of Work.

Oral Examination: An oral examination is required of all students M.M. program.

Academic Scholarship: The University requires that each student achieve a minimum grade point average of 3.0, in order to be eligible for a graduate degree. All courses in the student’s major must be completed with a grade of ‘B-minus’ or higher to be counted towards program credit. Grades below ‘B-minus’ are unsatisfactory and constitute valid cause for dismissing a student from a graduate program. The Department of Music permits a student to accumulate a maximum of six credits of ‘B-minus’ grades (in courses other than the area of concentration) as long as they are offset by higher grades so that a 3.0 grade point average is maintained at all times. Additionally, credits of B-minus and below in excess of six credits may result in dismissal from the program, regardless of whether the courses are included in the student’s Plan of Work. All course work must be completed in accordance with the regulations of the Graduate School (https://bulletins.wayne.edu/graduate/general-information/academic-regulations/) and the College of Fine, Performing, and Communication Arts (https://bulletins.wayne.edu/graduate/college-fine-performing-communication-arts/academic-regulations/)

Music: Composition/Theory (M.M.)

Prerequisite: Bachelor of Music with a concentration in composition/ theory or its equivalent in coursework, background, or experience. As part of the pre-admission interview, applicants must present scores and/or theory research materials as evidence of preparation for graduate work in composition or theory.

Arts Administration (M.A.)
The Master of Arts in Arts Administration program offers a broad arts administration education as well as focus within specific areas of practice. The program fosters leadership and management skills, explores processes of innovation and creativity, examines networks and sources of support, while drawing on sound business and administrative training. The program also makes use of local dynamic arts institutions and the smaller entrepreneurial arts and cultural organizations. Students will receive the background to lead arts and cultural organizations such as theaters, galleries, museums, arts and culture festivals, arts centers, arts councils, local and regional arts boards, dance companies, community arts and cultural organizations, and musical ensembles including symphonies, orchestras, jazz and choral groups.

Admission Requirements
Admission to this program is contingent upon admission to the Graduate School (p. 35).

Program Requirements
The program requires a minimum total of 30 credits. The curriculum may be fulfilled with a minimum of 28 credits of coursework and 2 credits of Master's Essay Direction or an approved Directed Study.

Theatre (M.F.A.)
The Master of Fine Arts in theatre is a three-year program of intensive professional training in the student's area of specialization in acting, scenic design, costume design, lighting design, theatre management or stage management.

Admission Requirements
Admission to this program is contingent upon admission to the Graduate School (p. 35). Each area of specialization has specific requirements for application and admission, which are managed through the online application system and are also listed on the Department's website (http://theatreanddance.wayne.edu/theatre/mfa.php). Students must declare their area of specialization upon entry into the program.

Program Requirements
The Master of Fine Arts with a Major in Theatre is offered only as a Plan C master's program, requiring sixty credits in the area of specialization. All programs require a final project and a final oral examination relevant to the degree specialization. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Fine, Performing, and Communication Arts (p. 177).

Theatre and Dance (M.A.)

The Master of Arts degree includes a three-year part-time program of advanced studies in theatre and dance, designed to provide specialized training in research methods and assessment, pedagogical foundations of teaching artistry, artistic practice and inquiry, and community engagement.

Admission to this program is contingent upon admission to the Graduate School (p. 35).

The program requires a total of thirty two (32) credits, and can be completed in one of two options:

- Plan A (Thesis): Includes 24 credits of coursework and 8 credits of Master’s Thesis Research and Direction
- Plan B (Essay): Includes 28 credits of coursework and 4 credits of Master’s Essay Direction

### Plan A: Thesis

School of Information Sciences

Dean: Jon Cawthorne

The Information Profession

The School of Information Sciences (SIS) prepares information professionals to assume leadership roles in libraries and information organizations. By emphasizing the practical application of knowledge and skills, students are trained in the core principles of information management - information access, organization, services, and management - as well as emerging competencies such as digitization, competitive intelligence, information architecture, and website development. SIS faculty research issues that improve library and information services as an essential component to cultural enrichment, knowledge dissemination, economic development, and the overall quality of life.

Qualified information professionals work in varied settings all over the globe. SIS graduates work in libraries as well as diverse information careers in the public, private, and nonprofit sectors. As organizations continue to view their information as a critical resource and place greater importance on its cultivation, SIS graduates can be found enjoying engaging and exciting careers throughout business, law, health sciences, publishing, government, archives and museums, communications and media, engineering, academia, pre-K-12 education, information organizations and industries.

Graduate Degrees

The School of Information Sciences offers two master’s level degree options. The Master of Library and Information Science (MLIS) degree is recognized by the American Library Association (ALA) as the first professional degree in this field and serves as the credential for entry-level professional employment. The Master of Science in Information Management (MSIM) expands the school’s current Graduate Certificate in Information Management (GCIM) into a degree that complements the school’s Master of Library and Information Science (MLIS) degree. The MSIM will appeal to prospective graduate students with an interest in working as information professionals in organizations and industries outside the typical venues for MLIS degree holders (e.g., libraries, archives, or school media centers) where a foundational core of library science coursework is not required.

Accreditation

The School of Information Sciences’ MLIS degree has been accredited continuously by the American Library Association since 1967. The School’s most recent continuing accreditation was granted by the ALA Committee on Accreditation in 2017. The School’s next comprehensive accreditation review occurs in the Fall of 2023.

Mission and Goals of the School

Mission Statement

We combine theories with practices to educate leaders who advance the importance of information in society. We deliver accessible, high quality education incorporating professional scholarship and best practices. We focus on three pillars:

- Library Users and Services
- Information Management
- Archives and Digital Content Management

Goals and Objectives

TEACHING EXCELLENCE: SIS will encourage and teach professional approaches and a service philosophy.

- SIS will educate students in the history, philosophies, theories, principles, policies, and ethics of library and information science.
- SIS will expose students to the historical, social, cultural, educational, political, and economic dimensions of information and information agencies.
- SIS will provide the skills and dispositions for excellence in information service delivery.
- SIS will continuously evaluate and apply evolving technologies to its teaching, learning, research, and service programs.

STUDENT SUCCESS: SIS will cultivate a culture of student success.

- SIS will incorporate career enhancement skills development into all courses.
- SIS will promote relationships between students and other members of the campus community who support student learning and success.
- SIS will deliver a "Distinctively Wayne State" experience that leverages our Detroit location, diversity, and academic and research excellence to better prepare students for success.
- SIS will stress the importance of lifelong learning and will promote opportunities to sustain professional growth and achievement, including career mentoring.

RESEARCH: SIS will foster, facilitate, and support research by faculty and students.

- SIS will support faculty research and scholarly communication.
- SIS will cultivate faculty engagement with student research experiences and skill development.
- SIS will encourage and support students in presenting their research in courses, at conferences, and through publication.
DIVERSITY AND INCLUSION: SIS will be engaged within the diverse communities and world of which we are a part.

- SIS will seek diversity among the faculty.
- SIS will seek diversity and facilitate inclusion among the student body.
- SIS will address the roles of library and information services in a diverse global society, paying particular attention to the underserved.
- SIS will facilitate student experience in multicultural and multiethnic information environments.

COMMUNITY ENGAGEMENT: SIS will practice and foster engagement in traditional as well as interdisciplinary research, scholarship, and practices that address important societal as well as information and library issues.

- SIS will engage the library community, alumni, and employers.
- SIS will promote commitment and involvement in professional associations and organizations.
- SIS will encourage involvement in the community and community organizations.
- SIS will support service activities and participation in leadership roles at the School, University, local, state, national, and international levels.
Graduate Certificate Programs

- Archival Administration (Graduate Certificate) (p. 208)
- Information Management (Graduate Certificate) (p. 208)
- Library and Information Science (Graduate Certificate) (p. 209)
- Library and Information Science (Specialist Certificate) (p. 210)
- Public Library Services to Children and Young Adults (Graduate Certificate) (p. 210)

Archival Administration (Graduate Certificate)

The Graduate Certificate in Archival Administration was established both for individuals entering the archival profession and for those with experience in the field. The certificate program provides a professional education to individuals wishing to identify, preserve, and make archival records accessible for use.

The Archival Administration certificate includes courses which teach students basic archival theory, methods and practice of appraisal, arrangement, description, preservation, reference, and the legal and ethical concerns regarding traditional, visual, and electronic records. In addition, other courses include records management, historical institutions and an archival practicum.

This program is open to students with baccalaureate degrees from accredited universities, students with advanced degrees, and students enrolled in other Wayne State University graduate programs.

Admission Requirements

Admission to the School is contingent upon admission to the Graduate School (p. 35). In addition, Graduate Certificate in Archival Administration applicants must satisfy the following criteria:

1. Possess an undergraduate degree from an accredited college or university.
2. Have an undergraduate grade point average of 3.00 or better or possess another degree beyond the bachelor’s degree. Applicants with an undergraduate grade point average between 2.50 and 2.99 can satisfy this requirement by one of the Alternative Admissions methods (http://sis.wayne.edu/admissions/alternative-admissions.php).
3. Meet the technology requirements (http://sis.wayne.edu/admissions/technology.php).
4. Submit a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) reflecting relevant personal and academic background and experience. The statement should be a minimum of 250 words and a maximum of 500 words (1-2 pages).
5. Submit a current resume or curriculum vitae.

Application:

1. Complete and submit the online Graduate Admission Application form (http://gradadmissions.wayne.edu/apply.php).
2. Compose a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) and upload it to your application.
3. Upload a current resume or curriculum vitae with your application.
4. Pay $50 application fee (https://wayne.edu/admissions/graduate-admission-requirements/).
5. Request official transcripts from each university you have attended and have them sent directly to Graduate Admissions (https://gradschool.wayne.edu/contact/), Wayne State University, Detroit, MI, 48202.

Student Learning Outcomes - GCAA

Students who successfully complete the Graduate Certificate in Archival Administration at the Wayne State University School of Information Sciences will be able to:

1. Describe the history, intent, challenges, and issues of archival management as a profession.
2. Develop the ability to preserve, organize and create access for the historic record.
3. Recognize professional processes to identify, conserve, store, and reformat various informational forms from historic to current.
4. Analyze the intellectual content of archival material to create optimal access (i.e., archival description) and designate long-term historic importance (i.e., archival appraisal).
5. Translate archival theory into professional engagement to better their communities.
6. Determine the best uses of technology for archives and their communities.
7. Support and respect a diverse user base through research, communication skills, and collections.
8. Recognize the importance of advocacy, outreach, education, ethics, and professional values for an archive.
9. Apply leadership and best practices to manage, budget, and implement projects.

Program Requirements

Students in graduate certificate programs at Wayne State must maintain a minimum grade point average of 3.0. The fifteen-credit Archival Administration Certificate includes nine credits of required coursework and six credits of elective coursework. Students working concurrently on the M.L.I.S. degree and the Certificate in Archival Administration are required to complete an additional six credits beyond the thirty-six required for the M.L.I.S. degree.

Students must complete fifteen credits selected from the following:

Information Management (Graduate Certificate)

The Graduate Certificate in Information Management (IM) serves the needs of those who wish to enter the rapidly expanding information
field. This certificate program seeks to provide students, librarians, and information professionals with the tools needed to use technology efficiently and effectively in gathering, storing, and disseminating information. Computers and productivity tools are helping knowledge workers in accessing information, generating insights, structuring results into a useful format, and producing knowledge simultaneously. The use of these productivity tools by knowledge workers requires that information professionals alter their perceived traditional professional role so that they can provide expanded services and support to these knowledge workers as well as to continue to perform their traditional professional responsibilities.

The program is open to students with advanced degrees in related fields, students enrolled in the School of Information Sciences MLIS program or other Wayne State University graduate programs, and, on a case by case basis, students with baccalaureate degrees from accredited universities who possess the appropriate background experience.

Admission Requirements

Admission to the School is contingent upon admission to the Graduate School (p. 35). In addition, Graduate Certificate in Information Management applicants must satisfy the following criteria:

1. Possess an undergraduate degree from an accredited college or university.
2. Have an undergraduate grade point average of 3.00 or better or possess another degree beyond the bachelor’s degree. Applicants with an undergraduate grade point average between 2.50 and 2.99 can satisfy this requirement by one of the Alternative Admissions methods (http://sis.wayne.edu/admissions/alternative-admissions.php).
3. Meet the Technology Requirements (http://sis.wayne.edu/admissions/technology.php). Entering students with strong technology skills are encouraged to submit a request to waive the prerequisite (http://sis.wayne.edu/students/policies/waiver.php), LIS 6080, Information Technology.
4. Submit a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) reflecting relevant personal and academic background and experience. The statement should be a minimum of 250 words and a maximum of 500 words (1-2 pages).
5. Submit a current resume or curriculum vitae.

Application

1. Complete and submit the online Graduate Admission Application form (http://gradadmissions.wayne.edu/apply.php).
2. Compose a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) and upload it to your application.
3. Upload a current resume or curriculum vitae with your application.
4. Pay $50 application fee (https://wayne.edu/admissions/graduate/admission-requirements/).
5. Request official transcripts from each university you have attended and have them sent directly to Graduate Admissions (https://gradschool.wayne.edu/contact/), Wayne State University, Detroit, MI, 48202.

Student Learning Outcomes - GCIM

Students who successfully complete the Graduate Certificate in Information Management at the Wayne State University School of Information Sciences will be able to:

1. Utilize and assess technologies for the creation, production, manipulation, modeling, mining, analysis, control, distribution, access, and use of information.
2. Leverage databases and large datasets to uncover and present insights that drive decision-making.
3. Collaborate with organizations to present their products and services to their users and customers in the most accessible and useful manner.
4. Apply usability principles and methods in assessing and designing information services and products for better user experiences.
5. Analyze how information policies affect information creation, production, control, protection, distribution, access, use and evaluation in different socio-technical contexts.
6. Develop independent learning skills and appreciate the need for lifelong learning of information technologies.

Program Requirements

Students admitted to the Information Management Graduate Certificate Program will be required to complete a minimum of 15 graduate credits. If this certificate is combined with the Master of Library and Information Science degree, 18 hours in the professional core, 15 hours in the Information Management specialization and 9 hours of elective courses will be required.

Students in graduate certificate programs at Wayne State must maintain a minimum grade point average of 3.0. Students working concurrently on the M.L.I.S. degree and the Certificate in Information Management are required to complete an additional six credits beyond the thirty-six required for the M.L.I.S. degree.

Library and Information Science (Graduate Certificate)

The mission of the Graduate Certificate in Library and Information Science (GCLIS) is to equip pre or post-master’s students with specialized competencies and problem solving abilities in a particular area of librarianship or information studies chosen from the wealth of courses offered by the School. For instance, if a GCLIS student would like to update his or her skills in a particular area, he or she may select courses that offer training in recent technologies, techniques, or skills that either were not obtained previously or have since become outdated. Additionally, a student might obtain the GCLIS in order to acquire the
Admission Requirements

Admission to the School is contingent upon admission to the Graduate School (p. 35). In addition, Graduate Certificate in Library and Information Science applicants must satisfy the following criteria:

1. Possess an undergraduate degree from an accredited college or university.
2. Have an undergraduate grade point average of 3.00 or better or possess another degree beyond the bachelor’s degree. Applicants with an undergraduate grade point average between 2.50 and 2.99 can satisfy this requirement by one of the Alternative Admissions methods (http://sis.wayne.edu/admissions/alternative-admissions.php).
3. Meet the technology requirements (http://sis.wayne.edu/admissions/technology.php).
4. Submit a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) reflecting relevant personal and academic background and experience. The statement should be a minimum of 250 words and a maximum of 500 words (1-2 pages).
5. Submit a current resume or curriculum vitae.

Application

1. Complete and submit the online Graduate Admission Application form (http://gradadmissions.wayne.edu/apply.php).
2. Compose a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) and upload it to your application.
3. Upload a current resume or curriculum vitae with your application.
4. Pay $50 application fee (https://wayne.edu/admissions/graduate/admission-requirements/).
5. Request official transcripts from each university you have attended and have them sent directly to Graduate Admissions (https://gradschool.wayne.edu/contact/), Wayne State University, Detroit, MI, 48202.

Learning Outcomes - GCLIS

Students who successfully complete the Graduate Certificate in Library and Information Science at the Wayne State University School of Information Sciences will be able to:

1. Demonstrate competence in a specialized area of librarianship or information studies.
2. Demonstrate up-to-date knowledge in the rapidly-changing field of librarianship and information studies: chiefly the organization, storage, retrieval, and dissemination of the human record.
3. Use problem-solving and decision-making skills to plan, implement, and evaluate specialized library or information services.
4. Develop a specialized competence responsive to the changing economic, technological, or social climate.

Program Requirements

The 15-credit GCLIS program includes 15 hours of coursework. For students completing the certificate only, INF 6080 —Information Technology or equivalent knowledge and skills are required as a prerequisite. Students must maintain a 3.0 average and meet all School requirements for ongoing enrollment including a completed Plan of Work.

Library and Information Science (Specialist Certificate)

The Specialist Program in Library and Information Science is a postmaster’s certificate curriculum designed for the practicing professional who requires specialized competence in an area of librarianship or information management, such as public services, technical services, reference, or information technology. This program enables librarians to:

1. update knowledge in the rapidly changing field of librarianship and information management—the organization, storage, retrieval, and dissemination of the human record;
2. use investigative methods and research findings in problem-solving and in the planning and evaluation of library and information services;
3. advance and extend competencies in areas of specialization begun during the first professional degree program (M.L.I.S.). Specializations may be in a particular library function (such as organization of materials, retrieval of information, information technology, collection development, management, public relations, and adult education), or in a type of information center (such as public, school, academic, and special), or in a service to a specific target group (such as business and industry, early childhood, the elderly, the handicapped, the institutionalized);
4. develop a new specialization responsive to the changing economic, technological, or social climate or to changing conditions in the life of the individual information professional; and/or
5. achieve other professional goals, as needed.

Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, applicants to the Specialist program in Library and Information Science must satisfy the following criteria:

1. Possess a master’s degree in library and information science.
2. Have professional employment experience as a librarian or information specialist.
3. Submit a goals statement reflecting relevant personal and academic background and experience.
4. Submit a current resume or curriculum vitae.
5. Demonstrate professional competence, leadership, and potential for further growth.

Candidates for the Specialist Certificate in Library and Information Science must complete thirty credits of 6000-8000 level course work providing the appropriate degree of concentration relevant to the student’s career goals. Students in specialist certificate programs at Wayne State must maintain a minimum grade point average of 3.0. A Plan of Work and prescribed courses will be developed in consultation with a faculty advisor.

Public Library Services to Children and Young Adults (Graduate Certificate)

The Graduate Certificate in Public Library Services to Children and Young Adults is intended for: practicing library professionals who need to advance their competency in the field of children and youth services; SIS graduate students wishing to pursue a professional career in children and youth services; and graduate students from other disciplines and
professions who wish to obtain public library and youth services skills to aid their organizations in meeting community needs.

Children and young adults comprise a high proportion of the patrons of public libraries - from large urban library systems to suburban library districts to small rural independent libraries. Services to children and young adults requires specialized training in the development of programs, the creation of effective collections, and the skills necessary to collaborate with community organizations who serve children and young adults. Students completing the certificate will be able to:

1. Develop effective programs and outreach services for children and young adults in public libraries.
2. Create appropriate collections, both print and electronic, for children and young adults.
3. Collaborate with community agencies, such as schools, social services and health organizations, to provide needed instruction and support for children and young adults.
4. Apply leadership principles to creating environments for children and young adults that respond to diversity and cultural needs of the community.

Program Requirements

The certificate may be completed in conjunction with the MLIS degree or as a post-MLIS certificate. The fifteen-credit Public Library Services to Children and Young Adults Certificate program includes nine credits of required coursework and six credits of electives. Students choose from among a wide range of elective courses related to children's literature, bibliographic instruction and practical experiences for six hours to complete the certificate.

As with other certificates, nine credits of this certificate may be used toward completion of the Master's degree requirements.

Student Learning Outcomes - GCPLSC

Students who successfully complete the Graduate Certificate in Public Library Services to Children and Young Adults at the Wayne State University School of Information Sciences will be able to:

1. Develop effective programs and outreach services for children and young adults in public libraries.
2. Create appropriate collections, both print and electronic, for children and young adults in public libraries.
Master's Programs

- Information Management (M.S.I.M.) (p. 212)
- Library and Information Science (M.L.I.S.) (p. 213)
- Library and Information Science and History (M.A./M.L.I.S. Joint Degree) (p. 214)

Information Management (M.S.I.M.)

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 38) section of this bulletin. The following additions and amendments pertain to the School of Information Sciences.

The MS in Information Management (MSIM) uniquely prepares students to be successful in data-intensive and user-centric environments. This degree prepares students to support data-driven problem-solving and decision-making in diverse fields. With this degree, students will develop skills necessary to assess, adopt, and utilize information technologies to design positive user experiences and obtain useful insights.

Today, information is a crucial resource – be it social, mobile, cloud or big data. Information professionals with the expertise to find, capture, master, and deliver information are in higher demand than ever before. The MS in Information Management provides the core analytical and problem-solving skills necessary to stay competitive and excel in today’s data-intensive, information-rich environments.

Admission Requirements

Admission to the School is contingent upon admission to the Graduate School (p. 35). In addition, Master of Library and Information Science applicants must satisfy the following criteria:

1. Possess an undergraduate degree from an accredited college or university.
2. Have an undergraduate grade point average of 3.00 or better or possess another degree beyond the bachelor’s degree. Applicants with an undergraduate grade point average between 2.50 and 2.99 can satisfy this requirement by one of the Alternative Admissions methods (http://sis.wayne.edu/admissions/alternative-admissions.php).
4. Submit a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) addressing your experience and familiarity with the required technical competencies needed for admission to the Master of Science in Information Management (MSIM) degree. The statement should be a minimum of 250 words and a maximum of 500 words (1-2 pages).
5. Submit a current resume or curriculum vitae.
6. MSIM students are expected to complete an online New Student Orientation (http://sis.wayne.edu/admissions/onlineorientationdetails.php) prior to starting classes.

Application

1. Complete and submit the online Graduate Admission Application form (http://gradadmissions.wayne.edu/apply.php).
2. Compose a personal statement (http://sis.wayne.edu/forms/personal_statement.pdf) and upload it to your application.
3. Upload a current resume or curriculum vitae with your application.
4. Pay $50 application fee (https://wayne.edu/admissions/graduate/admission-requirements/).
5. Request official transcripts from each university you have attended and have them sent directly to Graduate Admissions (https://gradschool.wayne.edu/contact/), Wayne State University, Detroit, MI, 48202.

Learning Outcomes - MSIM

Students who successfully complete the MS in Information Management at the Wayne State University School of Information Sciences will be able to:

1. Utilize and assess technologies for the creation, production, manipulation, modeling, mining, analysis, control, distribution, access, and use of information.
2. Leverage databases and datasets to uncover and present insights that drive decision-making.
3. Apply principles and methods towards assessing and designing information services and products for better user experiences.
4. Analyze how information policies affect information creation, production, control, protection, distribution, access, use and evaluation in different socio-technical contexts.
5. Develop independent learning skills and appreciate the need for lifelong learning of information technologies.

Program Requirements

The Master of Science in Information Management is offered only as a Plan C master’s program. A maximum of six credits in courses outside of library and information science may be accepted as cognates. Students must maintain a minimum grade point average of 3.0.

The 30-credit MSIM degree includes 5 required courses (4 courses plus a capstone practicum) and 5 elective courses, organized into a variety of specializations. Students are free to combine elective courses from the various specializations to craft a customized Plan of Work that satisfies the student’s particular needs.

5. Request official transcripts from each university you have attended and have them sent directly to Graduate Admissions (https://gradschool.wayne.edu/contact/), Wayne State University, Detroit, MI, 48202.

Learning Outcomes - Master of Library and Information Science

Students who successfully complete the Master of Library and Information Science degree at the Wayne State University School of Library and Information Science will be able to:

1. Critically evaluate, synthesize, and disseminate information.
2. Understand how complex interactions between diverse users, societal factors, and information environments affect professional situations.
3. Facilitate access to, and use of, information resources between users and communities.
4. Apply multiple and emerging approaches to the organization of knowledge for varied literatures, records, and historical documents.
5. Articulate and advocate for the foundations of the profession and its basic values and ethics such as intellectual freedom, information access and dissemination, and apply these principles to the advancement of the profession.
6. Determine the significance of intellectual property, security, and privacy issues.
7. Assess, adopt, and utilize the most relevant information technologies.
8. Utilize current management and leadership theories and practices in the workplace.
9. Evaluate and apply library and information science research to problems of professional practice by employing theories, best practices, and assessment strategies to the range of information functions.
10. Practice professional engagement through leadership, service work, lifelong learning and community involvement.

Program Requirements

The Master of Library and Information Science is offered only as a Plan C master’s program, requiring a minimum of thirty-six credits to be distributed as follows: Eighteen credits in the library and information science professional core, and eighteen credits in elective professional courses.

Library and Information Science (M.L.I.S.)

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 38) section of this bulletin. The following additions and amendments pertain to the School of Information Sciences.

The accredited Master of Library and Information Science (MLIS) degree prepares professionals for leadership roles in libraries and other information organizations. By emphasizing the practical application of knowledge and skills, we educate students in the core principles of information management access, organization, services and support as well as emerging fields such as digital collections, competitive intelligence, information architecture and data analytics. The MLIS degree is available online with selected classes also offered on-campus.

Admission Requirements

Admission to the School is contingent upon admission to the Graduate School (p. 35). In addition, Master of Library and Information Science applicants must satisfy the following criteria:

1. Possess an undergraduate degree from an accredited college or university.
2. Have an undergraduate grade point average of 3.00 or better or possess another degree beyond the bachelor’s degree. Applicants with an undergraduate grade point average between 2.50 and 2.99 can satisfy this requirement by one of the Alternative Admissions methods (http://sis.wayne.edu/admissions/alternative-admissions.php).

Total Credits: 18

A maximum of six credits in courses outside of library and information science may be accepted as cognates. Students must maintain a minimum grade point average of 3.0.

A Plan of Work is a formal statement of the goals and prescribed courses of a student's academic program. SIS requires that a Plan of Work be submitted after completion of nine credits of graduate course work. The Plan is prepared in consultation with the faculty advisor and may be organized around one or more areas of specialization. The emphasis may relate to the type of environment in which the student intends to work or to specialized job activities or functions. Faculty advisors will assist the student in devising an optimal Plan of Work that meets the student's academic goals. Please visit http://sis.wayne.edu/mlis/index.php (http://sis.wayne.edu/mlis/) for more information on the selection of elective courses.

Library and Information Science and History (M.A./M.L.I.S. Joint Degree)

Joint-degree programs allow students to earn two degrees with fewer credits than if the degrees are earned separately. Students who enroll in the joint program will earn both the M.L.I.S. and M.A. in History degree. Graduates will increase their job market potential and be prepared to enter a new workforce that is capable of appraising and describing historical records, creating websites, and preserving electronic documents. Candidates must complete the required courses as outlined for both programs in order to graduate. Core courses in one program may not be used as elective courses in the other; fourteen credits of electives maybe double-counted.

**Requirements: Library and Information Science**

Students will complete twenty-nine credits in core and elective Information Science courses and seven credits in History elective courses.

Total Credits: 30

Total for both degrees: fifty-three credits (no more than thirteen credits may be double-counted).

Library and Information Science and Public History (M.A.P.H./M.L.I.S. Joint Degree)

Students in this joint program will earn both the MAPH and an MLIS degree. Graduates of the program benefit from the joint preparation in public history and library and information science and increase their potential for finding employment in either field. Students are prepared to enter a new workforce with the skills to appraise and describe historical records, create and maintain websites, preserve electronic documents, and communicate with a public audience. Upon successful completion of this program students will be prepared for employment in a wide range of settings, including libraries, archives, museums, state and federal agencies, and the private sector.

Public history is applied history, and the MAPH leads to employment in occupations as diverse as museum work, library and archival research, public policy analysis, documentary filmmaking, state and national parks, and tourism. Public historians provide an essential service by making historical scholarship accessible to a broad public audience. Libraries, archives, and other institutions that hire information management professionals increasingly seek employees who can communicate with broad public audiences about their collections and holdings, and who can create exhibits and public programming. The MAPH/MLIS joint degree program responds to the changing professional expectations for librarians and archivists.

Applicants to this program must be admitted to both the School of Information Sciences and Department of History MAPH program.

Students complete a minimum of 55 credits total for both degrees (14 hours are double-counted). For the MAPH degree, students complete 33 hours of MAPH credits, inclusive of 8 hours of INF credits that will also count toward the student’s MLIS degree. In SIS, students complete 30 hours of LIS credits and 6 hours of History credits, for a total of 36
credits. The History credits would also count toward the student's MAPH electives.

**Requirements: Library and Information Science**

The MLIS degree requires 36 credits (including 6 credits of HIS courses).

**Total Credits** 18
Wayne State University Law School, founded in 1927, is located in the heart of Detroit’s historic cultural center, offering a unique urban experience. Detroit’s vibrant legal market including government offices, state and federal courts, multinational corporations, unions and major law firms provides students with a wide range of opportunities for employment and externships. Our students are bright, mature, conscientious and altruistic. They come from unique backgrounds and professions, some having previously served as doctors, musicians, actors, engineers and law enforcement officers before pursuing the law. Wayne Law also offers a network of more than 11,000 living alumni, including established leaders of the legal community, practicing throughout the nation and in more than a dozen foreign countries. Our expert faculty's nationally and internationally recognized scholarship adds depth to our students’ understanding of legal theory, doctrine and practice. Wayne Law students, faculty and alumni are deeply engaged in the community and profession.

Accreditation & National Recognition
Wayne State University Law School is accredited by the American Bar Association and is a member of the Association of American Law Schools. The Law School has a chapter of the Order of the Coif, the national honorary society dedicated to the highest standards of legal scholarship.

Setting & Facilities
The Law School is a flagship unit of Wayne State University, a major metropolitan research university located in the heart of Midtown, about four miles from downtown Detroit. Within blocks of the Law School are the Detroit Public Library, Detroit Institute of Arts, Charles H. Wright Museum of African American History, Detroit Science Center and other cultural attractions. The city of Detroit shares an international border with Canada and offers access to Michigan’s largest concentration of law firms and state and federal courts.

The Law School complex includes four buildings - Classroom Building, Damon J. Keith Center for Civil Rights, Law Building and Arthur Neef Law Library with lounges, gathering areas and meeting rooms. The three-floor Arthur Neef Law Library offers print and digital resources, a computer lab, 14 study rooms and wireless access. Special collections cover antitrust law, international law, Jewish law and Michigan law.

Degrees
The Law School offers academic programs leading to the degrees of Juris Doctor (J.D.) and Master of Laws (LL.M.). The J.D. is a graduate degree requiring a baccalaureate degree as a prerequisite. The LL.M. is a graduate degree offered by the Law School in the fields of and corporate and finance law, labor and employment law, and taxation which requires the J.D. or its equivalent as a prerequisite. The Law School also participates in joint degree programs with other Schools and Colleges within the University.

Damon J. Keith Center for Civil Rights
The Damon J. Keith Center for Civil Rights at Wayne Law is a regional hub for civil rights teaching, research and advocacy, training and inspiring the next generation of civil rights leaders in honor of the legacy of Judge Damon J. Keith. At the center, stakeholders gather to analyze policy, law students teach a civil rights curriculum to high school students and leaders dive into the issues of the day, such as tax foreclosures, water shutoffs and police-community relations. The center welcomes the public for lectures by civil rights icons, supports community-based organizations and publishes scholarship about how the law and social justice impact one another. The center offers the nation’s first and only repository dedicated to African-American legal history, along with a traveling exhibition about the 14th Amendment’s guarantee of equal protection under the law.

In summer 2014, WSU was awarded a three-year, $1.3 million grant from the W.K. Kellogg Foundation to launch the Detroit Equity Action Lab at the Keith Center. Through this initiative, 60 leaders working in the many dimensions of racial equity, including arts and media, community development, education, environment, food security, health care and housing, will address issues of structural racism in Detroit.

For more information, visit the Keith Center website (http://bulletins.wayne.edu/graduate/law-school/law.wayne.edu/keithcenter/).

Arthur Neef Law Library
The Arthur Neef Law Library provides a major legal research center for Wayne Law students and faculty. Its special collections include the Alwyn V. Freeman International Law Collection, Driker Antitrust Law Collection, Jewish Law Collection and a comprehensive collection of current and historical Michigan law materials that include the Michigan Supreme Court Records and Briefs, Michigan probate court opinions and Michigan Superfund site documents. The law library is a selective depository for U.S. government publications. The law library’s extensive print and digital resources are accessible online (http://bulletins.wayne.edu/graduate/law-school/library.wayne.edu/neef/).

Databases and other e-resources are easily discoverable and remotely accessible.

The law library building was designed to make optimal use of natural light in reading and study areas. Tables, carrels and soft-seating areas are available throughout the law library and offer wired and wireless access to networked resources. Our students may reserve any of the 14 study rooms through an online reservation system. A computer lab featuring desktop computers, printers and scanners is reserved for the exclusive use of Wayne Law students.
Admissions Policies and Procedures (J.D. Program)

Preparation for law study
The Law School has no requirements with respect to the content of an applicant's undergraduate education, but the Admissions Committee will take into account the nature of college work completed as well as the grades achieved. Proficiency in the English language, both written and spoken, and in analytical skills is essential to the study of law. The suggestions for pre-law preparation in the ABA-LSAC Official Guide to ABA-Approved Law Schools are excellent. The book may be ordered from the Law School Admission Council (http://lsac.org) and is available in most bookstores and libraries.

Admissions Policy
The Law School enrolls one class per year. Each class begins in August. Applications are accepted from Oct. 1 through July 1. Admission to Wayne Law is selective, and there is a great deal of competition to be a member of an entering class.

The Admissions Office uses rolling admissions. As applications become complete they are evaluated for a decision. Applicants are strongly encouraged to apply early as the class fills rapidly as the deadline approaches.

An applicant for admission to the J.D. program must have a bachelor's degree from an accredited college or university or apply pursuant to an articulation agreement with an undergraduate institution that grants the degree upon successful completion of all required first year courses in the Law School. A final official transcript must be sent to the Law School before enrolling.

Each applicant also must take the Law School Admission Test (LSAT) and register with the Law School Data Assembly Service (LDSAS). The Law School requires that students educated in a foreign country submit their transcripts through the Law School Admission Council J.D. Credential Assembly Service. Applicants who completed any post-secondary work outside of the United States, its territories or Canada must use this service for the evaluation of foreign transcripts. The one exception to this requirement is any foreign work completed through a study abroad, consortium or exchange program sponsored by a U.S. or Canadian institution where the work is clearly indicated as such on the home campus transcript.

Applications must take the LSAT no later than June of the year in which they intend to enroll. The Admissions Office will accept LSAT test scores that are up to five years old.

Admissions decisions
At Wayne Law, we use a holistic approach in evaluating applicants. Every application is thoroughly read by an admissions professional and members of the Faculty Admissions Committee. The Admissions Committee considers positively the following factors in reaching admissions decisions:

1. an applicant's academic achievement and potential, as shown by his/her LSAT score and Grade Point Average;
2. an applicant's demonstrated capacity to overcome or persevere against:
   a. socioeconomic disadvantage, whether the applicant would be the first generation of his/her family to attend or graduate from college or professional program and whether he/she was employed or raising a family while attending school; or
   b. substantial obstacles such as family or personal adversity, attendance at an under-performing school (elementary, middle or high school), and prejudice or discrimination;
3. any special circumstances suggesting that the applicant's LSAT score or academic record doesn't accurately reflect his/her current academic potential, such as the age of the applicant's GPA; a marked improvement in grades shown in the later years of college; or other special circumstances the candidate conveys in his or he personal statement or elsewhere in the application; and
4. other factors that foster a diverse and engaged law school environment, such as geographic residence (including in the city of Detroit), work and volunteer experience, leadership qualities, commitment to community and public service, communication skills, multilingual proficiency, and experience of life in a foreign country or on a Native American tribal reservation.

Deferred admissions
The Law School does not defer admissions except for persons called to military service. Any admits who withdraws from the class must submit a new application and fee for the next year for which he or she seeks admission.

Reduced program
The first-year day program curriculum is mandatory, but, under special circumstances including child-care responsibilities, significant health care concerns, or as part of an ADA accommodation; students may be permitted to take a slightly reduced course load. The applicant must submit a written request to the assistant dean of admissions prior to registration setting forth the personal circumstance justifying the request for admission as a reduced load student.

Reconsideration
An applicant may request reconsideration of an adverse admissions decision by writing a letter to the assistant dean of admissions stating the specific reason(s) why reconsideration is merited. The application then will be reviewed by the Admissions Committee. Applicants who have successfully petitioned for reconsideration are those who have submitted updated information, such as improved test scores or additional grades.

Application procedures (J.D. applicants)
Admission to the J.D. program at Wayne Law is highly competitive. Wayne Law receives a large number of applications. Every application receives careful, individualized attention by the Wayne Law Admissions Office and our faculty Admissions Committee. A variety of factors are taken into consideration. Typically, only about 40 percent of applicants are offered admission.

Note: Wayne Law will accept the June 2019 LSAT score for the class entering in fall 2019.

First-year applicants
Application requirements for those seeking admission as first-year students are as follows:

1. Complete the online application form (https://os.lsac.org/Release/Logon/Access.aspx) with an electronic signature. The deadline for application is July 1. To receive priority consideration for scholarships, your application must be complete by March 15.
2. Include with your application a brief personal statement, written by you in your own words. You can use this statement to convey to the Admissions Committee any experiences, interests, unusual circumstances or other information you believe may help the committee evaluate your potential for success at the Law School.
Because we don't conduct individual interviews, your personal statement is the best way for you to tell us what you would most like us to know about you.

3. Have the Law School Admission Council submit a copy of your JD-CAS report (which includes copies of transcripts from all U.S. undergraduate schools) to the Law School. If you earned your bachelor’s (or equivalent) degree from a college or university outside the United States, its territories or Canada, you must use a credential evaluation service. We prefer use of the JD-CAS, but we also will accept evaluations from organizations that are members of the National Association of Credential Evaluation Services or Association of International Credentials Evaluators.

4. Arrange for the submission of two letters of recommendation. The letters should be from individuals such as college professors or others who can comment on your intellectual abilities and academic performance. If you have been out of school for a number of years, you may submit letters of recommendation from an employer. Letters of recommendation should be sent directly to the Law School Admission Council. Additionally, two Law School Admission Council evaluations are recommended but not required.

**Transfer applicants**

A transfer applicant must have completed all of the first-year day or evening courses required by his or her ABA-accredited law school. Transfer students are admitted to the fall term only. The application deadline for transfer applicants is July 1.

A transfer applicant’s file will be ready for review when the Admissions Office has received all of the following:

1. The Law School online application with an electronic signature.
2. An official transcript sent directly from the applicant’s law school with all grades posted for the academic year.
3. A letter of good standing from the applicant’s law school.
4. A JD-CAS report.

**Guest student applicants for fall and/or winter terms**

The transfer applicant requirements and procedures outlined above apply to a law student who wishes to enroll at Wayne Law for one or two terms as a guest student. Application deadline is July 1 for fall term and Nov. 1 for winter term.

In the case of a guest student, the letter of good standing also should include a statement granting permission for the applicant to attend Wayne Law for the semester(s) indicated and an agreement to accept credits earned at the Law School and any other requirements or limitations from the “home” law school.

The application deadline for fall is July 1. The application deadline for winter is Nov. 1.

**Guest student for summer term**

A student from another ABA-accredited law school may take one or two summer courses at Wayne Law provided the student is in good standing and receives permission from his or her “home” law school. Application should be made by submitting the Law School summer guest application form. Application deadline is May 15 for summer term.

---

**Law (J.D.) Academic Regulations**

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 38) section in the Graduate Bulletin. The following additions and amendments are a brief overview of the specific additional and other Academic Regulations that pertain to the Law School.

The faculty of the Law School has adopted Academic Regulations which cover degree requirements, examinations and other academic matters. From time to time throughout the year, the Academic Regulations are updated, so the regulations shown here may not be those currently in force. The most current and complete Academic Regulations are available in the Law School Records Office or on the Law School website (https://law.wayne.edu) website. Compliance with the regulations is required of all law students.

**First-year program**

Wayne Law offers three program options for the first year of study to meet the various needs of a diverse student body. They include a full-time day program, a combined day and evening program, and a part-time evening program.

- **Full-time day program** – students take all courses during the day, completing 30 credits in their first year, 15 credits each semester
- **Combined day/evening program** – students take three courses at night, as well as one or two day courses each semester, completing 22 to 30 credits in their first year, 11 to 15 credits each semester
- **Part-time evening program** – students take three courses all at night, completing 16 credits in their first year, eight credits each semester

First-year students learn fundamental legal theory, as well as how to identify and analyze legal issues, through introductory courses including: civil procedure, constitutional law, contracts, criminal law, legal research and writing, property, and torts.

**Upper-class program**

Wayne Law offers a wide range of courses that prepare graduates for an evolving legal environment. Our faculty’s extensive knowledge and experience allow the Law School the flexibility to adapt courses and programming to shifting legal trends. From health law, public interest law and international law to corporate law, environmental law and more, you’ll find what you’re looking for at Wayne Law.

**Clinics**

Wayne Law’s client clinics are directed by full-time expert faculty members and help bridge the gap between theory and practice. Located on or close to campus and offered for credit, our clinics provide hands-on casework to law students while simultaneously assisting residents of the Detroit metropolitan community.

The Law School offers eight clinics:

- Asylum and Immigration Law Clinic
- Business and Community Law Clinic
- Civil Rights and Civil Liberties Clinic
- Criminal Appellate Practice Clinic
- Disability Law Clinic
- Legal Advocacy for People with Cancer Clinic
- Patent Procurement Clinic
- Transnational Environmental Law Clinic

**Externships**

Externships are an integral part of the experiential learning program at Wayne Law. Students who elect to complete an externship earn academic credit while gaining practical experience outside the Law School walls. Externships develop students’ professional skills, values and judgment as they learn about professionalism, the practice of law and the legal
Wayne Law offers four externship programs:

- Corporate Counsel Externship
- Criminal Justice Externship
- Judicial Externship
- Public Interest Externship

Co-curricular programs
Wayne Law students gain an edge through a number of co-curricular programs designed to sharpen minds and heighten capabilities. Students gain hands-on experience through a number of organizations dedicated to promoting a friendly yet competitive atmosphere and shaping legal minds.

Co-curricular programs are:

- Free Legal Aid Clinic
- The Journal of Law in Society
- Mock Trial
- Moot Court
- Wayne Law Review

Joint Degree Programs
The Law School offers, in conjunction with other colleges of the university, six joint degree programs that allow students to earn both degree and a master’s degree in one of the following disciplines:

- Business administration (M.B.A.)
- Criminal justice (M.S.)
- Dispute resolution (M.A.D.R.)
- Economics (M.A.)
- History (M.A.)
- Political science (M.A.)

Intellectual Property Law Institute
Since several Wayne State University Law School faculty members are experts in areas of intellectual property law, the Law School is able to offer a remarkable variety of courses in such areas as patent, copyright and trademark law.

In addition to these courses, Law School students have the opportunity to take courses at another Detroit law school and at a law school across the border in Canada through the Intellectual Property Law Institute. The Institute was created in 1987 as a cooperative effort of the law faculties of Wayne State University, University of Detroit Mercy and University of Windsor in Ontario. The institute offers an exceptional, rich curriculum for law students with courses and seminars in patents, copyrights, trademarks, trade secrets and know-how, computers and related technology, communications and media, entertainment, technology transfer, trade regulation and the arts. Full-time students at each of the three law schools may register for any institute course and will pay the tuition required at their home institution. The course will be credited toward their law degree.

Levin Center at Wayne Law
Established in 2015, the Levin Center at Wayne Law educates future attorneys, business leaders, legislators and public servants on their role overseeing public and private institutions and using oversight as an instrument of change. Through academic programming, training and research, the Center will equip future lawyers, legislators and leaders with an understanding of how effective legislative oversight can lead to significant and meaningful changes in public policy.

The Center hopes to inspire and train a new generation to embrace their responsibility to ensure public and private institutions operate with integrity, transparency and accountability to the general public in honor of former U.S. Sen. Carl Levin’s distinguished career in public service.

Program for Entrepreneurship and Business Law
The Program for Entrepreneurship and Business Law coordinates Wayne Law’s broad array of business law courses, clinics, externships, and extracurricular/co-curricular and community engagement activities.

The breadth of the field of business and corporate law is reflected in Wayne Law’s extensive business curriculum, taught by widely recognized full-time faculty.

Wayne Law also offers numerous experiential learning and extracurricular and co-curricular activities designed to prepare students to represent entrepreneurs or to become entrepreneurs themselves while supporting entrepreneurship and business development in metro Detroit. In addition, the Law School offers students the chance to represent real clients on real legal matters through the Business and Community Law Clinic and Patent Procurement Clinic.

The Program for Entrepreneurship and Business Law helps aspiring business owners in underserved communities participate in the economic revival of Detroit. The program offers early-stage legal assistance to participating local startups and creates forums for entrepreneurs to receive general legal guidance, access community resources and share their own business experience.

Program for International Legal Studies
International law cuts across all aspects of a Wayne Law legal education. One-third of the faculty teaches and writes on international subjects, and faculty members enjoy world-wide reputations as innovative and prolific scholars. Classes are available on a remarkable range of global topics. Wayne Law’s Jessup International Law Moot Court Team has won the Midwest championship two of the past three years.

The Program for International Legal Studies offers students the opportunity to explore international law through classes, summer internships abroad and co-curricular activities. It hosts an annual lecture series that brings renowned international law experts to campus. The program also hosts conferences on critical issues in international law. In addition, the program sponsors opportunities for students to work on international legal issues first hand.

Bar Admission
Wayne Law is committed to helping our students succeed in law school and pass the bar examination. We believe this journey starts in your first year of law school, as students begin to master the first-year law courses, and continues through the middle and final years at Wayne Law. Our programs are designed to provide additional bar support, using diagnostic exams to predict areas that students should focus on as well as free programs to enhance essay writing skills.

In addition to our programs, we provide expert individual advice and guidance. Wayne Law students graduate with the tools and support to start bar examination preparation and ultimately to be successful in the bar exam.

Student Affairs encourages students to begin preliminary bar preparation in their first year. Our director of academic success and bar preparation...
can help students create a bar exam plan for each of their years at Wayne Law.

**Degree Requirements**

Students should consult Section I of the Law School Academic Regulations (https://law.wayne.edu/academics/) for a complete list of the requirements for the J.D. degree. Following are some of the most important requirements:

- **Total credits required.** You must complete 86 credits with a cumulative grade point average of 2.0 or better.

- **Required courses.** You must successfully complete Civil Procedure A & B, Constitutional Law I, Contracts A & B, Criminal Law, Legal Research and Writing, Property and Torts in the first year of law school and Professional Responsibility and the Legal Profession as an upper level student.

- **Upper-class writing requirement.** To satisfy the upper-class writing requirement you must participate in a class or activity offering a rigorous writing experience after your first year. Qualifying activities include Criminal Appellate Practice Clinic, Appellate Advocacy, a directed study paper, and participation on Wayne Law Review, The Journal of Law in Society or Moot Court. You also may satisfy the requirement by taking any other course, clinic, workshop or seminar with a substantial writing requirement but only if you submit to the Records Office a signed certificate by the appropriate deadline.

- **Professional skills and experiential learning requirement.** If you started at the Law School between the fall 2005 semester and the summer 2013 semester, you must complete the professional skills requirement by taking a curricular offering of two or more credits that provides substantial instruction in professional skills beyond traditional legal research, writing and analysis.

- **Residence credit requirement.** You must complete three years in residence. A student who completes 10 credits or more in a given semester will receive one-half year of residence credit. A student who completes fewer than 10 credits in a semester will receive residence credit based on the ratio of the number of credits completed and 10 credits. You may not earn more than one-half year of residence credit during one semester, and credits earned in one semester cannot be applied to residence credit in any other semester.

- **Time limit for completing graduation requirements.** While transfer between programs is possible, a J.D. student who enters the Law School as a full-time student must complete the requirement for the J.D. degree within five years of starting the program, and a student who enters as a part-time student must complete the requirements within six years.

- **Limitation on clinical and externship courses.** Students may take not more than 14 credits of clinical and externship courses toward completion of degree requirements.

- **Transfer credits.** The Law School will transfer credits from all American Bar Association-approved law schools for courses in which the student received a grade of "C" or better. If a course is graded on a Pass/Fail or No Credit scale, the Law School only will transfer credits with a certification from the institution that a Pass is equal to a grade of "C" or better. The Law School will transfer the credits upon receipt of an official transcript sent directly from the credit-granting institution. Transfer credits are reviewed by the assistant dean of student affairs in consultation with the registrar. The student’s Law School transcript will show credit, but not grades, for courses carried and completed at other law schools. A transfer student only may receive credit for a course taken at the Law School or substantially overlaps with coursework taken at another school with the advance permission of the assistant dean of student affairs.

The above represents only a summary of the requirements for graduation. To be sure you understand all of the requirements you should carefully consult the Law School Academic Regulations.

**Law (J.D. /LL.M. Joint Degree)**

Applicants must meet requirements for admission to the Graduate School (p. 35). Applicants must also have at least a 3.0 cumulative G.P.A. in their J.D. courses at the time of application to the joint degree program, as well as a B or better in any J.D. courses to be credited towards the LL.M. degree. Students will be formally admitted to the LL.M. program upon completion of the J.D. degree requirements, assuming that they continue to satisfy the requirements for admission.

Students interested in the J.D. degree program should apply to the joint degree program after completing their 1L year but before entering their 3L year (or upon completion of equivalent credits, if part-time students). Students would work with Wayne Law’s Graduate Studies director to plan their courses for the 2L and 3L years, as applicable, to include appropriate courses that are creditable towards the LL.M. major they elect to pursue.

The J.D. degree requires a 1L curriculum consisting of civil procedure (parts A and B), constitutional law, contracts (parts A and B), criminal law, legal research and writing, property, and torts. J.D. students must also take an upper-level course in professional responsibility and satisfy an experiential learning requirement through clinic, externship or professional skills/simulation courses as well as an upper-level writing requirement. J.D. students must complete a total of 86 credit hours at a 2.00 G.P.A. or higher to receive the degree.

The LL.M. majors each have certain required courses and a list of approved courses, as set out in the Master of Laws Academic Regulations. LL.M. majors also have a small number of elective credits that may be taken outside the list of approved and required courses. A
maximum of 12 credits may be double-counted towards both degrees. The credits that will count towards the LL.M. degree from the J.D. courses include the LL.M. required courses and additional specified courses from the list of approved courses for that major, as set out below. Courses taken in the J.D. program that are neither required for the LL.M. major nor on the approved list for that major cannot be credited to both the J.D. and LL.M. degrees.

Law (LL.M.)

Lawyers who already have received a J.D. degree from an accredited U.S. law school or an equivalent degree in another country and satisfy Wayne Law’s LL.M. admissions criteria are eligible to undertake advanced legal studies for a master of laws (LL.M.) degree at Wayne Law.

Majors

Domestic and international students seeking specialized legal knowledge and skills may undertake an LL.M. degree with a major in one of the following substantive law areas:

- Corporate and finance law
- Labor and employment law
- Taxation
- U.S. law (open to international students who seek a general understanding of the U.S. legal system to enhance their home country practice)

Admission requirements

The basic requirement for admission to the LL.M. program is a demonstration of sufficient ability to be a successful student. This ability may be demonstrated by a record that includes the following:

1. A J.D. (or LL.B.) degree from a law school that is approved by the American Bar Association and is a member of the Association of American Law Schools.
2. A J.D. (or LL.B.) degree from a law school that is approved by the American Bar Association but is not a member of the Association of American Law Schools, but only if the applicant has compiled a distinguished academic record at that law school.
3. The equivalent of a J.D. or LL.B. degree from a law school outside the United States at which the applicant compiled a distinguished academic record. Applicants must receive a score of 600 or above on the Test of English as a Foreign Language (TOEFL), or 250 or above on the computer-based TOEFL, or 100 or above on the internet-based TOEFL, or 7.0 or above on the International English Language Testing System (IELTS) exam, although a waiver of this requirement may be granted based on other evidence of English language competency. Individuals are ineligible for admission to the United States Law LL.M. Program if they have received a J.D. degree from a U.S. law school.
4. In extraordinary cases, the Graduate Committee, on the recommendation of the director of graduate studies, may admit to the LL.M. degree program an applicant who has graduated from a United States law school that is not approved by the American Bar Association if the applicant has been admitted to practice without limitation in one of the states of the United States and has clearly demonstrated by experience, academic performance and other qualifications the ability to perform well in the LL.M. program. The director of graduate studies shall sign and place in the student’s file a statement of the considerations that led to the decision to admit the applicant.

Each state applies its own criteria for allowing applicants to take the bar examination and for admitting attorneys to practice law. Completion of the LL.M. degree does not qualify a student to apply for permission to take the bar exam in every state. Lawyers from other countries seeking to practice law in the United States should obtain information regarding the requirements for admission to the bar in the state(s) in which they wish to practice.

How to apply

Admission to this program is contingent upon admission to the Graduate School (p. 35). Among the required documents are “official transcripts.” Official transcripts are those issued directly by your previous institution. They usually include a school imprint, seal, or original signature and stamp of the registrar or senior school official. Transcripts cannot be transmitted via the applicant and must be sent by the institution to Wayne State University and cannot read “issued to student.” Electronic transcripts will be accepted if they are delivered securely from the registrar of the issuing institution directly to the Office of Graduate Admissions.

Specific questions about the program may be directed to the director of graduate studies (llmprogram@wayne.edu).

LL.M. application deadlines are:

- Nov. 1 - winter term
- March 15 - spring/summer term
- July 1 - fall term

Applicants from abroad are encouraged to apply substantially earlier to allow sufficient time to obtain the necessary visa and other documents.

Degree Requirements

The requirements and expectations for the LL.M. degree are set forth in the Master of Laws Academic Regulations, which should be read in conjunction with the Wayne Law Academic Regulations.

The LL.M. curriculum includes day and evening courses taught by nationally recognized faculty and expert practitioners. Each LL.M. major requires that a student take specified core courses and allows a student to select electives from a large list of law courses approved for credit toward that particular major. In addition, LL.M. students majoring in one of the substantive law areas may select electives from among approved courses for their majors in other university departments or schools, such as business, finance and industrial relations. (Certain restrictions apply if equivalent courses are offered in the Law School in the same academic year.) LL.M. students other than those majoring in U.S. law also must complete a master’s thesis, written and researched in collaboration with a faculty adviser, as the capstone of their studies.

Courses are offered during three terms with the broadest offerings in the fall semester (beginning in late August) and winter semester (beginning in January). Additional courses are offered in the summer/spring term (beginning in mid-May). Course scheduling changes from year to year depending on faculty teaching commitments, but tentative schedules for two-year cycles are available on the website so that students can plan their pathways to the degree. Students should consult with the LL.M. program director and faculty in their major areas to determine reasonable schedules of courses.

Although students may initiate their LL.M. degree studies in the winter semester, students are encouraged to enroll in the fall semester so they can participate in the fall orientation program for new students (generally offered in the week prior to the commencement of the fall semester) and register for core courses (such as Taxation for tax majors, Corporations for corporate and finance law majors or Survey of U.S. Law for U.S. law majors) that may not be offered in the winter semester and are often prerequisites for more advanced study.
LL.M. students are permitted to take up to six years to complete their degree. Full-time students usually can complete their LL.M. coursework in one year (often including work on the master's thesis over the summer), while part-time study generally requires two or more years.

**Law - Studies in Law (M.S.L.)**

Wayne State University Law School's online Master of Studies in Law (M.S.L.) (https://law.wayne.edu/msl/) degree is specifically designed to help specialists in human resources expand their knowledge of legal principles and the U.S. legal system.

The Master of Studies in Law (M.S.L.) degree requires the satisfactory completion of 30 credits. The program is available on a part-time basis but the requirements must be completed within six years.

The program includes the following specialized courses in workplace-related law:

- Employment Law
- Employment Discrimination
- Labor Law and Practice
- Employee Benefits
- Dispute Resolution in Employment
- HR Capstone Paper

Students will also be required to complete foundation courses that provide a solid grounding in legal principles and doctrine—an abbreviated version of the first year of law school. Those courses include:

- Working with Lawyers
- Survey of the Common Law
- Civil Procedure and Introduction to Dispute Resolution
- Government Organization and Regulation
College of Liberal Arts and Sciences

Dean: Stephanie Hartwell

The College of Liberal Arts and Sciences comprises the traditional academic disciplines and may be considered the academic core of the University. Composed of nineteen departments, a variety of programs, and over 400 faculty members, the college is able to offer a rich and broad-based education in the liberal arts and sciences. Curricula leading to master’s and doctoral degrees are offered in the physical and natural sciences, mathematics, the social sciences and the humanities. Some programs provide practical training and lead to professional certification. Most doctoral programs acquaint students with methods used in scholarly inquiry and require students to complete an independent research study. Students thus contribute to the University’s mission to increase fundamental knowledge and apply that knowledge to the betterment of the human condition. Faculty in the College of Liberal Arts and Sciences have been recognized nationally and internationally for their important contributions to research and for their scholarly publications. Working with these faculty mentors, graduate students acquire an education that leads to the joy of intellectual discovery and its application in the real world.
Academic Regulations for the College of Liberal Arts and Sciences

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 38) section of this bulletin. The following additions and amendments pertain to the College of Liberal Arts and Sciences.

Graduate Programs Admission Requirements

Admission to any graduate degree program is contingent upon meeting the admission requirements of the Graduate School (p. 35).

Preference is given to those students who have achieved superior undergraduate scholastic records and who evidence superior abilities.

All credits prerequisite to a degree or certificate program must be earned prior to or concurrent with the initial graduate credit applicable to the program. If undergraduate preparation for the major field is considered deficient, additional coursework may be required at the undergraduate level. Many programs have additional individual admission requirements. Students should consult the subsequent departmental sections in this bulletin for specific requirements in each field of study.

Graduate Record Examinations

The Graduate Record Examination (GRE) is used to assist advisors in evaluating educational preparation and to serve as a basis for planning future study. There is no uniform policy concerning GREs. Some departments require GRE scores from all applicants for admission, while others require scores only from students in specified classifications. Students should consult the department in which they wish to major to determine which examinations must be taken.

Students required to take these examinations must apply at the Testing and Evaluation Office, 698 Student Center, either prior to or at the time of admission. Students who previously have taken the examination may have transcripts of these scores submitted. After the initial registration, no subsequent enrollment will be permitted nor will candidacy be authorized until examination requirements have been fulfilled.

AGRADE — Accelerated Graduate Enrollment

The College of Liberal Arts and Sciences has established an accelerated combined undergraduate and graduate program ('AGRADE') whereby qualified seniors in the College of Liberal Arts and Sciences may enroll simultaneously in some undergraduate and graduate programs of the College. A maximum of sixteen credits may be applied towards both undergraduate and graduate degrees in a student's major field if the major department is an 'AGRADE' participant. (Students should contact the chairperson of their major department to ascertain its 'AGRADE' status.) Those who elect the 'AGRADE' program may expect to complete the Bachelor's and Master's degrees in five years of full-time study.

Eligibility: 'AGRADE' applicants must have an overall g.p.a. of 3.5. Applicants are also expected to have performed at a superior level in their major, as determined by the major department and reflected in a g.p.a. in the major of at least 3.6 at the time of application.

Application: A student seeking ‘AGRADE’ status should present to the Graduate Admissions Committee of his/her major department all of the materials which that department requires for normal admission, EXCEPT for the Graduate Record Examination (GRE) required by some departments. For departments in which the GRE is required, it is expected that this examination will be taken at the normal time and scores forwarded to the major department. Specific departmental admission requirements can be found in this bulletin or obtained from the Graduate Office of the College of Liberal Arts and Sciences (313-577-5188).

The earliest date by which a student may apply for the 'AGRADE' program is during the semester in which he/she completes ninety credits toward the undergraduate degree.

AGRADE Credits: Students may elect a minimum of three and a maximum of sixteen 'AGRADE' credits. These credits will be used to complete the baccalaureate degree as well as to serve as the beginning of graduate study. Upon formal admission to a master’s program, ‘AGRADE’ credits are transferred as if they were graduate credits transferred from a graduate program at another university. The remaining graduate credits required for the master’s degree will be earned in the conventional manner following formal admission to the graduate program. Formal admission to the graduate program occurs as AGRADE students complete their baccalaureate degree.

For more details about the ‘AGRADE’ program, contact the chairperson of the department in which ‘AGRADE’ enrollment is sought or the Graduate Office of the College of Liberal Arts and Sciences (313-577-5188).

Degree Requirements

Graduate degrees are conferred not merely upon the completion of a prescribed number of courses nor necessarily after a given period of residence, but rather in recognition of each candidate's outstanding ability and high achievement as evidenced in all course work, research, scholarly writing, examinations and personal fitness for a chosen profession. All course work must be completed in accordance with the academic procedures of the Graduate School and College of Liberal Arts and Sciences. In addition to the general Graduate School requirements for degrees (p. 19) and to the information provided below, other requirements are specified by the individual graduate departments. Students should consult the programs and requirements of the departments in which they plan to major.

Candidacy

Candidacy is an advanced status recommended by student advisors and authorized by the Graduate School or Liberal Arts and Sciences Graduate Office upon evidence of superior scholarship, appropriate personal qualities and promise of professional competence. Students should note that admission as an applicant does not assure acceptance as a candidate for a degree, and that candidacy is a necessary but not sufficient requirement for graduation.

To be eligible for candidacy, students must file officially approved Plans of Work. The Plan should provide for effective concentration in a major field, with proper supporting courses in related fields. Ph.D. applicants should file their Plan with the Graduate School; master's applicants should file with the graduate officer of the College of Liberal Arts and Sciences. In preparing a Plan, students should evaluate with care their personal and professional objectives as well as all degree and departmental requirements. Normally, a student enrolled in a master's degree program is expected to file a Plan of Work by the time twelve graduate credits or their equivalent have been earned.

It is recommended that an approved Plan be filed by applicants for the Ph.D. degree before approximately forty credits beyond the baccalaureate degree have been earned. In addition to filing the Plan, students must satisfy any foreign language requirements.
Candidacy is reached after the Plan of Work has been approved, the final Qualifying Examination has been passed, approximately fifty credits have been completed, and the dissertation committee has been named.

Commencement
Information concerning commencement announcements, caps and gowns, invitations, tickets, time and place, assembling and other relevant items will be mailed to graduates by the Alumni Office prior to the event. Candidates for advanced degrees are requested and expected to attend the commencement at which the University confers upon them the honor of the degree earned.

Master’s Degree Requirements
In most master’s degree programs, the minimum requirement for the degree is thirty-two credits under either Plans A, B, or C as cited below. At least twenty-four credits must be taken in residence. At least six credits of coursework in the major field, in addition to the essay or thesis, must be in courses open only to graduate students (courses numbered 7000 and above).

Plan A requires at least twenty-four credits of course work plus a six to eight credit thesis.

Plan B requires at least twenty-seven credits of course work plus a three credit essay.

Plan C requires at least thirty credits of course work; an essay or thesis is not required. Most departments require a final comprehensive examination as part of Plan C.

Students should consult a departmental advisor for details on the availability of Plan A, B or C in their major field.

Requirements vary by department; see listings under the individual departments for exact information. In accordance with the time limitation of the Graduate School, all requirements for the master’s degree must be completed within a six-year period.

Doctoral Degree Requirements
Preliminary Qualifying Ph.D. Examination
Responsibility for preliminary qualifying examinations is vested in the graduate faculty of each department, specifically in its committee on doctoral study. Accordingly, committees may require this examination of all candidates or of any candidate prior to the final qualifying examination.

Final Qualifying Ph.D. Examination for Candidacy
The final qualifying examination is required of all applicants and will be a written examination. It may also contain an oral portion if the department requires one. Consult the specific department for requirements.

The written qualifying examination will cover the applicant’s major and minor areas and may include such other related matters as the doctoral examining committee may prescribe. If an oral qualifying examination is required, it will be conducted by the departmental qualifying examination committee within sixty days after the written qualifying examination has been passed. This examination will relate to the subject matter of the written examination, the applicant’s major and minor areas and other pertinent matters.

If an examining committee does NOT certify that the applicant has passed either the written or oral examinations, it must make specific recommendations with reference to admitting the applicant to a second examination and specify any additional work that should be completed prior to such an examination. If a second examination is held, it must be scheduled within one calendar year and shall be considered final.

Selection of the student’s doctoral committee, including one member from outside the student’s department, is a requirement for candidacy. Substitutions in the membership of this committee may be made prior to submission of the Outline and Record Form to the Graduate School. After this form is approved, any change in committee membership requires written approval from the Graduate School. This committee conducts the final dissertation defense.

Essays, Theses, and Dissertations
There is no prescribed format for the master’s essay. Essay guidelines, indicating standard style manuals for each department and title-page samples, are available in the Liberal Arts and Sciences Graduate Office, 2155 Old Main.

Master’s degree candidates under the essay plan register for the course numbered 7999, Master’s Essay Direction, in the department of their major; a total of three credits must be elected.

The original copy of the essay should be submitted to the Liberal Arts and Sciences Graduate Office after it is approved and signed by the advisor. This copy will be returned to the department.

The thesis or dissertation must be an original work, either in or definitely related to the student’s major area of specialization. If proper standards of quality, objectivity, originality, and independence are maintained, candidates may use data that they have derived from their University research. Neither the results of the research nor the publication of findings can be restricted by any non-University agency nor can they be published prior to acceptance of the dissertation by the Graduate School unless prior approval of such publication has been obtained from the advisor. Advisors have primary responsibility for approval of the essay or thesis, but every member of a doctoral committee must read, approve and sign the dissertation.

Students may not begin work on a manuscript until they have submitted an approved Plan of Work and outline form. They may then register for the thesis or dissertation credits and pay regular fees in the same manner as for all other course work.

Master’s candidates under the thesis plan register for the course numbered 8999 in the department of their major. This course is entitled Master’s Thesis Research and Direction and must be elected for a total of eight credits. Ph.D. candidates must enroll in thirty credits of doctoral dissertation direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses 9991, 9992, 9993, and 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively) offered under various subject area codes, in consecutive academic year semesters.

Theses/Dissertation Outline and Record Form
Before students begin working on theses or dissertations, they must file outlines and record forms. Master’s candidates must prepare three copies which, after receiving departmental approval, will be forwarded to the Liberal Arts and Sciences Graduate Office. Doctoral candidates must prepare four copies which, after receiving departmental approval, will be forwarded to the Graduate School.
Anthropology

Office: 3054 Faculty Administration Building; 313-577-2935
Chairperson: Krysta Ryzewski
Graduate Director: Stephen Chrisomalis
http://clas.wayne.edu/anthropology (http://clas.wayne.edu/anthropology/)

Anthropology is a comparative social science that seeks to uncover principles that govern human behavior. Anthropology includes the four fields of cultural, biological, archaeological, and linguistic anthropology. Departmental strengths include applied anthropology, medical anthropology, historical archaeology, museum studies, cultural resource management / public archaeology, business / organizational anthropology, language and cognition, urban anthropology, paleo-diet, foodways, environmental anthropology, land-use studies, global health, and social entrepreneurship.

The Anthropology Department offers five different graduate degree options: Master of Arts (MA), Doctor of Philosophy in Anthropology (Ph.D.), and two joint Ph.D. programs in Social Work & Anthropology (SWAN), Anthropology and Urban Sustainability (TRUST) and MD-Ph.D.

Alumni from Wayne State's Anthropology graduate programs are readily employed in a wide range of areas. Some work in traditional institutions such as colleges, universities, and museums, but many are employed in public and private settings. These include health, governmental, international, and social agencies, business and organizational settings, public policy, research and development, design, as well as in positions within government, non-profit, and cultural institutions that require environmental management, historic preservation, archaeology, cultural heritage, and museum-based skills. A master's degree in Anthropology can prepare students for advanced study in professions such as medicine or law. Accordingly, graduate programs in Anthropology are designed to accommodate a variety of specific student interests and objectives.

Individuals who hold degrees in fields other than anthropology and desire admission to graduate degree programs will be individually reviewed. Admission will be granted at the discretion of the Graduate Committee after review of the applicant's background, training, and academic standing; supplementary work may also be individually prescribed.

Academic Scholarship: All course work completed to satisfy the following degree requirements must be done in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224). All students are required to obtain a grade of 'B' in each course that counts toward the degree. A grade of 'B-minus' or below in two courses will be sufficient reason to dismiss a student from a graduate program. For the purposes of evaluating this condition, a grade of 'WF' is considered to be a failing grade.

To repeat a course, a student will need to submit a "Petition to Repeat a Graduate Course" form to the Graduate Committee for consideration. Students may not repeat a class without prior approval.

The Department only allows two course repeats for a class where a student receives an insufficient grade.

- Anthropology (M.A.) (p. 226)
- Anthropology (Ph.D.) (p. 227)
- Anthropology and Urban Sustainability (Ph.D. Dual-Title) (p. 228)
- Social Work and Anthropology SWAN (Ph.D.) (p. 228)

Anthropology (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Additionally, applicants must satisfy the following:

1. The student must have completed ANT 1100 (Introduction to Anthropology) or its equivalent. Admission may be granted while this deficiency is remedied.
2. The student must submit three letters of recommendation.
3. The student must submit a letter of intent outlining his/her research interests and intentions in the field of anthropology, so that the Department may determine if the student's goals are compatible with its available expertise. The student may also mention any life history experience which may be helpful in the decision to admit.
4. A writing sample such as a research paper for a previous course.
5. The student may arrange for his/her Graduate Record Examination (GRE) scores to be sent to the department if he or she wishes.
6. The student must have an undergraduate grade point average (g.p.a.) of at least 3.2. Admission may be granted in exceptional cases where the grade point average is less than 3.2. Admission is contingent upon g.p.a., GRE scores (if applicable), recommendations, the compatibility of research and educational goals with Departmental resources, and the availability of openings in programs with high demand.
7. All applications and admissions material must be submitted to the Office of Graduate Admissions by the following deadlines: October 1 for admittance to the Winter Semester, and January 15 for admittance in the following Fall Semester.

AGRADE Program (B.A to M.A)

The Department of Anthropology offers the Accelerated Graduate Enrollment (AGRADE) Program provides the opportunity for top students to enroll simultaneously in an undergraduate and graduate program. The AGRADE allows qualified full-time students to complete the Master's degree in Anthropology usually within one year of their undergraduate degree.

Students can apply a maximum of 16 credits towards both an undergraduate and a graduate degree in the student's major field. Students electing AGRADE programs may expect to complete the bachelor's and master's degrees in five years of full-time study.

Students must apply for an AGRADE program during the semester that they earn 90 credits toward an undergraduate degree – typically during junior year. Applicants must have a cumulative GPA at the cum laude level (20th percentile, or a minimum of 3.5) and not less than a 3.6 GPA in the major courses already completed.

For more details about the AGRADE program, students should contact Anthropology Advisor Harman Singh at HarmanSingh@wayne.edu or the Graduate Office of the College of Liberal Arts and Sciences at clasgrad@wayne.edu or 313-577-2516.

Program Requirements

Students pursuing the M.A. in anthropology have two options, referred to as Plans B and C, below. ANT 7005 is required for all first-year graduate students.

Students must file a plan of work prior to the completion of twelve credits and must petition the Graduate Committee for any exceptions to the M.A. requirements.
The following courses, or their equivalents, must be completed either as an undergraduate (see note below) or graduate student.

Methods Options

Select one of the following (in consultation with advisor): 4

- ANT 5210 Anthropological Methods
- ANT 5280 Field Work in Archaeology of the Americas

Electives 12

Select four additional courses (at least one anthropology seminar at the 7000 level) in consultation with advisor:

- ANT 7xxx - Seminar
- Elective
- Elective
- Elective

Graduation Requirements

Select one of the following: 3

- ANT 7900 Synthesis (Plan C) ²
- ANT 7999 Master's Essay Direction (Plan B) ³

Total Credits 34

¹ Students entering the M.A. program with a B.A. from WSU who have completed any of the core courses for undergraduate credit (with a grade of 'B' or better) do not need to repeat them, however, they must replace the credits with any other ANT 5000 or higher level course chosen in consultation with their advisor.

² ANT 7900 is an integrative, holistic and comparative course that synthesizes diverse analytical perspectives and methodologies.

³ The M.A. essay, ANT 7999, is a shorter piece of independent work (often 30-60 pages double-spaced) and intended to be written within a single term.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Additional information regarding this program is available from the department upon request.

Anthropology (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Only a limited number of applicants who have demonstrated superior ability can be accepted in this program.

In addition to the transcripts and other materials required by the Graduate School, the Department requires all materials cited above for admission to the Master of Arts program; curriculum vitae; writing sample, three letters of recommendation, and letter of intent. An applicant's admissibility into the doctoral program will not be reviewed until all these materials have been received.

All application and admissions materials must be submitted to the Office of Graduate Admissions by January 15 to begin in the Fall semester.

The Plan of Work must be submitted before forty credits have been completed and before the qualifying examination is scheduled.

Program Requirements

The Doctor of Philosophy requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credit.

A minimum of thirty credits of graduate work must be at the 7000-level or above (excluding dissertation credits). Students must petition the Graduate Committee for course equivalents, substitutes, or any other exceptions to the Ph.D. requirements. The student is expected to command in detail theories, concepts, methodology, and research techniques in common usage in the student's subfield of concentration (cultural anthropology, linguistics, archaeology, or biological anthropology).

In the Qualifying Examinations, the student must demonstrate, by written examination, competence in depth in at least three areas of specialization relating to the dissertation topic, including mastery of a broad range of theoretical materials and an ability to think and write analytically. After passing the Qualifying Examinations and prior to beginning fieldwork, the student must submit the following documents:

1. an oral defense of the dissertation prospectus and an approved doctoral dissertation outline and record of approval form;
2. a prospectus; and
3. a Human Investigations Committee Behavioral Protocol Summary Form, when applicable.

Once the student has attained candidate status, he/she is required to register for doctoral dissertation credits. Students must register for 9000-level credits (ANT 9991, ANT 9992, ANT 9993, and ANT 9994) through the Graduate Office and must fulfill 7.5 credits in these courses each semester for four consecutive semesters (excluding spring-summer). All course work completed to satisfy the following degree requirements must be done in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Additionally, the student is expected to:

1. complete substantial field research, which will ordinarily be of sufficient duration and scope to provide materials for the student's dissertation (in the case of biological anthropology and some other specializations, the dissertation may be based on laboratory research); and
2. submit an acceptable dissertation and present a final lecture.

Coursework: The following courses, or their equivalents, must be completed:

<table>

Anthropology and Urban Sustainability (Ph.D. Dual-Title)

Students admitted to the Ph.D. program in Anthropology can apply to earn a Ph.D. in Anthropology with a dual-title in Urban Sustainability. This dual-title degree is designed to prepare professionals to solve challenging urban problems that require working across disciplines. Students enrolled in this dual title program take courses in topics and develop specific skills relating to urban sustainability. Students in Anthropology will also conduct an internship or science exchange in Anthropology will also conduct an internship or science exchange in Anthropology.

Applicants must meet the admissions standards of the Graduate School (http://bulletins.wayne.edu/graduate/general-information/admission/) and the Department of Anthropology and be first offered admission to the Anthropology doctoral program.

Students are required to take six core courses plus 12 elective credits of Urban Sustainability coursework. A minimum of 7 of the 12 elective credits must be from coursework outside of the student’s home department.

Foreign Language Requirement: Doctoral students must demonstrate a proficiency in an approved scholarly language. In conjunction with your faculty advisor, you will identify the language other than English most relevant to your scholarly work. This should be a language that has a substantial scholarly literature, such as a relevant academic journal. Your advisor, or another faculty member in the department, will select a scholarly passage in that language, roughly 300 words in length, on a subject related to your dissertation research. You have 90 minutes to complete the examination with the aid of a printed bilingual dictionary, but no electronic aids.

Additional Information: A more detailed discussion of the doctoral program is available from the department (http://clas.wayne.edu/anthropology/). Students should also consult the Graduate School's general requirements for doctoral degrees (p.).
students follow a curriculum that draws from existing courses in each discipline, including a core course that focuses on the integration of the two fields. Content combining the perspectives of both disciplines is included in the qualifying exam and dissertation research requirements for the degree.

This program prepares scholars for work in several different occupations, including faculty positions in social work and anthropology as well as work in governmental, non-profit, and international settings.

Academic Scholarship: All course work completed to satisfy the following degree requirements must be done in accordance with the academic regulations (p. 38) of the Graduate School. All students are required to maintain a 'B' average. A grade of 'B-minus' or below in two courses will be sufficient reason to dismiss a student from the program. For the purposes of evaluating this condition, a grade of 'WF' is considered a failing grade.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Only a limited number of applicants who have demonstrated superior ability and potential will be accepted in this program.

Prospective students should apply for admission to either the Social Work or Anthropology Ph.D. programs and specify, using a pull-down menu, their request for admission to the SWAN program. They must meet the admissions standards of both the Graduate School and the SWAN program. Students who do not possess an MSW degree should apply separately to the MSW program and notify the SWAN steering committee of their application to both the MSW and SWAN programs. All application and admission materials must be submitted to the Office of Graduate Admissions by January 10 to begin in the following fall semester.

The Plan of Work must be submitted before forty credits have been completed and before the qualifying examination is scheduled.

The Doctor of Philosophy requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credits.

A minimum of thirty credits of graduate work must be at the 7000-level or above (excluding dissertation credits). Students must petition the SWAN Steering Committee for course equivalents, substitutes, or any other exceptions to the SWAN requirements.

Once the student has attained candidate status, he/she is required to register for doctoral dissertation credits. Students must register for 9000-level credits (SW 9991, SW 9992, ANT 9993, and ANT 9994) through the Graduate Office and must fulfill 7.5 credits in these courses each semester for four consecutive semesters (excluding spring-summer). All course work completed to satisfy the following degree requirements must be done in accordance with the regulations of the Graduate School (p. 38), the College of Liberal Arts and Sciences (p. 224), and the School of Social Work (p. 353).

Coursework:

Student who have not attained the MSW degree are required to obtain this degree prior to graduating with a SWAN PhD. See the MSW Graduate Bulletin entry for details. Students are required to meet with their MSW adviser to develop an MSW plan of work that meets MSW program requirements. With the approval of the SWAN committee and the MSW coordinator, a limited number of SWAN courses may be counted towards MSW requirements.

The following courses, or their equivalents, must be completed by ALL students:

<table>

Total Credits 48

Elective Credits: In addition to the required courses, listed above, a student will select three (3) credits of Social Work electives from either: SW 9050 First Year Seminar (1 cr), SW 9240 Social Work Education (3 cr), SW 9420 Research Practicum (2 cr), SW 9450 Writing for Publication and Presentation (1 cr), or SW 9650 Job Search Strategies. Six (6) electives are also selected from the student’s research area.

Qualifying Exams: The SWAN steering committee will design and administer the SWAN qualifying examinations so that students can demonstrate the breadth, depth and mastery of their theoretical and empirical knowledge related to social work and anthropology theory, research methods and data analysis approaches as well as their substantive domain of knowledge. Students will demonstrate this knowledge through a written examination consisting of four sections:

1. statistics,
2. culture area,
3. research methods, and
4. a substantive paper demonstrating students' application of social science theory and SWAN knowledge to their intended research domain.

The statistics exam will be an in-school, open book exam developed by faculty teaching the required statistics courses. For the take home theory, topic area and substantive paper components, students will, in consultation with their academic advisers, select a three-person examination committee consisting of social work and anthropology faculty. These examination committee members will meet with students to develop reading lists and questions that students will then address in written take-home exams.

Wayne State University Graduate Bulletin 2022-2023 - DRAFT COPY 229
Students who fail one or more sections of the qualifying examination will be expected to retake only those sections that they failed. Students who fail one or more sections of the examination for a second time will be dismissed from the program.

**Foreign Language Requirement:** Students doing SWAN research fieldwork in non-English speaking settings will be expected to have 3 semesters of a foreign language or demonstrate fluency in their field language. These students need to take classes to complete the Anthropology Foreign Language requirement (3 semesters of the same foreign language at the undergraduate level; language credits do not count towards the 90 credits needed for a Ph.D.).

1. a grade of ‘C’ or better in one and one-half years of work in the language offered to meet the requirement (three semesters or five quarters of coursework at any accredited college or university);
2. satisfactory performance on a standardized (Educational Testing Services) examination; or
3. certification of competence to carry out research in the relevant language by a member of the graduate faculty of Wayne State or an equivalent university. The nature of the tools of research and requirements for satisfactory proficiency will be determined by each student's doctoral committee. Additionally mandated tools of research may include additional statistics, mathematics, computer science and/or a field language.

**Additional Information:** A more detailed discussion of this doctoral program is available on the SWAN (http://clas.wayne.edu/swan/) website. Students should also consult the Graduate School’s general requirements for doctoral degrees (p. 35).

### Biological Sciences

**Office:** 1360 Biological Sciences; 313-577-2873  
**Chairperson:** Victoria Meller  
[https://clas.wayne.edu/biology](https://clas.wayne.edu/biology)  
- Biological Sciences (M.A.) (p. 230)  
- Biological Sciences (M.S.) (p. 230)  
- Molecular Biotechnology (M.S.) (p. 231)  
- Biological Sciences (Ph.D.) (p. 231)  
- Biological Sciences and Urban Sustainability (Ph.D. Dual-Title) (p. 232)

### Biological Sciences (M.A.)

#### Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, applicants are expected to have attained a level of scholarship in the baccalaureate program equal to a grade point average of 3.0 or better, including adequate preparation in biological sciences and supporting courses in chemistry, physics and mathematics. Normally, the entering student will be expected to have fulfilled the equivalent of the requirements for the Bachelor of Arts (or Bachelor of Science) degree at Wayne State University and to satisfy any deficiencies by course work before becoming a candidate for the advanced degree.

#### Program Requirements

The Department offers the Master of Arts degree under the Plan C option requiring thirty-two credits of coursework. Course requirements include the following:

**Plan C:** Thirty-two credits in course work are required, with a minimum of seven graduate level courses completed in the Department of Biological Sciences. Cognate credits may be taken in other College of Liberal Arts and Sciences departments, the College of Education, or the School of Medicine with approval from the Departmental Graduate Officer. All students must meet with the Departmental Graduate Officer, Dr. Edward Golenberg, once each semester for approval of course selections.

Students must elect courses according to Departmental requirements (http://clas.wayne.edu/Biology/UndergraduatePrograms/).

**Candidacy:** Applicants become degree candidates after completing twelve credit hours of course work and filing a Plan of Work which must be approved and signed by the Departmental Graduate Officer.

**Academic Scholarship:** All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

### Biological Sciences (M.S.)

#### Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, applicants are expected to have attained a level of scholarship in the baccalaureate program equal to a grade point average of 3.0 or better, including adequate preparation in biological sciences and supporting courses in chemistry, physics and mathematics. Normally, the entering student will be expected to have fulfilled the equivalent of the requirements for the Bachelor of Science degree at Wayne State University and to satisfy any deficiencies by course work before becoming a candidate for the advanced degree. The general portion of the Graduate Record Examination (GRE) is required for
admission to the Master of Science program. Admission is granted for the Fall Semester only.

Program Requirements
The Department offers the Master of Science degree under the Plan A option.

Requirements include the following:

**Plan A:** Twenty-three credits in course work, plus a thesis (eight credits) based on completion of a research program.

Under Plan A, the eight credits of thesis work must be in original laboratory or field research under the direction of the student's major advisor. At least twenty-four of the total credits must be from the Department of Biological Sciences. A final oral examination is required, based on the candidate's course work and research.

Students must complete one semester of two laboratory rotations before choosing an advisor. Students must elect courses according to departmental requirements, including a core curriculum and electives determined by the student's graduate advisor with review and approval by the Graduate Committee Chairperson and the Department Graduate Officer, Dr. Edward Golenberg.

**Candidacy:** Applicants become degree candidates after completing twelve credit hours of course work and filing a Plan of Work which must be approved and signed by the Departmental Graduate Officer.

**Academic Scholarship:** All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Molecular Biotechnology (M.S.)
The Molecular Biotechnology Program is a career-oriented program specifically designed to educate and train technically-oriented people in both the theory and practice of modern biotechnology. The program's main emphasis is on the application of these skills through integration of classroom, laboratory, and research experiences.

Admission Requirements
Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, applicants are expected to have attained a level of scholarship in the baccalaureate program equal to a grade point average of 3.0 or better, including adequate preparation in biological sciences and supporting courses in chemistry, physics and mathematics. The general portion of the Graduate Record Examination (GRE) is required. An introductory genetics course and a microbiology course passed with grades of 'B' or better are required, and completion of an introductory biochemistry course is strongly recommended. Deficiencies in course work must be completed before beginning the program. Students may enter in the Fall semester only.

Program Requirements
The M.S. in Molecular Biotechnology requires thirty-eight credits. Coursework will be completed in accordance with the schedule set by the Program Director, Dr. Weilong Hao. Students must consult with Dr. Hao, each semester prior to registration. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

**Candidacy:** Applicants become degree candidates after completing twelve credit hours of course work and filing a Plan of Work which must be approved and signed by Dr. Hao.

**Proposed Plan of Work**

Biological Sciences (Ph.D.)

Admission Requirements
In addition to the requirements of the Graduate School (p. 35) the applicant should have completed a bachelor's or master's degree with a major in a biological or other science. Applicants who have completed degrees in other disciplines will be considered on an individual basis.

Applicants must submit scores for the general portion of the Graduate Record Exam (GRE). The approval of the Department of Biological Sciences Graduate Admissions Committee is required for admission of applicants. Three letters of reference must be submitted, along with a statement of the Candidate's goals and career objectives. Admission is granted for the Fall Semester only.

Program Requirements
The Doctor of Philosophy degree requires ninety credits beyond the baccalaureate degree. Sixty credits must include the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Select at least twelve credits in Biological Sciences from a core curriculum</td>

</tr>
<tr>
<td>BIO 9996</td>
<td>(minimum 4 credits)</td>
<td>2</td>
</tr>
</tbody>
</table>
Select thirty credits in course work at the 7000-level or higher, exclusive of doctoral dissertation research. Six of those credits must be in courses exclusive of BIO 7996, BIO 8995, and BIO 8999.

The remaining thirty credits must be earned as dissertation credit, taken in consecutive academic year semesters.

<table>

</tr>
</tbody>
</table>

**Academic Scholarship:** All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

**Qualifying examinations** are administered in two parts. The first part is a written test which is taken during one of three testing periods, July at the end of the first two semesters, November in the second year, or April in the second year. A list of examination topics will be generated by the student's dissertation advisory committee at least two months before the scheduled exam.

Students who pass the written qualifying examination take the oral examination within one year of the written test. Students are required to complete a written prospectus of their dissertation research, in the form of a grant proposal. The oral examination will include, but not be limited to, a defense of the prospectus. The examiners will be members of the student's dissertation advisory committee. The oral examination is graded on a pass/fail basis.

**Candidacy** status is reached after the Plan of Work has been approved, the written and oral portions of the qualifying examination have been passed, approximately fifty credits have been completed, and the student's dissertation advisory committee has been named.

**Teaching/Research Requirement:** Every doctoral student is required to teach at least two semesters or have equivalent teaching experience.

Continuance in the doctoral program depends upon satisfactory progress as determined by the student's Dissertation Committee with the Departmental Chairperson as an *ex officio* member.

**Biological Sciences and Urban Sustainability (Ph.D. Dual-Title)**

Students admitted to the Ph.D. program in Biology can apply to earn a Ph.D. in Biology with a dual-title in Urban Sustainability. This dual title degree is designed to prepare professionals to solve challenging urban problems that require working across disciplines. Students enrolled in this dual-title program take courses in topics and develop specific skills relating to urban sustainability. Students in Biology will also conduct an internship or science exchange in Urban Sustainability, help develop and participate in colloquia and seminars, perform community service, and write funding proposals. The dual-title coursework follows competencies outlined by the Transformative Research in Urban Sustainability Training program.

1 In order to satisfy the elective requirement, the topic area must be relevant to the program. Students should consult with their advisor for details.
Chemistry

Office: 169 Chemistry Building; 313-577-7784
Chairperson: Matthew J. Allen; e-mail: mallen@chem.wayne.edu
Associate Chairperson: Jeremy Kodanko
Academic Services Officers: Erin Bachert, Melissa Rochon
https://clas.wayne.edu/chemistry (https://clas.wayne.edu/chemistry/)

General Requirements for Graduate Study in Chemistry

Every student entering the graduate program in chemistry will be required to take a series of entrance (proficiency) examinations covering the major disciplines of chemistry. These examinations, which cover standard undergraduate-level material, will be administered on announced dates in August, January, and May (prior to the start of each term). The examination in each area must be taken every time it is offered until a satisfactory level of proficiency is demonstrated in three of the five major fields.

Demonstration of proficiency in each area may be achieved:

1. by receiving a grade of 'pass' on the proficiency examination; or
2. by completing a 7000-level course in the area with a grade of 'B' or higher.

Full-time graduate students must establish proficiency in three areas within twelve months of commencing graduate study. Part-time graduate students must meet this requirement by the time they have completed twelve hours of graduate credit.

A final oral examination is required of all graduate degree candidates.

- Chemistry (M.A.) (p. 233)
- Chemistry (M.S.) (p. 233)
- Chemistry (Ph.D.) (p. 234)

Chemistry (M.A.)

This degree is designed for those who wish advanced training in chemistry but intend to pursue careers in cognate fields, such as education or business.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35).

Admission may be granted to applicants who have completed one year of college physics, mathematics through calculus, and the equivalent of undergraduate semester credits in chemistry as follows: general chemistry (eight credits), organic chemistry (eight credits), physical chemistry (six credits), quantitative analysis (four credits), and advanced chemistry (three credits). Applicants specializing in biochemistry may substitute advanced biology for advanced chemistry.

A minimum undergraduate grade point average of 2.75 in chemistry and cognate science is required. Students who do not meet the requirements may petition the departmental committee on graduate study for qualified admission. Admissions under this program may include special requirements specified on the basis of the student's previous experience and training.

Program Requirements

This degree is offered only as a Plan C master's program. (Chemistry courses below the 6000 level may not be applied toward this degree.) A total of thirty credits in course work which must include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHM 8850</td>
<td>Frontiers in Chemistry</td>
<td>1</td>

</tbody>
</table>

Select at least eighteen credits in chemistry courses open to graduate chemistry students (excluding research, seminar, CHM 6740 and CHM 8850) of which at least nine credits must be at the 7000 level.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Candidacy must be established by the time twelve credits have been earned. The applicant must file a copy of the Plan of Work with the Graduate Officer.

Chemistry (M.S.)

This is a professional degree for those planning to enter the chemical profession.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35).

Admission may be granted to applicants who have completed one year of college physics, mathematics through calculus, and the equivalent of undergraduate semester credits in chemistry as follows: general chemistry (eight credits), organic chemistry (eight credits), physical chemistry (six credits), quantitative analysis (four credits), and advanced chemistry (three credits). Applicants specializing in biochemistry may substitute advanced biology for advanced chemistry.

A minimum undergraduate grade point average of 2.75 in chemistry and cognate science is required. Students who do not meet the requirements may petition the departmental committee on graduate study for qualified admission. Admissions under this program may include special requirements specified on the basis of the student's previous experience and training.

Program Requirements

This degree is offered only as a Plan A (thesis) master’s program. (Chemistry courses below the 6000 level may not be applied toward this degree.)

Wayne State University Graduate Bulletin 2022-2023 - DRAFT COPY 233
CHM 8830  Seminar in Physical Chemistry
CHM 8840  Seminar in Biochemistry
CHM 6740  Laboratory Safety  1

Select at least twelve credits in chemistry courses open to graduate chemistry students (excluding research, seminar, CHM 6740, and CHM 8850) of which at least nine credits must be at the 7000 level.

Select six credits in chemistry and/or cognate courses  6

CHM 8999  Master’s Thesis Research and Direction  1

Submission of a satisfactory research thesis  8

Total Credits  30-31

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Candidacy must be established by the time twelve credits have been earned. The applicant must file a copy of the Plan of Work with the Graduate Officer.

Chemistry (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). All applications for admission to the doctoral program in chemistry and all adjustments in the program subsequent to admission must have the approval of the Graduate Officer of the Department of Chemistry.

A minimum undergraduate grade point average of 3.0 in chemistry and cognate science is required except by special permission of the Departmental Committee on Graduate Study. An applicant having a master’s degree from another institution must show a grade point average of at least 3.0 (‘B’).

Transfer from the Master’s Program to the Ph.D. Program: In order to transfer to the Ph.D. program, a student must accumulate a minimum of nine credits in chemistry course work numbered 6040-8690 with a grade point average of at least 3.25. An applicant having a lower average must earn the master’s degree with a superior academic record before acceptance as a doctoral applicant.

Program Requirements

Questions regarding requirements should be addressed to the Academic Services Officer. The Doctor of Philosophy degree requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credit, and the remainder of which must include the following:

1. A minimum of six courses (eighteen credits) in graduate course work of which at least nine credits must be in chemistry courses at the 7000 level or above; not less than six credits shall be from outside the major division of specialization. A student who does not pass any proficiency examinations upon entrance to the program will be required to pass an additional graduate course, for a total of seven courses (twenty-one credits). Additional courses beyond the required six or seven, may be specified by the student’s Ph.D. advisor or committee to address deficiencies or to develop expertise in one or more specific research areas.

2. Credit by Examination: Well-prepared students may receive up to nine credits by passing the final examinations in 6000- or 7000-level courses. These may be in either the major or minor fields.

3. Four credits of graduate seminar.

4. One credit in CHM 8850 Frontiers in Chemistry.

5. One credit in CHM 6740 Laboratory Safety.

7. Two credits in CHM 7770 Proposals in Chemical Research.

8. Thirty credits in Ph.D. research involving independent research under the direction of a faculty member in the Department. The thirty credit dissertation registration requirement is fulfilled by registering for the courses:

(Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Candidacy: In order to become a candidate for the Ph.D. degree, an applicant must successfully complete both a written and oral qualifying examination. The written examination consists of an independent research proposal. The oral examination includes the major field and covers minor and cognate fields as well. Any additional requirements set by the Graduate School or the department must be completed. Copies of such requirements may be obtained from the Chairperson of the Departmental Committee on Graduate Study.

234  Chemistry (Ph.D.)
Classical and Modern Languages, Literatures, and Cultures

Office: 485 Manoogian Hall; 313-577-3002
Chairperson: Vanessa DeGifis
Academic Services Officer: Terrie Pickering
https://www.clas.wayne.edu/languages (https://www.clas.wayne.edu/languages/)

- German (M.A.) (p. 236)
- Language Learning (M.A.) (p. 236)
- Near Eastern Languages (M.A.) (p. 236)
- Romance Languages (M.A.) (p. 237)
- Modern Languages (Ph.D.) (p. 238)

Classics (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Additionally, the applicant must present an undergraduate major in Latin, Greek, or Classics, or receive the consent of the graduate advisor for graduate work. Evidence of having passed the Graduate Record Exam is required.

Program Requirements

The master's degree in Classics is offered under the following options:

- **Plan A**: Twenty-four credits in course work, plus an eight-credit thesis.
- **Plan B**: Twenty-eight credits in course work, plus a four-credit essay.
- **Plan C**: Thirty-two credits in course work.

Candidacy must be established by the time twelve credits have been earned.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (http://bulletins.wayne.edu/graduate/general-information/academic-regulations/) and the College of Liberal Arts and Sciences (http://bulletins.wayne.edu/graduate/college-liberal-arts-sciences/academic-regulations/).

Students who plan to pursue a Ph.D. in Classics or a related field should follow Plan A or B in order to demonstrate their ability to conduct scholarly research.

Latin (M.A. Concentration)

Under **Plan A**, course work must include at least twenty-four credits in Latin, exclusive of LAT 5000 and LAT 8999 and at least eight of these twenty-four credits must be in courses numbered 7000 or higher. A final oral examination is required.

Under **Plan B**, course work must include at least twenty-eight credits in Latin, exclusive of LAT 5000 and LAT 7999 and at least eight of these twenty-eight credits must be in courses numbered 7000 or higher. A maximum of four credits in cognate or related fields may be applied under this Plan. A final oral examination is required.

Under **Plan C**, course work must include at least thirty-two credits in Latin, exclusive of LAT 5000 and at least eight of these thirty-two credits must be in courses numbered 7000 or higher. A maximum of four credits in cognate or related fields may be applied under this Plan. A final written and/or oral examination is required.

Greek (Ancient) and Latin (M.A. Concentration)

Under **Plan A**, a minimum of twelve credits in course work is required in each language (Ancient Greek and Latin) exclusive of GKA 5000, GKA 8999, LAT 5000, or LAT 8999. A minimum of two courses (exclusive of thesis courses) in one language must be in courses numbered 7000 or higher. A final oral examination is required.

Under **Plan B**, a minimum of twelve credits in course work is required in each language (Ancient Greek and Latin) exclusive of GKA 5000, GKA 7999, LAT 5000, or LAT 7999. A minimum of two courses (exclusive of the essay course) in one language must be in courses numbered 7000 or higher. The remaining four credits may be in Latin or Ancient Greek; alternatively, a maximum of four credits in cognate or related fields may be applied. A final oral examination is required.

Under **Plan C**, a minimum of sixteen credits in course work must be taken in one language, and a minimum of twelve credits in the other, exclusive of GKA 5000 or LAT 5000. To complete the thirty-two credit requirement, four credits in either language may be added; alternatively, a maximum of four credits in cognate or related fields may be applied. A final written and/or oral examination is required.

Ancient Studies (M.A. Concentration)

A minimum of twenty credits is required in either Ancient Greek or Latin, exclusive of GKA 5000 or LAT 5000, plus six additional credits in Classics (CLA) courses at the 5000 level or above and at least six additional credits in courses selected from the following list. At least two courses elected in this plan must be in courses numbered 7000 or above. A final written and/or oral examination is required.

German (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35).

Program Requirements

The master's degree in German is offered by this department under the following options:

**Plan A**: Twenty-four credits in course work, plus an eight credit thesis and oral examination

**Plan B**: Twenty-nine credits in course work, plus a three credit essay and oral examination

**Plan C**: A minimum of thirty-two credits in course work depending on the Plan of Work. Course work is followed by three written examinations and an oral examination covering graduate studies.

Students planning a teaching career on the college level or intending to continue to the doctoral degree should elect either Plan A or Plan B. Plan C, Language and Culture, is intended primarily for those interested in teaching on the elementary and secondary school levels, or for those with a more general interest in German language and culture.

All students studying for the M.A. in German who have graduate teaching assistantships are required to complete LGL 7850.

Under all Plans, the Graduate School requires a minimum of six credits at the 7000 level or above.

**Academic Scholarship**: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

**Master's Option in Germany**: Students accepted into the German graduate program have the opportunity to earn graduate credit towards a Master of Arts in German while spending two semesters studying at the University of Munich. The opportunity is made possible by the cooperation of the Junior Year in Munich Program, which facilitates the student's matriculation, registration, and housing in Munich.

All students must first be admitted to the German graduate program before they will be considered eligible to participate in this option. Students already enrolled are eligible to participate upon successful completion of sixteen graduate credits within the department with a grade of 'B' or better, approval of the M.A. Plan of Work, and/or the approval of the graduate advisor. Students who wish to spend their first year of graduate study in Munich must complete their studies on the WSU campus in order to receive the M.A. degree. While in Germany the student will complete a minimum of eight credits per semester. WSU credit will be granted only for those classes approved in advance by the graduate advisor and for which the student has earned *benotete Scheine* (graded certificate).

For further details and requirements, see the German M.A. advisor.

Language Learning (M.A.)

*An admissions moratorium is in effect for this program.*

This program is targeted at in-service elementary, secondary, and college-level foreign language teachers interested in ongoing professional development. Students should be advised that it does not provide provisional state licensure (teacher certification), and does not include a practice teaching component. The program can be completed with concentrations in: Arabic, Classics, French, German, Italian, and Spanish.

Admission to this program is contingent upon:

1. admission to the Graduate School (p. 35), and
2. approval of the Master of Arts in Language Learning (MALL) Advisory Committee (based on the applicant's academic record, target language proficiency, statement of purpose, and three letters of recommendation).

The Master of Arts in Language Learning degree is offered under the Plan B (essay) option only. It requires a minimum of thirty-three credits in course work, plus a three-credit essay. Course work is divided into three core areas.

**Total Credits**: 36

The Graduate School requires that a minimum of six credits be completed at the 7000-level or above. The three-credit essay will be written in conjunction with materials learned in the three cores under the direction of a MALL faculty member.

**Academic Scholarship**: Grades of 'B-minus' or lower in any course in the language and culture core or in the methodology core will represent unacceptable work. Students receiving such grades must repeat the course in order to have it count toward the degree. Students must maintain a 3.0 g.p.a. overall. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

**Candidacy** must be established by the time twelve credits have been earned.

Near Eastern Languages (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Additionally, applicants must supply the program with a letter of intent, a 5-7 page sample of academic writing in English, and three confidential letters of recommendation. GRE scores are encouraged, but not required. International applicants must satisfy English proficiency requirements as established by the Graduate School, which may require submission of TOEFL scores.

Admission Requirements consist of: Minimum undergraduate g.p.a. of 2.75 ('C+'); and a minimum of two years of prior study in Arabic.
language, with a minimum g.p.a. in Arabic language courses of 3.5 (B+). Prior coursework in Islamic and/or Near Eastern Studies is preferred. Candidates for the master’s degree with concentration in either Hebrew or Arabic must have an adequate knowledge of at least one Semitic language and some knowledge of the culture of the Near East.

Program Requirements

The master's degree is offered by this department under the following options:

**Plan A**: Thirty-two credits including an eight credit thesis.

**Plan B**: Thirty-two credits including a three credit essay.

**Academic Scholarship**: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

**Candidacy** must be established by the time twelve credits have been earned.

**Arabic (M.A. Concentration)**

A student specializing in Arabic is expected to demonstrate ability in the use of Arabic sources. The student must successfully complete at least one advanced Arabic course in which work is performed with original Arabic sources (ARB 5010, ARB 5020, or ARB 5140; in extraordinary circumstances a student may request acceptance of ARB 5990 as compliance with this requirement) with a grade of ‘B’ or higher while enrolled in the M.A. program. In addition to Arabic language (ARB) courses, the student may elect courses in Near Eastern studies (NE) and Hebrew (HEB), and may elect up to six credits in cognate courses in other related topics in the history, philosophy, anthropology, linguistics, sociology and politics of the Middle East. At least two courses must be completed at the 7000+ level. He/she is expected to write an essay or a thesis wherein he/she must show ability in using sources and doing original research as well as demonstrate proficiency in a modern language. A final oral and written examination will be required to test the ability of the student in the language and culture of his/her area of concentration. The applicant’s program of study must have the approval of the major advisor.

**Hebrew (M.A. Concentration)**

A student specializing in Hebrew is expected to demonstrate ability in the use of modern Hebraic sources. In addition to Hebrew language, literature, and culture courses, the student may be advised to elect six credits in cognate courses from the disciplines of history, philosophy, anthropology, linguistics, sociology, and political science. He/she is expected to write a thesis or essay in which he/she shows ability in using sources and in doing original research as well as demonstrates proficiency in a modern language and literature. A final oral and written examination will be required to test the ability of the student in the language and culture of his/her area of concentration. The student’s program of study must have approval of the major advisor.

**Romance Languages (M.A.)**

Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, the Graduate Record Examination is strongly recommended, and three letters of recommendation are required of all applicants to the M.A. and Ph.D. programs.

Students envisaging a teaching career on the college level or intending to continue to the doctoral degree may elect either Plans A, B, or C — Literature. At present, Plan C — Literature is available only in French, and Plan C — Language and Culture, is available only in French and Spanish.

**Academic Scholarship**: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

**French (M.A. Concentration)**

**Under Plan A**: Candidates are required to take:

Several options are available: knowledge, critical thinking, research skills, and interdisciplinary work. The Doctor of Philosophy with a major in Modern Languages allows consolidation of work that emphasizes disciplinary knowledge. No essay is required for Plan C. Candidates for the degree must, upon completion of their course work, take a comprehensive oral and written examination based on the French area reading list for the Master of Arts Degree. All students with a graduate teaching assistantship must take LGL 5850: Foreign Language Instruction.

**Italian (M.A. Concentration)**

Under Plans A and B: At least five weeks prior to the time the degree is to be granted, candidates must pass a comprehensive oral examination based on course work and the Italian area reading list.

**Spanish (M.A. Concentration)**

Under Plans A and B: Candidates are required to take course work in the areas of linguistics, Peninsular Spanish literature, and Spanish American literature. Candidates are required to write a comprehensive examination as specified in the Graduate Handbook for Students and Faculty of the Department of Classical and Modern Languages, Literatures, and Cultures, based on the Spanish area reading list for the Master of Arts degree. No oral examination is required.

Under Plan C — Language and Culture: Candidates are required to take a minimum of thirty-three credits in course work, including:

With consent of the graduate advisor, students may elect up to six graduate credits in related areas. Upon completion of their course work, candidates are required to write an examination covering Spanish language and linguistics, Hispanic culture and Hispanic literature, as specified in the Graduate Handbook for Students and Faculty of the Department of Classical and Modern Languages, Literatures, and Cultures. No oral examination is required.

**Modern Languages (Ph.D.)**

The Doctor of Philosophy with a major in Modern Languages allows students to combine a major and a minor that best meet their interests and career goals. Students must consult with the Ph.D. advisor to consolidate a coherent plan of work that emphasizes disciplinary knowledge, critical thinking, research skills, and interdisciplinary work. Several options are available:
Communication Sciences and Disorders

Office: 103 Prentis Building; 313-577-3339
Chairperson: Jinsheng Zhang
Graduate Officer: Derek Daniels
Coordinators of Clinical Programs: Tausha Moore, Mary Kassa
https://clas.wayne.edu/csd/

Audiology is the study of the normal and impaired auditory system. Speech-language pathology focuses on impaired speech, language, fluency, and voice function of children and adults. The Doctor of Audiology (Au.D.) and Master of Arts with a major in Speech-Language Pathology degree programs offer students intensive and diverse academic and clinical experiences.

The course of study should be developed as early as possible with the student's major advisor, and candidacy must be established by filing an approved Plan of Work after twelve credits have been earned.

Academic Scholarship

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Application Requirements

Application requirements for all departmental graduate programs are:

1. a minimum undergraduate grade point average of 3.0
2. completion of the Graduate Record Examination
3. submission of three letters of recommendation
4. submission of a written Statement of Intent
5. submission of official transcripts

International applicants must provide, in addition, official results of the TOEFL, TWE, and SPEAK/TSE. Please access the department's website (http://www.clas.wayne.edu/csd/) for additional information. Admission to all programs is contingent upon admission to the Graduate School (p. 35).

Accreditation

- Speech-Language Pathology (M.A.) (p. 239)
- Audiology (Au.D.) (p. 239)
- Communication Sciences and Disorders (Ph.D.) (p. 239)

Speech-Language Pathology (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Applications must be made using the university's online application and the CSDCAS Centralized Application Service (https://portal.csdcas.org/). Deadline for receipt of all application materials for fall admission is January 15.

It is essential that prospective graduate students in this area confer with an advisor in the area of Speech-Language Pathology concerning academic, clinical and professional programs to meet certification requirements as set forth by the American Speech-Language-Hearing Association.

Program Requirements

The Master of Arts degree is offered by the Department of Communication Sciences and Disorders (http://www.clas.wayne.edu/CSD/) under the following options:

- Plan A: 54 - 60 credits, including an eight-credit thesis.
- Plan B: 54 - 60 credits, including a three-credit essay.
- Plan C: 54 - 60 credits in course work, plus written and/or oral comprehensive examinations in the major (total credits determined by major area of study).

Audiology (Au.D.)

The Doctor of Audiology (Au.D.) program, offered by the Department of Communication Sciences and Disorders (http://www.clas.wayne.edu/CSD/), is designed to prepare audiology professionals to meet requirements for licensure (and certification, if desired) and is consistent with the standards of the Council on Academic Accreditation of the American Speech-Language-Hearing Association.

The program is specifically designed for individuals who have completed an undergraduate degree program in an accredited college or university and who have met the prerequisite requirements for admission to the Au.D. program. This is a four-year (eleven semester) full-time academic and clinical program. Most applicants who have completed an undergraduate degree in communication disorders meet our course work requirements for admission. Applicants with undergraduate degrees in other fields may need to complete prerequisite course requirements prior to admission to the graduate program.

Admission (p. 239) to this program is contingent upon admission to the Graduate School (p. 35). Applications must be made using the university's online application (http://www.gradadmissions.wayne.edu/apply.php) and the CSDCAS Centralized Application Service (https://portal.csdcas.org/). Deadline for receipt of all application materials for fall admission is January 15.

Prerequisite courses for admission to the Au.D. program include coursework in behavioral and social sciences, mathematics, natural science, human communication, language acquisition, phonetics or acoustics, and an introductory course in human communication disorders. Most applicants will have also completed introductory coursework in speech-language pathology and audiology.

The Au.D. requires successful completion of 121-125 graduate credits in the major plus written and/or oral comprehensive examinations.

Communication Sciences and Disorders (Ph.D.)

Admission to this program is contingent upon admission to the Graduate School (p. 35) and satisfaction of departmental application requirements (p. 239).

A minimum of ninety graduate credits beyond the baccalaureate is required for completion of the Ph.D. program. Most students exceed this requirement in the course of completing the degree. The student and his/her advisor work cooperatively to plan a program of study designed to establish the necessary skills and knowledge for successful completion.
of the degree and in preparation for careers in research, higher education, and advanced clinical practice. As part of the program of study, the student will complete thirty credits in Doctoral Dissertation Research and Direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses SLP 9991, SLP 9992, SLP 9993, and SLP 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Candidacy: In order to become a candidate for the Ph.D. degree, an applicant must successfully complete both a written and an oral qualifying examination.

Criminology and Criminal Justice
Office: 3054 Faculty/Administration Building; 313-577-2705
Chairperson: Brad Smith
Graduate Director: Charles Klahm IV
Academic Services Officer/Advisor: Marianka Holloway
https://clas.wayne.edu/cj

The Master of Science degree in Criminal Justice is designed to prepare students for positions in criminal justice and related agencies as well as prepare students who wish to pursue a Ph.D. in Criminal Justice or related fields. Students are provided with a broad educational foundation in criminal justice grounded in law and the social sciences. Study begins with an analysis of crime and the entire justice system. Advanced study focuses on the political, organizational, social, and behavioral aspects of various components of the system of criminal justice. Research courses give students the tools with which to independently analyze issues of crime and justice as well as the requisite skills for career development. The Master of Science degree is offered an in-person/hybrid format or fully online. Courses are offered in the following core areas depending on which program students choose: contemporary criminal justice, causes of crime, research methodology and data management analysis, administration in criminal justice, and a specialization of the student’s choice.

Students in the Criminal Justice Graduate Program take core classes in Criminal Justice and are eligible to take elective courses in other Liberal Arts and Sciences departments and in departments in other colleges. This allows substantial flexibility in arranging a program of study that meets the student’s goals.

- Criminal Justice (M.S.) (p. 240)
- Criminal Justice (J.D./M.S. Joint Degree) (p. 242)

Criminal Justice (M.S.)
Admission Requirements
Admission to this program is contingent upon admission to the Graduate School (p. 35). Strong undergraduate social science preparation is recommended, and additional undergraduate course work may be specified in criminal justice or related areas where such preparation is inadequate.

In the application for graduate admission, students must indicate whether they will be completing the M.S. in Criminal Justice in

1. the traditional/hybrid program (students in the traditional program can take online courses except for CRJ 7030);

2. the completely online program (students in the online program are only permitted to take online courses).

In determining admission for the individual applicant, the Graduate Committee evaluates the student’s undergraduate record (with special emphasis on upper division courses: junior/senior year), the level of difficulty of course work, as well as grade point average (GPA) in the student’s major, the strength of the recommendations, and the quality of the personal statement. The minimum standard for admission as a regular Master’s student is a cumulative weighted undergraduate GPA of 3.0 or better. Applicants with an undergraduate GPA between 2.75 and 2.99 may be considered for admission, but are required to take the Graduate Record Examination (GRE) and provide a written exception statement justifying why they are capable of graduate work and explaining why their undergraduate GPA is below 3.0.
Applicants to the Master of Science program in Criminal Justice must:

1. complete and submit the Graduate School’s online application (http://wayne.edu/admissions/graduate/);
2. submit transcripts from the applicant’s undergraduate school/college;
3. have two (2) letters of recommendation, at least one of which is strongly encouraged to be written by a former professor/instructor, submitted online; and
4. submit a personal statement.

Personal statements should address the applicant’s qualifications, career goals, and interest in crime and justice related issues more generally. Personal statements must be no longer than two single-spaced pages. Statements must be submitted as part of the online application process.

Questions concerning the admission process should be directed to the Criminal Justice Department at 313-577-0772.

Requirements – Traditional Program

The Master of Science in Criminal Justice degree is awarded upon successful completion of thirty credits. All coursework must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224). The traditional degree program is offered as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CRJ 7020</td>
<td>The Nature of Crime</td>
<td>3</td>
</tr>
<tr>
<td>CRJ 7040</td>
<td>Evidence-Based Practices in Criminal Justice</td>
<td>3</td>
</tr>
<tr>
<td>CRJ 7860</td>
<td>Research Methods in Criminal Justice</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following: 3-4

<table>
<thead>
<tr>
<th>Code</th>

<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CRJ 7999</td>
<td>Master’s Essay Direction</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective Courses: The elective courses are to be chosen after a conference with the Graduate Director to determine the plan which is most consistent with the student’s educational and career goals. These courses will be specified in the student Plan of Work. Some elective credit may have to be used to satisfy the College of Liberal Arts and Sciences requirement that at least six credits in course work be at the 7000 level or higher, and that at least six credits (excluding core courses) be taken in the major area. With the exception of one 5000-level elective course, all remaining courses toward the degree must be taken at the 6000 level or higher.

Transfer Credits: The maximum number of credits that may be transferred in from other accredited colleges and universities is between six and eight semester credits for two courses. Transfer courses must be taken at the graduate level with a passing grade of ‘B’ or higher; the student must have had graduate status at the time the courses were taken.

Requirements – Online Program

The Master of Science in Criminal Justice online degree is awarded upon successful completion of thirty credits. All coursework must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224). The online degree program is offered as follows:

Elective Courses: The elective courses are to be chosen after a conference with the Graduate Director to determine the plan which is most consistent with the student’s educational and career goals. These courses will be specified in the student Plan of Work. Some elective credit may have to be used to satisfy the College of Liberal Arts and Sciences requirement that at least six credits in course work be at the 7000 level or higher.
higher, and that at least six credits (excluding core courses) be taken in the major area. With the exception of one 5000-level elective course, all remaining courses toward the degree must be taken at the 6000 level or higher.

Transfer Credits: The maximum number of credits that may be transferred in from other accredited colleges and universities is between six and eight semester credits for two courses. Transfer courses must be taken at the graduate level with a passing grade of 'B' or higher; the student must have had graduate status at the time the courses were taken.

Criminal Justice (M.S./J.D. Joint Degree)

The Law School and the Department of Criminal Justice offer a joint degree program in criminal justice and law (M.S./J.D.). Students must be separately admitted to both the Law School and the Master of Science in Criminal Justice program.

Students must complete all the requirements for both degrees. Law School courses count for up to nine elective credits toward the Master of Science in Criminal Justice degree. A maximum of four Criminal Justice (CRJ) courses may be applied to the requirements for the J.D. degree. A student must complete the first year of law school before any CRJ courses may be taken toward the joint degree. CRJ courses may be taken concurrently with law school courses during the second and subsequent years. The first step for the joint degree is to be admitted into the law program at Wayne State University. The second step is to contact the Law School advising office and the Department of Criminal Justice Graduate Advisor to inquire on how to apply for the joint degree program.

Economics

Office: 2074 Faculty/Administration Building; 313-577-3345
Chairperson: Kevin Cotter
Administrative Assistant: Katie Francek
https://clas.wayne.edu/economics

The Department encourages applications from students with broad intellectual interests as well as strong quantitative skills, regardless of their undergraduate majors.

The M.A. in Economics can be a terminal degree leading to careers in business, government and non-governmental organizations, or junior college teaching. Because many master's students study part-time, the Department schedules as many core courses in the evening as possible.

The Ph.D. curriculum provides thorough training for professional economists through course work, tutorials and research workshops. It gives students a solid foundation in economic theory and econometrics and offers several carefully selected fields of specialization. The Department's Ph.D. graduates choose careers in academia, research, and business.

• Economics (M.A.) (p. 242)
• Economics and Law (M.A./J.D. Joint Degree) (p. 243)
• Economics (Ph.D.) (p. 243)

Economics (M.A.)

Admission Requirements

Admission to this program is contingent on admission to the Graduate School (p. 35). Applicants to this program must hold a bachelor's degree, with an undergraduate grade point average of at least 3.0 for regular admission. Exceptions may be authorized only by the Department's Admissions Committee. Consistent with Graduate School requirements, international applicants must demonstrate English proficiency by obtaining a satisfactory score on the Test of English as a Foreign Language (TOEFL) or other test acceptable to the Graduate School.

Applicants are expected to have completed the following courses or their equivalents as undergraduate or post-bachelor students:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 5000</td>
<td>Intermediate Microeconomics</td>
<td>4</td>
</tr>
<tr>
<td>ECO 5050</td>
<td>Intermediate Macroeconomics</td>
<td>4</td>
</tr>
<tr>
<td>ECO 5100</td>
<td>Introductory Statistics and Econometrics</td>
<td>4</td>
</tr>
</tbody>
</table>

MAT 2010 or a similar introductory course in differential and integral calculus provides minimal mathematics requirements. Additional courses in calculus and linear algebra are desirable although not required.

Regular admission may be granted to an applicant who has not completed these courses, but in this case they must be completed before taking 6000 or 7000-level courses.

Program Requirements

Thirty-two graduate credits are required. Although the University offers various plans for M.A. degrees, the Department of Economics offers the Master of Arts degree under Plan C only, as described below.

For the M.A. Program, students must take:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Theory Core</td>
<td>Take as early in the program as possible</td>
<td></td>
</tr>
</tbody>
</table>
and have a grade point average of at least 3.0. Applicants must include additional economics courses.

Applicants are expected to arrive with the following preparation:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 5000</td>
<td>Intermediate Microeconomics</td>
<td>4</td>
</tr>
<tr>
<td>ECO 5050</td>
<td>Intermediate Macroeconomics</td>
<td>4</td>
</tr>
<tr>
<td>ECO 5100</td>
<td>Introductory Statistics and Econometrics</td>
<td>4</td>
</tr>
</tbody>
</table>

MAT 2010 and MAT 2020 or similar introductory courses in differential and integral calculus providing minimal mathematics requirements. Additional courses in calculus and linear algebra are highly desirable.

**Program Requirements**

Ph.D. students in economics must successfully complete ninety credits in graduate study, consisting of sixty credits in course work and thirty credits in dissertation research. Advancement to candidacy will require about three years of full-time study beyond the bachelor's degree and is granted upon completion of the following requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 9991</td>
<td>Doctoral Dissertation Research and Direction I</td>
<td>4</td>
</tr>
<tr>

<td>4</td>
</tr>
</tbody>
</table>

An oral examination on research

1. Must be approved by the Director of Graduate Studies in Economics and by the Dean of the Graduate School. The Plan of Work must be filed by the completion of the first year of doctoral study.

2. Proficiency must be demonstrated by passing qualifying examinations in microeconomic theory, macroeconomic theory, and two selected fields.

The thirty credit dissertation registration requirement is fulfilled by registering for the courses ECO 9991, ECO 9992, ECO 9993, and ECO 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

**Academic Scholarship:** All course work must be completed in accordance with the regulations of the Graduate School (p. 224) and the College of Liberal Arts and Sciences (p. 224).

**Economics and Law (M.A./J.D. Joint Degree)**

This department in cooperation with the Law School offers a joint degree program leading to a Master of Arts degree with a major in Economics and a Juris Doctor degree in law. Students in this program must be admitted to both the Law School and the Department of Economics and must complete all requirements for the Economics M.A. degree and all requirements for the J.D. degree. After admission to the Law School, the student must complete the first year of the J.D. program before electing additional economics courses.

**Economics (Ph.D.)**

**Admission Requirements**

Admission to this program is contingent upon admission to the Graduate School (p. 35). Applicants to this program must hold a bachelor's degree and have a grade point average of at least 3.0. Applicants must include verbal, quantitative and analytical Graduate Record Examination scores and three letters of recommendation from officials or teaching staff of the institution(s) most recently attended. Applicants from other countries must demonstrate English proficiency by obtaining a satisfactory score on the Test of English as a Foreign Language (TOEFL). All candidates must submit a Statement of Purpose as part of their applications.

**Academic Scholarship:** All course work must be completed in accordance with the regulations of the Graduate School (p. 224) and the College of Liberal Arts and Sciences (p. 224).

**Minor Requirements:** Students must complete at least eight credits in a minor field, subject to the approval of the Director of Graduate Studies.
in Economics. These courses may include other economics courses not specified in the major requirements.

**Doctoral Dissertation Outline and Record of Approval:** This form must be approved by the student's dissertation advisory committee, the Director of Graduate Studies in Economics, and the Dean of the Graduate School.

**The Doctoral Dissertation:** The doctoral candidate is required to submit a doctoral dissertation on a topic satisfactory to his/her Faculty Dissertation Committee.

**Public Lecture:** Upon acceptance of the dissertation, the student will deliver a final lecture in accordance with Graduate School procedures.

**Employment and Labor Relations**

*Office:* 5401 Cass (255 Walter P. Reuther Library)  
313-577-0175  
https://clas.wayne.edu/labor-studies

- Employment and Labor Relations (M.A.) (p. 244)

---

**Employment and Labor Relations (M.A.)**

The Master of Arts in Employment and Labor Relations (MAELR) is an inter-college as well as an interdisciplinary graduate degree program jointly sponsored by the Departments of Economics and Psychology in the College of Liberal Arts and Sciences, and Management and Information Systems in the School of Business Administration. Policy direction is provided by the Academic Policy Committee composed of one representative of each sponsoring department.

MAELR is designed to provide professional preparation for a career in human resource management and labor-management relations. Students will be prepared in this discipline for positions in government, business and union organizations, and the program staff will assist in the appropriate job placement of its graduates. This program will also provide knowledge and skills for persons who contemplate entering or who are already engaged in self-employment involving labor relations, such as labor arbitration.

**Admission Requirements**

Admission to the program requires three letters of recommendation and completion of the program application form, in addition to the transcripts and the application form required by Graduate Enrollment Services. The letters of recommendation must be written by college or university professors under which the applicant has studied, and/or current or former employers. The Graduate Record Examination (GRE) or the Graduate Management Admissions Test (GMAT) is required of all applicants. Applications will be evaluated on the basis of the following:

1. the overall or upper-division grade point average;  
2. GRE and GMAT scores;  
3. applicant's performance in previous graduate courses, if any;  
4. quality of the applicant's employment experience at increasing levels of responsibility; and,  
5. other appropriate indicators of successful performance as a graduate student, including the content of reference appraisals.

Students applying to the program who have completed a graduate degree, may be exempt from submitting GRE and GMAT scores.

**Prerequisites**

Students who have been admitted but who do not possess all of the following prerequisites must remedy any deficiency, without graduate credit, before graduate courses are taken in the degree program: statistics (equivalent to ECO 5100, BA 2300, or EER 7630); introductory microeconomics (such as ECO 2010) and an equivalent of PSY 2100, Psychology in the Work Place. A grade of ‘C’ or better is required of all prerequisite courses.
Advising

All academic advising will be done by the Academic Services Officer. Students should call the MAELR Office (313-577-0175) for information on advising hours.

Program Requirements

MAELR is offered only as a Plan C master’s program requiring the satisfactory completion of at least thirty-six credits in graduate course work, including a core curriculum of twenty-four credits and twelve electives:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 6480</td>
<td>Advanced Economics of Work</td>
<td>3</td>
</tr>
<tr>
<td>ELR 7000</td>
<td>Introduction to Labor and Employment Relations</td>

<td>3</td>
</tr>
<tr>
<td>Electives</td>
<td></td>
<td>12</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>36</td>
</tr>
</tbody>
</table>

1 ELR 8500 should be taken in the last nine credits of the program and only after the completion of the six other Core Courses.
2 The topic and methodology of a Directed Study must have the prior approval of the Director, who must also approve the appointment of the faculty member who will supervise the project. For courses specifically associated with this program see Employment and Labor Relations Courses (ELR).
3 Selection of electives will be guided by the student’s prior preparation and career objectives and will require the approval of the Program Director. Electives are not limited to courses offered by the sponsoring departments.

A Core Course may be waived only if the student demonstrates, to the satisfaction of the Academic Policy Committee, that he/she has completed an equivalent graduate-level course with a grade of ‘B’ or better and elects an additional approved elective course in its place.

Academic Scholarship: Graduate students in the MAELR program will be required to earn a ‘B’ (3.0) average to satisfy degree requirements. If a grade below ‘B’ is received in a core course, that course must be repeated promptly and a grade of ‘B’ or better obtained. A grade of ‘C’ in two graduate courses will constitute a sufficient basis for dismissal from the program. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Candidacy: Students are expected to file a Plan of Work when nine graduate credits in the MAELR curriculum have been earned. Upon approval of the Plan of Work the student’s rank will be changed from ‘applicant’ to ‘candidate’ provided the applicant’s grade point average is at least 3.0.

English

Office: Room 9408, 5057 Woodward; 313-577-2450
Chairperson: Caroline Maun
Associate Chairperson and Director of Undergraduate Studies: Jaime Goodrich
Director of Composition: Richard Marback
Director of Graduate Studies: Chera Kee
Academic Services Officer: Anglesia Brown
https://clas.wayne.edu/english/https://clas.wayne.edu/english/

The English Department is engaged in researching and re-conceptualizing what it means to read and write English in the twenty-first century and invites energetic, intellectually adventurous students to join in this pursuit. The graduate program is designed for students who show promise in the formal study and teaching of language, literature, film, rhetoric, composition, and culture, and seek to pursue the Master of Arts and/or Doctor of Philosophy in these areas.

The M.A. program can be used to prepare for doctoral work and/or as a terminal degree used to develop expertise in particular areas of study (e.g., professional writing, creative writing). Students may earn an M.A. in English or an M.A. in English with a concentration in Creative Writing.

The doctoral program provides focus for graduate studies in English and ensures that students receive an education at the highest possible level. Our department offers two Ph.D. concentrations: one in Literature, Culture, Media and Writing and one in Rhetoric and Writing Studies.

• English (M.A.) (p. 245)
• English (Ph.D.) (p. 246)

English (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35).

Application deadlines are October 15 (for Winter admission) and February 15 (for Fall admission with funding consideration). The deadline for fall admission without funding consideration is August 1.

The English Department requires that all applicants provide a statement of purpose, two academic letters of reference, and sample essay from a previous English course. Applicants should submit the English Department’s Graduate Application form (https://clas.wayne.edu/english/docs/wsu_english_graduate_admissions_and_funding_application_form.pdf).

M.A. applicants who wish to emphasize creative writing also must submit a creative writing sample.

Program Requirements

The Master of Arts degree in English is offered as a Concentration in Creative Writing (Plan A), Concentration in Technical and Professional Writing (Plan C), Plan B, or Plan C option. These options correspond to the Graduate School’s Plans A, B or C (p. 19) for the master’s degree.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Plan A: Concentration in Creative Writing

The M.A. program in English with a Concentration in Creative Writing is designed to prepare students to go on to a Master of Fine Arts or doctoral
work in creative writing or to train students with a specific interest in creative writing that may not lead to further advanced study. The M.A. in English with a Concentration in Creative Writing requires thirty-three credits of course work, which must include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENG 5695</td>
<td>Topics in Writing and Publishing</td>
<td>3</td>
</tr>
<tr>
<td>ENG 5860</td>
<td>Topics in Creative Writing</td>
<td>3</td>
</tr>
<tr>
<td>ENG 5870</td>
<td>Poetry Writing Workshop</td>
<td>3</td>
</tr>
<tr>
<td>ENG 5880</td>
<td>Fiction Writing Workshop</td>
<td>3</td>
</tr>
<tr>
<td>ENG 5885</td>
<td>Topics in Creative Non-Fiction Writing</td>
<td>3</td>
</tr>
<tr>
<td>ENG 6800</td>
<td>Advanced Creative Writing</td>
<td>3</td>
</tr>
<tr>
<td>ENG 7800</td>
<td>Seminar in Creative Writing</td>
<td>3</td>
</tr>
</tbody>
</table>

Students also choose between 8-12 credit hours of electives at the 5000-, 6000-, and 7000-levels from the English Department’s course list (p. ) in the Graduate Bulletin.

**Plan B**

The M.A. program in English Plan B is designed to prepare students to go on to doctoral work in English or to train students with a specific interest in English that may not lead to further advanced study. The M.A. in English requires thirty-three credits, including a three-credit essay. Demonstration of proficiency in at least one foreign language is also required if directed to do so by an academic advisor based on the research topic of the Master’s Essay (for further details, consult the Director of Graduate Studies).

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENG 7870</td>
<td>Teaching Practicum in Technical and Professional Writing</td>
<td>2</td>
</tr>
</tbody>
</table>

Students in the M.A. program in English with a Concentration in Creative Writing should plan to take 15-18 credits of creative writing courses at the 5000-, 6000-, and 7000-levels, taken from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENG 5840</td>
<td>Writing in the Workplace</td>
<td>3</td>
</tr>
<tr>
<td>ENG 5830</td>
<td>Writing and Publishing</td>
<td>3</td>
</tr>
<tr>
<td>ENG 5825</td>
<td>Topics in Technical Professional Writing</td>
<td>3</td>
</tr>
<tr>
<td>ENG 5895</td>
<td>Topics in Environmental, Nature, and Science Writing</td>
<td>3</td>
</tr>
</tbody>
</table>

For the remaining 14 credit hours of elective courses, students may choose from the 5000-, 6000-, and 7000-level courses in the English Department’s course list (p. ) in the current Graduate Bulletin.

**English (Ph.D.)**

**Admission Requirements**

Admission to this program is contingent upon admission to the Graduate School (p. 35).

Students may apply to the Ph.D. program with either a B.A. or M.A. degree. Students who apply with a B.A. will have the opportunity to receive an M.A. degree before the completion of their Ph.D.

The application deadline is December 15, but every Ph.D. student must begin the program in the fall semester.

The English Department requires that all applicants provide a statement of purpose indicating areas of research interest, at least two academic letters of reference, and a sample of the student’s scholarly or critical writing. Applicants should also submit the English Department’s Graduate Admissions form. (https://clas.wayne.edu/english/docs/wsu_english_graduate_admissions_and_funding_application_form.pdf)

The Ph.D. program requires ninety credits of course work beyond the B.A. degree. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

**Major Requirements**

1. Sixty credits of course work (for students entering the program with an M.A., up to thirty credits may be transferred from another institution).
2. Completion of distribution requirements as listed below.
3. Thirty credits of dissertation courses (ENG 9991, ENG 9992, ENG 9993, ENG 9994) taken in consecutive academic year semesters following the completion of regular course work and the Qualifying Exam.
4. All courses must be at the 7000- or 8000-level; permission from the Director of Graduate Studies is required to take courses at lower levels.
Concentrations

The Ph.D. program has two concentrations: Literature, Culture, Media and Writing; and Rhetoric and Writing Studies. Each doctoral student must select a concentration early enough in her or his program to fulfill the course distribution requirements.

An admissions moratorium has been approved for the Film and Media Studies concentration, effective Winter 2022.

Graduate Teaching Assistants

Each Graduate Teaching Assistant must take ENG 7850, Pedagogical Practicum I, in the first semester in which she or he holds the assistantship, and ENG 7860, Pedagogical Practicum II, in the third semester in which she or he holds the assistantship.

Foreign Language Requirement

Demonstration of reading proficiency in at least one foreign language if directed to do so by an academic advisor based on the research topic of the dissertation. The preferred method for demonstrating proficiency is to pass a translation examination (for further details, consult the Director of Graduate Studies).

Final Qualifying Examination

One year before she or he plans to take the Qualifying Examination (QE), each student meets with her or his advisor to declare the field and emphasis in which she or he plans to be examined. Designated fields reflect the current division of the discipline as published by the Modern Language Association. Emphases are designed to underscore the necessity of embedding doctoral work in ongoing critical debates among the various disciplines and sub-disciplines that make up English studies. An emphasis should identify a topical or thematic category and/or articulate a theoretical or methodological approach. Students will also need to list two (or more) courses that support the declared emphasis.

The student writes a brief description of her or his field and emphasis and the dissertation director presents this to the Department Graduate Committee. The Graduate Committee selects the other two members of the QE Committee. The QE Committee then works with the student to construct a list of texts on which she or he is to be examined (roughly 100-120 texts). The exam itself should be scheduled no later than the semester following the completion of course work. The QE Committee composes questions for a six-hour written examination. Within one week after taking the written exam, the student then takes a ninety-minute oral examination. The student passes or fails the exam in its entirety. No later than one month after successful completion of the Qualifying Examination, the student selects a dissertation committee consisting of three members of the English Department graduate faculty and one appropriately qualified individual who is not a member of the English Department. Members of this committee may or may not have been members of the student’s QE Committee.

Dissertation Defense

A final Public Lecture Presentation-Defense, after the dissertation has been completed, is also required.
Environmental Science and Geology

Office: 0224 Old Main; 313-577-2506
Chairperson: Mark Baskaran

- Environmental Science (Online M.A.) (p. 248)
- Geology (M.A.) (p. 248)
- Geology (M.S.) (p. 249)

Environmental Science (Online M.A.)

The human impact on Earth's environment over past two centuries is unprecedented. An incredible 300% increase in human population growth in the 20th century has led to an increase in energy consumption by more than 1000% since 1950. Never in the history of the Earth has such a drastic increase in the atmospheric CO₂ occurred over such a short period of time. Education on the science of the changing environment is at the forefront of human endeavor, and a significant fraction of the global GDP is currently being spent on addressing this science (e.g. increasing spatial extent of harmful algal blooms, ocean acidification, ever increasing amount of micro-plastics in fresh and salt water systems, effects of global climate change including flooding/drought and other weather-related catastrophic events). This online master's program addresses many of the anthropogenic environmental changes listed above. This inter-disciplinary program includes courses from several branches of science including coastal and environmental geology, environmental biology, low-temperature aqueous geochemistry, environmental isotope geochemistry, biogeochemistry, remote sensing, big data analytics, climate science, toxicology, water quality, etc.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). The minimum grade point average required for regular admission to the program is 2.75. Specific admissions requirements include: evidence of a completed baccalaureate degree from an accredited college or university; college-level coursework in geology, biology, mathematics, physics, and chemistry; two letters of recommendation; and a one-page statement of purpose.

Program Requirements

The online M.A. in Environmental Science requires a minimum of 30 credits. The program is offered under master's program Plan C (coursework only). All coursework must be completed in accordance with the regulations of the Graduate School (https://bulletins.wayne.edu/graduate/general-information/academic-regulations/) and the College of Liberal Arts and Sciences (https://bulletins.wayne.edu/graduate/college-liberal-arts-sciences/academic-regulations/).

Elective Courses

- ESG 6420 | Mathematical Methods in Earth Science |
- ESG 6160 | Applied Remote Sensing |
- ESG 6165 | Biodiversity Changes in the Anthropocene |

Geology (M.A.)

The Master of Arts in geology is designed to provide the students with special training in the environmental aspects of this discipline in keeping with the urban setting of Wayne State University. Students receiving the degree of Master of Arts in geology will be especially prepared to work in a capacity that deals with or provides solutions to environmental problems in which an intimate relationship between the environment and earth science is an important factor.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Additionally, candidates are required to have an undergraduate major in geology, or a strong background in geology supported by courses in related sciences, and a grade point average of at least 3.0 in the major. Prerequisite study should include many of the following courses: mineralogy, petrology, sedimentation, geomorphology, environmental geochemistry, structural geology; plus a course in any two of the following fields: paleontology, stratigraphy, geological site assessment, geostatistics, and geophysics.

Two semesters of calculus, a year of chemistry and a year of physics are also necessary. Deficiencies in prerequisites may be made up concurrently with graduate work.

The verbal and quantitative parts of the Graduate Record Examination are required for admission to the graduate program, and the applicant must file three personal letters of recommendation and a personal statement describing goals and motivations for pursuing an M.S. Geology degree before acceptance.

Students transferring from other fields should make an appointment with the Graduate Officer or the Department Chairperson who will review the applicant’s background and make recommendations regarding the graduate program.

Program Requirements

The Master of Arts in geology is offered as Plan B (essay) or Plan C (coursework). Both options require 32 credits.

Plan B - Master's Essay

especially prepared to work in a capacity that deals with or provides solutions to environmental problems in which an intimate relationship between the environment and earth science is an important factor.

The master's degree program involves the rigorous, in-depth study of major concepts pertaining to the earth, and the techniques used to study them. Entrance into the program assumes a firm foundation in the basic and elemental concepts of geology.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Additionally, candidates are required to have an undergraduate major in geology, or a strong background in geology supported by courses in related sciences, and a grade point average of at least 3.0 in the major. Prerequisite study should include many of the following courses: mineralogy, petrology, sedimentation, geomorphology, environmental geochemistry, structural geology; plus a course in any two of the following fields: paleontology, stratigraphy, geological site assessment, geostatistics, and geophysics.

Two semesters of calculus, a year of chemistry and a year of physics are also necessary. Deficiencies in prerequisites may be made up concurrently with graduate work.

The verbal and quantitative parts of the Graduate Record Examination are required for admission to the graduate program, and the applicant must file three personal letters of recommendation and a personal statement describing goals and motivations for pursuing an M.S. Geology degree before acceptance.

Students transferring from other fields should make an appointment with the Graduate Officer or the Department Chairperson who will review the applicant’s background and make recommendations regarding the graduate program.

Program Requirements

The Master of Science in geology is offered by this department only under the following option:

Plan A: Thirty-two credits including an eight credit thesis.

Students must complete twenty-four credits in graduate course work from the following courses:

<table>

</table>

Total Credits 32

Students can only take up to a maximum of 8 credits out of the required 32 credits outside the Geology Department and a maximum of 4 Geology credits are allowed as ESG 7999 Directed Study. If additional credits are required, then, courses may be selected from other graduate courses in chemical and/or civil engineering, or graduate courses in chemistry or physics. Graduate courses in disciplines other than geology require the approval of the thesis advisor and the graduate committee. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

The graduate program may be modified by the Geology Department to conform to the needs of individual candidates.

Candidacy for the Master's degree is established by submitting an acceptable Plan of Work to the Graduate Officer of the College of Liberal Arts and Sciences. This plan must be submitted and approved by the College by the time twelve graduate credits have been earned. For Plan-B, the student will choose one faculty member as advisor in the department for writing the research paper.

Geology (M.S.)

The Master of Science with a major in Geology consists of advanced studies that are designed to prepare the student to assume a position of responsibility as a professional geologist, or to enter a program leading to the doctor of philosophy in geology or a related discipline at another university. The Master of Science in geology is designed to provide the students with special training in the environmental aspects of this discipline in keeping with the urban setting of Wayne State University. Students receiving the degree of Master of Science in geology will be especially prepared to work in a capacity that deals with or provides

Total Credits 32

Students can only take up to a maximum of 8 credits out of the required 32 credits outside the Geology Department and a maximum of 4 Geology

Wayne State University Graduate Bulletin 2022-2023 - DRAFT COPY 249
credits are allowed as GEL 7990 Directed Study. If additional credits are required, then, courses may be selected from other graduate courses in chemical and/or civil engineering, or graduate courses in chemistry or physics. Graduate courses in disciplines other than geology require the approval of the thesis advisor and the graduate committee. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

The graduate program may be modified by the Geology Department to conform to the needs of individual candidates.

Candidacy for the Master's degree is established by submitting an acceptable Plan of Work to the Graduate Officer of the College of Liberal Arts and Sciences. This plan must be submitted and approved by the College by the time twelve graduate credits have been earned. Once candidacy is established, the student, in consultation with his/her advisor and the Geology Department graduate officer, will select the thesis committee. The committee will be comprised of a minimum of three members of the graduate faculty with the student’s advisor serving as one member and committee chairperson. Two of the three members of the committee (including the advisor) must be from the Department of Geology. The third member may be from another department if this third member will be making a significant contribution to the applicant’s course work and/or thesis study.

Cognate Requirements: Although there are no cognate courses required for the Master of Science degree, geology majors should consult their advisor regarding cognate courses which will be of value to their particular program. Depending on interests and future goals, courses in mathematics, physics, chemistry, and computer science, and especially those in chemical and civil engineering may be of particular value.

**History**

*Office: 3094 Faculty/Administration Building; 313-577-2525*

*Chairperson: Elizabeth V. Faue*

[https://clas.wayne.edu/history](https://clas.wayne.edu/history/)

History is the study of the past, for its own sake and to inform how we understand the world today and what might be possible in the future. The history department offers graduate coursework in United States, European, and World history. Our faculty’s wide-ranging topical expertise includes labor history, women's and gender history, the history of violence, legal history, urban history, environmental history, the history of science and technology, and the history of capitalism. Our curriculum incorporates professional development and career exploration opportunities for all master’s and doctoral students.

Graduate education in history prepares students for diverse careers such as teaching positions at the secondary, community college, or university levels; government research positions; management of archival resources or historical agencies; and museums and other public history careers. Our graduate programs also provide sufficient flexibility to serve the needs of students with career goals where an understanding of history is crucial (such as law or journalism) or useful (such as banking, criminal justice, social work, research, public policy, or publishing) or those who simply have an avocational interest in acquiring advanced knowledge of history.

**Degree programs**

1. The **M.A. in History** is an academic degree for students who want to teach history at the secondary school level, who are considering pursuing a doctorate, who want to conduct independent research, or who are lifelong learners with an interest in historical scholarship.

2. The **M.A. in Public History** (MAHP) is a professional degree for students seeking careers in museums, at historical societies or historic sites, in cultural resource management, in nonprofits, in government agencies, and in allied fields. It is also appropriate for secondary school teachers who seek to gain experience in project-based, community-engaged pedagogy.

3. The **Ph.D. in History** is an academic degree and the culmination of a historian’s academic training. Our doctoral program prepares students professionally for both academic and non-academic careers.

4. The **World History Bridge Certificate** provides a graduate-level credential in world history, an area of growing demand at both the secondary and post-secondary levels of education. The certificate program is especially suitable for history and social studies teachers and teachers in training.

5. The **M.A./J.D joint degree** leads to a simultaneous receipt of an M.A. from the Department of History and a J.D. from the Law School. Students must be accepted to the Law School before they may apply to the M.A. in History.

6. The **M.A./M.L.I.S. joint degree** leads to a simultaneous receipt of an M.A. from the Department of History and an M.L.I.S. from the School of Information Science. Students may either apply simultaneously to the M.A. and M.L.I.S programs or apply to one program and, after acceptance, apply to the other.

7. The **MAPH/M.L.I.S. joint degree** leads to a simultaneous receipt of an M.A. in Public History from the Department of History and an M.L.I.S. from the School of Information Science. Students may either apply simultaneously to the M.A. and M.L.I.S programs or apply to one program and, after acceptance, apply to the other.
Career outlook

- Public History and Library and Information Science (M.A.P.H./M.L.I.S. Joint Degree) (p. 254)
- World History (Bridge Graduate Certificate) (p. 255)

History (M.A.)
The M.A. in History is an academic degree for students who want to teach history at the secondary school level, who are considering pursuing a doctorate, who want to conduct independent research, or who are lifelong learners with an interest in historical scholarship. The M.A. degree can be completed in two years of full-time study.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Earning a graduate degree is an undertaking which requires a considerable commitment of time and financial resources. The Department of History expects applicants to its graduate program to arrive well-prepared to undertake a rigorous course of study.

The department normally considers only applicants whose undergraduate grade point average is at least 3.00 overall and at least 3.25 in a minimum of eighteen semester credits in history and related subjects at the advanced undergraduate level. Applicants should have or be in the process of acquiring relevant foreign language preparation to enter the area in which they wish to study. The department requires that all applicants submit a statement of purpose, a writing sample, two letters of recommendation from former instructors, a resume or curriculum vitae, and copies of transcripts from each college or university previously attended. Please consult the Department of History (https://clas.wayne.edu/history/) graduate handbook for detailed instructions for preparing application materials.

Application deadlines are October 15 (for Winter admission), January 15 (for Fall admission with funding consideration), and April 15 (for Fall admission without funding consideration).

PLEASE SEE ATTACHED PROPOSAL (p. 7) FOR CURRICULUM FOR M.A. in History (online)

Our M.A. students may write a thesis (Plan A) or essay (Plan B), and the degree requirements are slightly different depending on the path they choose. Both are detailed below.

M.A. in History (Plan A/Thesis)

(30 credits, 22 in regular coursework and 8 in thesis credits)

<table>

History — Public History (M.A.P.H.)
The M.A. in Public History (M.A.P.H.) is a professional degree for students seeking careers in museums, at historical societies or historic sites, in cultural resource management, in nonprofits, in government agencies, and in allied fields. It is also appropriate for secondary school teachers who seek to gain experience in project-based, community-engaged pedagogy. The M.A.P.H. degree can be completed in two years of full-time study.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Earning a graduate degree is an undertaking which requires a considerable commitment of time and financial resources. The Department of History expects applicants to its graduate program to arrive well-prepared to undertake a rigorous course of study.

The department normally considers only applicants whose undergraduate grade point average is at least 3.00 overall and at least 3.25 in a minimum of eighteen semester credits in history and related subjects at the advanced undergraduate level. The department requires that all applicants submit a statement of purpose, a writing sample, two letters of recommendation from former instructors, a resume or curriculum vitae, and copies of transcripts from each college or university previously attended. Please consult the Department of History (https://clas.wayne.edu/history/) graduate handbook for detailed instructions for preparing application materials.

Application deadlines are October 15 (for Winter admission), January 15 (for Fall admission with funding consideration), and April 15 (for Fall admission without funding consideration).
For the Master's in Public History degree at least 33 credits are required. 15 credits will be completed in core courses that include an internship and master's project. 18 credits will be completed in a public history track. Students are required to take at least three courses at the 7000-level or above. Candidates must petition the Graduate Committee for any exceptions to the M.A.P.H. requirements.

### History (Ph.D.)

The Doctor of Philosophy in History is an academic degree and the culmination of a historian's academic training. Our doctoral program prepares students professionally for both academic and non-academic careers.

Completing the Ph.D. typically involves at least four years of full-time study for students entering with a master's degree and at least six years for students entering with a bachelor's degree. Students who are admitted without a master's degree may choose to earn an M.A. by completing a thesis or essay as part of their coursework.

### Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Earning a graduate degree is an undertaking which requires a considerable commitment of time and financial resources. The Department of History expects applicants to its graduate program to arrive well-prepared to undertake a rigorous course of study.

The department normally considers only applicants whose undergraduate and/or master's grade point average is at least 3.00 overall and at least 3.25 in a minimum of eighteen semester credits in history and related subjects. Attainment of an M.A. in History is not required of doctoral applicants. Applicants should have or be in the process of acquiring relevant foreign language preparation to enter the area in which they wish to study. The department requires that all applicants submit a statement of purpose, a writing sample, two letters of recommendation from former instructors, a resume or curriculum vitae, Graduate Record Examination scores, and copies of transcripts from each college or university previously attended. Please consult the Department of History (https://clas.wayne.edu/history/) graduate handbook for detailed instructions for preparing application materials.

The application deadline is **January 15** for Fall admission.

The Ph.D. program requires ninety credits of course work beyond the B.A. degree.

Successful completion of Responsible Conduct of Research training
Attainment of Skill Area Competence in three fields outside of traditional academic history

Please consult the Department of History (https://clas.wayne.edu/history/) Graduate Handbook for a detailed explanation of these requirements.

Admission to Candidacy requires completion of the following requirements:

1. Filing of an approved Plan of Work with the Graduate School;
2. Satisfactory completion of written and oral qualifying examinations in two major and one minor history fields.

Dissertation: The dissertation is a work of original historical research and presentation on a topic selected by the student with the approval of the student's advisor and accepted as successfully completed by both the advisor and a dissertation committee. Upon completion of the dissertation, the student will be required to make a public lecture presentation-defense and to submit the dissertation for certification to the Graduate School.

### Academic Scholarship

All course work must be completed in accordance with the regulations of the Graduate School. Please consult the Department of History (https://clas.wayne.edu/history/) Graduate Handbook for a detailed explanation of these requirements.

### History and Law (M.A./J.D. Joint Degree)

The combined M.A./J.D. Program leads to the simultaneous receipt of a J.D. from the Law School and a M.A. from the Department of History. Students must complete at least 30 credits in History as well as all degree requirements for the J.D. Because the Law School may credit some of the non-law credits toward the J.D. degree, a student may be
able to complete the combined M.A./J.D. program in one semester beyond the time usually required to complete the J.D. alone.

**Admission Requirements**

*Applicants to this program must be admitted to both the Law School and Department of History M.A. program.*

Law students may apply to the Department of History for admission to the M.A. program, and upon admission may enroll in history courses after successful completion of their first year of legal studies. Admission to this program is contingent upon admission to the Graduate School (p. 35). Earning a graduate degree is an undertaking which requires a considerable commitment of time and financial resources. The Department of History expects applicants to its graduate program to arrive well-prepared to undertake a rigorous course of study.

The department normally considers only applicants whose undergraduate grade point average is at least 3.00 overall and at least 3.25 in a minimum of eighteen semester credits in history and related subjects at the advanced undergraduate level. The department requires that all applicants submit a statement of purpose, a writing sample, two letters of recommendation from former instructors, a resume or curriculum vitae, and copies of transcripts from each college or university previously attended. Please consult the Department of History [graduate handbook](https://clas.wayne.edu/history/) for detailed instructions for preparing application materials.

Application deadlines are **October 15** (for Winter admission) and **April 15** (for Fall admission).

MA/JD joint degree students must complete all requirements for a JD as described in the Graduate Bulletin as well as 30 credit hours for the History MA (Plan B). Coursework for the History MA consists of 12 credits in three core courses, plus at least 18 credits of elective coursework, 8 credits of which can be in LEX classes and at least 10 of which must be in HIS classes. Students are encouraged to take a variety of History courses and to pursue research topics that have a legal and/or constitutional history focus. Neither the History Department nor the Law School can guarantee the availability of any required or elective course in any given semester.

**History and Library and Information Science (M.A./M.L.I.S. Joint Degree)**

Joint-degree programs allow students to earn two degrees with fewer credits than if the degrees are earned separately. Students who enroll in the joint program will earn both the M.L.I.S. and M.A. in History degree. Graduates will increase their job market potential and be prepared to enter a new workforce that is capable of appraising and describing historical records, creating websites, and preserving electronic documents. Candidates must complete the required courses as outlined for both programs in order to graduate. Core courses in one program may not be used as elective courses in the other; fourteen credits of electives may be double-counted.

**Admission Requirements**

*Applicants to this program must be admitted to both the School of Information Sciences and Department of History M.A. program.*

Admission to this program is contingent upon admission to the Graduate School (p. 35). Earning a graduate degree is an undertaking which requires a considerable commitment of time and financial resources. The Department of History expects applicants to its graduate program to arrive well-prepared to undertake a rigorous course of study.

The department normally considers only applicants whose undergraduate grade point is at least 3.00 overall and at least 3.25 in a minimum of eighteen semester credits in history and related subjects at the advanced undergraduate level. Applicants should have or be in the process of acquiring relevant foreign language preparation to enter the area in which they wish to study. The department requires that all applicants submit a statement of purpose, a writing sample, two letters of recommendation from former instructors, a resume or curriculum vitae, and copies of transcripts from each college or university previously attended. Please consult the Department of History [graduate handbook](https://clas.wayne.edu/history/) for more details on how to prepare application materials.

Application deadlines are **October 15** (for Winter admission), **January 15** (for Fall admission with funding consideration), and **April 15** (for Fall admission without funding consideration).

**Requirements: Library and Information Science**

Students will complete twenty-nine credits in core and elective Information Science courses and seven credits in History elective courses.

**Requirements: History**

Students will complete twenty-three credits of History courses and seven credits of Information Science elective courses.

No more than two (2) courses may be taken at the 5000- or 6000-level without permission of the advisor and DGS (granted by their signatures on the Plan of Work); 5000- and 6000-level courses must be offered for graduate credit to count toward the MA degree.

INF courses (7 cr.)  7
Total Credits  30

Total for both degrees: fifty-three credits (no more than thirteen credits may be double-counted).

Public History and Library and Information Science (M.A.P.H./M.L.I.S. Joint Degree)

Students in this joint program will earn both the MAPH and an MLIS degree. Graduates of the program benefit from the joint preparation in public history and library and information science and increase their potential for finding employment in either field. Students are prepared to enter a new workforce with the skills to appraise and describe historical records, create and maintain websites, preserve electronic documents, and communicate with a public audience. Upon successful completion of this program students will be prepared for employment in a wide range of settings, including libraries, archives, museums, state and federal agencies, and the private sector.

Public history is applied history, and the MAPH leads to employment in occupations as diverse as museum work, library and archival research, public policy analysis, documentary filmmaking, state and national parks, and tourism. Public historians provide an essential service by making historical scholarship accessible to a broad public audience. Libraries, archives, and other institutions that hire information management professionals increasingly seek employees who can communicate with broad public audiences about their collections and holdings, and who can create exhibits and public programming. The MAPH/MLIS joint degree program responds to the changing professional expectations for librarians and archivists.

Admission Requirements

Applicants to this program must be admitted to both the School of Information Sciences and Department of History MAPH program.

Admission to this program is contingent upon admission to the Graduate School (p. 35). Earning a graduate degree is an undertaking which requires a considerable commitment of time and financial resources. The Department of History expects applicants to its graduate program to arrive well-prepared to undertake a rigorous course of study.

The department normally considers only applicants whose undergraduate grade point is at least 3.00 overall and at least 3.25 in a minimum of eighteen semester credits in history and related subjects at the advanced undergraduate level. The department requires that all applicants submit a statement of purpose, a writing sample, two letters of recommendation (at least one should be from a former instructor; the other may be a professional reference from a supervisor for a history-related internship or other employment), a resume or curriculum vitae, and copies of transcripts from each college or university previously attended. Please consult the Department of History (https://clas.wayne.edu/history/) graduate handbook for more details on how to prepare application materials.

Application deadlines are October 15 (for Winter admission), January 15 (for Fall admission with funding consideration), and April 15 (for Fall admission without funding consideration).

Students complete a minimum of 55 credits total for both degrees (14 hours are double-counted). For the MAPH degree, students complete 33 hours of MAPH credits, inclusive of 8 hours of INF credits that will also count toward the student’s MLIS degree. In SIS, students complete 30 hours of LIS credits and 6 hours of History credits, for a total of 36 credits. The History credits would also count toward the student’s MAPH electives.

Requirements: Library and Information Science

The MLIS degree requires 36 credits (including 6 credits of HIS courses).

History — World History (Bridge Graduate Certificate)

The Bridge Graduate Certificate in World History provides a graduate-level credential in world history, an area of growing demand at both the secondary and post-secondary levels of education. The certificate program is especially suitable for history and social studies teachers and teachers in training. Students can apply all of their certificate coursework to the Master of Arts in History or Public History if they decide to pursue an additional degree.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Earning a graduate degree is an undertaking which requires a considerable commitment of time and financial resources. The Department of History expects applicants to its graduate program to arrive well-prepared to undertake a rigorous course of study.

The department normally considers only applicants whose undergraduate grade point average is at least 3.00 overall and at least 3.25 in a minimum of eighteen semester credits in history and related subjects at the advanced undergraduate level. The department requires that all applicants submit a statement of purpose and copies of transcripts from each college or university previously attended. Please consult the Department of History (https://clas.wayne.edu/history/) graduate handbook for detailed instructions for preparing application materials.

Application deadlines are October 15 (for Winter admission) and April 15 (for Fall admission).

World History Bridge Certificate students complete 4 courses for a minimum 12 credits, as follows:

Core course—HIS 8310, World History Seminar (3 cr.)

Electives—At least 9 credits of HIS courses numbered 5000 or above, at least one of which has a global or comparative focus. Courses focused exclusively on US or European history cannot be counted toward the certificate. Students should aim for a regional distribution in their course selection, rather than take multiple courses focused on a single world region. Please consult the Department website for a list of approved courses.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Linguistics

Office: Room 10303, 5057 Woodward; 313-577-8642
Director: Haiyong Liu
https://clas.wayne.edu/linguistics (https://clas.wayne.edu/linguistics/)

Linguistics is devoted to the scientific study of language structure and use. The Linguistics Program at Wayne State offers an interdisciplinary approach to this field, permitting students to explore a wide range of topics and issues in language research. The program is administered by a director and an advisory committee of participating faculty who regularly teach courses for the program. The core linguistics courses are offered on a regular basis. Elective courses are offered in the following areas: (a) linguistics and a language; (b) language structure; (c) language variation and change; (d) language acquisition and processing; and (e) sociolinguistics and discourse/pragmatics.

Training in linguistics prepares students for advanced work in linguistic research, as well as for employment in teaching English and foreign languages; computer systems (especially natural language processing); broadcasting, mass media and journalism; publishing and editing; translation; international business; intercultural communication and negotiation; law; and generally any profession requiring the precise use or analysis of speech or writing.

- Linguistics (M.A.) (p. 255)
- Linguistics (Graduate Certificate) (p. 257)

Linguistics (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, applicants to the linguistics program must have taken at least one year of a foreign language.

Program Requirements

The master's degree is offered by the College of Liberal Arts and Sciences with both a Plan B and a Plan C master's options. Plan B requires a minimum of thirty-three credits that include at least two 7000-level seminars. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Programs are planned in consultation with the linguistics program advisor. To be admitted to candidacy, a coherent Plan of Work, listing both completed and proposed courses, must be submitted to the College by the time twelve credits have been earned.

- LIN 7710  Advanced Studies in Linguistic Structure
- LIN 7720  Advanced Studies in Language Use
- LIN 7770  Discourse Analysis

Elective Courses
The remaining courses are electives chosen in consultation with an advisor. Courses may be chosen from any one or more of the areas listed on the next tab. (A maximum of twelve credits may be earned in LIN 6720).
- LIN 7999  Master’s Essay Direction 3

Total Credits 33

1 The language-use and seminar course requirements may not be satisfied by the same course.
2 The language use course involves either the analysis of speech data acquired in fieldwork or theories that address language use.
3 Students following the Plan C coursework-only option should choose one additional 7000-level seminar in lieu of the Master’s Essay Direction course.

Elective Courses
Selected in consultation with an advisor, courses may be chosen from any one or more of the areas listed below. (A maximum of twelve credits may be earned in LIN 6720).

Linguistics and a Language
Students may complete up to nine credits in advanced language skills or in the linguistics of the chosen language as part of their electives. These credits are to be selected in consultation with an advisor.

Linguistics (Graduate Certificate)

This certificate program provides basic training to graduate students of various disciplines or students already with a B.A. degree who want to develop an understanding of how language is structured, acquired and used and/or whose career development would benefit from some background in linguistics. Admission to this program is contingent upon admission to the Graduate School (p. 35).

Students must complete a minimum of twelve graduate-level credits, including at least one 7000-level LIN course. The plan of work is developed in consultation with the Linguistics program advisor. All course work must be completed in accordance with the regulations of the Graduate School (p. 35) and the College of Liberal Arts and Sciences (p. 224). No transfer credit will be accepted.

1 If both LIN 5290 and LIN 5300 are chosen, then one course will apply toward the elective requirements.

Mathematics

Office: 1150 Faculty/Administration Building; 313-577-2479
Chairperson: Hengguang Li
https://clas.wayne.edu/math

The courses offered by the Department of Mathematics serve several purposes: they supply the mathematical preparation necessary for students specializing in the physical, biological or social sciences, in business administration, in engineering, and in education; they provide a route by which students may arrive at the level of research competency in any of several special mathematical areas; they allow students to prepare themselves for work as mathematicians and statisticians in industry and government; and they give an opportunity to all inquisitive students to learn something about modern mathematical ideas.

- Mathematics (M.S.) (p. 257)
- Mathematics (M.A.) (p. 258)
- Mathematical Statistics (M.A.) (p. 259)
- Applied Mathematics (M.A.) (p. 260)
- Data Science and Business Analytics (M.S. with a concentration in Statistics) (p. 261)
- Mathematics (Ph.D.) (p. 262)

Mathematics (M.S.)

The M.S. in Mathematics is the most rigorous program at the Master’s level and is designed for students who intend to study at the Ph.D. level in mathematical sciences, as well as for other students who are looking for a challenge.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35).

The entrance requirements for the MS in Mathematics program include successful completion of course work equivalent to the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 2010</td>
<td>Calculus I</td>

</tr>
</tbody>
</table>

As preparation for graduate study, the Department of Mathematics strongly recommends undergraduate course work along the line of the Prospective Graduate Study Concentration, described in the Mathematics B.A. and B.S. degree programs in the Undergraduate Bulletin.
Program Requirements

The Master of Science in Mathematics is offered under the following options:

**Plan A:** Twenty-six credits in course work plus an eight credit thesis.

**Plan B:** Twenty-nine credits in course work plus a three credit essay.

**Plan C:** Thirty-two credits in course work.

</table>

At least twenty-four credits in course work from the Department of Mathematics, including credits earned toward a thesis or essay under Plan A or Plan B options.

A final oral examination. All students in Plan C are required to take this examination. Students in Plan A or B may, upon recommendation of the thesis or essay adviser, be excused from the final oral examination by the Departmental Graduate Committee.

A public lecture on the thesis or essay for each student in Plan A or Plan B.

By the time twelve credits have been earned, each student must submit a Plan of Work, approved by a departmental adviser, to the director of the program. In the Plan of Work, the student must choose Plan A, Plan B, or Plan C. The Plan of Work must be approved by the Departmental Graduate Committee, at which time the student will be advanced to candidacy. Students are not allowed to take more than twelve credits in the program unless candidacy has been established.

NOTE: Candidates for the Master of Science in Mathematics are exempt from the requirement of the Graduate School that six credits in the major field must be in courses numbered 7000 and above.

NOTE: The following courses cannot be applied towards this degree:

Mathematics (M.A.)

An admissions moratorium is currently in effect for this program.

The Master of Arts with a Major in Mathematics is offered under the following options:

**Plan A:** Twenty-four credits in course work plus an eight credit thesis.

**Plan B:** Twenty-seven credits in course work plus a three credit essay.

**Plan C:** Thirty credits in course work.

Completion of these plans must satisfy the following criteria:
Mathematical Statistics (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35).

The entrance requirements for the master's program in statistics include successful completion of course work equivalent to the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>

At least 3 more credits in Mathematics at the 5000 level

Credit accrued in courses such as the history of mathematics or the teaching of mathematics, in which the study of mathematics itself is not the primary purpose will not be counted toward this requirement.

Program Requirements

The Master of Arts in Mathematical Statistics is offered under the following options:

**Plan A:** Twenty-four credits in course work plus an eight credit thesis in the area of mathematical statistics.

**Plan B:** Twenty-seven credits in course work plus a three credit essay in the area of mathematical statistics.

**Plan C:** Thirty credits in course work.

1. These courses represent several areas of applied mathematics.

By the time twelve credits have been earned a Plan of Work, approved by a departmental advisor, should be submitted to the director of the master's program in mathematics. At this time, the Graduate Committee will act on the application for candidacy. The student will not be allowed to take more than twelve credits in the master's program unless candidacy has been established.

In the Plan of Work the student will state his or her choice of one of the plans A, B, or C. The choice of plan must be approved by the Graduate Committee.

There is a final oral examination for the master's degree. All students in Plan C are required to take this examination. Students in Plan A or B may, upon recommendation of the thesis or essay advisor, be excused from the final oral examination by the Graduate Committee.

It is required that the thesis or essay of each student in Plans A or B be presented in a public lecture.

**NOTE:** Candidates for the Master of Arts degree with a major in mathematics or in mathematical statistics are exempt from the requirement of the Graduate School that six credits in the major field must be in courses numbered 7000 and above.

**Academic Scholarship:** All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).
### Applied Mathematics (M.A.)

This degree is designed for students who are interested in applied mathematics or are interested in applying mathematics to areas outside of mathematics (e.g., biology, chemistry, computer science, economics, engineering, geology, medical science, physics, psychology, social science). The program is flexible in that it does not represent the teaching of any fixed body of knowledge. It does require two areas of concentration, one of these being the major in mathematics (pure and applied) with emphasis on the applicable subjects. The minor area is to be either in applied mathematics or in an area outside of mathematics (such as the above) to which the student is interested in applying mathematics. Mathematical methods are emphasized.

### Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35).

Applicants for the Master of Arts in Applied Mathematics should have a good background in the area in which they are planning to apply mathematics, but a bachelor’s degree in mathematics is not required. Applicants must have successfully completed course work equivalent to the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 2010</td>
<td>Calculus I</td>
<td>12</td>
</tr>
<tr>
<td>&amp; MAT 2020</td>
<td>and Calculus II</td>
<td></td>
</tr>
<tr>
<td>&amp; MAT 2030</td>
<td>and Calculus III</td>
<td></td>
</tr>
<tr>
<td>MAT 2250</td>
<td>Elementary Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MAT 2150</td>
<td>Differential Equations and Matrix Algebra</td>
<td>3-4</td>
</tr>
<tr>
<td>or MAT 2350</td>
<td>Elementary Differential Equations</td>
<td></td>
</tr>
<tr>
<td>MAT 5070</td>
<td>Elementary Analysis</td>
<td>4</td>
</tr>
</tbody>
</table>

At least 3 more credits in Mathematics at the 5000 level.

Credit accrued in courses such as the history of mathematics or the teaching of mathematics, in which the study of mathematics itself is not the primary purpose will not be counted toward this requirement.

### Program Requirements

This program is usually offered as a Plan B master’s degree option requiring twenty-nine credits of course work plus a three credit essay. However, Plan A (master’s thesis) and Plan C (course work only) options are available with the approval of the Departmental Graduate Committee.

1. A minimum of thirty-two credits.
2. A minimum of twenty credits in mathematics courses not previously completed from the following list (additional courses may be approved on an individual basis):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 5100</td>
<td>Numerical Methods I</td>
<td>3</td>
</tr>
<tr>
<td>MAT 5110</td>
<td>Numerical Methods II</td>
<td>3</td>
</tr>
<tr>
<td>MAT 5210</td>
<td>Advanced Calculus</td>
<td>4</td>
</tr>
<tr>
<td>MAT 5220</td>
<td>Partial Differential Equations</td>
<td>4</td>
</tr>
</tbody>
</table>
Each student in this program is ordinarily required to write a project-type essay for three credits under the direction of a supervisor in the Department of Mathematics and an essay advisor from some department related to the minor area, both of whom must approve the essay. (If the chosen minor area is in applied mathematics, the adviser in the major area can be the same as the adviser in the minor area.) The selection of advisors and topics must be approved by the Departmental Graduate Committee.

NOTE: The following courses cannot be applied towards this degree:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 5000</td>
<td>Fundamental Concepts of Mathematics and Proof Writing</td>
<td>3</td>
</tr>
<tr>
<td>MAT 5070</td>
<td>Elementary Analysis</td>
<td>4</td>
</tr>
</tbody>
</table>

The following courses can only be applied towards requirement three for the minor in education:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 6130</td>
<td>Discrete Mathematics</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>MAT 6210</td>
<td>Teaching Geometry, Probability and Statistics, and Discrete Mathematics from an Advanced Perspective</td>
<td>3</td>
</tr>
</tbody>
</table>

**Academic Scholarship:** All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

**Data Science and Business Analytics (M.S. with a concentration in Statistics)**

The Master of Science in Data Science and Business Analytics (M.S.D.S.B.A.) program is designed to give graduates a core of computing, business, statistics, and operations research skills to identify, analyze, and solve analytics problems; to integrate those skills in an interdisciplinary way that other, single-discipline-oriented analytics degree might not; and to provide in-depth training in an analytics area of specialization. The statistics concentration is designed to meet demand in industry for talent with solid statistical foundations.

**Admission Requirements**

Applicants must meet requirements for admission to the Graduate School (p. 35). Students must have earned a Bachelor's Degree from an accredited college or university with sufficient background in mathematics, statistics and computer programming. Application and admission to this program will be coordinated separately in each of the concentration areas in coordination with the participating units.

**Program Requirements**

The M.S.D.S.B.A. program requires students to complete a minimum of thirty credits using master's degree Plan C: a minimum of twenty-four credits in course work plus a six credit practicum with industry.
Students will be required to take three core courses (covering the three concentrations) along with three advanced courses which will be required within a concentration. In addition, students will be able to take at least two elective courses. Students will also be required to take a practicum course carrying six credits that will pull together a variety of subject material covered in the core/elective courses in the context of real-world applications. The six credits for practicum may be replaced by two applied statistics courses for the statistics concentration if students elect to do so. These applied statistics courses typically include class projects. Combined, the core and advanced courses give students integrated breadth of analytics, and provide depth of knowledge in an area of analytics tailored to their specific interests and career goals.

**Academic Scholarship:** All course work must be completed in accordance with the regulations of the Graduate School (p. 35) and the College of Liberal Arts and Sciences (https://bulletins.wayne.edu/graduate/college-liberal-arts-sciences/academic-regulations/). Students may enroll on a full-time or part-time basis but must complete requirements within six years of admission.

**Mathematics (Ph.D.)**

Admission to this program is contingent upon admission to the Graduate School (p. 35). Doctoral applicants must have completed a master’s degree in mathematics or reached an equivalent level of advancement. The Department Graduate Committee may make exceptions to this rule in cases where unusual ability has been demonstrated. Admission to the doctoral program will be granted only to those whose records indicate an ability to succeed in advanced study and research.

All applicants for the degree of Doctor of Philosophy with a major in mathematics are urged first to study the general doctoral degree requirements (p. ) and to plan their programs so that all those requirements are fulfilled in the proper order and at the proper times. On the next tab are the major steps in earning this degree. Specific requirements of the Mathematics Department are included.

Candidates for the doctoral degree must complete ninety credits in course work beyond the bachelor’s degree, including thirty credits of dissertation direction. Specific requirements for this degree in mathematics are as follows:

**Preliminary Examinations:** These are two-hour written examinations covering undergraduate level material from a sophisticated point of view. Students are required to pass a preliminary exam in Algebra or Analysis, as well as one additional exam from the following four choices:

- Algebra
- Analysis
- Applied Mathematics
- Probability and Statistics

Students may choose to take exams in their first semester in the Ph.D. program, in which case they must satisfy the requirements by the end of their second semester; or they may choose to take exams in their second semester, in which case they must satisfy the requirements by the end of their third semester. Students must select exams at the beginning of each semester, to be taken later in that semester.

Under special circumstances, the Departmental Graduate Committee may approve petitions on an individual basis for exceptions to these rules.

**Course Requirements:** In addition to the examinations described above, before advancement to candidacy every student in the Ph.D. program must earn a grade of 'B' or better in one course in each of the three subject areas in which they do not pass a Preliminary Examination. The courses may be selected from the following choices:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 7400</td>
<td>Advanced Algebra I</td>
<td>4</td>
</tr>
<tr>
<td>MAT 7600</td>
<td>Real Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MAT 7200</td>
<td>Ordinary Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>or MAT 7210</td>
<td>Partial Differential Equations</td>
<td></td>
</tr>
<tr>
<td>MAT 7700</td>
<td>Advanced Probability Theory I</td>
<td>3</td>
</tr>
<tr>
<td>or STA 7810</td>
<td>Advanced Statistics Theory I</td>
<td></td>
</tr>
<tr>
<td>MAT 7500</td>
<td>Topology II</td>
<td>3</td>
</tr>
<tr>
<td>or MAT 7510</td>
<td>Algebraic Topology I</td>
<td></td>
</tr>
</tbody>
</table>

As a general rule, students are expected to take at least one required course each semester until they fulfill their course requirements. Under special circumstances, the Departmental Graduate Committee may approve petitions on an individual basis for exceptions to these rules.

**QUALIFYING EXAMINATIONS** consist of two sections, a written and an oral examination. A student must begin the written qualifying examination by the end of the third year in the Ph.D. program, and must pass all parts of the examination by the end of the fourth year in the Ph.D. program. All parts of the examination must be passed before a student can advance to Candidacy Status.

**Written Qualifying Examinations** consist of two three-hour parts, a major and a minor area exam. The examination committee will give the student a list of topics in the student’s area of specialization. These topics should both reflect the student’s particular research interest and be of sufficient breadth to cover the entire area. The committee will also designate a minor area on which the student will be examined. The minor area is to be supportive of the major area but sufficiently different to avoid compromising the diversity of the total two-part exam.

**Oral Qualifying Examinations:** By University regulations, after passing the written Qualifying Examinations, a student must take an oral Qualifying Examination; Departmental policy mandates that the exam must be taken within thirty days after certification of passing the written exam. The oral examination committee consists of the written examination committee, and a representative of the Graduate Committee. The oral examination will normally cover material similar to that of the written examinations, but may also include material outside the written examination areas which is deemed relevant to the student’s research work.

**Dissertation:** The thirty credit dissertation registration requirement is fulfilled by registering for the courses MAT 9991, MAT 9992, MAT 9993, and MAT 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV respectively), in consecutive academic year semesters.

**Defense of Dissertation:** Candidates must pass a final oral examination covering their research after the candidate’s advisor has approved the completed dissertation.

**Academic Scholarship:** All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).
Nutrition and Food Science

Dietetics (M.S.)

Admissions Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35) and a separate application to the Coordinated Program in Dietetics. Successful applicants shall have a minimum grade point average of 3.3. Undergraduate preparation must include required courses as follows: introductory and organic chemistry, anatomy and physiology, microbiology, human nutrition, food science, macronutrient metabolism, psychology, statistics, and introduction to management (all must be within a five-year recency of application). The Graduate Record Examination is recommended.

Program Requirements

The Master of Science in Dietetics requires 42 credits — 30 credits of major coursework, including a 3-credit capstone course, and 12 credits of supervised practice. Required competencies must be achieved upon program completion as mandated by the Accreditation Council for Education in Nutrition and Dietetics (ACEND); therefore, coursework is based on fulfilling those competencies and the program curriculum is set and sequential, with no elective courses offered. All coursework must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Nutrition and Food Science (M.S.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Successful applicants shall have a minimum grade point average of 3.0. Undergraduate preparation should include basic courses in nutrition and food science. Persons lacking a limited number of prerequisites may be admitted conditionally, contingent upon completion of certain courses specified by the graduate committee. The Graduate Record Exam is recommended.

Program Requirements

This degree is offered only as a Plan B master’s program requiring thirty-two credits, including a three-credit essay. The concentration in food service management includes courses in the School of Business Administration. Contact the Department for information on applicable courses. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Nutrition and Food Science (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Successful applicants shall have a minimum grade point average of 3.0. Undergraduate preparation should include basic courses in nutrition and food science. One year of introductory chemistry, and at least one semester each of organic chemistry, anatomy and physiology are required; biochemistry and statistics are recommended. Persons lacking a limited number of prerequisites may be admitted conditionally, contingent upon completion of certain courses specified by the graduate committee. The Graduate Record Examination is recommended.

Program Requirements

This degree is offered only as a Plan A master’s program requiring thirty-two credits, including a three-credit thesis based on completion of research study, and eight credits of laboratory course work. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Nutrition and Food Science and Public Health (M.A./M.P.H. Joint Degree)

The M.A. in Nutrition and Food Science/M.P.H. is a joint degree program offered by the Department of Nutrition and Food Science, College of Liberal Arts and Sciences, and Department of Family Medicine and Public Health Sciences, School of Medicine.

Students must meet the admission and graduation requirements of both programs and enroll concurrently in the two programs during most of the period in which they are earning the degrees. If they complete requirements for only one degree, one degree will be awarded.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Admission criteria for the MA-MPH Joint Degree will meet the requirements of both MA and MPH degrees by requiring:

1. A minimum undergraduate Grade Point Average of 3.0 and all requirements for admission to the WSU Graduate School that include satisfying the English proficiency requirements. If applicants have not completed a baccalaureate degree from an accredited institution in the US or in a country where English is the native language, satisfactory attainment of scores in the Michigan English Language Assessment Battery (MELAB) (85), the Test of English as a Foreign Language (TOEFL) (79 internet-/550 paper-based), or the International English Language Testing System (IELTS) (6.5) will be required. Tests should not be more than 2 years old. The MPH Program has established a minimum TOEFL score of 90 and a minimum IELTS score of 7.
2. Standardized Test Scores: GRE, MCAT, GMAT or LSAT within the last five years.
3. The submission of a professional curriculum vitae together with a satisfactory personal statement indicating the applicant’s background, research and/or work experience, interests, and career goals as they relate to attainment of the MA-MPH degree. Three letters recommendation will also be required. An interview may be conducted.
4. Completion of college-based courses in mathematics and the social sciences, and completion of the following undergraduate courses or equivalent:

Total Credits: 32

Program Requirements

A minimum of 59 graduate credits beyond the baccalaureate degree is required for completion of the MA-MPH program.

Students enrolled in the MA-MPH Joint Degree Program will be required to take specific NFS (p. 35) and FPH (p. 35) listed public health-related courses. The culminating master’s essay (NFS 7999) requirement of the MA degree will be substituted by completion of the 3-credit hour MPH project course (FPH 8990). A total of 12 credits can be double-counted towards completion of this joint degree program.

Graduation requirements for the MA-MPH Joint Degree are consistent with the MA and MPH Degrees and will:

1. Require completion of all required courses for both the MA and MPH degree segments, the public-health related courses specific to the MA-MPH Program, the culminating MPH project course, and elective courses for a minimum total of 59 credit hours within a 6 year period. A total of 15 credits may be double-counted.
2. Require students to maintain a minimum grade point average of 3.0 in the entire program. A minimum of a B grade in all required courses in both the MA and MPH segments will also be required. Students obtaining less than a B grade in any core or required course will be allowed to retake it only once. Departmental policies will allow for only one C grade over the course of the entire program (and only in an elective course).

¹ MA-MPH Joint Degree double-counted courses
Nutrition and Food Science (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). A completed Master's degree in a health/science related filed is recommended. A minimum grade point average of 3.0 and the Graduate Record Examination is option, but recommended. Three letters of reference must be submitted, along with a statement of the applicant's goals and career objectives, and an interview will be conducted with applicants, whenever feasible. Students with a master's degree in nutrition, food science, or related disciplines will have their transcripts evaluated to determine which courses meet the Ph.D. course requirements.

Program Requirements

A minimum of ninety graduate credits beyond the baccalaureate is required for completion of the Ph.D. program, distributed as follows:

1. At least thirty credits in Nutrition and Food Science. Twenty-two of these credits are required for all students, and eight credits are selected to fill student needs and interests.
2. Additional courses from other basic science departments including at least one 7000-level course in biochemistry and one graduate course in statistics.
3. Eight credits must be completed outside the Department to form a minor. A list of required and elective courses for doctoral studies is available from the Department Office.
4. Thirty credits in dissertation research, involving independent research under the direction of a faculty member in the Department. The thirty credit dissertation registration requirement is fulfilled by registering for the courses NFS 9991, NFS 9992, NFS 9993, and
5. Submission of a satisfactory research dissertation.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).
Peace and Conflict Studies

Office: 2320 Faculty/Administration Building; 313-577-3453
Director: Frederic S. Pearson
https://clas.wayne.edu/cpcs (https://clas.wayne.edu/cpcs/)

- Peace and Security Studies (Graduate Certificate) (p. 266)

Peace and Security Studies (Graduate Certificate)

The surge of violent disputes, civil disruption, military campaigns, human rights controversies and security concerns worldwide has led to new emphasis on constructive intervention and positive solutions to violent human confrontations. Concern about ethnic tensions, terrorism, border conflict, immigration, weapons flows, alternate security perspectives and violence at home and abroad create a great need for understanding the circumstances and means by which peace is threatened, reinforced, and preserved. On the inter-personal level, issues of abuse, violence and incivility also must be addressed.

Many of these topics now characterize job and career opportunities in a variety of fields. The Graduate Certificate in Peace and Security Studies (GCPSS), offered by the WSU Center for Peace and Conflict Studies, represents a unique added credential, with emphasis on prevention of violence, peaceful borders and social boundaries, for students undertaking Master’s level study or who have completed an accredited graduate degree and are looking forward to work in such areas as social service, diplomacy, education, public service, theology, security management and law enforcement.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). The GCPSS program is open to students who have been admitted to or completed an accredited Master’s degree program in an appropriate discipline at Wayne State University or at another university in this region or Canada. Applicants who have completed a Master’s at a non-North American university will be required to submit two letters of academic recommendation, a writing sample, a personal statement indicating the reasons for pursuing the GCPSS, along with evidence, as appropriate, of English proficiency (e.g., TOEFL score). The Director of the Center for Peace and Conflict Studies is the program advisor.

Program Requirements

The GCPSS requires a minimum completion of fifteen credits in peace and security related courses. Up to nine Certificate credits may be applied toward the requirements of a graduate degree.

Two core courses in Peace and Security Studies are required, along with completion for credit of a community based practicum (applied research) or internship (professional training) experience. An additional six elective credits are to be selected from existing courses in a variety of disciplines; one of these courses may come from the student’s home Master’s major. Students in the program will be required to maintain at least a 3.0 g.p.a. in Peace and Security studies core and elective courses. Graduate School time limitations on completion of degree or certificate requirements and regulations on the transfer of credits from other programs will apply. The GCPSS is awarded upon completion of the student’s M.A./M.S./M.S.W./M.B.A. (or equivalent degree) requirements along with certificate requirements.

Total Credits 15

1 Students in PCS 7800 may undertake fieldwork either in the form of an original applied research project or internship placement in a relevant international or community agency in the Windsor-Detroit areas or abroad, dealing with issues of political or group violence or reconciliation, immigration or with border management. Internship placement may not be paid or be in the student’s own place of employment and may not coincide directly with any other internship or practicum in the student’s graduate program. The experience must result in a supervisor evaluation and substantial written analysis by the student. PCS 7800 is offered each semester (supervised by members of the PCS Faculty Committee) and should be taken after completing PCS 6100 and PCS 7100.

2 Additional graduate courses related specifically to peace and/or security areas that could satisfy the elective sequence requirement are listed below. Students may petition for acceptance of alternate relevant electives.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Assessment: Upon completion of their certificate requirements each student is required to submit a small portfolio of what they consider to
be their best work in the program, which will be reviewed as a way of evaluating the program itself. Core course instructors in the program also report on the extent to which assessment goals were reached and will survey the students to determine ways in which course material was or was not utilized in career and everyday life experiences.

Philosophy

Office: 5057 Woodward, 12th floor; 313-577-2475
Interim Chairperson: Eric Hiddleston
https://clas.wayne.edu/philosophy

- Philosophy (M.A.) (p. 267)
- Philosophy (Ph.D.) (p. 267)
- Health Care Ethics (Graduate Certificate) (p. 268)

Philosophy (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Admission requires approval by the admissions officer of the Department. Prerequisites should include courses in logic, value theory, and the history of philosophy. The Graduate Record Examination is required if the student's undergraduate grade point average is below 2.75 for a degree awarded by an accredited institution, or below 3.0 for a degree awarded by a non-accredited institution.

Program Requirements

The master's degree is offered by this department under the following options:

Plan A: Twenty-four credits in course work, including at least two graduate seminars at the 7000-level in philosophy, plus an eight-credit master's thesis.

Plan B: Twenty-eight credits in course work, including at least two graduate seminars at the 7000-level in philosophy, plus a four-credit master's essay.

Plan C: (open only to prospective doctoral candidates registered in the Ph.D. program) Thirty-two credits of course work, including at least two graduate seminars at the 7000-level in philosophy, plus satisfaction of all Ph.D. logic and preliminary essay requirements.

Candidacy must be established by the time twelve credits have been earned. All students in the master's program must pass the Departmental examinations in elementary logic before the second year of study.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Philosophy (Ph.D.)

Admission to this program is contingent upon admission to the Graduate School (p. 35).

Candidates for the doctoral degree must complete ninety credits beyond the baccalaureate degree, including thirty credits of dissertation directed study. In order to continue in the program and gain admission to candidacy, a student must satisfy the following:

1. Pass PHI 5050 or the Departmental Examination in elementary logic before the second year in the doctoral program;
2. Complete the Departmental Advanced Logic Requirements by the end of the fourth year;
3. Satisfy the course requirements in metaphysics/epistemology, value theory, and history of philosophy by the end of the fourth year;
4. Complete the two preliminary essays by the beginning of the fourth year; and
5. Pass an oral examination on the dissertation prospectus, by the fifth year;

The thirty credit dissertation registration requirement is fulfilled by registering for PHI 9991, PHI 9992, PHI 9993, and PHI 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The candidate’s doctoral committee must approve the doctoral dissertation prior to an oral presentation open to all interested faculty and students.

Before receiving a Ph.D., the student must give some classroom lectures under the supervision of the faculty of the Philosophy Department.

**Academic Scholarship:** All course work must be completed in accordance with the regulations of the Graduate School (p. 224) and the College of Liberal Arts and Sciences (p. 224).

### Health Care Ethics (Graduate Certificate)

The Graduate Certificate in Health Care Ethics provides grounding in the essentials of bioethical reasoning and practice, including its application to issues in the domains of medicine, law, and public policy. Online course offerings help participants further existing career and education plans, facilitate changes in career and education plans, or help choose suitable careers, as well as further personal development.

**Admission requirements:** Admission to the certificate program is contingent upon admission to the Graduate School (p. 35).

1. Applicants are required to have an undergraduate or graduate degree (with at least a 3.0 GPA) in a field allied with health, law, or philosophy. Applicants are required to submit transcripts of such work.
2. Applicants are required to submit a personal statement describing their reasons for pursuing the certificate as well as career plans or goals.

Students in the Certificate Program must complete four courses for 16 credits total from the following list of courses.

<table>
<thead>
<tr>

</tbody>
</table>

* Students must complete at least one of PHI 5250 or PHI 5330. Students may include both courses as part of the overall requirements.

** The Certificate Essay course, PHI 6999, is available only after completing at least two other courses from the list.

Students must complete the 4 courses in a maximum of 3 calendar years and with an overall GPA of 3.0 or better. Courses in which students receive grades of C or lower will not count toward the certificate. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

---

### Physics and Astronomy

**Office:** 135 Physics Research Building; 313-577-2721
**Chairperson:** Peter Hoffmann
https://clas.wayne.edu/physics/ (http://www.clas.wayne.edu/physics/)

Physics is the science that describes the behavior of the physical world. It is the most basic of all sciences and as such is responsible for the interpretation of fundamental physical processes which support many other scientific disciplines.

The degree programs of this department are designed to provide students with the broad-based knowledge and problem-solving skills that are needed in order to be productive physicists in an academic, government, or industrial environment. The programs can accommodate students with varying undergraduate backgrounds and are designed to provide maximum flexibility for individual students. At the doctoral level, specializations are offered in the areas of: elementary particle physics, nuclear physics, condensed matter physics, atomic physics, materials science, optics, biophysics, and quantum field theory.

Faculty members are committed to excellence in research and teaching, and work in an open and informal atmosphere which allows effective communication between students and advisors. The faculty hold national and international reputations in their areas of specialization. They organize and participate in conferences, publish extensively, and receive numerous outside grants, contracts and fellowships. In addition, they engage in many collaborations with scientists in both foreign and American universities and national laboratories. The department is housed in a modern physics building containing well-equipped research laboratories.

- Physics (M.A.) (p. 268)
- Physics (M.S.) (p. 269)
- Physics (Ph.D.) (p. 270)

### Physics (M.A.)

For some students, the master’s degree will be used as part of a continuing Ph.D. program; for others, it will be a terminal degree leading to employment in government laboratories, industrial programs, hospitals, teaching positions, and other occupations. The Master of Arts with a major in Physics is offered under Plan B, as described on the next tab.

### Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, applicants must satisfy the following criteria.

### Prerequisite Preparation

Prerequisite preparation should include:

<table>

A departmental final oral examination is required of all candidates.

Plan B (plan-specific requirements)

Plan C (plan-specific requirements)

At least three credits of coursework in physics and astronomy at the 7000 level and above (exclusive of PHY 7990, PHY 7996, PHY 7999, PHY 8991, PHY 8995).

Other graduate courses can be taken at the 5000 level or above and can include up to 4 credits of PHY 7990, PHY 7999, PHY 8991, PHY 8995. Courses in departments other than physics and astronomy can be taken with permission of the graduate director.

Plan A (plan-specific requirements)

Plan B (plan-specific requirements)

Plan C (plan-specific requirements)

At least three credits of coursework in physics and astronomy at the 7000 level and above (exclusive of PHY 7990, PHY 7996, PHY 7999, PHY 8991, PHY 8995).

Other graduate courses can be taken at the 5000 level or above and can include up to 4 credits of PHY 7990, PHY 7999, PHY 8991, PHY 8995. Courses in departments other than physics and astronomy can be taken with permission of the graduate director.

Plan A (plan-specific requirements)

Plan B (plan-specific requirements)

Plan C (plan-specific requirements)

**Physics (Ph.D.)**

For some students, the master's degree will be used as part of a continuing Ph.D. program; for others, it will be a terminal degree leading to employment in government laboratories, industrial programs, hospitals, teaching positions, and other occupations. The Master of Science with a Major in Physics is offered under Plan A or Plan C.

**Admission Requirements**

Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, applicants must satisfy the following criteria.

**Prerequisite Preparation**

Prerequisite preparation should include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHY 7999</td>
<td>Master’s Essay Direction (3 credits required)</td>
<td></td>
</tr>
</tbody>
</table>

A departmental final oral examination is required of all candidates.

Plan B (plan-specific requirements)

Plan C (plan-specific requirements)

At least three credits of coursework in physics and astronomy at the 7000 level and above (exclusive of PHY 7990, PHY 7996, PHY 7999, PHY 8991, PHY 8995).

Other graduate courses can be taken at the 5000 level or above and can include up to 4 credits of PHY 7990, PHY 7999, PHY 8991, PHY 8995. Courses in departments other than physics and astronomy can be taken with permission of the graduate director.

Plan A (plan-specific requirements)

Plan B (plan-specific requirements)

Plan C (plan-specific requirements)

At least three credits of coursework in physics and astronomy at the 7000 level and above (exclusive of PHY 7990, PHY 7996, PHY 7999, PHY 8991, PHY 8995).

Other graduate courses can be taken at the 5000 level or above and can include up to 4 credits of PHY 7990, PHY 7999, PHY 8991, PHY 8995. Courses in departments other than physics and astronomy can be taken with permission of the graduate director.

Plan A (plan-specific requirements)

Plan B (plan-specific requirements)

Plan C (plan-specific requirements)
Program Requirements
Candidates for the doctoral degree must complete ninety credits beyond the baccalaureate, including thirty credits of dissertation research. Students must demonstrate proficiency in the fields of: mechanics, electromagnetic theory, quantum physics, and thermodynamics and statistical mechanics.

Course work:

<table>
<thead>

</tbody>
</table>

In general, it is recommended that students take all the advanced courses in their specialty. Students specializing in any branch of theoretical physics are encouraged to take the quantum theory of fields, or a related directed study. On petition of the student and his/her dissertation advisor, the Departmental Graduate Committee may waive any of the above course requirements.

Ph.D. Qualifying Examination: This will normally be taken after the student has completed approximately one year of graduate course work. Its purpose is to investigate the student’s knowledge of physics and capacity for creative thought. This is a written examination. The student must submit a Plan of Work prior to taking this examination.

Physics Colloquium (PHY 8995): It is required that all full-time graduate students register for and attend the Departmental Physics Colloquium each semester they are in residence.

Dissertation: An approved dissertation is required. The thirty credit dissertation registration requirement is fulfilled by registering for the courses PHY 9991, PHY 9992, PHY 9993, and PHY 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Political Science
Office: 2040 Faculty/Administration Building; 313-577-2630
Chairperson: Daniel S. Geller
https://clas.wayne.edu/politicalscience

The study of political science is aimed at understanding and illuminating the nature and problems of government and the role of politics in the modern world. This is accomplished through systematic exploration of the structure and processes of government at different levels and across nations, through the study of individual and collective political behavior, and through analyses of policy problems and the processes through which public policies are formulated and administered. The field of political science is of special importance to students whose career goals include:

1. Professions likely to involve participation in public affairs, including law, engineering, criminal justice, public health, social welfare and education.
2. Administrative or executive positions in government — local, state or federal, and in non-profit organizations dealing with the public sector.
3. Teaching of political and social science at the secondary, community college and university levels.
5. Leadership, research and staff roles in citizen organizations, political parties, economic and social interest groups, municipal research bureaus and nonprofit organizations.
6. Positions associated with mass communications, such as radio, television and newspapers, where understanding of public affairs and governmental policies and organization is required for accurate reporting and analysis.
7. Positions in private enterprise where knowledge of governmental processes is essential, such as in industrial relations, legislative liaison and public relations.

- Political Science (M.A.) (p. 271)
- Political Science and Law (M.A./J.D. Joint Degree) (p. 272)
- Public Administration (M.P.A.) (p. 272)
- Political Science (Ph.D.) (p. 273)
- Nonprofit Management (Graduate Certificate) (p. 274)

Political Science (M.A.)
The Master of Arts program in Political Science is designed for students who have completed an undergraduate degree and wish to continue their education in Political Science. The MA program prepares students for doctoral study upon completion of the degree, and for careers in government, policy advocacy and the non-profit sector.

Admission Requirements
Admission to this program is contingent upon admission to the Graduate School (p. 35). A strong undergraduate performance is a prerequisite and substantial undergraduate preparation in the social sciences is recommended. Applicants must submit the following materials via the online application.

1. Official copies of transcripts from all colleges and universities attended.
2. A personal statement: a two to three-page essay describing your educational and professional goals as they relate to the Master’s program.
3. Two letters of recommendation.
4. Optional: Graduate Record Examination scores. Applicants with a cumulative GPA below 3.30 must submit GRE scores in order to be considered for admission. Applicants with a GPA of 3.30 or higher are not required to submit GRE scores, although they may wish to do so, especially if they are considering continuing on to the Ph.D.

The Master of Arts in Political Science program accepts applications for admission to start in either Fall or Winter terms.

AGRADE – Accelerated Graduate Enrollment

The Department of Political Science permits undergraduate majors with superior academic records to petition for accelerated graduate enrollment under the AGRADE (BA to MA) program. This program allows qualified juniors and seniors to apply a maximum of 16 credits earned in specifically approved courses to both a bachelor’s and a master’s degree, saving time and money in the pursuit of both degrees. For further details about the AGRADE program, students should contact either the undergraduate advisor or graduate program director.

Program Requirements

The Master of Arts in Political Science requires a minimum of thirty-three credits, including twenty-four in political science and either a three-credit master’s essay (Plan B) or eight-credit thesis (Plan A).

All masters students must satisfy a general Departmental requirement aimed at the development of basic analytic and methodological skills by successfully completing PS 5630 (statistics) and PS 7660 (research methods). These courses should be taken early in the student’s program of study. Students select a major field of study from among the following six fields: American government and politics, comparative politics, political theory, public policy, urban politics, and world politics. A minimum of twenty-four credits must be completed in political science.

If the thesis option is elected, an oral examination on the thesis is required.

A student’s program is finalized in a Plan of Work that must be filed by the time the student has earned twelve credits. The student should consult the department’s Graduate Program Director for guidance in the development of his/her Plan of Work and for the specific requirements of their major field concentration.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Political Science and Law (M.A./J.D. Joint Degree)

This department in cooperation with the School of Law offers a joint degree program leading to a Master of Arts degree in Political Science and a Juris Doctor degree.

Admission Requirements

Students must first be admitted to the Law School before applying for this joint degree program. Having entered the Law School, students may then apply for admission to the Master of Arts program in Political Science. Applicants must satisfy all admissions requirements for the Master of Arts in Political Science (see above), except for the Graduate Record Examination which is satisfied by Law School admission. Students should have some undergraduate background in the social sciences, including course work in American politics. Students lacking such preparation may be required to take course work in addition to the minimum required for the degree.

Program Requirements

This degree is offered only as a Plan B master’s program requiring thirty-three credits including a three credit essay. Credit distribution must consist of twenty-one credits of political science including PS 5630, PS 7660, and the essay credit; and twelve credits in law courses. Programs integrating course selections from the two principal areas are developed on an individual basis.

Upon completion of these M.A. requirements and the Law School requirements for the J.D., students are awarded both degrees. Students should begin course work in the Law School and complete the required first year curriculum before taking any Political Science courses. Subsequently, a combination of political science and law courses may be taken. For further information regarding the joint program, students should consult the Department’s Director of Graduate Studies.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Public Administration (M.P.A.)

This program is designed to prepare students for careers in public service in government, nonprofit organizations, and private organizations. The curriculum emphasizes study of the environment of public service, management techniques, organizational dynamics, the policy process, and the analysis of public policies.

Accreditation

The program is accredited by the Network of Schools of Public Policy, Affairs, and Administration.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Undergraduate preparation in the social sciences, although recommended, is not required. Applicants must have a 3.0 grade point average in the last sixty credits of undergraduate work to be considered for regular admission. In addition, scores from the Graduate Record Examination (GRE) must be submitted, with the following exceptions:

1. Applicants with an undergraduate grade point average exceeding 3.29 need not submit GRE scores.
2. Applicants holding master’s degrees in other fields and having graduate grade point averages of 3.30 or higher in their graduate degree work, need not submit GRE scores. Letters of Recommendation from previous instructors are welcome but not required.

A personal statement citing career goals and objectives is also required.

Program Requirements

The Master of Public Administration is offered under the following option:

Plan C: Thirty-nine credits (minimum) in course work.

Of the thirty-nine credits required for the degree, thirty credits are earned in a required set of core courses within the Department. Students
without significant administrative background must meet an additional requirement of at least three credits of supervised internship over and above the minimum of thirty-nine credits otherwise required. All students must complete thirty credits of core requirements including:

<table>

</tbody>
</table>

As part of the thirty-nine credits, students are also required to complete an area of concentration consisting of at least nine credits, which may require course work outside of political science. Passage of a written comprehensive examination based on the core curriculum is also required to earn this degree.

A student’s program is finalized in a Plan of Work that must be filed by the time the student has earned twelve credits. The student should consult the department’s M.P.A. program director for guidance in preparing this Plan of Work.

**Academic Scholarship:** All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

No credit will be granted for courses taken at Wayne State prior to formal admission to the M.P.A. program without prior authorization of the M.P.A. Program Committee.

**Areas of Concentration:** Students in the M.P.A. program are required to select an area of concentration consisting of a minimum of nine credits of interrelated course work. Students must consult with, and secure the approval of, the M.P.A. program director prior to undertaking this part of the program, but students pursuing a specific career goal may use the Elective Option to design their own specialization. Areas of concentration include:

- Economic Development Policy and Management
- Health and Human Services Policy and Management
- Human and Fiscal Resource Management
- Non-Profit Policy and Management
- Organizational Behavior and Management
- Urban and Metropolitan Policy and Management
- Elective Option (individually tailored)

**Graduate Certificate Programs:** In conjunction with their degree work, M.P.A. students may also pursue a graduate certificate in the following programs.

- Graduate Certificate in Nonprofit Management (p. 274) administered by the M.P.A Program.
- Graduate Certificate in Economic Development (p. 281) administered by the Department Urban Studies and Planning.

- Graduate Certificate in Gerontology (p. 364) administered by the School of Social Work.

**Political Science (Ph.D.)**

The Doctor of Philosophy in Political Science at Wayne State prepares students with a strong intellectual interest in political science for careers in academia, government, non-profit organizations and private-sector research firms. The Ph.D. degree in political science indicates not only the achievement of superior knowledge of the major theoretical approaches, research findings, and debates in the discipline but also the ability to initiate, design and carry out independent research.

Our Ph.D. program attracts a diverse student body, including many mid-career professionals, and accommodates both full and part-time study. Most students finish within 5 to 6 years. We offer fellowships and teaching assistantships to full-time students on a competitive basis. Part-time students are encouraged to apply for tuition scholarships. Research assistantships may also be available with individual faculty members.

**Admissions Requirements**

Admission to this program is contingent upon admission to the Graduate School (p. 35).

The doctoral program in political science accepts applications for admission to start in Fall or Winter terms. Applicants wishing to be considered for fellowships and scholarships must apply for Fall admission and submit all application materials by January 15.

Required application materials include official copies of transcripts from all colleges and universities attended; a personal statement describing your preparation, research experience and interests and professional goals as they relate to the Ph.D. in political science; three letters of recommendation and Graduate Record Exam scores. There are additional university requirements for international applicants (https://gradschool.wayne.edu/admissions/international/).

**Program Requirements**

A Ph.D. student is required to complete a minimum of ninety graduate credits, thirty of which are earned through the dissertation.

Doctoral students in the political science program structure their course work in terms of a single major field and two minor fields. Major field concentrations may be elected in American government, comparative politics, political theory, public administration, public policy, urban politics, or world politics. Minor concentrations may be in the above seven fields.

**Admission to candidacy** for the doctor's degree will usually require at least two years of full-time graduate study beyond the bachelor's degree. It is granted upon fulfillment of the following requirements:

1. Filing an approved Plan of Work with the Graduate School.
2. Completion of at least 50 credit hours of coursework, including residence, methods and field requirements.
3. Completion of a preliminary oral examination after the second year of course work;
4. Completion of the written qualifying exams.
5. Identifying a dissertation advisor and naming a dissertation committee.

**Approval of Dissertation Prospectus:** The candidate is required to prepare and defend a dissertation prospectus following the qualifying exams. The
prospectus must be approved by the dissertation advisory committee before the candidate begins work on the dissertation.

Dissertation: The thirty credit dissertation registration requirement is fulfilled by registering for the courses PS 9991, PS 9992, PS 9993, and PS 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Submission of Dissertation: To complete the requirements for the degree the candidate is required to submit an approved doctoral dissertation on a topic satisfactory to their Dissertation Committee, designed to demonstrate proficiency in political science analysis, a capacity for independent and creative research, and the ability to perfect and follow through on an appropriate research or evaluation design.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Nonprofit Management (Graduate Certificate)

Graduate Certificate in Nonprofit Management offers practically relevant and academically rigorous training with flexible scheduling options and online course offerings to nonprofit sector professionals working or aspiring to develop a career in nonprofits and philanthropic community.

Admission requirements: Admission to this program is contingent upon admission to the Graduate School (p. 35).

- All applicants are required to submit a resume and a personal statement.
- To be considered for regular admission:
  - Applicants holding Bachelor degrees must have 3.0 grade point average in their undergraduate program.
  - Applicants holding graduate degrees must have 3.0 grade point average in their graduate program.

The program will consist of 12 credit hours, including three required foundational courses and one functional elective course for at least 3 credits.

- Psychology (Ph.D.) (p. 275)
- Infant Mental Health (Ph.D. dual-title program) (p. 276)

Industrial and Organizational Psychology (M.A.)

This program is designed for students interested in pursuing advanced training in applied workplace psychology. This includes:

1. job analysis and the development and validation of personnel selection and performance appraisal systems,
2. the implementation and evaluation of employee and management training and development programs,
3. enhancing employee motivation and morale, and
4. related activities that employ psychological principles and practices to increase organizational effectiveness.

Unlike the Master of Arts with a major in Psychology, this program is NOT a transitional program leading to doctoral degree candidacy.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Admission is offered for the fall semester only. The application deadline is May 1 for domestic students, and April 1 for international students. To be considered for admission, an applicant’s background should include a minimum undergraduate upper division cumulative grade point average of 3.00, a course in introductory psychology, and a course in statistics (grade of ‘B’ or better), and they must present their scores from the general portion of the GRE test taken within five years of application. To obtain more information about this program, contact the Department of Psychology (http://www.clas.wayne.edu/psychology/).

The Master of Arts in Industrial/Organizational Psychology is offered only as a Plan C option: thirty credits of coursework with no thesis or essay.

Total Credits 30

Psychology (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35).

Only students who have been admitted to the doctoral program in psychology may elect to earn this master’s degree; hence all candidates are considered as doctoral applicants.

Applicants holding bachelor’s degrees, master’s degrees, and/or other advanced degrees will be considered for admission. At the undergraduate level, applicants must have earned a 3.0 or better average in psychology courses and in total course work. A minimum of twelve semester credits in psychology is required and must include a laboratory course and a statistical methods course in psychology. Courses in college mathematics and biology and familiarity with computers are highly recommended.

Program Requirements

The Master of Arts with a major in psychology is offered only as a Plan A master’s program requiring thirty-two credits including an eight-credit thesis (PSY 8999). In addition to the thesis, a minimum of twenty-four credits in psychology is required and must include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY 7150</td>
<td>Quantitative Methods in Psychology I</td>
<td>4</td>
</tr>
<tr>
<td>PSY 8150</td>
<td>Multivariate Analysis in Psychology</td>
<td>4</td>
</tr>
</tbody>
</table>

One of the following outside the student’s major area:

- PSY 7010 History and Systems of Psychology
- PSY 7080 Human Cognition
- PSY 7090 Theories of Learning
- PSY 7120 Biological Basis of Behavior
- PSY 7250 Theory of Personality
- PSY 7400 Introduction to Life-Span Developmental Psychology
- PSY 7590 Industrial and Organizational Psychology
- PSY 7620 Social Psychology: Research and Theory

Emphasis is placed on factual knowledge, theory, and research methods in general psychology. The thesis involves the use of laboratory or field data and must be approved by the advisor and other committee members approved by the Departmental Graduate Committee. A final oral examination pertaining to the thesis is required.

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Psychology (Ph.D.)

Admission Requirements

Applicants must complete a Psychology Department application form and provide general GRE test scores, at least three letters of recommendation, and a statement of purpose in addition to the transcripts and application form required by the Graduate School. Application policies and procedures are available on the Department of Psychology (http://clas.wayne.edu/psychology/) website. Students will not be considered for admission until all documents have been received and evaluated. All forms are due by December 1, and applicants will be notified of the admission committee’s decision around March 1.
Because the doctoral degree offered by this department is viewed as a continuation of the Master of Arts degree program in psychology, students are expected to earn the M.A. degree or complete a master's-equivalent project as a preliminary stage in doctoral study. The work of students who hold advanced degrees when they enter this program will be evaluated to determine the extent to which it satisfies the requirements of the M.A. degree in psychology.

Program Requirements
The Doctor of Philosophy requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credits. Additionally, in order that students may acquire a broad background in the factual and theoretical content of psychology, three substantive courses are required of all doctoral candidates:

<table>
<thead>
<tr>
<th>Code</th>

</tbody>
</table>

Each student is expected to select a major and minor area of specialization from among the following list. (Alternate minor areas may be developed in consultation with relevant faculty, subject to the approval of the Department Graduate Committee.)

**BEHAVIORAL AND COGNITIVE NEUROSCIENCE:** This interdisciplinary research and training program prepares students for positions in research and teaching in many areas of neuroscience, including functional cognitive neural imaging, neural physiology, behavioral pharmacology, neurobehavioral teratology, and affective neuroscience. Academic training is provided through foundation courses, specialized seminars, and intensive participation in mentored research based on one-to-one working relationships with faculty members.

**CLINICAL PSYCHOLOGY:** This training program is accredited by the American Psychological Association and educates students as scientist-practitioners. Students are prepared for a wide range of careers, including research, teaching, clinical practice, and administration. In addition to the basic departmental course requirements for a doctoral degree, students also take courses in professional ethics, psychopathology, psychological assessment, psychological interventions, diversity, and other coursework consistent with APA accreditation. Requirements also include an empirical master’s thesis and doctoral dissertation, as well as supervised clinical training in assessment and treatment of clients in our training clinic, external placements, and an internship. Special opportunities for training and research in neuropsychology, child psychology, health psychology, and community psychology are available in the clinical program, with faculty in other areas of the department, and in the community.

The DEVELOPMENTAL SCIENCE area takes a life-span perspective to human development (prenatal to late adulthood), providing students with a strong foundation in dynamic modern developmental theories and models. Current studies focus on many aspects of human development. These include risk and resilience, longitudinal modeling, developmental contexts (e.g., poverty, child care, schooling, culture/ethnicity), parent-child relationships, child maltreatment, stress reactivity/temperament, emotion regulation, joint attention, school readiness, language development, peer relations, adolescent health, Black youth development, gender development, academic achievement and motivation. Graduates of our program can work in quite varied positions related to human development, including research, education, human services, and public policy.

The SOCIAL-PERSONALITY area focuses on theory-based basic and applied research. Students can be trained in a variety of experimental, survey research, and intervention methods and techniques, including experimental designs, implicit/automatic processing, in-person and online survey administration, daily assessment techniques, hormone assays, and alcohol administration. These research methods are used to address basic research questions in the areas of social cognition, close relationship processes, interpersonal violence, and personality processes.

**INDUSTRIAL/ORGANIZATIONAL PSYCHOLOGY** offers coursework in Personnel Psychology (including such topics as criterion development, performance evaluation, and personnel selection) and Organizational Psychology (including such topics as employee motivation, engagement leadership and executive development, occupational health, and organizational climate and culture). Opportunities exist for field experience in a variety of local and national corporations. The program is designed to prepare students for careers in either applied (e.g., within organizations, consulting firms) or academic careers.

**Academic Scholarship:** All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

**Residence:** All new doctoral students must enroll for their first academic year on a full-time basis. Students must complete at least six three-credit courses, exclusive of research and thesis credits, during the first year. Any incompletes in these six courses must be removed prior to the fall semester of the second year.

**Examinations:** The qualifying examination, a written examination covering the student’s major area, is required. It is normally taken after completion of the master’s thesis.

**Training, Teaching, and Research:** Doctoral students are required to participate in a training assignment each academic year they are in residence. This is required of all full-time students, irrespective of whether the training assignment includes a stipend. The student’s area committee is responsible for seeing that this requirement is met each year. The training assignment involves appropriate teaching, research (other than thesis or dissertation research) or professional activities.

**Dissertation Research:** The thirty credit dissertation registration requirement is fulfilled by registering for the courses PSY 9991, PSY 9992, PSY 9993, and PSY 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Psychology and Infant Mental Health (Ph.D. Dual-Title)

Students admitted to the Ph.D. program in either the clinical or developmental areas of psychology can apply to earn a Ph.D. in...
Psychology with a dual-title in Infant Mental Health. This dual-title degree is designed to prepare psychologists to conduct research, advocate for, and intervene to improve early behavioral, cognitive, social, and emotional development in contexts in which parents or children may suffer from developmental disabilities, health problems, or mental health problems. Students enrolled in this dual-title program take courses in infant development and assessment and develop specific skills related to infant mental health assessment and treatment. Students in clinical psychology also conduct a clinical practicum in infant mental health. The dual-title coursework follows competencies outlined by the Michigan Association for Infant Mental Health that are required for endorsement as an infant mental health specialist or an infant mental health mentor.

Admission Requirements

Applicants must meet the admissions standards of the Graduate School and the Department of Psychology and be offered admission to the psychology doctoral program in either the clinical or developmental areas of psychology. Students may indicate on their application to the psychology program their desire to earn an infant mental health dual-title, or they can request this after an offer of admission has been made. Students already enrolled in the Ph.D. program in psychology during their first three years may also contact the infant mental health program director, Ann Stacks, to enroll in the program.

Program Requirements

Students are required to take 12 credits of infant mental health coursework, 9 of which can also count as their cognate. All students must complete and earn at least a grade of B in their courses.

In addition, it is recommended that dual-title students who are in the clinical psychology doctoral training program complete at least one semester of a supervised field placement / external practicum at an infant mental health agency. Students in both the clinical and developmental doctoral training programs will have their knowledge of infant mental health assessed during their doctoral qualifying examination. In addition, dual-title students must write a dissertation on a topic related to infant mental health, with a member of the infant mental health faculty serving on their doctoral committee.

Sociology

Office: 2228 Faculty/Administration Building; 313-577-2930
Chairperson: David Merolla
https://clas.wayne.edu/sociology/ (http://clas.wayne.edu/sociology/)

The graduate programs offered by the Department of Sociology are designed to prepare students for the academic job market or other professional careers through a challenging, comprehensive, and integrated curriculum that trains graduate students to 1.) theorize from a variety of sociological perspectives and 2.) analyze using a variety of methodologies. The programs require course work in the general areas of sociological theory and sociological research methods, including qualitative and quantitative methodologies. In addition to core classes, students have flexibility in pursuing specialized coursework designed to concentrate on specific areas. Graduate students can choose to specialize in areas including: Sociology of Health and Illness (SOHI); Race, Ethnicity, and Gender (REG); and Global, Transnational and Comparative (GTC).

The research interests and methodological approaches of the faculty are diverse. Faculty have studied and written about a wide range of sociological topics including: aging and life course, development, disabilities, environment, fetal alcohol syndrome, gender and work, immigration, international political economy, mental health, menopause and midlife, precariousness and informal employment, military, racial politics, religion, racial discrimination in the consumer markets, race disparities in education, racialization of American Indians, sustainability, welfare state, and work-family policy. Faculty research these issues in local, national, and international (e.g., Canada, China, Japan, and Mexico) contexts.

The faculty directory and information about current faculty research can be found on the department’s website (http://www.clas.wayne.edu/Sociology/Faculty-Research/).

- Sociology (M.A.) (p. 277)
- Sociology (Ph.D.) (p. 278)

Sociology (M.A.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (https://bulletins.wayne.edu/graduate/general-information/admission/). In addition, new applicants to the sociology program must satisfy the criteria below. Applications are considered for admission to fall term only; all stages and materials in the application process must be completed by January 15. Materials required for admission include:

1. Graduate Application (demographic and educational profile).
2. Official transcripts from past universities attended.
3. Three (3) letters of recommendation (at least two should be from university or college faculty members).
4. Statement of Interest (this should describe applicant’s reasons for graduate study in Sociology, proposed areas of study, and career goals).
5. Writing sample.
6. G.R.E. scores. (submission of GRE scores is optional).
7. TOEFL scores. (G.R.E. scores will be considered, but will not be a binding criterion for admission. The Department realizes that scores on standardized tests are greatly influenced by social and cultural factors, and may not be accurate indicators of performance ability. A combined assessment of students’ GPA, G.R.E. scores, transcripts, letters of recommendation,
writing sample, and statements of interest will be used to make admissions decisions.

2 We are currently asking for paper-based TOEFL scores of 600 or above (or internet-based TOEFL scores of 100 or above) for entry into our Ph.D. program. Nonetheless, we will consider students who have a score of 550 or better on the paper version of the TOEFL (or 80 or better on the internet-based version of the TOEFL). The Department realizes that scores on standardized tests are greatly influenced by social and cultural factors, and may not be accurate indicators of performance ability.

A grade point average of at least 3.3 in upper division courses, and in sociology courses, is required for admission consideration to the Master’s program.

Program Requirements

The Master of Arts degree with a major in Sociology requires a minimum of 30 credits. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

The program is offered as Plan A (thesis) or Plan B (essay). Students seeking the Ph.D. degree should select Plan A. Students selecting Plan B have the option of following the curriculum for a concentration in Applied Sociological Research Methodology (see requirements below).

Plan A: Thesis

Sociology (Ph.D.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (https://bulletins.wayne.edu/graduate/general-information/admission/). In addition, applicants must satisfy the criteria listed below. Applications are considered for new admissions to the fall term only; all stages and materials in the application process must be completed by January 15.

Materials required for Ph.D. admission include:

1. Graduate Application (demographic and educational profile).
2. Official transcripts from past universities attended.
3. Three (3) letters of recommendation (at least two should be from university or college faculty members). Preferably, one recommendation letter should come from the student’s Master’s-level advisor.
4. Statement of Interest (describing applicant’s reasons for graduate study in sociology, proposed areas of study, and career goals).
5. Writing sample (e.g. a term paper or report).
7. TOEFL scores.

1 Current students completing their MA degree in the department of sociology at Wayne State or students taking prerequisite courses at the Masters level can apply for admission into the PhD program by submitting an application through the WSU online admission's portal. All the above criteria are required. In addition, current students must have completed their MA with a grade point average of at least a 3.5 GPA based solely on required coursework (theory, statistics methods), and have written and defended a MA thesis prior to submitting the online application. Please refer to the Sociology Graduate Student Handbook for further details on requirements and process. Applications for current students are accepted on a rolling basis; however, students must contact the Director of Graduate Studies to begin the application process.

2 G.R.E. scores will be considered, but will not be a binding criterion for admission. The Department realizes that scores on standardized tests are greatly influenced by social and cultural factors, and may not be accurate indicators of performance ability. A combined assessment of students' GPA, G.R.E. scores, transcripts, letters of recommendation, writing sample, and statements of interest will be used to make admissions decisions.

3 We are currently asking for paper-based TOEFL scores of 600 or above (or internet-based TOEFL scores of 100 or above) for entry into our Ph.D. program. Nonetheless, we will consider students who have a score of 550 or better on the paper version of the TOEFL (or 80 or better on the internet-based version of the TOEFL). The Department realizes that scores on standardized tests are greatly influenced by social and cultural factors, and may not be accurate indicators of performance ability.

Applicants should have a 3.5 grade point average (G.P.A.) in their master's degree work and/or previous graduate work. In particular, we will review
an applicants' grades in any previous statistics, methods, and theory courses.

PLEASE NOTE: Students who lack a master's degree in sociology, or have not yet completed the master's requirements in sociology at the time of application, may not be admitted directly into the Ph.D. program. They may be granted admission to the master's program, possibly on a "qualified" basis, in order to take courses in preparation for the Ph.D. program. If students are placed in the master's program to complete preliminary coursework, they will need to apply for the Ph.D. program once they have completed this coursework. Admission is not guaranteed, and the Graduate Admissions committee will evaluate students' grades in master's-level courses when considering change of status applications. Any questions about this policy should be directed to the Graduate Director.

Program Requirements

The PhD degree requires a minimum of ninety (90) credits beyond the baccalaureate degree. Thirty (30) credits may be earned via a MA degree, thirty (30) credits are earned at WSU as part of the program of study in the PhD program and thirty (30) credits are earned by enrolling in dissertation credits. The thirty credit dissertation registration requirement is fulfilled by registering for the courses SOC 9991, 9992, 9993, and 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. If a student has completed all dissertation credits, but still needs to work on the dissertation, then he or she may register for SOC 9995 (https://bulletins.wayne.edu/search/?P=SOC%209995) (doctoral maintenance credits in sociology). SOC 9995 (https://bulletins.wayne.edu/search/?P=SOC%209995) is zero credits and students pay a set fee to be registered; the student will be considered full-time if registered in this course number. A total of six to nine credits of the thirty Ph.D. credits may be earned outside the Department of Sociology (see item 5 below). Students with an M.A. degree from another university must file a transfer of credit form with their plan of work (see below) in order to get credit for up to thirty credits from another master's degree program outside of Wayne State.

In addition to the minimum of 30 credits earned during a M.A. program, Ph.D. students must complete the following courses:

<table>

<td>Doctoral Candidate Status IV: Dissertation Research and Direction</td>
<td></td>
</tr>
</tbody>
</table>

Students choose four electives that best fits their area(s) of expertise. Students are encouraged to use their two cognate courses to build a secondary area of expertise.

Race, Ethnicity, and Gender (REG)

REG focuses on how race, ethnicity, and gender serve as principles of social organization that shape individual experiences and reproduce social inequalities. Faculty in these areas examine how structural and individual sexism and racism impact both objective (e.g., educational attainment, earnings, career advancement) and subjective (e.g., racial identity, political attitudes, work-family conflict) outcomes. Recent student projects in this area have explored a broad range of substantive topics such as race and gender disparities in health and school discipline, the experiences of women and racial and ethnic minorities in the workplace, and the role of sexuality in shaping experiences of criminal victimization.

Global, Transnational, and Comparative Sociology (GTC)

GTC prepares students to conduct theoretically grounded, methodologically sound, empirically rigorous research from a comparative perspective that addresses global and transnational social, political, economic, and cultural phenomena. GTC focuses on how fundamental macro-level structures and processes shape individual and group experiences, as well as relationships among nation-states. GTC research also evaluates micro- and meso-level processes across subnational and national units of analysis. Our GTC faculty conduct quantitative and qualitative research on a wide variety of topics such as international development, health disparities, migration, international political economy, and work and labor. Many of these substantive areas overlap with the department's two other core areas, the Sociology of Health and Illness and Race, Ethnicity, and Gender. Students are encouraged to undertake research that engages two or more areas.

Sociology of Health and Illness (SOHI)

The sociology of health and illness examines the interaction between society and health. Sociologists within this specialty area examine how social factors impact health and illness and how health and illness impact society. This specialty also looks at health and illness in relation to social institutions such as the family, work, school, politics, and religion as well as the fundamental causes of disease and illness, the organization and operation of the health care system, behaviors of health care providers and patients, provider-patient relationships, access to care, etc. In all of these analyses, sociologists in this specialty area explore health disparities by race/ethnicity, gender, class, sexuality, age, ability, and nationality.

Ph.D. Preliminary Examinations

Upon completion of all doctoral coursework, students take a written qualifying examination ("prelim"). The purpose of the preliminary examination is to certify that doctoral students have acquired the necessary expertise in an area of study and can integrate, apply, and discuss what has been learned to contribute to the knowledge in the field. Students should begin preparing for the preliminary examination well in advance (e.g., 6 months) of the examination.

Students are allowed two attempts to pass the Preliminary Examination. The second attempt is final and students who fail this attempt are dismissed from the program. The examination committee must remain the same for both attempts. Students should consult their advisers and the Graduate Director before taking the prelim to ensure that they are ready to take the prelim.

Refer to the full preliminary examination guidelines on the Department website for further information on procedures and evaluation criteria.

Students must pass prelims in full before they can file for Ph.D. candidacy and begin their dissertation.
If students are done with their required Ph.D. coursework but have not passed their prelims, they can enroll in SOC 9990 (pre-dissertation credits) in order to maintain active student status. Students are sometimes allowed to enroll early in SOC 9991 (the first set of dissertation credits) if they are taking those credits during the semester that they are taking prelims. Students should contact the Director of Graduate Studies to discuss this possibility.

Ph.D. Candidacy Status
Following successful completion of the written preliminary examination, students work with their advisor to establish the Dissertation Committee, which is composed of four faculty members. The Dissertation Committee oversees student’s work on a dissertation prospectus and oral defense, as well as student’s work on the final dissertation and final defense. Refer to the Sociology Graduate Student Ph.D. Handbook for full details.

Dissertation Proposal
Prior to initiating doctoral research, Ph.D. Candidates must prepare a prospectus of the proposed dissertation research. The Graduate School requires Ph.D. students to complete an oral qualifying examination as part of their degree requirements. In Sociology, the oral qualifying examination is the Dissertation Prospectus Defense. It shall be conducted by the doctoral committee after a defendable draft of the dissertation prospectus has been completed. Students receive only one chance to complete their oral qualifying examination (dissertation proposal defense). Students who fail their oral qualifying examination may be terminated from the graduate program. Proposals include a short introductory chapter, literature review, a chapter detailing students’ theoretical or conceptual framework (although sometimes this is combined with the literature review), and a methods chapter that proposes how they will engage in their dissertation research.

Urban Studies and Planning
Office: 3198 Faculty Administration Building; 313-577-2701
Chairperson: Rayman Mohamed
https://clas.wayne.edu/usp
The planning profession offers a systematic, creative way to influence the future of neighborhoods, cities, rural and metropolitan areas, even the country and the world. Urban and regional planners use their professional skills to serve communities facing social, economic, environmental and cultural challenges by helping residents to:

- Develop ways to preserve and enhance their quality of life
- Find methods to protect the natural and built environment
- Identify policies to promote equity and equality
- Structure programs to improve services to disadvantaged communities, and
- Determine methods to deal effectively with growth and development of all kinds.

The majority of planners work in traditional planning areas such as community development, land use, housing, transportation planning, environmental/natural resource planning, economic development, urban design, historic preservation and community activism. Other planners work in emerging fields such as healthy communities, food systems, energy development, or place-making.

The program seeks to prepare individuals to work with local and state public agencies, nonprofit organizations and for consultants and others in the private sector.

Accreditation: The Master of Urban Planning program is accredited by the Planning Accreditation Board.

- Urban Planning (M.U.P.) (p. 280)
- Economic Development (Graduate Certificate) (p. 281)

Urban Planning (M.U.P.)
Admission to this program is contingent upon admission to the Graduate School (p. 35).

The Master of Urban Planning is offered by this department under the following options:

Plan A: Forty-eight credits including an eight credit thesis.

Plan B: Forty-eight credits including a three credit essay.

Plan C: Forty-eight credits of coursework.

The distribution of the forty-eight credits is as follows: twenty-three credits in required courses (listed below), which build the core of the program; selection of elective courses (between thirteen and seventeen credits) to form a topic concentration; and the completion of a capstone component that includes an integrative project (UP 7700, four credits), and professional report (UP 7500, three credits) or a master’s essay (UP 7999, three credits), or a master’s thesis (UP 8999, eight credits). Students are strongly advised to pursue Plan C. Plan C includes the Professional Report, UP 7500. Students can petition the Graduate Director to substitute other courses for UP 7500. Students will not be permitted to graduate if they obtained B- or less on more than one required (core) classes.

Electives: Following completion of at least twelve credits in required courses, students will, in consultation with their assigned faculty advisor, devise a Plan of Work, selecting elective courses that constitute one of three concentrations:

- Housing and Community Development
- Urban Economic Development
- Managing Metropolitan Growth.

With the approval of the Director of the Urban Planning Program, a student may design his/her own topic of concentration.

Prior completion of courses equivalent to the program requirements may form a basis for reducing credits in any individual Plan of Work. Possession of a master's degree in an area of study determined to be related to urban planning by the Graduate Program Committee may allow an applicant to elect a program of thirty-two credits, inclusive of capstone requirements.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

Economic Development (Graduate Certificate)

The Graduate Certificate Program in Economic Development equips students with conceptual and methodological tools with which to pursue economic development activities in state, regional and local governments; non-profit and community organizations; private associations such as chambers of commerce; or private businesses and civic institutions engaged in economic development. It is administered in conjunction with the following graduate programs:

- Sociology
- Business Administration
- Economics
- Employment and Labor Relations
- Public Administration
- Urban Planning.

The Certificate is designed for students who wish to combine a graduate degree (master's or doctoral) with a specialty in urban, regional and state economic development. It will be awarded only in conjunction with the completion of a graduate degree or to those already holding such a degree.

Admission Requirements

Applicants must meet the admission standards of the Graduate School. (p. 35) Eligibility for this program is limited to persons holding a graduate degree from an accredited educational institution or those actively pursuing a graduate degree at Wayne State University. Applicants must submit a completed application form, personal statement of interest in the program, and Plan of Work.

Program Requirements

Students must complete twelve credits in designated courses, including Core Area I, and courses (at least three credits each) from two of the Core Areas II, III, and IV. At least one course at the 7000 level must be elected, and at least one course (in addition to the Area I course) must be elected from outside the student’s graduate program.

Students in the certificate program must maintain a grade point average of at least 3.0. Transfer of credit from other institutions may not be applied toward the credits required for the certificate. If a student is concurrently enrolled in a graduate degree program at the University, no more than nine credits from the certificate program may be applied toward that degree.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the College of Liberal Arts and Sciences (p. 224).

to enroll. Students who are not in a graduate program in applied sociology, business administration, economics, industrial relations, public administration, or urban planning, or who do not already possess a graduate degree in one of these areas, should contact the Department.
School of Medicine

Interim Dean: Wael Sakr

The Wayne State University School of Medicine faculty and staff will graduate a diverse group of physicians and biomedical scientists who will transform the promise of equal health into a reality for all. We will educate a diverse student body in an urban setting and within a culture of inclusion, through high-quality education, clinical excellence, pioneering research, local investment in our community and innovative technology, to prepare physician and biomedical scientific leaders to achieve health and wellness for our society. We are privileged to serve our community, state, nation, and the world as innovators in medicine, health, prevention and wellness.

The school offers educational programs leading to the Doctor of Medicine, Doctor of Philosophy, Master of Science and Master of Public Health degrees. Graduate education in clinical fields, postdoctoral study and continuing medical education programs, as well as a joint M.D.-Ph.D. degree, also are offered. About 300 students are admitted annually to the medical degree program and approximately 400 students are enrolled in doctoral or master’s degree study in 19 program areas, including the medical degree/doctoral combined-degree program. More than 900 students are post-graduate trainees as medical residents, post-doctoral fellows, or fellows in 29 clinical research programs. Continuing education programs, seminars and colloquia serve the faculty and students, as well as professionals throughout the community as a resource for current and ongoing developments in the health sciences. In addition to degree programs, the school offers courses in many basic medical science disciplines appropriate for students in other colleges and schools of Wayne State University. Non-degree enrollment in basic science courses at the graduate level is permitted on a limited basis for qualified students.

Research focusing on human health is the foundation of activities in the School of Medicine. Fundamental and applied research in biomedical sciences, clinical specialties and health care systems is directed by the faculty. Research programs are supported by more than $120 million annually in research grants, contracts and gifts. Members of the faculty serve on scientific boards, panels, study groups and in professional leadership roles in health care regionally, nationally and internationally. Clinical services provided by the faculty, post-graduates and students are rendered throughout Detroit’s hospitals. The school also is affiliated with these hospitals for the purpose of conducting undergraduate and graduate medical education.

History of the School

In 1868, five physicians who witnessed the crude medical treatment on Civil War battlefields dedicated themselves to advancing health education and care, and founded the Detroit Medical College in Detroit. Originally named the Detroit Medical College, it was founded by five physicians who served in the U.S. Civil War, and upon their return determined that the city of Detroit deserved a medical school.

Today, nearly 150 years after its establishment, the Wayne State University School of Medicine is still fueled by the passion for its community and dedication to urban clinical excellence. Through social responsiveness and a continuous focus on innovation in education, research and clinical care, the School of Medicine continues to graduate a diverse group of health care leaders and advocates who go on to transform the promise of equal health care for all into a reality.

Accreditation

Programs in the Wayne State University School of Medicine are accredited by the Liaison Committee on Medical Education, representing the American Medical Association and the Association of American Medical Colleges (the medical doctor program); the Liaison Committee of Graduate Medical Education of the Accrediting Council for Graduate Medical Education and various Residency Review Committees (residency programs); and the Accreditation Council of Continuing Medical Education (Continuing Medical Education).

Graduate Degrees and Certificates

There are two major types of academic programs in the School of Medicine, those leading to the M.D. degree and postgraduate medical education; and those programs in the basic medical sciences which offer Master of Science or Doctor of Philosophy degrees.

Shiffman Medical Library and Learning Resources Centers

Library resources are made available to graduate students through a variety of services from the Shiffman Medical Library in the Richard J. Mazurek Medical Education Commons. They include reference and research support, document delivery / interlibrary loan, and instruction. Orientation programs, small group workshops and individualized instruction featuring the latest information resources are available to graduate students throughout their program. Key services in support of graduate education include: reference service, remote and on-site electronic access to the major biomedical databases including PubMed, Scopus, Science Citation Index, various clinical decision support tools such as ClinicalKey, and UpToDate, and an array of electronic tools for effective information management. Materials not available in the WSU Libraries are obtained for graduate students free of charge. Access to library collections from research institution across the country including the National Library of Medicine, University of Michigan, Michigan State University and various specialized collections is also available to graduate students.

The library’s goal is to support each graduate student’s individualized needs through graduation and for self-directed, life-long learning. Librarians are available for consultation, for help in identifying useful literature and using the latest file management programs to organize the references at any point during their program. Librarians can also provide students with time-saving tips to prepare manuscripts. Shiffman Library offers access to a number of databases to assist students in acquiring external funding. The library staff is committed to acquiring the materials needed to support the array of graduate programs offered by the affiliated colleges. A computer lab is available in the library for graduate students use. The lab contains five desktop workstations, one adaptive workstation, a standalone scanner, and a fully wired teacher’s lectern.
Please contact the library for more information about current and planned services. The staff of the Shiffman Library is committed to enabling transparent discovery and access to the best possible resources that expeditiously and effectively meet student and faculty needs.

**Office of Student Affairs**
The Office of Student Affairs is under the supervision of an associate dean. Services include: career and supportive counseling; crisis intervention; liaison for referrals; academic advising; guidance for residency application; support for student government and organization activities as well as oversight of Special Events, the Health and Wellness Program and the Medical Student Faculty Mentoring Program. The staff is committed to assisting students in every way possible as the students work toward M.D. degrees. These programs are part of the School’s commitment to provide each matriculant with support services so that the rigorous educational program can be presented within as comfortable an environment as possible.

- **Counseling:** Appointments for confidential supportive and career counseling can be arranged through the Office of Student Affairs.
- **Mentoring:** Faculty mentors are provided through the Office of Student Affairs for the purpose of giving guidance and support to the medical students throughout their medical school careers.
- **Health and Wellness:** The Health and Wellness Program was developed so that each student optimizes healthy coping strategies, finds good balance and achieves academic success throughout medical school.

**Office of Development and Alumni Affairs**
*Office:* 540 E. Canfield, 1369 Scott Hall; Detroit, MI 48201
The Wayne State University School of Medicine Office of Development and Alumni Affairs and the Medical Alumni Association exist to support the advancement of the School of Medicine by establishing and cultivating mutually beneficial, lifelong relationships between alumni, students and the School of Medicine. The Office of Development and Alumni Affairs and the Medical Alumni Association work collaboratively to develop services, benefits, programs and communications designed to foster awareness, generate pride, encourage involvement and increase engagement and financial support.

We are proud to serve and represent the broad array of more than 22,000 alumni who were educated and trained at the WSUSOM — Physicians, Researchers, Residents and Fellows.

**Office of Marketing and Communications**
*Office:* 540 E. Canfield, 1320 Scott Hall, Detroit, MI 48201
This office is responsible for the marketing, communications and public relations programs for the Wayne State University School of Medicine. The office leads strategy on a wide array of communications initiatives aimed at raising the stature of the Wayne State University School of Medicine and its prominence in medical education, research, care and community engagement. The office takes an integrated approach, leveraging resources and collaborating across our campus and community to enhance the School of Medicine brand in Detroit and beyond. Some areas of focus include media relations, digital communications, advertising and outreach, collateral publications and editorial services.
Doctor of Medicine

Educational Goals
The Wayne State University School of Medicine has established a comprehensive set of competencies and institutional learning objectives for the Doctor of Medicine program. This list formalizes the goals of a WSU medical education, and defines what a graduating physician should know to practice medicine in the 21st century. There are six general competencies, including:

1. integration of the basic sciences in medicine;
2. integration of clinical knowledge and skills to patient care;
3. interpersonal and communication skills;
4. professionalism;
5. organizational and systems-based approaches to medicine, and;
6. life-long learning and self-improvement.

Each of these competencies is further refined into specific educational objectives which are taught and measured through the medical school curriculum.

Continuing Medical Education

Assistant Dean: David R. Pieper, Ph.D.

The Division of Continuing Medical Education (CME) was established to provide medical education activities to physicians who have completed their training, as well as support in graduate medical education programs. The CME Division is concerned with addressing the continuing medical education needs of physicians residing in the tri-county area of metropolitan Detroit, as well as the needs of the other physicians in the state and country.

Various special conferences, symposia and workshops, lasting one to five days, are offered under the academic sponsorship of the departments in the Medical School. Physicians from Michigan and many other states and countries attend meetings which reflect new discoveries and changes in needs and interests in medicine. Every effort is made to assist physicians in their continuing efforts to increase their competence and to improve their skills on behalf of the patients they serve.

In addition to these special programs, ‘continuing’ activities of one- to two-hour duration are scheduled at regular intervals during the year. Physicians are encouraged to participate in the departmental workshops, teaching rounds and grand rounds that meet their interests or needs; they are conducted in the clinical settings of Wayne State University and the Detroit Medical Center.

Other types of CME activities offered by the Wayne State University School of Medicine include journal based CME, web based CME and CME associated with Learning from Teaching.

There are increasing pressures on practicing physicians to maintain and update their professional competence and skills. Wayne State University School of Medicine is striving to respond to these needs through continuing medical education. Inquiries may be directed to the Division for information about programs on specific subjects or programs for specific medical specialties.

Accreditation (CME)
Wayne State University School of Medicine is accredited by the Accreditation Council of Continuing Medical Education (ACCME) to sponsor continuing medical education (CME) for physicians. As an accredited sponsor of CME, the School designates certain of its continuing medical education offerings as meeting the criteria for Category 1 of the Physician's Recognition Award of the American Medical Association, and for the requirements for license renewal by the Michigan Medical Practice Board. Other certifications from various medical specialty societies and boards are secured for individual offerings as may be required.

Graduate Medical Education Program (GME)

Associate Dean and Designated Institutional Official: Tsveti Markova, MD, FAFP

Graduate Medical Education (GME) at Wayne State University (WSU) is an essential element of a diverse and rich academic environment encompassing many specialties and sub-specialties in the practice of medicine. The residency programs directly impact the lives of thousands of patients through patient care, but most importantly through the educational mission that reaches beyond hospitals to the community. Graduate Medical Education at WSU produces exceptional physicians who are committed to provide outstanding care to the communities we serve including not only the city of Detroit and the surrounding metropolitan area, but the state of Michigan and beyond. GME provides service to our communities, support to our peers, and training to our residents, and extends our medical knowledge, compassion and skills toward our mission of patient safety and quality healthcare for today and tomorrow. Wayne State University as a sponsoring institution has achieved the maximum Accreditation Council for Graduate Medical Education (ACGME) accreditation status with no citations and a commendation. The next site visit is scheduled in 2024.

WSU is the sole sponsoring institution of ten Graduate Medical Education programs for 150 residents and fellows in the following areas:

• Anesthesiology
• Brain Imaging Medicine
• Dermatology
• Family Medicine
• Internal Medicine
• Ophthalmic Plastic and Reconstructive Surgery
• Otolaryngology
• Physical Medicine and Rehabilitation
• Urology
• Transitional Year.

These programs are based mainly with our hospital partners to assure an optimal learning environment: Ascension Crittenton Hospital, Beaumont Health Hospitals – Taylor and Dearborn, St. Joseph Mercy Oakland Hospital, Barbara Ann Karmanos Cancer Institute, and John Dingell Veterans Administration Medical Center.

The School of Medicine, through its Graduate Medical Education Committee (GMEC) and the Office of Graduate Medical Education, holds the ultimate responsibility for all GME programs sponsored by the university. The Office of GME tracks program outcome measures, conducts extensive internal reviews of each GME program, and ensures that each program teaches and assesses the ACGME general competencies and associated milestones in the areas of: patient care, medical knowledge, practice-based learning and improvement, interpersonal and communication skills, professionalism, and systems-based practice. Other GME office responsibilities include:

• Demonstrating an overall commitment to GME;
• Maintaining affiliation agreements with other institutions participating in GME;
It is recommended that students complete lab work in the above science courses. It is also recommended that students take a course in statistics, ethics, and biochemistry. The student is urged to select additional subjects which will contribute substantially to a broad cultural background.

It is to be noted that when students are accepted before completion of their premedical requirements, they must maintain a satisfactory scholastic average in their continued premedical work to warrant enrollment in the School of Medicine.

The Medical College Admission Test is required of all applicants for admission into the first year class. Students seeking admission should take this test no later than September of the year prior to matriculation. After a preliminary review of application credentials, interviews are held with those applicants who warrant further consideration.

Admission to the First-Year Class
The School of Medicine adheres to the acceptance procedures of the Association of American Medical Colleges, including the ‘Early Decision Plan.’ Admission procedures of the School are:

1. No place in the first-year class shall be offered to an applicant more than one year before the actual start of instruction for that class.
2. Following the receipt of an offer of a place in the first-year class, a student shall be allowed three weeks in which to make a decision.
3. No student who has at any time been requested to withdraw for any reason from a medical school in which he/she has been registered will be accepted by the WSU School of Medicine. Students who have been dropped for poor scholarship by the School of Medicine should not expect favorable consideration for readmission.
4. Any applicant accepted by the School of Medicine who does not complete enrollment must apply for readmission and meet all requirements in force at the time of the new application.

Selection Factors
The Committee on Admissions will select applicants who, in its judgment, will make the best students and physicians. Consideration is given to the entire record, including grade point average, Medical College Admission Test scores, recommendations and interview results (one-on-one interview and multiple mini-interviews), as these reflect an applicant’s personality, maturity, character and suitability for medicine. Additionally, the committee regards as desirable certain health care experiences, such as volunteering or working in hospitals, hospices, nursing homes or doctor’s offices. The committee also values experience in biomedical laboratory research. Following an initial screening process, students with competitive applications are selected to complete a secondary application. Special encouragement is given to candidates from medically underserved areas in Michigan.

As a state-supported school, the institution must give preference to Michigan residents; however, out-of-state applicants are encouraged to apply. An applicant’s residency is determined by university regulations. Applicants must be a U.S. or Canadian citizen or U.S. permanent resident to be eligible for admission. Students whose educational backgrounds include work outside the United States must have completed two years of course work, including the prerequisite courses at a U.S. or Canadian college or university. Canadian citizens are considered non-resident for both admission and tuition purposes. Interviews are required but are scheduled only with those applicants who are given serious consideration. Students are urged to apply by November 1.

Application and Acceptance Policies
The School of Medicine adheres to the acceptance procedures of the Association of American Medical Colleges, including the ‘Early Decision Plan.’ Admission procedures of this School are:
1. An American Medical College Application Services application must be filed between June 1 and December 31 of the year preceding anticipated matriculation.
2. Applicants must respond to acceptance offer within three weeks of the offer.

Diversity and Integrated Student Services
This unit supports the medical school to maintain its representation of diversity across economic, personal and social dimensions. This is accomplished through pipeline outreach programs and special projects that present a combination of academic and extracurricular activities designed to inform high school, undergraduate and post-baccalaureate students about career opportunities in medicine and other health professions, and prepare them to gain admission.

A special program feature of the unit is the Post Baccalaureate Program. This medical school preparatory program offers an opportunity to a small number of applicants who are Michigan residents, and whose undergraduate academic achievement has been compromised by certain disadvantaging factors to gain admission into medical school. Successful completion of this special one year program facilitates entry into medical school for those selected applicants from disadvantaged backgrounds.

Registration Requirements
Physical Examination
Each student must present proof of a physical examination at or before registration for the first year. Students are also required to be annually tested for TB (skin test or chest x-ray). Additional vaccines and titers may be required.

Health Insurance
Health insurance is mandatory and students must demonstrate proof of insurance at registration. Students have the option of purchasing the group plan offered by the Medical School, which can be purchased at registration.

Disability Insurance is mandatory and can be purchased at registration.

Criminal Background Check: All accepted applicants to the medical school will be required to complete a criminal background check through AMCAS and Certiphi, the selected vendor for criminal background checks.

Transcripts
Transcripts of all university-level work must be on file in the Registrar’s Office for each medical student, including the degree statement from the university from which the student obtained his/her degree.

Academic Program
The Office of Undergraduate Medical Education is responsible for the overall management, administration, and supervision of the undergraduate medical curriculum. The undergraduate program in medicine is structured in phases that divide the four years on a time, and more importantly, conceptual level.

- The initial segment (18 months) establishes a framework of skills, scientific, clinical and societal – a chassis on which to build the practice of medicine.
- The next segment (12 months) involves an intense clinical experience in all aspects of medicine.
- The final segment (14 months) sees students advance toward their career goals while being prepared for residency.

Phase 1 of the curriculum is aimed at “coaching up” our students, training them earlier, and providing context as to how/why to apply classroom learning within clinics and in the community. To give students an even greater start, we align the basic science curriculum to best take advantage of cadaver dissection opportunities for additional hands-on experience.

Phase 1, Segment 1
The Segment 1 curriculum will be eight months in length and taught on a systems-based model. Each system is taught via lecture; small-group problem-based and case-based learning; and laboratory experiences. Of particular note, this segment is centered upon anatomic cadaver dissection. This is unusual in medical schools in 2018, but we consider it to be essential.

Systems curriculum present the anatomy, physiology, biochemistry, histology and genetics of each organ system, correlated with anatomic dissection.

Importantly, clinical education is also correlated with each system, as the physical exam and history exercised and instruction in the clinical skills course will mirror the system taught in the basic science portion.

Phase 1, Segment 2
The second segment is concentrated on the abnormal – the diseased states of the human. This, again, is taught by organ system. Minor revisions are ongoing in this curriculum, which will build upon the existing systems approach.

Clinical instruction is centered upon the continuity clerkship in which each student is paired with a preceptor in community practice for a half day of clinic every other week. This real-patient experience is integrated with further instruction in clinical skills and regional/focused physical exam in the skills center.

Students must pass Step 1 of the USMLE (United States Medical Licensing Examination) in order to be promoted from Year II to Year III. Students must also pass Step 2 (both clinical knowledge and clinical skills) examinations in order to graduate.

Phase 2, Segment 3
This phase is defined as the 12 months of core clerkship courses, including orientation weeks, helping with the transition to clerkships, and a longitudinal course called Clinical Reasoning, Integration and Skills for Practice (CRISP). Students are assigned to faculty coaches to aid and assist in the student’s growth in clinical mastery.

Phase 3, Segment 4
This phase is 14 months in the expanded fourth year of medical school, which will start in April of the students’ third year. Courses are one calendar month or, in some cases, two weeks. Rotations at other institutions (visiting or audition) and independent electives are supported and encouraged.

Matriculation and Promotion
Primary evaluation of students is the responsibility of the faculty of the appropriate departments or courses for Year I-III students, and the Elective Course Coordinators for Year IV students.

Students are evaluated promptly by the primary evaluators, who make recommendations to the Promotions Committee which may include: promotion, re-examination, repetition of all or part of the year, interruption or suspension or probation of a student’s program, or dismissal. Questions of suitability for the study and practice of medicine on other
than academic grounds are handled according to the University’s ‘Guidelines for Assisting Persons with Behavioral Problems.’

The Promotions Committee is chaired by the Vice Dean for Medical Education or his/her designee and consists of twelve members: four nominated from the faculty by the President of the Faculty Senate, with the advice and consent of the Executive Committee; four nominated from the Council of Departmental Chairpersons; and four selected by and from the student body. Faculty members serve three-year terms. Student members serve for one year and have full discussion privileges. Their votes are advisory to the Committee.

At appropriate intervals, the Promotions Committee meets to make promotional decisions based upon the student’s academic performance. The Committee has the obligation to assure that the rules of the School and the rights of the individuals involved have been fairly met. Decisions are transmitted for the Committee by the Associate Dean for Academic and Student Programs. Students have the right to appeal such decisions by direct petition to the Promotions Committee. In the event of such an appeal, the Committee may gather evidence and hear witnesses. The student involved has the right to be heard by the Committee and may call a reasonable number of witnesses to testify in his/her behalf. The Promotions Committee is the final decision-making body with regard to the promotion process. The student has the right to request the Office of the Provost to review any determinations made by the Promotions Committee of the School of Medicine relative to academic performance on his/her part.

Leaves of Absence may be granted to students with documented health problems (medical leave of absence), or to those with appropriate educational opportunities outside the School (educational leave of absence), for personal reasons (personal leave of absence); or the medical school can put students on an administrative leave of absence.

Any students whose enrollment is continued by the Promotions Committee, or, in the case of Leaves of Absence, by the Vice Dean for Medical Education or his/her designee, is considered to be making academic progress toward the M.D. degree.

Grading

The grading system throughout all years of the School’s curriculum is:

- ‘H’ (Honors)
- ‘S’ (Satisfactory)
- ‘U’ (Unsatisfactory)
- ‘I’ (Incomplete)

The exception to this rule is Year 3 where an S+ (Satisfactory with commendations) can be achieved in all clerkships. The minimum passing grade is ‘S’. In order to be promoted from year to year, students must obtain ‘S’ on all course work and complete all requirements established by course directors.

Graduation Requirements

Students regularly registered in the School of Medicine may receive the degree Doctor of Medicine upon the fulfillment of the following requirements:

1. They must be at least 21 years of age, must exhibit good moral character, and must be suitable for the practice of medicine.
2. They must have satisfactorily completed all the academic requirements established by the School.
3. They must have paid all fees in full, and have all holds released.
4. They must pass Step 1 and pass Step 2 (clinical knowledge) and Step 2 (clinical skills) of National Board examinations.

Required MD4 Electives: seven courses to be chosen from MD4 courses not taken to satisfy any of the above requirements.

**Total Credits** 70

### Cooperative Electives Exchange Program

The Deans of the four Michigan medical schools, acting as the Michigan Medical Schools Liaison Committee, have signed cooperative agreements allowing students full credit for courses taken as electives at any one of the participating medical schools:

- Wayne State University
- University of Michigan
- Michigan State University
- Michigan State University College of Osteopathic Medicine.

The Deans intend the program 'to make the best use of one another's resources to the greater advantage of the student and the Michigan community. By allowing medical students full academic credit for elective courses taken at any one of our respective medical schools, our students will be able to share productively in the learning and training opportunities of the entire State.'

Under the course exchange program, election of an ‘away course’ at one of the cooperating schools requires approval of both the parent and host institutions. Enrollment, matriculation and fee payments continue without alteration at the parent institution; however, students are responsible for all travel and living expenses incurred during the ‘away’ elective. Additional information can be obtained from Records and Registration, School of Medicine. Under the course exchange program, election of an ‘away course’ at one of the cooperating schools requires approval of both the parent and host institutions. Enrollment, matriculation and fee payments continue without alteration at the parent institution; however, students are responsible for all travel and living expenses incurred during the ‘away’ elective. Additional information can be obtained from Records and Registration in the School of Medicine.

### Medicine Three-Year Program (M.D.)

**Contact Information:**
Office of Admissions

Detroit, MI 48201  
Telephone (313) 577-1466  
mdadmissions@wayne.edu

The Three-Year MD (3YMD) program at the Wayne State University School of Medicine (WSUSOM) offers a limited number of students the opportunity to complete their medical degree in three years. Students accepted into the 3YMD program receive conditional acceptance into a WSUSOM sponsored or administered residency upon graduation from the 3YMD program. Students enrolled in the 3YMD program will complete all of the requirements for graduation from medical school as set forth by the Liaison Committee on Medical Education and will receive extensive mentorship from their chosen residency program while in the 3YMD program.

Total Credits: 15

Medicine and Business Administration (M.D./M.B.A. Joint Degree)

Students admitted to the M.D. program must be in good academic standing prior to enrolling in the Business of Medicine elective track within the M.D. program. Students in the Business of Medicine track will apply for admission to the M.B.A. program, and upon acceptance complete M.B.A. courses during the Pre-Clerkship and Post-Clerkship phases of the M.D. program.

The M.D. curriculum is structured in phases that divide the four years on a time, and more importantly, conceptual level.

- **Pre-Clerkship phase** - The initial segments are known as the Pre-Clerkship phase (https://highways.med.wayne.edu/overview/structure/pre-clerkship-phase/) which is **18 months in duration**. This phase establishes a framework of skills, scientific, clinical and societal – a chassis on which to build the practice of medicine.

- **Clerkship phase** - The next segment is called the Clerkship phase (https://highways.med.wayne.edu/overview/structure/clerkship-phase/) and is a total of 12 months. This phase involves an intense clinical experience in all aspects of medicine.

- **Post-Clerkship phase** - The final segment is the Post-Clerkship phase (https://highways.med.wayne.edu/overview/structure/post-clerkship-phase/) and is **14 months in duration**. During this phase, students advance toward their career goals while being prepared for residency.

The M.B.A. program provides knowledge across multiple business disciplines and it requires a minimum of 36 credits, or 12 courses. This program requires completion of 6 core courses (18 credits) and 6 elective courses (18 credits). Elective requirements and concentrations provide the opportunity to tailor the M.B.A. program to specific interests and career goals. For M.D./M.B.A., 9-elective credits will be transferred from the M.D. program. The transferred courses will be the Business of Medicine elective courses in the M.D. program. The remaining 9-elective credits will be selected from the elective course offerings within the M.B.A. program.
Clinical Sciences

The Wayne State University School of Medicine has a distinguished history of producing the nation's finest physicians and researchers. That reputation continues to be built upon today, making the university not only a center for medical education, but the source of groundbreaking clinical research put into practice around the world.

The clinical science departments in the School of Medicine provide medical students with opportunities for clinical learning and research in over fifteen academic disciplines.

Anesthesiology

Office:
St. Joseph Mercy Oakland
Medical Office Building
44555 Woodward Avenue, Suite 306
Pontiac, MI 48341
248-858-2259

https://anesthesiology.med.wayne.edu/

This department offers medical students a program in anesthesiology comprised of individual instruction in the operating room and a series of regularly scheduled seminars. The major objectives of study in this field include the acquisition of skills and knowledge related to: airway management, including endotracheal intubation; lumbar puncture and spinal anesthesia; monitoring of anesthetized patients; pharmacology of anesthetic agents and other drugs related to anesthesia; preoperative evaluation and preparation of a patient for anesthesia and surgery; physiology of the perioperative period; respiratory therapy including management of patients who require prolonged ventilator care; management of acute drug intoxication; and the management of pain. A one-month elective in anesthesiology is offered to medical students during their junior or senior year.

Dermatology

Office: 18100 Oakwood Blvd., Suite 300; Dearborn; MI 313-429-7843
Chairperson: Darius R. Mehregan

http://www.dermatology.med.wayne.edu/

The instructional and research activities of this department focus on the skin as a distinct organ of the body. Specific diagnostic procedures developed in recent years such as immunopathology, and various modalities of treatment such as PUVA, UVA, Narrow band UVB, lasers and Mohs micrographic surgery, are taught in the department.

A comprehensive clinical dermatology elective is offered to third and fourth year medical students. A research elective is also available to qualified students, offering both basic and clinical research in the fields of immunobiology, molecular biology, ultrastructural analysis, photobiology and dermatopathology. The laboratory of molecular dermatology specializes in the molecular biology of malignant melanoma. The department offers a three-year, fully accredited residency training program to candidates at the second postgraduate year level.

Emergency Medicine

Office:
4201 Saint Antoine Street
University Health Center, 6G
Detroit, MI 48201
313-993-2530

Chairperson: Brian J. O'Neil, M.D., F.A.C.E.P., F.A.H.A.

http://em.med.wayne.edu/

The Department of Emergency Medicine provides basic life support training and physical diagnosis instruction to M.D. Year 2 students. M.D. Year 3 students receive advanced cardiac life support training and participate in a suture laboratory to learn suture techniques. A mandatory rotation in emergency medicine for all senior students takes place at Detroit Medical Center hospitals or other affiliated hospitals. The fourth year rotation is designed to familiarize the student with:

1. the evaluation, assessment and stabilization of patients with urgent medical problems;
2. invasive and noninvasive procedures routinely used in the emergency department;
3. and management of acutely-ill patients in a timely manner.

Graduate medical education includes two three-year emergency medicine residency programs, based at the Detroit Medical Center (Detroit Receiving Hospital and Sinai-Grace Hospital). Both programs are fully accredited.

Family Medicine and Public Health Sciences

Office: 3939 Woodward Avenue, 313-577-1421
Interim Chairperson: Jinping Xu, MD, MS

The Department of Family Medicine and Public Health Sciences (DFMPHS) has a strong public health focus with an emphasis on applications of socio-behavioral and medical sciences to community health problems. Public health is a population-based approach to communities that addresses health promotion, disease prevention, restoration and maintenance of health. The skills and scientific approach required in public health include epidemiology, biostatistics, research methodology, health services research, and behavioral sciences. Central to the approach of public health is a focus on community-level influences on health including social, economic, cultural, ethnic, and environmental factors. Public health research methods involve defining selected community problems, proposing studies and solutions, surveillance, evaluating progress, and monitoring the use of resources.

The MPH Program (p. 317) at WSU is accredited by the Council on Education for Public Health (CEPH). The CEPH is an independent agency recognized by the US Department of Education to accredit public health educational programs. The interdisciplinary nature of public health is reinforced in required and elective courses.

M.D. Medical Education

The DFMPHS faculty is well integrated into the didactic and clinical education of students throughout all levels of medical school. Our faculty participate in the early training of medical students through active teaching in the Population, Patient, Physician, Professionalism (P4) and Clinical Experiential Clerkship (CEC) courses. In the final clinical years of training, we lead the required family medicine and sub-intern clerkships, and offer several elective courses including a public health elective.

Graduate Medical Education

Graduate medical education within the DFMPHS consists of 3 residency programs, each distinctly different in scope and educational mission.

Our WSU Categorical Family Medicine Residency Program is located in Rochester Hills on the campus of Ascension Providence Rochester Hospital. Our 1-year WSU Transitional Year Residency Program is also located at our Rochester Hills campus at Ascension Providence Rochester Hospital. The program is designed to provide the educational
structure and foundation for first year residents to gain experience in a variety of inpatient and outpatient clinical settings in preparation for their terminal categorical programs.

Our 3-year WSU Preventive Medicine Residency Program provides resident training which focuses on clinical preventive medicine and public health sciences for urban populations, underserved populations, and in local correctional facilities.

The DFMPHS maintains a strong research emphasis on improving clinical primary care practice and reducing the burden of health disparities. The Department has achieved national recognition for its high level of external NIH funding, and for the last five years, the Blue Ridge Report has ranked us in the top ten of 150 Family Medicine Departments in the U.S and first in Michigan in 2020.

Internal Medicine

Office:
University Health Center
4201 St. Antoine, 2E
Detroit, MI 48201
Phone: 313-993-7835
https://intmed.med.wayne.edu/

Chairperson: M. Safwan Badr

The major objective of the educational program in internal medicine is to establish a firm conceptual basis for clinical diagnosis and treatment of disease. The exposure to clinical disciplines is graduated throughout each M.D. four year curriculum. During the early years in the M.D. program emphasis is placed on the application of knowledge gained in the basic science courses to an understanding of the biological disorders which accompany human disease. In M.D. Year I, students work with the Department of Internal Medicine through participation in several clinical conferences. During M.D. Year II, the student’s attention is directed toward the study of pathophysiologic mechanisms of disease, the principles of clinical diagnosis and the scientific basis of therapeutics. An internal medicine forum is available for students interested in internal medicine as a career. In M.D. Year III and IV emphasis is placed on the student’s direct participation in patient care as a member of the health-care team. In Year III the student gains clinical experience through assignment to Wayne State University teaching hospitals; this insures acquaintance with several members of the faculty and to a wide spectrum of medical problems. During Year IV, the student spends a month as an acting intern and a month in an outpatient clinic to gain experience with ambulatory medicine. Elective courses in subspecialties are offered. Students may also choose to pursue laboratory investigative programs under the tutelage of members of the faculty. In addition to formal course work, the student may elect more intensive study as a student-fellow in either clinical or laboratory medicine during the summer recesses. With the expansion of the Internal Medicine faculty, a number of research experiences supported by a variety of national funding agencies are available.

Neurological Surgery

Office:
4160 John R. Street, Suite 930
Detroit, Michigan 48201
Phone: 877-486-7978

http://neurosurgery.med.wayne.edu (http://neurosurgery.med.wayne.edu/)

The goal of the Department of Neurological Surgery is to acquaint the undergraduate medical student with the problems, both diagnostic and therapeutic, in the field of neurological surgery. This is accomplished by close affiliation with and participation in the neurosciences core curriculum of the freshman and sophomore years. Lectures, conferences and ward rounds are included in this teaching program. In the third year neurosurgical teaching program, the Department curriculum emphasizes the surgical aspects of cerebral and spinal disease and problems. Third year students are made aware of problems best handled by neurosurgical techniques during their trauma and emergency surgery rotation. Fourth year students seeking further study of neurosurgical techniques may elect programs in clinical neurological surgery and neuroscience research. Detroit Receiving Hospital, Harper University Hospital, Sinai-Grace Hospital, and Children’s Hospital of Michigan are the primary clinical facilities for undergraduate instruction by this department.

A seven-year residency training program, (includes one year of research in the laboratory or an enfolded clinical fellowship) in neurological surgery is conducted by the Department and based at the following University-affiliated hospitals: Detroit Receiving, Harper University, Sinai-Grace, and Children’s. The research interests of the department are concentrated primarily in the neurological mechanisms involved in ischemic stroke, brain tumors, stereotactic and computer-assisted surgery, neuro-oncology, skull base surgery, aneurysms and AVM clinical studies, traumatic brain injury, and hydrocephalus. The Department of Neurological Surgery operates a microsurgical laboratory for residents and participates in ongoing research projects requiring training in microsurgical techniques and microsurgical anatomy. The residents also participate actively in tumor research at Karmanos Cancer Institute.

Neurology

Office: 8D University Health Center; 313-577-1242
Chairperson: Jun Li, MD, PhD

M.D. Program Education

The Department of Neurology provides instruction in the first, second, third and fourth years of the medical curriculum. Members participate in the first year basic neuroscience course. In the second year the department is responsible for the clinical neuroscience-neurology course, which emphasizes pathophysiology. During the third year, all students rotate for four weeks through the neurology unit at one of the University-affiliated hospitals, at which time the students receive bedside and outpatient teaching and are given responsibilities in patient management. Clinical electives for students who have completed the required courses are available for interested students.

Post-Graduate Education

The Wayne State University Neurology Residency Training Program is a fully-accredited program located at the Detroit Medical Center and the Veterans Administration Hospital. The department offers a three-year training program for candidates applying for second year post-graduate level of training. Post-residency fellowships are also available in neuromuscular diseases/EMG, epilepsy/EEG, neurocritical care, multiple sclerosis/neuroimmunology, stroke, clinical neurophysiology, and movement disorders.

Research Electives

Research electives for medical students are available, either in brief summer rotations or for longer periods taken during elective time. Interested students are encouraged to contact the Department of Neurology.

Obstetrics and Gynecology

Office: 3750 Woodward, Suite 200; 313-993-4514
and fourth year medical students. The teaching encompasses courses in
vitreoretinal diseases and surgery, glaucoma and ocular trauma are
requirements for resident education. Clinical and research fellowships
are available on a selective basis upon completion of the residency program.
The residency program is structured to provide appropriate didactic and
clinical teaching and resident support services to exceed all ACGME
clinical teaching and research facilities. Whether correcting common eye disorders such as
cataracts, glaucoma and strabismus, or performing highly technical
operations such as vitrectomy, corneal transplants or lens implantations,
the medical staff uses the most advanced diagnostic treatment, and
surgical methods. The Institute is ideally suited for clinical instruction
because it attracts a large number of patients with rare eye diseases,
engages in advanced diagnostic techniques, performs a wide range of
delicate eye operations and is a center for eye research. Through its
affiliation with the University and the Detroit Medical Center, the Institute
provides a stimulating learning environment for graduate physicians and
medical students. Medical students gain clinical experience in obstetrics and gynecology in
Detroit Medical Center Hospitals: Hutzel Women's Hospital and
Sinai-Grace in addition to other affiliated hospitals: William Beaumont,
Oakwood, Providence, St. John's, and Henry Ford. The third year clerkship
includes an extensive didactic course, as well as in-depth clinical experience. Further, clinical and research opportunities are available in
all sub-specialty areas during senior elective periods. Summer student
research fellowships are available, both in clinical research within the
Department, and in basic research at the C.S. Mott Center for Human
Growth and Development, where the Department's basic science laboratories are located.
The graduate program concentrating in the reproductive sciences is
included with the Doctor of Philosophy in Physiology (p. 316).

**Ophthalmology**

*Office:* K-220 Kresge Eye Institute; 313-577-1355  
*Chairperson:* Mark S. Juzych, M.D., M.H.S.A.

The Ophthalmology Department is committed to education, research,
and patient care. These activities are conducted primarily in the central
campus of the Detroit Medical Center, in the Kresge Eye Institute, under
the direction of the Department Chairperson. The close association of
medical practice, research and teaching makes the Kresge Eye Institute
an ideal teaching facility. Whether correcting common eye disorders such as
cataracts, glaucoma and strabismus, or performing highly technical
operations such as vitrectomy, corneal transplants or lens implantations,
the medical staff uses the most advanced diagnostic treatment, and
surgical methods. The Institute is ideally suited for clinical instruction
because it attracts a large number of patients with rare eye diseases,
engages in advanced diagnostic techniques, performs a wide range of
delicate eye operations and is a center for eye research. Through its
affiliation with the University and the Detroit Medical Center, the Institute
provides a stimulating learning environment for graduate physicians and
medical students. Each year the Institute selects seven outstanding medical graduates for
a three-year residency training program in eye diseases and surgery. The residency program is structured to provide appropriate didactic and
clinical teaching and resident support services to exceed all ACGME
requirements for resident education. Clinical and research fellowships
in vitreoretinal diseases and surgery, glaucoma and ocular trauma are
available on a selective basis upon completion of the residency program.
The Institute's faculty also provides lectures and clinical training for third
and fourth year medical students. The teaching encompasses courses in
ophthalmology for residents in family practice and emergency medicine
through an elective rotation.

**Orthopaedic Surgery**

*Office:* Oakwood Heritage Hospital, 10000 Telegraph Rd., Taylor, MI 48180; 313-375-7218
*Chairperson:* Lawrence G. Morawa

The M.D. program in orthopaedic instruction is integrated and designed
to introduce the medical student to the entire field of musculoskeletal
diseases and injuries. By means of demonstrations, lectures, conferences, clinics and clerkships, the student learns the important
specifics of the orthopaedic examination and is exposed to many groups of
musculoskeletal problems related to trauma in adults and children.
By study of the factual content of common problems in each field, the
student's attention is directed to general principles of diagnosis and
treatment.

**Otolaryngology, Head and Neck Surgery**

*Office:* 5E University Health Center, 4201 St. Antoine; 313-577-0804
*Chairperson:* Ho-Sheng Lin

The M.D. program instruction of the Department of Otolaryngology, Head and Neck Surgery is designed to acquaint students with all
diseases treated by the modern otolaryngologist. Instruction is given in
the methods of examining the ear, nose and throat in the outpatient
department. Audiology is included so that the student may properly
classify deafness in prescribing appropriate therapy.

Head and neck, and plastic and reconstructive surgery as related to
otolaryngology are included in the instructional program. Observation
and, at times, assistance at surgical operations offer additional
learning opportunities to students. In general, the program stresses the
correlation of ear, nose and throat problems to the entire curriculum in
medicine and surgery.

**Pediatrics**

*Office:* 400 Mack Ave., Ste. 1 East, Detroit, MI 48201; 313-448-9600
*Chairperson:* Herman Gray, M.D., M.B.A.

Formal teaching by the Department of Pediatrics takes place in the
patient units and clinics at Children's Hospital of Michigan during
the third year of the medical school program. The aim of the student
clerkship is to acquaint the student with the course of normal
development, the common variations from normal patterns, and the
reaction of the immature to illness. An effort is made to incorporate all
aspects of childhood in the allotted time of study in order to have full
participation by members of the surgical, orthopedic, and psychiatric
staff. An inpatient and outpatient experience is offered that affords the
student an opportunity to be exposed to a broad array of pediatric illness.
The Department of Pediatrics maintains contact with the student before
the clerkship through contribution to the curriculum of basic science
courses. The Department also provides an optional program of study
during the fourth year.

The Fourth Year Elective Program offers the senior student an
opportunity to gain experience in general pediatrics at a greater level
of responsibility in patient care. The student assumes an increasing
role as a primary care provider under the supervision of the resident staff
in advanced years of pediatric training. Experience in the pediatric sub-
specialties is also available to senior students. Thus, they are able to
improve the level of their clinical skills and to obtain familiarity with

Chairperson: Chaur-Dong Hsu  
http://obgyn.med.wayne.edu/
the application of clinical and laboratory research techniques to the investigation of pathophysiology in a wide variety of children. Further information regarding programs may be obtained by writing to the office of the Chairperson of the Department.

Physical Medicine and Rehabilitation - DMC

Tel: 313-745-1218; Fax: 313-745-1063
https://pmr-rim.med.wayne.edu/

The Department of Physical Medicine and Rehabilitation encourages students to acquire knowledge of the patient as a person, not merely of his/her disease. The student is taught to assess the neuromuscular and musculoskeletal systems and to manage the disorders of these systems. In addition, a concept of rehabilitation is presented which considers not only the disease or injury that leads to chronic disability, but emphasizes the coordination of effective therapies and forces which will ameliorate the social, psychological and vocational problems created by the impairment. Teaching is conducted through lectures, demonstrations, staff conferences and seminars, with the major emphasis upon office practice instruction. Clinical instruction is provided at the Rehabilitation Institute of Michigan, the principal teaching facility of the Department for the PM&R DMC program and at the following institutions: DMC Children's Hospital, Detroit Receiving Hospital, Harper Hospital, Karmanos Cancer Hospital, and Veterans' Administration Hospital.

Psychiatry and Behavioral Neurosciences

Office: Tolan Park Medical Building, Suite 5-A, 3901 Chrysler Service Drive
Chairperson: David R. Rosenberg, M.D.
http://psychiatry.med.wayne.edu/

M.D. Program Education

The Department of Psychiatry and Behavioral Neurosciences provides M.D. students with an awareness of psychiatric problems as they are experienced in the practice of medicine. The educational mission of the Department is to teach the knowledge base, skills, and professional attributes in psychiatry and behavioral neurosciences for future physicians to practice competently in any medical specialty.

This Department is active in the teaching of the medical student throughout all four years of training. The core curriculum in psychiatry is taught in the second and third year of medical school and includes:

- Year II: Normal development and psychopathology
- Year III: Clinical clerkship and didactic learning

Clinical psychiatry rotations are conducted at Detroit Receiving Hospital, Harper University Hospital, Henry Ford Health System, Providence Hospital, Sinai-Grace Hospital, University Psychiatric Centers, William Beaumont Hospital, and Veterans' Administration Medical Center. These rotation sites provide the student with experiences in a variety of clinical settings, including inpatient, partial hospitalization programs, consultation services, emergency room, and outpatient services. Faculty members also serve as course directors and participate in the teaching of interdisciplinary courses that span the four years of medical school, including clinical medicine (history and communication skills), human sexuality, and behavioral health longitudinal curricula (interpersonal violence, substance use disorders, preventative health and health maintenance).

Radiology

Office: Detroit Receiving Hospital 3L-8, 4201 St. Antoine, Detroit, MI 48201
https://radiology.med.wayne.edu/

M.D. program instruction by this department is directed toward a total integration of the fundamentals of radiology with the basic sciences, particularly anatomy, physiology, chemistry and pathology. Radiologic instruction is correlated at the M.D. Year I and II levels with other departments. Year III-level instruction is clinically oriented and numerous radiologic electives are offered in Year IV. Various diagnostic imaging techniques such as conventional radiographic procedures; radionuclide imaging, both static and dynamic; ultrasonography; computerized tomography, MR, and digital subtraction radiography are included in both the undergraduate and graduate level of instruction. The preclinical program has been designed to orient the anatomy student to normal roentgen anatomy and also to relate this to aspects of physical diagnosis. There is further coordination in anatomy and physiology to emphasize function and in turn relate this to aspects of history taking. In the fields of physiology and physiologic chemistry, radioactive isotope techniques are presented relating particularly to endocrine functions, renal functions and blood formation. Correlated teaching is also carried in gross pathology.

In the clinical years, teaching of diagnostic radiology, radiation therapy, nuclear radiology, computerized tomography, MRI, and ultrasonography is related to total patient care and such teaching is, therefore, predominantly correlated with other clinical departments. The clinical aspects of diagnostic radiology, radiation therapy and radionuclide procedures and techniques are taught during clerkship and in the clinics and various inter-departmental and intra-departmental conferences.

Surgery

Office: 3990 John R., Detroit, MI 48201; 313-745-8778
Chairperson: Donald Weaver
https://wsusurgery.com/

The main objectives of the Department of Surgery are to relate the principles of the basic sciences to clinical practice and to impart the details of patient care in light of modern physiological and pharmacological knowledge. Emphasis is on understanding of the deranged metabolic processes occasioned by surgically treatable disease and physical trauma, the translation of these into recognizable symptoms and signs and the rational correlation of therapy with these basic disturbances. Surgery is taught as only one aspect of patient care and emphasis is placed on the relationship of the surgeon to other personnel who form part of the health care team. As part of their education, students are part of the resident care team and are assigned patients for study.

With the unusually broad spectrum of diseases treatable by surgical methods present in the Wayne State University affiliated hospitals, students have contact with oncological, vascular and gastrointestinal problems. Students obtain a wide clinical experience at Detroit Receiving and Harper University Hospitals. During their third year, they may also select to rotate to one of the other affiliated hospitals such as Henry Ford Hospital, Oakwood Hospital, St. Joseph Mercy Hospital, St. John's Hospital and Medical Center, VA Administration Hospital and William Beaumont Hospital.

Students are encouraged to participate in experimental and clinical research programs with staff supervision during their senior elective periods and summer vacations. The program is designed to provide the
student with the opportunity to develop career interests in surgery at an early stage in their education.

**Urology**

*Office:* 4201 St. Antoine, UHC-7C Detroit, Michigan 48201; 313-577-5222  
*Chairperson:* Michael L. Cher

M.D. program instruction in the field of urology begins in the M.D. Year I with the physical diagnosis course. Students receive lecture and laboratory instruction on the male genitourinary physical examination. Instruction continues in Year III with a series of lectures. Students receive these lectures as part of their general surgery curriculum. These lectures incorporate the fundamental concepts of the disease processes which affect the genito-urinary system. The lectures attempt to integrate the physiologic and anatomic mechanisms of urological disorders, their clinical presentations, and contemporary treatment strategies and outcomes. Clinical electives in urology are offered to students in their third/junior and fourth/senior years of medical school training. The electives are arranged in four week blocks. Rotations on the urology service can be tailored to the individual student. Students may also spend time in the various office clinics within the Department of Urology to broaden their experience.
Graduate Programs of the School of Medicine

Academic Regulations Governing Master's and Doctoral Degrees

Advanced study programs leading to the Doctor of Philosophy and Master of Science degrees are available in the School of Medicine. Their primary purpose is to provide an opportunity for graduate training in preparation for careers in biomedical research including those in academia, industry, biotechnology, and government. In addition, the programs are designed to provide an educational springboard into a wide variety of related careers including those in medicine, intellectual property (patent) law, regulatory affairs, compliance, healthcare management, science advocacy/policy, teaching, scientific writing, clinical and translational sciences, forensics, and environmental affairs, among others.

Graduate students enter a community of team-oriented scholars and are expected to become acquainted with the development of a main area of study and its relationship to other pursuits. Students should develop into independent and self-directed learners and researchers, acquire useful perspectives on the meaning and limitations of exact science, and maintain a balance between practical and abstract intellectual activity. They are expected to draw from and add to the wealth of accumulated knowledge in their chosen discipline. Graduate students work closely with faculty advisors who help plan course schedules and research programs, supervise laboratory training, and help navigate career options.

For complete information regarding the academic rules and regulations of the University, students should consult Academic Regulations (p. 38) of this bulletin. The following additions and amendments pertain to the School of Medicine.

Admission

Admission to these graduate programs is contingent upon admission to the Graduate School (p. 35). Requests for program-specific information and requirements should be made directly to the program of interest. Mailing address and individuals to contact are cited below.

Application

Applicants must complete/submit:

1. University Graduate School application;
2. Official transcripts of all undergraduate (and graduate) academic work;
3. Graduate Record Examination scores, verbal, quantitative and analytical writing components.

Individual programs may have additional application requirements, including higher standards for G.P.A. and English proficiency than the Graduate School. Students for whom English is not their native language will be required to demonstrate competency in verbal and written English within the first year of study.

Most study programs are planned for students who begin in the fall semester; however, matriculation may be possible at other times during the year in individual cases.

The recommended procedure for application is:

1. Consult departmental websites and/or contact the appropriate Graduate Officer for additional information and forms relevant to that program;
2. Submit ALL application materials by February 1 for admission to begin study in the fall semester;
3. Earlier applications will be accepted in most cases. Late applications will be evaluated; however, the graduate programs have limited enrollment, and thus late applicants may encounter programs already filled. Most graduate assistantships and fellowships are awarded in the months of February and March; late applicants may have very limited opportunities for this type of financial assistance. Additional financial aid may be available through the Office of Student Financial Aid.

Master of Science Degrees

Descriptions of individual programs may be found in the departmental sections which follow. Two interdisciplinary programs are offered in addition to the discipline-based courses of study: a master's degree program in basic medical sciences and a master's degree program in medical research. These are described below. General requirements for the Master of Science degree may be found under Master's Degrees (p. ).

Doctor of Philosophy Degrees

Programs leading to the Doctor of Philosophy degree in the basic medical sciences are under the jurisdiction of the Graduate School of the University. Ph.D. students, admitted to one of the listed graduate programs, typically enroll in the School of Medicine's Interdisciplinary Biomedical Sciences (IBS) core curriculum during their first year. The IBS is a broad-based curriculum involving courses in Interdisciplinary Molecular and Cellular Biology and selected courses in the systems curriculum. Department and program-specific course requirements and additional information may be found in the individual descriptions of each Ph.D. program.

The thirty credit dissertation registration requirement is fulfilled by registering for the courses 9991, 9992, 9993, and 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively) offered under various subject area codes, in consecutive academic year semesters.

Interdisciplinary Biomedical Sciences (Ph.D.)

The School of Medicine's Interdisciplinary Biomedical Sciences (IBS) curriculum is open only to doctoral students in the School of Medicine. Completion of the Core Curriculum is recommended during the first year of Ph.D. study; it must be completed by the end of the second year. The IBS curriculum includes:

<table>

Admission of other students requires the consent of the curriculum director.

**Joint M.D. and Ph.D. Program**

A joint M.D. and Ph.D. program of study may be designed to provide an opportunity for exceptionally talented students to acquire knowledge and expertise in both research and clinical medicine. By combining and interrelating the Doctor of Medicine and Doctor of Philosophy programs, the dual degree objectives may be accomplished effectively and often in a shorter time than is possible by two separate degree programs completed in sequence. Such a program will prepare the student to assume investigative leadership in medical schools and in institutes for medical research. This program is flexible so that it can be adapted to best suit the student's discipline, needs and objectives.

**Admission:** Students will apply to the joint degree program at the time that they apply to the School of Medicine via the American Medical College Application Service (AMCAS). However, failure to be admitted to the joint degree program will not alter the student’s opportunity to be considered for medical admission. In some instances, medical students may be admitted during their first or second year of undergraduate medical school, but this will involve other means of financial support than when he/she has been admitted by a joint process to the M.D-Ph.D. program in the School of Medicine. At the time of acceptance to the joint degree program, students will be required to submit a graduate application. Students interested in a joint degree program may contact the Graduate Programs Office in the School for further information and counseling.

**Degree Requirements**

The requirements for the joint M.D./Ph.D. degrees conform to those established for the separate degrees by the School of Medicine, the Graduate School (p. 19), and the individual departments involved.

- Anatomy and Cell Biology (p. 301)
- Basic Medical Sciences (M.S.) (p. 297)
- Biochemistry, Microbiology and Immunology (p. 302)
- Clinical and Translational Science (Bridge Graduate Certificate) (p. 298)
- Genetic Counseling (M.S.) (p. 298)
- Medical Research (M.S.) (p. 299)
- Molecular Genetics and Genomics (p. 305)
- Oncology (p. 308)
- Pathology (p. 312)

**Programs Offered through the Graduate Programs Office**

**Basic Medical Sciences (M.S.)**

*Office: 1128 Scott Hall*
*Program Director: George S. Brush, Ph.D.*

The Basic Medical Sciences (BMS) program offers a didactic, multidisciplinary (broadly-based), and human biology-oriented curriculum. The BMS program can enhance the academic preparation of individuals holding a bachelor’s, master’s or professional degree who are seeking to subsequently matriculate into human or veterinary medical, dental, or pharmacological professional degree programs. The curriculum can facilitate career advancement of individuals employed in the areas of biomedical research and science education. The curriculum is NOT for individuals holding M.D., D.D.S., Pharm.D. or equivalent degrees; such individuals interested in medical or biomedical research are referred to the M.S. in Medical Research program (see below).

The curriculum involves courses from several basic science departments and programs, each one representing a unique discipline within the Wayne State University School of Medicine. At least one BMS CORE course from each of at least four different disciplines is required. The curriculum also has advanced basic medical science electives. The Master of Science in Basic Medical Sciences degree is a Plan B master’s essay curriculum that requires an original critical evaluation of a specific topic in current biomedical science commonly based on analysis of current biomedical literature; original experimental research is not required.

**Admission Requirements**

**Admission** to the BMS program is contingent upon admission to the Graduate School (p. 35). A minimum of a bachelor’s degree or equivalent is required. A major in a biological or chemical science is preferred; applicants with other majors will be considered. Applicants must have completed at least one year of general biology, two years of chemistry (inorganic and organic), and one year of physics at the undergraduate level or above. An earned cumulative Grade Point Average of 3.0 together with strong science grades are required for regular admission. Applications must be submitted online (see url at the end of this paragraph). A complete application requires submission of the basic application form, a statement of purpose, three letters of recommendation, transcripts from all prior academic institutions in which the applicant is/was enrolled, and a recent standardized test score (original or copy): either MCAT, DAT, GRE or PCAT. Copies of transcripts may be submitted for application review; however, the Graduate School will require submission of an official transcript showing degree awarded prior to enrollment.

**Program Requirements**

The Master of Science in Basic Medical Sciences is offered only as a Plan B master’s degree that requires completion of thirty-four credits in the BMS curriculum and must include a graded Master's essay curriculum that requires an original critical evaluation of a specific topic in current biomedical science commonly based on analysis of current biomedical literature; original experimental research is not required.

**Required Core Courses**

A minimum of four CORE courses, each one from a different basic science discipline/subject area (as reflected in the different two- or three-letter course prefixes), must be chosen from the following (a few alternative Core courses are available with Program Director approval):

<table>
<thead>
<tr>
<th>Code</th>

</table>
scholarship and degrees, including a cumulative earned 3.0 g.p.a. in the School must be completed in accordance with the regulations of the Medical Research. Under this Bridge Program, all of the M.D./Ph.D. program. Applicants should file a Change of Graduate Status with the School of Medicine Graduate Program Office and include a very brief statement of purpose for enrolling in this curriculum. The Graduate Certificate in Clinical and Translational Science (Bridge Graduate Certificate) trains M.D./Ph.D. students in the key elements of clinical and translational science. Thus, the curriculum for this certificate includes courses in biostatistics; epidemiology; development of novel clinical and translational methodologies; designing and implementing clinical trials and clinical research; understanding the clinical presentation, diagnosis, management and treatment of patients in the context of cutting-edge research methodologies; adhering to federal regulatory and ethical requirements in conducting clinical and scientific research; and preparing, writing and submitting competitive fellowship and grant applications to national and federal peer-reviewed funding agencies as well as performing research.

Admission to these programs is contingent upon admission to the Graduate School (p. 35) and the graduate programs of the School of Medicine (p. 296), respectively. Admission is limited to students in the M.D./Ph.D. program. Applicants should file a Change of Graduate Status with the School of Medicine Graduate Program Office and include a very brief statement of purpose for enrolling in this curriculum.

This Graduate Certificate in Clinical and Translational Science requires fifteen credits of course work. Under this Bridge Program, all of the certificate credits may be applied toward the requirements of the M.S. in Medical Research (p. 299). The program is designed for seven to eight years, over the duration of the M.D./Ph.D. program. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees, including a cumulative earned 3.0 g.p.a. in the courses offered for credit, and Satisfactory (‘S’) grades in the courses graded Satisfactory/Unsatisfactory (S/U).

### Required Courses

The Graduate Certificate in Clinical and Translational Science requires fifteen credits of courses including:

### Genetic Counseling (M.S.)

**Office:** 2375 Scott Hall; 313-577-6298  
**Program Director:** Angela M. Trepanier, M.S., C.G.C.  
**Associate Director:** Erin Carmary, M.S., CGC

The graduate program in Genetic Counseling is located in the Center for Molecular Medicine and Genetics (CMMG) on the School of Medicine campus. Genetic counselors are medical professionals who help people understand and adapt to the medical, psychological and familial implications of genetic contributions to disease. This is achieved through the following: procuring and interpreting family and medical histories to assess the chance of disease occurrence or recurrence; educating about inheritance, testing, management, resources, and research; and providing counseling to promote informed decision-making and adaptation to genetic disease or risk. The practice of genetic counseling requires comprehensive knowledge of human and medical genetics, including genetic and genomic testing, in combination with an appreciation for the psychosocial, ethical, and social issues associated with genetic disorders. It also requires strong critical thinking, psychosocial assessment, and interpersonal communication skills. Genetic counselors generally work as part of a health care team in a variety of clinical settings such as pediatric genetics, reproductive genetics, cancer genetics, inherited metabolic disorders/newborn screening, cardiovascular genetics, and neurogenetics. Genetic counselors also work in many other settings including clinical laboratories, public health departments, universities, advocacy organizations, and public policy organizations. Genetic counseling services may be provided in person, by telemedicine (video-conferencing) or by telephone. In addition to providing genetic counseling services to patients, genetic counselors may have roles in research, genetic/genomic testing, sales and marketing, leadership, advocacy, public policy, and/or education.

The graduate program in genetic counseling is designed to prepare students with the appropriate knowledge base and practical experience to function competently as genetic counselors in a wide array of settings. The curriculum consists of course work in molecular biology, human and medical genetics, embryology, epidemiology, research methods and statistics, the principles, theory, and practice of genetic counseling, ethics, cultural competency, diversity, equity, inclusion, and justice, counseling, and interpersonal communication. In addition, students gain practical experience by doing supervised clinical internships in a broad range of genetics and specialty clinics as well as clinical genetics laboratories. Students are also required to conduct a research project on a relevant clinical or professional topic (modified Plan B). This program is accredited by the Accreditation Council of Genetic Counseling.
Admission Requirements

Admission to the genetic counseling program is contingent upon admission to the Graduate School (p. 296), respectively. Applicants must have a baccalaureate degree, typically with a grade point average of at least 3.0 or equivalent. Undergraduate course work in biology, biochemistry, chemistry, genetics, organic chemistry, statistics and psychology is required. Also required are three letters of recommendation, a written personal statement, transcripts, and a resume that includes information about efforts to explore the profession and counseling advocacy work. Prospective students are strongly encouraged to shadow and/or speak with a genetic counselor, attend a genetic counseling program open house, and/or do other activities that will familiarize them with the field before applying. The genetic counseling program holds open houses 2-3 times per year where potential applicants can learn about the profession by interacting with and hearing presentations from practicing genetic counselors. Advocacy experience is also a prerequisite to admission. Counseling advocacy, which includes but is not limited to crisis counseling (including crisis text hotline), sexual assault or domestic violence counseling, serving as a resident assistant, or facilitating a grief and loss support group, is required. For questions about the suitability of an advocacy experience, please contact the program directors.

The genetic counseling program participates in the Association of Genetic Counseling Program Directors' Genetic Counseling Admissions Match, administered by National Matching Services, Inc. Only applicants that register to take part in the admissions match are considered for admission.

The Master of Science in Genetic Counseling program is offered as a Master's Degree Plan B (p. 296), requiring a research project. The curriculum includes approximately forty-five credits: thirty-five credits in core course work, six credits in clinical internships, and four credits for the research project (coursework and independent study). Students should contact the Program Director (%20geneticcounseling@med.wayne.edu) for more details about required courses.

Medical Research (M.S.)

Office: 1128 Scott Hall; 313-577-1455
Program Director: George S. Brush, Ph.D.

The Master of Science in Medical Research (M.S.M.D.R) program provides a broadly based, multi-disciplinary, human biology-oriented master’s level education and requires basic and/or clinical biomedical research training. Admission to the program is available to individuals who have a professional medical (M.D., D.O.), dental (D.D.S.), pharmaceutical (Pharm.D.), or equivalent degree in human health care and who are actively participating in Wayne State University School of Medicine affiliated post-graduate clinical medicine training, or are affiliated faculty members. The M.S.M.D.R program enables individuals to obtain research credentials for entry into an academic medical, dental, or pharmacologic research career, or for individuals already in an academic medical, dental, or pharmacologic career to change their research emphasis.

An additional MSMDR program has been developed for students enrolled in the M.D. program at Wayne State University School of Medicine. The master’s portion of this joint M.S.-M.D. program is designed to provide a multi-disciplinary, human biology-oriented education with basic and/or clinical research training. The program will be of value to medical students who wish to include research in their future careers, and will prepare them to understand how concepts, therapies, and technologies are translated from the laboratory to the clinic. Inquiries should be sent to the Program Director.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Applications must be submitted online which allows submission of the applicant’s information, statement of purpose, and the three required references. One of the references must be from the prospective thesis advisor who must be a WSU School of Medicine Graduate Faculty member. For application review, a professional applicant must provide the M.S.M.D.R Program transcripts with proof of a degree from a professional degree-granting institution, either medical (M.D., D.O.), dental (D.D.S.), pharmaceutical (Pharm.D.) or equivalent. Copies of transcripts may be submitted for application review; however, the Graduate School will require submission of an official transcript showing degree awarded prior to enrollment. International medical graduates must provide a valid certificate from the Educational Commission for Foreign Medical Graduates. A medical school applicant must be in good standing in the second or third year of the M.D. program at Wayne State University School of Medicine. Students who have completed the Medical Student Summer Research Fellowship are encouraged to apply.
Program Requirements

The Master of Science in Medical Research is offered only as a Plan A master’s program requiring completion of thirty credits, including an eight-credit thesis.

Courses

For students with professional degrees, a minimum of two courses, each one reflecting a different discipline/subject area (as reflected in the different two or three-letter course prefixes) must be chosen from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</thead>
<tbody>
<tr>
<td>GS 0900</td>
<td>Essential Research Practices: Responsible Conduct of Research</td>
<td>0</td>
</tr>
<tr>
<td>MGG 7091</td>
<td>Scientific Communication</td>
<td>2</td>
</tr>
</tbody>
</table>

In addition, a minimum of two courses must be chosen, upon consultation with the thesis advisor and program director, that complement the research activities.

Elective Courses

Elective credits sufficient to complete the degree requirements must be approved by written consent of the Program Director.

The Plan of Work is developed by the student in consultation with the prospective thesis advisor and filed with the Program Director. The deadline is specified by the Graduate School and enforced by the Registrar. With the Program Director’s approval the student is advanced to candidacy status.

Thesis Requirement: Completion of MDR 8999, Master’s Thesis Research and Direction, Cr. 8; prereq: M.S. in Medical Research candidacy status, approved thesis outline, consent of advisor, and authorization by M.S.M.D.R Program Director.

Thesis Advisor: The advisor is selected with the advice and consent of the Program Director. The Thesis Committee, selected with the advice and consent of the Thesis advisor, must be composed of three graduate faculty members, including the thesis advisor who also serves as the student’s academic advisor for the remainder of his/her program. The candidate must prepare an outline of the thesis, obtain signatures of approval from all Committee members, and file with Program Director for approval.

Thesis and Defense: The thesis document must be provided to the Thesis Committee for review prior to the oral defense. The Committee evaluates the thesis document and following the subsequent oral defense determines the MDR 8999 final grade.
Anatomy and Cell Biology

Office: 8374 Scott Hall; 313-577-1061
Chairperson: Linda D. Hazlett
http://www.anatomy.med.wayne.edu/

The Anatomy and Cell Biology Program provides training in the study of dynamic biological processes using cellular, molecular, behavioral, and imaging approaches. Faculty members are active in an extensive array of research areas, including the visual sciences, neuroscience, cell and developmental biology, immunology and infectious disease. The department offers two graduate degrees, both of which require the successful completion of courses. For the Ph.D. degree, dissertation research is performed in the laboratory of a faculty member with all requirements generally completed in four to five years. The M.S. degree offers two tracks: Research (Neuroscience or Visual Sciences) and Teaching, either of which can be completed within two years. In addition, students admitted to the School of Medicine (https://www.med.wayne.edu/) can pursue M.D./M.S. or M.D./Ph.D. degree, typically completed in five or seven years, respectively. While acceptance to the Ph.D. and M.S. programs is contingent upon admission to the Graduate School (p. 35), applications are submitted directly to the Department of Ophthalmology, Visual and Anatomical Sciences (OVAS).

- Anatomy and Cell Biology (M.S. and Ph.D.) (p. 301)

Anatomy and Cell Biology (M.S. and Ph.D.)

The Department of Anatomy and Cell Biology offers training for the investigation of biological and biomedical problems using molecular, cellular, and morphological approaches. Faculty members are active in a diversity of research areas, including cell and developmental biology, neuroscience, vision research, and immunology. Study for the Ph.D. degree includes dissertation research in the laboratory of a faculty member and can generally be completed in four to five years. Students who have also been admitted as medical students can typically complete both M.D. and Ph.D. degrees in six to seven years. Admission to the master’s degree program is very limited and based on special circumstances.

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 35) and the graduate programs of the School of Medicine (p. 296), respectively. Applicants must have an undergraduate degree. A minimum grade point average of 3.0 is required for admission to the Ph.D. program. An interview with the Graduate Committee Chairperson or designated representative is desirable. The Graduate Record Examination is required for admission. Foreign students must be proficient in English as determined by satisfactory performance on the standardized TOEFL English proficiency examination.

Academic Scholarship

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.

Assistantships and Research

The Department has graduate research assistantships available for a number of qualified students. All students accepted into the doctoral degree program are considered for financial assistance, and no application forms are necessary for this purpose. Students on assistantships are advised to elect no more than ten credits in a given semester. Two credits are covered during spring/summer semester. All students, whether or not they hold a fellowship or assistantship, are required to assist the graduate faculty in research activities as a component of their educational experience.

Program Requirements

The general requirements (p. 19) for the Master of Science and Doctor of Philosophy degrees may be found in the Graduate School section of this bulletin. The master's degree is offered as Plan A only, which includes a manuscript based on original research.

During their first year, Ph.D. students typically enroll in the School of Medicine's Interdisciplinary Biomedical Sciences (IBS) curriculum:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>IBS 7015</td>
<td>Interdisciplinary Cell and Molecular Biology</td>
<td>6</td>
</tr>
<tr>
<td>IBS 7030</td>
<td>Functional Genomics and Systems Biology</td>
<td>2</td>
</tr>
<tr>
<td>IBS 7050</td>
<td>Molecular Neuropsychopharmacology</td>
<td>2</td>
</tr>
<tr>
<td>IBS 7090</td>
<td>Biomedical Immunology</td>
<td>2</td>
</tr>
<tr>
<td>IBS 7100</td>
<td>Biomedical Neuropsychopharmacology</td>
<td>2</td>
</tr>
<tr>
<td>IBS 7130</td>
<td>Systems Neuroscience: Structure and Function of The Nervous System</td>
<td>2</td>
</tr>
<tr>
<td>IBS 7140</td>
<td>Foundations of Data Science</td>
<td>3</td>
</tr>
</tbody>
</table>

Opportunities are provided for the student to become acquainted with the diverse research interests of the faculty and to obtain hands-on experience in selected techniques. Seminars and elective courses broaden the exposure to clinically-relevant areas of research. In the second year, students may select advanced courses in several areas of Anatomy and Cell Biology and choose an advisor to assist in development and implementation of a dissertation research project. The graduate program is flexible and allows for continuing interdisciplinary training; emphasis is placed on designing a program which is tailored to the student’s particular goals. In addition to developing research competence, individuals interested in pursuing teaching as part of a career will be able to achieve competence in neuroscience, embryology, and microscopic or gross anatomy.

The graduate students interested in neurobiology subdiscipline should take one of the three courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANA 7010</td>
<td>Human Gross Anatomy</td>
<td>8</td>
</tr>
<tr>
<td>ANA 7030</td>
<td>Human Microscopic Anatomy</td>
<td>4</td>
</tr>
<tr>
<td>ANA 7130</td>
<td>Neuroanatomy</td>
<td>4</td>
</tr>
</tbody>
</table>

Graduate Students admitted in the program undergo lab rotation (ANA 7270) prior to selecting a dissertation advisor. Graduate students in the program area also required to register for ANA 7890 seminar course. They also complete written and oral qualifying examinations. The major component of the Ph.D. program is preparation of a dissertation which details the results of original research.

After the completion of PhD candidacy, the thirty credit dissertation registration requirement is fulfilled by registering for the courses ANA 9991, ANA 9992, ANA 9993, and ANA 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Vision Science Program

Students interested in developing independent careers in the area of vision science may obtain specialty training in this research field. Through course work and clinical interactions, students receive broad based training which integrates basic science and clinical approaches.

Wayne State University Graduate Bulletin 2022-2023 - DRAFT COPY 301
to the understanding of eye function and ocular disease. Three courses (ANA 7055, ANA 7065, and ANA 7075) provide the background for individually directed research projects. Faculty from both the Department of Anatomy and Cell Biology and the Department of Ophthalmology participate as mentors in this unique program.

Biochemistry, Microbiology and Immunology

Office: 7374 Scott Hall; 313-577-1511
Chairperson: Philip Pellett, Ph.D.
Associate Chair: Ladislau Kovari Ph.D.
Graduate Director: Jeffrey Withey Ph.D.
http://www.biochemmicroimmuno.med.wayne.edu

The Department of Biochemistry, Microbiology Immunology serves our community, state, nation, and the world by applying the tools of our disciplines to improving health and wellness for all members of our society, including historically underserved populations.

We are home to students and faculty engaged in the study of areas of modern biomedical science that are fundamental to understanding biological systems relevant to human health. The department was formed in January 2017 by a merger of the long-standing Departments of Biochemistry & Molecular Biology and Immunology & Microbiology.

We provide high quality biomedical science education and opportunities to perform pioneering research. This enables our diverse student body of college undergraduates, medical students, graduate students, and post-doctoral scholars to develop into scientific leaders in the international biomedical arena.

Our current areas of research include:

**Biochemistry and Molecular Biology** have played major roles in the biological revolution that has transformed our understanding of the fundamental processes of life, and have paved the way for the development of solutions to medical problems that vexed us for centuries. Our biochemical research programs involve the study of molecular mechanisms that underlie biological processes, with an emphasis on the relationship between macromolecular structure and function.

**Immunology** involves the study of defense systems that revolve around discrimination of self from non-self. Recognition of pathogens (non-self) triggers mechanisms that can lead to an elimination of the pathogen. Over-enthusiastic recognition of self can lead to autoimmune diseases such as rheumatoid arthritis. Research in immunology is directed at learning how immune responses are regulated, to enhance protections against pathogens, dampen autoimmunity, and direct the immune system to eliminate cancers.

**Microbiology** revolves around the study bacteria and viruses, classes of microorganisms that cause a wide range of diseases internationally. Microorganisms are important constituents of our environment, from our personal microbiomes to the complex array of microbial interactions that define nearly all aspects of life on earth. Our microbiology research programs involve investigation of pathogen-host interactions from the levels of populations and individuals, down to the intracellular level.

Our department is home to M.S., Ph.D., and M.D/Ph.D. programs in Biochemistry & Molecular Biology (https://biochemmicroimmuno.med.wayne.edu/phd-program/) and Immunology & Microbiology (https://biochemmicroimmuno.med.wayne.edu/immunologyandmicrobiologyms/phdprograms/). Our objective is to prepare students for active and successful careers in these exciting and important areas of modern biomedical science. Our students learn how to work independently and collaboratively on complex multidisciplinary biomedical problems, in the context of high standards for research and scholarship. Our educational programs facilitate the development of critical skills such as hypothesis development, experimental design, robust application of classical and modern methods, data analysis,
performing research by high ethical standards, and preparation of data for written and oral presentation in high-quality venues. For decades, our graduate programs have provided excellent foundations for many significant careers in biological research.

- Biochemistry and Molecular Biology (M.S.) (p. 303)
- Biochemistry and Molecular Biology (Ph.D.) (p. 303)
- Immunology and Microbiology (M.S.) (p. 304)
- Immunology and Microbiology (Ph.D.) (p. 304)

Biochemistry and Molecular Biology (M.S.)

The M.S. degree in Biochemistry and Molecular Biology provides strong research training for students who are interested in a research career in academia, medicine, or industry, in related careers in which first-hand research experience is an asset, or as a prelude to more advanced degrees.

Research interests in the Department of Biochemistry, Microbiology & Immunology are diverse, allowing graduate students to choose from a broad spectrum of topics when picking a research lab. Regular interactions between students and faculty are facilitated with weekly departmental and student seminars, formal collaborations between research groups and a cooperative work environment that promotes discussion of research projects between students of different labs.

Admission to these programs is contingent upon admission to the Graduate School (p. 35) and the graduate programs of the School of Medicine (p. 296).

The master's degree in Biochemistry and Molecular Biology is offered under Plan A only. Plan A is defined as a minimum of 30 credits, eight of which must be from thesis research, and requires the completion of an approved research thesis. Full-time thesis research can begin in the second semester with advisor approval.

M.S. candidates with less than 16 credit hours of course credits in BMB may transfer to the Ph.D. program with the approval of the Graduate Committee. Such candidates must then take and pass the Ph.D. written qualifying exam. M.S. candidates with more than 16 hours must complete the M.S. degree and reapply to the Ph.D. program if they wish.

All coursework must be completed in accordance with the regulations of the Graduate School (https://bulletins.wayne.edu/graduate/general-information/degree-certificate-requirements/) and the School of Medicine (https://bulletins.wayne.edu/graduate/school-medicine/programs/). A minimum g.p.a. of 3.0 must be maintained throughout the program, 3.5 is required to maintain the scholarship. Students should strive to be 1st or 2nd author on one peer reviewed publication to validate the quality of their research and to compete effectively in their post-graduate careers.

Successful completion of an original research project is an essential part of the M.S. program and requires a full-time commitment in the summer following Year 1 formal coursework and in Year 2. The applicant for this degree should therefore select an advisor and project as early as possible in the second semester of the program. Option 2 students need this and a Research Plan form before registering for Winter semester. "Plan of Work" and "Petition for Candidacy Degree" forms should be filed by the end of the second semester with the Office of Graduate Studies. Master's students will hear oral presentations by Faculty who are accepting Master's students in the early portion of BMB 7890. They should select an adviser and committee to initiate research in BMB 7996 Winter and Summer of Year 1, during which time they define their thesis projects.

Applicants for the Master of Science degree must complete the following coursework, including at least eight credits of master's research. Required coursework includes the following:

<table>

Total Credits 34

The completion of an original research project and the preparation and presentation of a thesis are the primary activities of the second year.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.

Biochemistry and Molecular Biology (Ph.D.)

The Department of Biochemistry, Microbiology & Immunology offers a program of coursework and experimental research leading to a doctoral degree in Biochemistry & Molecular Biology. Areas of strength within the department include the molecular biology of gene structure and function, bioenergetics, enzymology, and macromolecular structural biology.

Admission to these programs is contingent upon admission to the Graduate School (p. 35) and the graduate programs of the School of Medicine (p. 296).

Applicants for the Doctor of Philosophy degree must complete ninety credits, including at least thirty credits in research and dissertation, at least six credits in a minor and the remaining credits distributed between the major and required cognate courses and electives.

In their first year, all Ph.D. graduate students in the School of Medicine’s Interdisciplinary Biomedical Sciences (IBS) program (of which we are a part) participate in a combined First Year curriculum, which provides broad-based knowledge in important areas of fundamental biomedical research. Faculty from all departments participate in the teaching, which emphasizes critical discussion of primary and secondary literature. The fall semester covers Molecular and Cell Biology. During the winter semester of the first year, coursework includes two two-credit IBS course offerings chosen by the student, together with two departmental courses that are required for our Ph.D. students: Protein Structure and Function (BMB 7320) and Molecular Biology (BMB 7330).

In addition to these courses, first-year students undertake a series of ten-week laboratory rotations designed as in-depth introductions to the laboratories of their greatest interest. During the first weeks of the fall semester, faculty with slots available in their laboratories participate in a briefing session for incoming students to describe their research work. Further one-on-one discussion with individual faculty members is also encouraged. Students are urged to gather as much background information as possible before making these choices as they are likely to
be a major factor in determining the direction of their entire professional career. Generally, each student does three rotations during the fall and winter semesters, and on the basis of this experience, chooses the laboratory in which they will carry out their doctoral research.

After the first year in the program, students choose courses from anywhere in the University, to focus on their particular interests. Six credit hours in an appropriate minor are required, which need not be confined to coursework offered in the School of Medicine. Favorite choices for the minor include courses in computer science or chemistry. In addition, all students in year 2 and beyond are required to register for Journal Club (BMB 7890) each year. It is expected that most course work will be completed by the end of the second years. A minimum g.p.a. of 3.0 must be maintained throughout the program.

A written comprehensive qualifying exam is administered near the end of the first year, followed by an oral examination by the student’s dissertation committee in the area of the proposed thesis research. The dissertation committee should ideally be selected in the Fall semester of Year 2. The committee is composed of the Advisor to the candidate and three other members, including two faculty from the Department of Biochemistry, Microbiology & Immunology whose primary affiliation is with the Biochemistry & Molecular Biology program. Subsequent years are primarily devoted to dissertation research. Each student in the third year and beyond is required to meet with their dissertation committee once a year (twice if the committee calls for it), to discuss progress in their research projects.

Each student must arrange a program in an area of minor concentration with a representative of the department in which he/she plans to minor and preferably with the representative on the doctoral committee. Areas of minor concentration include organic chemistry, physical chemistry, physical-organic chemistry, microbiology or immunology, pharmacology, physiology, biology, and computer science.

The thirty credit dissertation registration requirement is fulfilled by registering for the courses BMB 9991, BMB 9992, BMB 9993, and BMB 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.

Immunology and Microbiology (M.S.)

The M.S. program in Immunology & Microbiology provides education, training and research experience for students interested in research careers in academia, medicine and industry. The program requires completion of a research project and thesis. The program does not provide formal preparation for careers in medical technology or clinical laboratory science that require professional accreditation.

The M.S. in Immunology and Microbiology program is designed to be a full-time educational experience requiring the completion of 33 credits over a two-year period. The first year is comprised of a mixture of coursework and research. The second year is focused primarily on research.

Admission Requirements

Admission to these programs is contingent upon admission to the Graduate School (p. 35) and the graduate programs of the School of Medicine (p. 296).
distribution of credits among major and minor requirements, consult the department.

Molecular Genetics and Genomics
Office: 3127 Scott Hall; 313-577-5323
Director: Lawrence I. Grossman
http://www.genetics.wayne.edu

Graduate programs in Molecular Genetics and Genomics are administered by faculty in the Center for Molecular Medicine and Genetics (CMMG). Degree programs include the Master of Science, Doctor of Philosophy, and a joint M.D.-Ph.D. program. Molecular Genetics and Genomics graduate students receive broad training in genetics, molecular and cellular biology, genomics, functional genomics, systems biology, bioinformatics, and computational and statistical methods. A major component of their training involves conducting dissertation or thesis research in one of the focus areas of Center faculty. Students receive intensive laboratory training, working closely with faculty on projects at the forefront of biomedical genetics and genomics research.

- Molecular Genetics and Genomics (M.S.) (p. 306)
- Molecular Genetics and Genomics (Ph.D.) (p. 307)
- Molecular Genetics and Genomics AGRADE (p. 305)

Molecular Genetics and Genomics AGRADE Program

The AGRADE-MGG program is hosted by the Center for Molecular Medicine and Genetics (CMMG) in the School of Medicine. This program is comprised of foundational (core) courses and additional concentration (elective) courses in molecular medicine, genetics and genomics. AGRADE-MGG students obtain academic and applied training in addition to capstone research experiences that integrate learning across their courses. In addition to coursework, this is a research-intensive track that includes research in CMMG faculty laboratories performing wet bench experiments and/or dry bench computational projects as a starting point for a thesis project in year 2 of the program, as well as additional electives. In contrast to regular MGG MS students, who can choose between Plans A and B, only Plan A is available for AGRADE-MGG students. The final thesis will be graded by a thesis committee, which will include an oral thesis defense to the committee.

Eligibility

Before applying to the program, students should meet with their undergraduate academic advisor to determine if AGRADE-MGG would be a good fit. Student records will be reviewed to determine eligibility, and the academic advisor will assist students in declaring and in guiding their course of study. In general, undergraduate students with declared STEM majors will be eligible to apply for AGRADE-MGG status in the semester during which they expect to complete 90 credits. All AGRADE-MGG applications will be reviewed and prioritized for admission in the Fall semester of each year by the CMMG graduate recruitment committee. Acceptance to the AGRADE-MGG program will be competitive; thus, not all students who meet the minimum criteria will be admitted.

Eligibility criteria are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 2010</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>CHM 1100</td>
<td>General Chemistry I</td>
<td>4</td>
</tr>
<tr>
<td>&amp; CHM 1130</td>
<td>and General Chemistry I Laboratory</td>
<td></td>
</tr>
<tr>
<td>or CHM 1125</td>
<td>General Chemistry I for Engineers</td>
<td></td>
</tr>
<tr>
<td>CHM 1150</td>
<td>General Chemistry II Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>CHM 1240</td>
<td>Organic Chemistry I</td>
<td>4</td>
</tr>
</tbody>
</table>
Applications must include:

- personal statement detailing interest in the AGRADE-MGG program, career goals, specific motivations and potential mentoring faculty members;
- academic record and suitability to join the AGRADE-MGG track;
- two references from connected faculty detailing the student's capacity for graduate study.

Requirements

Upon admission to this accelerated track, undergraduate students complete a minimum of 3 and a maximum of 16 (3-16) credits of approved AGRADE-MGG graduate level courses.

AGRADE-MGG graduate level courses can be used to complete baccalaureate degree requirements and fulfill the initial phase of study toward the MS-MGG degree, provided students perform well in these courses (B grade or higher) and apply to MS-MGG upon graduation with their baccalaureate degree. For courses in which both undergraduate and graduate students participate, AGRADE-MGG students will be held to the course standards required of graduate students.

Explicit in the path to an MS-MGG degree using the AGRADE-MGG mechanism is the requirement that students must complete a minimum of 34 credits of graduate level courses to earn an MS-MGG degree. Thus, courses listed on a student's undergraduate transcript at the time of application to the AGRADE-MGG program cannot be used for credit transfer into the AGRADE-MGG curriculum. Nonetheless, specified undergraduate courses will be considered (B grade or higher) for waiving the requirement to take mandated core AGRADE-MGG courses. In such cases, students must take approved AGRADE-MGG elective credits equivalent to the number of the waived graduate level credits. Further, specified undergraduate courses taken by AGRADE-MGG students can only stand in lieu of equivalent core MGG graduate courses (with a B or higher grade) if an equivalent number of AGRADE-MGG electives are taken.

Upon acceptance into the MS-MGG program, AGRADE-MGG courses will be treated as if they are graduate credits transferred from a graduate program at another university. The remaining graduate level credits required for a Masters degree (minimum of 34) will be earned in the usual manner within the MS-MGG program.

Only Plan A is available for AGRADE-MGG students.

Molecular Genetics and Genomics (M.S.)

Admission Requirements

Admission to the Molecular Genetics and Genomics graduate programs is contingent upon admission to the Graduate School (http://bulletins.wayne.edu/graduate/general-information/admission/) and the graduate programs of the School of Medicine (http://bulletins.wayne.edu/graduate/school-medicine/programs/). Applicants for the M.S. program must have an undergraduate degree with a major in biology or related science. Students with backgrounds in mathematics or computer science are also encouraged to apply, as are students with significant research experience. Applicants should submit a personal statement, resume, transcript and have three letters of recommendation sent directly to the Program. The Graduate Record Examination is not required, but is recommended. International students must be proficient in English and demonstrate a satisfactory performance on the TOEFL English proficiency examination. Members of the admissions committee will interview select applicants.

Program Requirements

The Plan A MS degree requires completion of Master’s Thesis Research and Direction (MGG 8999 (http://bulletins.wayne.edu/search/?P=MGG %208999), Cr. 8), which includes original research and writing and defense of a thesis. The Plan B MS degree requires completion of Master’s Essay in Molecular Genetics and Genomics. The MS degree requires 34 credit hours to graduate. Students in the MS program enroll in the following courses.

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.
Molecular Genetics and Genomics (Ph.D.)

Admission Requirements

Admission to the Molecular Genetics and Genomics graduate programs is contingent upon admission to the Graduate School (http://bulletins.wayne.edu/graduate/general-information/admission/) and the graduate programs of the School of Medicine (http://bulletins.wayne.edu/graduate/school-medicine/programs/). Applicants must have an undergraduate degree with a major in biology or related science. Students with backgrounds in mathematics or computer science are also encouraged to apply, as are students with a Master's degree and significant research experience. A minimum grade point average of 3.0 from the most recent degree is required. Applicants should submit a personal statement, resume, transcript and have three letters of recommendation sent directly to the Program. The Graduate Record Examination is not required, but is recommended. International students must be proficient in English and demonstrate a satisfactory performance on the TOEFL English proficiency examination. Members of the admissions committee will interview select applicants.

Assistantships and Research

Competitively awarded assistantships or fellowships are available to fund students during their studies. All students accepted into the doctoral degree program are considered for financial assistance, and no application forms are necessary for this purpose. All students, whether or not they hold a fellowship or an assistantship, are required to assist the graduate faculty in research and teaching activities as a component of their educational experience.

Program Requirements

Ph.D. students in the graduate program in molecular genetics and genomics enroll in the School of Medicine's Interdisciplinary Biomedical Sciences (IBS) curriculum during their first year. The IBS curriculum includes:

Elective and advanced topics courses will be selected to meet student needs. The program will enable the student to demonstrate a basic understanding of molecular genetics and genomics, in order to pass a general examination for candidacy for the Ph.D. degree.

Dissertation: Thirty credits in dissertation research are required in the Ph.D. program. This requirement is fulfilled by registering for the courses MGG 9991, MGG 9992, MGG 9993, and MGG 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. Students must write an original research dissertation, have it approved by a dissertation committee, and present it in a public defense.

Academic Scholarship: All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.

Cancer Biology (M.S.)

The MS program in Cancer Biology offers a strong didactic and laboratory curriculum in cancer biology with a major focus on molecular oncology. Our goal is to provide intensive research training for students who are interested in a career in academia, medicine, industry, or related careers in which first-hand research experience is an asset. Research interests in the Department of Oncology are diverse and dynamic, allowing students to choose from a broad spectrum of topics for their research thesis. Students are encouraged to attend weekly departmental seminars, student journal club, and annual symposia. These regular interactions between students and faculty help our students develop networking and oral communication and collaboration skills for future success.

Admission Requirements

Admission to the MS program is contingent upon admission to the Graduate School (p. 35) and the graduate programs of the School of Medicine (http://bulletins.wayne.edu/graduate/school-medicine/programs/). Qualified applicants must have a BS or BA degree from an accredited college or university, preferably with a major in biology, chemistry, physics, or a closely related discipline. A complete application includes the basic application form, personal statement, official transcripts from previous institutions, and three letters of reference. International students must be proficient in English as determined by satisfactory performance on the English proficiency examination. Applicants should consult the Graduate School’s website for details on demonstrating English proficiency (https://gradschool.wayne.edu/admissions/english-proficiency/). Scores should be reported to Wayne State University using institution code 1898. Applications must be submitted online by January 1st. Graduate School Admissions policies can be found at the Office of Graduate Admissions (https://gradschool.wayne.edu/admissions/).

Contact Information

Administrative Office for the MS Program in Cancer Biology
Department of Oncology
Wayne State University School of Medicine
421 E Canfield Street
Detroit, MI 48201
Tel: 313-578-4302

Email: danieln@karmanos.org

The master’s degree in Cancer Biology is offered under Plan A only. A minimum of 30 credits, eight of which must be from thesis research, and the completion of an original research project are required to receive a master's degree. The coursework includes 12 credits of compulsory courses and 10 credits of elective courses (listed below). A minimum GPA of 3.0 must be maintained throughout the master’s program. Students should select an advisor and committee as early as possible in the second semester of year 1 to begin full time thesis research. Students should strive to publish one peer-reviewed paper as first or second author to demonstrate the quality of their research.

Cancer Biology (Ph.D.)

Historically, researchers involved in cancer biology research have focused on a particular field in biology or medicine relating to alterations in fundamental biological processes that result in malignancy, progression to fatal metastatic disease, or success or failure of therapy. However, continued advances in cancer diagnosis and treatment require scientists to have a greater specialization in the biology of cancer while, at the same time, exposure to a host of disciplines, ranging from biochemistry to cell biology and immunology, and to state-of-the-art cell biology and molecular biology methods. The Cancer Biology Graduate Program at the Wayne State University School of Medicine and the Barbara Ann Karmanos Cancer Institute is dedicated to providing an outstanding training experience in the rapidly evolving field of cancer research. Our philosophy is that to train the next generation of cancer researchers requires a strong interdisciplinary graduate curriculum with a major focus on the biology of cancer, and opportunities to regularly interact with clinicians engaged in cancer diagnosis and treatment. The goal is to develop scientists with capacities for critical scientific thinking needed to conduct original research as independent cancer investigators. The Ph.D. program consists of formal course work which provides a comprehensive education in the basic concepts, along with solid training in the core disciplines, that serve contemporary cancer research. Graduates gain a broad understanding of the fundamental principles that underlie this diverse and dynamic field with in-depth knowledge in their dissertation discipline. An integral part of the training experience involves
opportunities to develop written and oral communication skills essential to future success as a cancer researcher.

**Admission Requirements**

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the graduate programs in the School of Medicine (p. 296). Applicants to this program should have a background in one of the chemical or biological sciences; applicants with other backgrounds will be considered for admission depending on their competence related to specific areas of interest within the program. Admission is based on previous academic accomplishments, as documented by a transcript of a degree in-progress or a posted official transcript of a completed degree. A minimum 3.0 grade point average is required although students typically have averages well in excess of this minimum. A statement of purpose, three letters of recommendations and a personal interview are required for admission. Applicants with previous research experience are strongly encouraged to apply and a description of their research experience should be provided. International students must be proficient in English, as determined by satisfactory performance on the English proficiency examination. Applicants should consult the Graduate School’s website for details on demonstrating English proficiency (https://gradschool.wayne.edu/admissions/english-proficiency/).

**Curriculum:** Students in the Cancer Biology Graduate Program enroll in the School of Medicine’s Interdisciplinary Biomedical Sciences (IBS) curriculum during their first year. The IBS curriculum includes IBS 7015, Interdisciplinary Molecular and Cellular Biology. Additional courses are selected by the student in conjunction with the Departmental Graduate Director. In addition, students enroll in CB 7210, Fundamentals of Cancer Biology.

The graduate education of each cancer biology student is tailored to his/her specific interests and research requirements. Previous educational experience is recognized so as to permit the student to progress as rapidly as possible. Since the program requires a broad understanding of cancer biology, a core curriculum is required including thirty credits from the following:

<table>

</tbody>
</table>

In addition to the required courses, a number of advanced cancer biology courses are offered from which students choose a minimum of eight credits, providing the total in required coursework. A number of other courses are available to allow students to specialize in a specific research discipline.

During the second year of study, students submit a "Plan of Work" which documents the academic curriculum leading to the Ph.D. It is expected that the majority of the didactic course work will be completed during the first and second years of Ph.D. study. A written comprehensive qualifying exam is administered in the late spring of the first year of study, followed by an oral comprehensive exam of the proposed dissertation research in the spring of the second year. Ph.D. candidacy is conferred upon successful completion of the oral comprehensive exam. During the summer of the first year, a month long clinical rotation is required (CB 7130) during which graduate students "round" with oncologists treating cancer patients in the Karmanos Cancer Hospital. The third and subsequent years are primarily devoted to dissertation research. Up to forty-five credits of general research, including thirty credits of dissertation research during consecutive semesters (see below) will complete the Graduate School requirements for the Ph.D. degree.

**Dissertation Research**

An applicant for the Doctor of Philosophy degree must satisfactorily complete at least ninety credits, including thirty dissertation research credits in CB 9991, CB 9992, CB 9993, and CB 9994 during consecutive semesters. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees. For information regarding distribution of credits among major and minor requirements, consult the department.

To receive the Ph.D., students must successfully defend the dissertation research and complete a publishable research project under the guidance of a faculty mentor. In addition to traditional classroom learning, there are many additional educational opportunities available to our students including seminars by nationally/internationally renowned scientists both within and outside the cancer center, special non-credit courses, fellowship and grant writing, and research workshops and scientific conferences.

**RESEARCH:** Outside of the required coursework and written and oral comprehensive exams, the bulk of Ph.D. study involves independent laboratory or population-based research leading to results of publishable caliber. The Cancer Biology Graduate Program offers research opportunities with outstanding faculty in many areas of contemporary cancer biology including cancer therapeutics, metastasis, tumor microenvironment, breast cancer biology, carcinogenesis, cancer genetics, population studies, and cancer immunology. Students complete three research rotations under the guidance of Cancer Biology faculty during the first year of study (two in the fall and one in the winter semester), after they choose their dissertation mentor. Dissertation research mentors are selected based on students’ research interests and the research rotation experiences. Since scientific research is open-ended, the amount of time required for completion of a defensible dissertation leading to the Ph.D. cannot be predicted, although typically the Ph.D. degree is conferred within four to five years. A written dissertation and a final oral defense of the dissertation research to the Dissertation Research Committee are requirements for conferring the Ph.D. degree in Cancer Biology. There is an additional requirement of two research publications (one as first author) based on the dissertation research for receipt of the Ph.D. degree.

**FINANCIAL SUPPORT:** All students accepted into the program are considered for financial assistance; a specific application is not necessary. Students receiving assistantships are permitted to enroll
in ten credits hours per Fall and Winter semester, and two credit hours during the Spring/Summer semester. Financial support for the training program in Cancer Biology is derived from University fellowships, traineeships supported by training grants from the National Cancer Institute, faculty grants, and individual graduate fellowships.

Medical Physics (D.M.P.)

Medical Physics is an applied branch of physics concerned with the application of the concepts and methods of physics to the diagnosis and treatment of human disease. Medical Physicists participate in clinical service and consultation, research and development, and education in the areas of radiation oncology, diagnostic radiology, nuclear medicine, and health physics. The Department of Oncology offers courses of study leading to a Master of Science degree, a Doctor of Philosophy degree, a Professional Doctorate degree, or a Graduate Certificate in Medical Physics. Through courses, seminars, laboratories, research experiences, and clinical internships, the Medical Physics programs provide education and clinical training in the physics of Diagnostic Radiology, Nuclear Medicine, and Radiation Oncology.

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the graduate programs in the School of Medicine (p. 296). A bachelor’s degree in physics or a physical science is the preferred background for students entering these programs, although candidates with degrees in other scientific or technological specialties may be accepted provided they have an adequate education in physics and mathematics. Applicants with incomplete physics and/or mathematics backgrounds will be required to complete their preparation in these areas before acceptance into a program.

The Professional Doctorate (D.M.P.) program requires ninety credits beyond the baccalaureate including thirty credits of clinical residency in Radiation Oncology Physics. The thirty credit clinical requirement is fulfilled by registering for the courses ROC 9996, ROC 9997, ROC 9998, and ROC 9999 (Radiation Oncology Physics Clinical Rotation I, II, III, and IV, respectively), in consecutive academic year semesters.

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.

Medical Physics (Graduate Certificate)

Medical Physics is an applied branch of physics concerned with the application of the concepts and methods of physics to the diagnosis and treatment of human disease. Medical Physicists participate in clinical service and consultation, research and development, and education in the areas of radiation oncology, diagnostic radiology, nuclear medicine, and health physics. The Department of Oncology offers courses of study leading to a Master of Science degree, a Doctor of Philosophy degree, a Professional Doctorate degree, or a Graduate Certificate in Medical Physics. Through courses, seminars, laboratories, research experiences, and clinical internships, the Medical Physics programs provide education and clinical training in the physics of Diagnostic Radiology, Nuclear Medicine, and Radiation Oncology.

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the graduate programs in the School of Medicine (p. 296). A bachelor’s degree in physics or a physical science is the preferred background for students entering these programs, although candidates with degrees in other scientific or technological specialties may be accepted provided they have an adequate education in physics and mathematics. Applicants with incomplete physics and/or mathematics backgrounds will be required to complete their preparation in these areas before acceptance into a program. Applicants for the Graduate Certificate are required to have a Ph.D. in physics or related discipline prior to admission.
The Graduate Certificate requires a Ph.D. in Physics or related science to be eligible for application and requires completion of 19 graduate credits of didactic coursework. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.

**Medical Physics (M.S.)**

Medical Physics is an applied branch of physics concerned with the application of the concepts and methods of physics to the diagnosis and treatment of human disease. Medical Physicists participate in clinical service and consultation, research and development, and education in the areas of radiation oncology, diagnostic radiology, nuclear medicine, and health physics. The Department of Oncology offers courses of study leading to a Master of Science degree, a Doctor of Philosophy degree, a Professional Doctorate degree, or a Graduate Certificate in Medical Physics. Through courses, seminars, laboratories, research experiences, and clinical internships, the Medical Physics programs provide education and clinical training in the physics of Diagnostic Radiology, Nuclear Medicine, and Radiation Oncology.

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the graduate programs in the School of Medicine (p. 296). A bachelor's degree in physics or a physical science is the preferred background for students entering these programs, although candidates with degrees in other scientific or technological specialties may be accepted provided they have an adequate education in physics and mathematics. Applicants with incomplete physics and/or mathematics backgrounds will be required to complete their preparation in these areas before acceptance into a program.

The Master of Science with a major in Medical Physics is offered under Plan B as defined by the Graduate School. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.

**Medical Physics (Ph.D.)**

Medical Physics is an applied branch of physics concerned with the application of the concepts and methods of physics to the diagnosis and treatment of human disease. Medical Physicists participate in clinical service and consultation, research and development, and education in the areas of radiation oncology, diagnostic radiology, nuclear medicine, and health physics. The Department of Oncology offers courses of study leading to a Master of Science degree, a Doctor of Philosophy degree, a Professional Doctorate degree, or a Graduate Certificate in Medical Physics. Through courses, seminars, laboratories, research experiences, and clinical internships, the Medical Physics programs provide education and clinical training in the physics of Diagnostic Radiology, Nuclear Medicine, and Radiation Oncology.

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the graduate programs in the School of Medicine (p. 296). A bachelor's degree in physics or a physical science is the preferred background for students entering these programs, although candidates with degrees in other scientific or technological specialties may be accepted provided they have an adequate education in physics and mathematics. Applicants with incomplete physics and/or mathematics backgrounds will be required to complete their preparation in these areas before acceptance into a program.

The Ph.D. requires ninety credits beyond the baccalaureate including thirty credits of dissertation direction. The thirty credit dissertation registration requirement is fulfilled by registering for the courses ROC 9991, ROC 9992, ROC 9993, and ROC 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. The dissertation must be based on original research under the direction of a graduate faculty advisor.

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.
The discipline of pathology is a broadly based investigation of all aspects of the diseases that affect living systems. This includes the study of the underlying causes of disease, as well as the molecular and cellular mechanisms of the disease process. The goal of our Ph.D. program is to train students to be creative and successful scientists with a solid understanding of clinically relevant disease processes. Although broadly based, our Ph.D. program has a particular focus on the molecular and cellular mechanisms of cancer and metabolic diseases.

In the first semester, Pathology Ph.D. students join the first year Ph.D. students from all the Ph.D. programs at the medical school to take IBS 7015 during the first semester. In the subsequent semesters, each student follows a unique individualized plan of study designed to take into account previous educational experience, individual interests, and the student’s thesis project research area. The program consists of a selected electives, small number of required courses, several research rotation projects, a qualifying examination, and a doctoral dissertation based on new and significant research findings.

- Pathology (Ph.D.) (p. 312)

Pathology (Ph.D.)

Admission Requirements
Admission to these programs is contingent upon admission to the Graduate School (p. 35) and the graduate programs of the School of Medicine (p. 296), respectively. The Department admits students with superior records of academic achievement holding either a bachelor’s or master’s degree. Applicants must have an undergraduate g.p.a. above a 3.0 and international students must show proficiency in English with a minimum TOEFL score of 100. Although there are no specific requirements, significant consideration will also be given to an applicant’s area of undergraduate study, the amount of research experience, and Graduate Record Examination (GRE) scores.

Academic Scholarship
All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.

Program Requirements
The Doctor of Philosophy degree requires the completion of ninety credits, including at least thirty credits in research and dissertation. Students must follow the general doctoral degree requirements of the Graduate School (p. 296) and the School of Medicine (p. 296). The thirty credits of doctoral dissertation research are fulfilled by registering for PTH 9991, PTH 9992, PTH 9993, and PTH 9994 in consecutive academic year semesters. Other courses are arranged to meet the specific needs and interests of each student. At the end of the second year of study, students are required to take a qualifying exam to demonstrate a basic understanding of basic molecular and cellular biology, pathology, and their chosen specific area of research. Doctoral thesis research is conducted in the laboratory of one of the Pathology faculty members.

Pharmacology

Office: 6374 Scott Hall; 313-577-1580
Chairperson: Ray Mattingly
Associate Chairperson: Lawrence H. Lash
http://www.pharmacology.med.wayne.edu/

The discipline of pharmacology is concerned with all aspects of the effects of drugs and chemicals on living systems. The field ranges from investigations at the molecular level to population studies on a global level. Drug development and evaluation make up an important part of pharmacology, but the field also includes the use of drugs as tools to probe the functions of macromolecules, cells, organs and even whole animals, and investigation of the harmful effects of chemicals on cells, organs and animals (toxicology). The breadth of interests encompassed by pharmacology provides excellent opportunities for individuals with strong interests and training in biology or chemistry to apply their knowledge to the understanding of fundamental biological processes.

- Pharmacology (M.S.) — Applied Pharmacology and Environmental Xenobiotics (p. 313)
- Pharmacology (Ph.D.) (p. 313)
- Pharmacology and Urban Sustainability (Ph.D. Dual-Title) (p. 314)

Pharmacology (M.S.) — Applied Pharmacology and Environmental Xenobiotics

Admission Requirements
Admission to the Master of Science with a major in Pharmacology and concentration in Applied Pharmacology and Environmental Xenobiotics program is contingent upon admission to the Graduate School (p. 35). A bachelor's degree or equivalent is required, with a major in biological, chemical, physical, or computer science. An overall GPA of 3.0 is strongly preferred. Application requirements include transcripts from academic institutions attended, a statement of purpose, and three letters of recommendation. The Graduate Record Examination (GRE) is not required. International students must demonstrate proficiency in English as determined by satisfactory performance on the standardized TOEFL exam or other appropriate exams (this will be waived in the case of international students coming from countries offering their coursework in English).

Academic Scholarship
All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.

Program Requirements
Graduation requirements include the successful completion of 33-34 credits in the Applied Pharmacology and Environmental Xenobiotics program with a minimum overall grade point average of 3.00. Full-time students can readily complete all requirements for the program degree within 2 years. Some students (such as those currently employed) may choose to enroll on a part-time basis. In any case, all degree requirements must be completed within 6 years of commencing the program.

All incoming The Applied Pharmacology and Environmental Xenobiotics program students will be required to successfully complete online courses in Lab Biosafety, Communicating Research Findings, and Responsible Conduct of Research, as offered through the Collaborative Institutional Training Initiative (CITI) Program, followed by a Responsible
Plan B Curriculum (33 credits)

Plan A and Plan B options require submission of a Plan of Work developed in consultation with the Program Director during the first year. Plan A requires subsequent completion of a thesis based on original research, under the direction of an Advisor and two additional committee members are chosen from among PHC faculty members with Graduate Faculty status. Plan B requires completion of an Essay based on a scholarly review of the relevant literature, under the direction of an Advisor and two additional departmental committee members with Graduate Faculty status. The thesis or essay Advisor will be selected during the Winter semester of year 1. Students’ progress toward completion of their theses or essays will be monitored and certified by their committees twice-yearly. The Program Director will monitor academic progress in coursework relative to the Plan of Work.

**Plan A Curriculum (34 credits)**

**Pharmacology (Ph.D.)**

**Admission Requirements**

Admission is contingent upon admission to the Graduate School (p. 35) and the graduate programs of the School of Medicine (p. 296), respectively. Applicants to the graduate program of the Department of Pharmacology should have a background in one of the chemical or biological sciences. Students with diverse backgrounds will be considered individually if they have special competence related to one of the departmental areas of interest. Applicants are expected to provide scores from the Graduate Record Examination. A subject test is not required, but is helpful in making the admission decision. Personal interviews are recommended. Letters of inquiry should be directed to the Chair, Graduate Admissions Committee of the Department.

**Academic Scholarship**

All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.

**Program Requirements**

Ph.D. students in the graduate program in pharmacology enroll in the School of Medicine's Interdisciplinary Biomedical Sciences (IBS) curriculum during their first year. The IBS curriculum includes:

**Total Credits** 19

Pharmacology course requirements include: Pharmacology lecture (PHC 7010) (successful completion of this course will provide a waiver of two credits of Systems Biology coursework), participation in the journal club (PHC 7700) and seminar series (PHC 7890), and the selection of six advanced pharmacology minicourses (PHC 7650).

For each student in the program a unique plan is constructed to allow utilization of previous educational experience and individual interests, permitting the student to progress as rapidly as possible. The program consists of a small number of required courses, several
Molecular and Environmental Toxicology (Ph.D. Concentration)

The MET concentration fulfills the basic requirements for a Ph.D. in Pharmacology but also entails additional toxicology-related classroom and research experience. The disciplines of pharmacology and toxicology are highly intertwined. They require the same basic knowledge set; involve the study of the same biochemical, molecular and genetic processes; and use a similar vocabulary. However, the focus of the two disciplines is different, with pharmacology being concerned with the therapeutic effects of drugs and toxicology being concerned with the detrimental effects of chemicals and agents on biological processes. The term "environmental" is used in the concentration's title to convey the concentration's attention to the effects of environmental exposure on human health, as opposed to ecological/terrestrial effects. The overall goals of the MET concentration are to provide comprehensive instruction in modern-era molecular and cellular toxicology, and an appreciation of how such expertise can be used not only to study the mechanism of an agent's toxic effects, but also in an interdisciplinary fashion to study environmentally-linked disease. To achieve this goal, the MET concentration will offer interdisciplinary research opportunities and access to mentors who are dedicated to understanding the toxic effects of specific toxicants (environmental and therapeutic), as well as probing the complex effects of exposure to environmental stressors. Available research projects in the MET concentration will feature investigations examining the effects of environmental agents (e.g., urban air pollution, cigarette smoke, PCBs, lead, dioxin, and phthalates) on cellular and molecular processes involved in disease susceptibility and initiation and progression. MET scientists are studying intracellular signaling pathways, transcriptional regulation of gene expression, apoptosis, oxidative stress, DNA repair, epigenetic and genetic perturbations, and complex mechanisms in cell growth and differentiation that determine the environmental contribution to diseases with a rising incidence in the urban setting such as metabolic disease, cancer, immune system disturbances, and mental health disorders.

The MET concentration in the Department of Pharmacology Graduate Program emphasizes the use of contemporary approaches, such as advanced techniques in biochemistry, cell biology, molecular biology, molecular genomics, epigenetics, bioinformatics, proteomics, and epidemiology, in problems aimed at dissecting the mechanisms of environmentally-induced disease. In order to prepare for challenging careers in academics, industry, and government, students in the MET concentration are expected to seek access to research laboratories that conform to standards of excellence and are recognized by peers to be competitive in the environmental health sciences/molecular and cellular toxicology field. It is the goal of the MET concentration to prepare our students of today to serve as the leaders of tomorrow.

Molecular Neuropharmacology (Ph.D. Concentration)

The doctoral program in Pharmacology includes a concentration in molecular neuropharmacology. The focus of this concentration is to provide training in the molecular aspects of neuropharmacology, with an emphasis on molecular signaling and functional genomics. The Department recruits competitive, highly motivated graduate students for training in this unique and topical discipline.

Pharmacologists, by the very nature of their discipline, determine the response of individual cells, tissues and/or organisms to changes in the internal and external environment (including therapeutic agents) and are thus in increasing demand in the 'post-genomic' era. Neuropharmacologists are especially in demand, given both the need for current therapeutic drugs for CNS disorders and the rapid pace of discovery about basic neural mechanisms that shows much promise for therapeutic purposes. Biomedical scientists are now acutely aware that there is, in fact, not a single human genome but myriad genomes comprised of countless DNA deletions, insertions, and single nucleotide polymorphisms which change the substrate upon which environmental factors act and also modify the human response to therapeutic drugs. Neuropharmacology, in the post-genome era, thus encompasses both the effects of drugs on neural cell function as well as the influence of genetic variations (from SNPs to gene knockouts) on drug responses at the cellular and organismic level. In this context, the application of molecular and genetic tools provides critical insights into brain function and facilitates the development of novel therapeutics for brain dysfunction and tumors.

Pharmacology and Urban Sustainability (Ph.D. Dual-Title)

Students admitted to the Ph.D. program in Pharmacology can apply to earn a Ph.D. in Pharmacology with a dual-title in Urban Sustainability. This dual-title degree is designed to prepare researchers and professionals to solve challenging urban problems that require working across disciplines. Students enrolled in the dual-title program take courses that help develop knowledge and skills relating to urban sustainability. Students in the program also undertake activities such as community service, participate in colloquiums, and prepare a funding proposal related to urban sustainability. The dual-title coursework follows competencies outlined by the Transformative Research in Urban Sustainability training program.

Students in the dual-title program will obtain sufficient grounding in both pharmacology and urban sustainability through the coursework. The urban sustainability core consists of five courses, which are distributed across several departments. The pharmacology core includes: PHC 7410 Principles of Toxicology, at least ten credits of IBS courses, and pharmacology mini-courses and seminars. Students will also take at least two courses from a list of elective courses distributed across several departments. Both elective courses must be from a department other than the Department of Pharmacology.

In order to satisfy the elective requirement, the topic area must be relevant to the program. Students should consult with their advisor for details.

**Required and Elective Activities**

The following are the required activities for the dual-title degree:

1. Community service: Participate in two events per year or an equivalent commitment to citizen science, stewardship or outreach/education projects with community group partners.
2. Participate in Colloquium: Help develop and attend an annual series of talks given by visiting lecturers across disciplines.
3. Prepare a proposal to send to an external funding agency.

In addition, dual-title degree students will be strongly encouraged to undertake the following elective activities:

1. Participate in an internship in an applied setting with a partner organization in urban sustainability.
2. Produce a video documentary with their doctoral research team about the interdisciplinary sustainability problem their research is addressing, translating scientific content for a wider audience.
3. Participate in the WSU Research and Academic Development Seminar Series, which provides graduate training and career development workshops, to help prepare students to complete the required funding proposal and to envision perspectives to consider during documentary and publication preparation.
4. Produce a collaborative publication with a doctoral research team under the supervision of the doctoral advisor.
5. Develop a capstone seminar course in collaboration with other students, including from other departments, pursuing the Urban Sustainability dual-title degree that they will co-teach with the guidance of faculty. The capstone course will tie together and demonstrate the interconnected nature of urban sustainability topics and will be available to fellow dual-title degree students and other graduate and undergraduate students.
6. Include undergraduate students in data collection, data analysis, and report-writing, both to foster greater participation in later graduate studies by those students, and also to develop the mentoring skills of the doctoral students.
Physiology
Office: 5374 Scott Hall; 313-577-1520
Interim Chairperson: Gil C. Mor
http://physiology.med.wayne.edu (http://physiology.med.wayne.edu/)

Physiologists study the functions of living organisms, tissues and/or isolated cells. The emphasis in physiology is on the functional interrelationships between healthy, as opposed to diseased tissues, cells and sub-cellular components. Increasingly, the discipline focuses on the properties of single cells and their sub-cellular components with the availability and application of molecular biology techniques. However, whether at the level of the single cell or the whole organism, the aim of the physiologist is to understand complex functional interrelationships between body tissues.

The Department of Physiology offers programs leading to the Master of Science and Doctor of Philosophy degrees. The degree of Master of Science is frequently the first step toward a Ph.D. Students planning a career in teaching or research in physiology are advised to complete the requirements for the Doctor of Philosophy degree. A Reproductive Sciences Concentration is an option in the Doctor of Philosophy program. It incorporates the teaching, research and physical resources of both the Physiology and the Obstetrics and Gynecology Departments, offering interdisciplinary doctoral training in the reproductive sciences with the degree earned through the Department of Physiology.

- Physiology (M.S.) (p. 316)
- Physiology (Ph.D.) (p. 316)

Physiology (M.S.)

The mission of the M.S. program in the Department of Physiology is to provide an introduction to advanced training in physiology. Our goal is to train students to carry out advanced research in physiology and to develop problem solving and presentation skills in a wide variety of professional venues and to develop the necessary background to work in research, enter our Ph.D. program, or other professional program.

Admission to these programs is contingent upon admission to the Graduate School (p. 13) and the graduate programs of the School of Medicine (p. 296), respectively. In addition, applicants for the Doctor of Philosophy degree are normally expected to have a personal interview with one or more members of the Departmental Graduate Committee.

All course work must be completed in accordance with the regulations of the Graduate School and the School of Medicine governing graduate scholarship and degrees.

The master's degree is offered under Plan A (thesis) or Plan C (coursework). Under Plan A, applicants for the master's of science degree must complete a minimum of 30 credits beyond a bachelor's degree, of which eight credits must be thesis research credits (PSL 8999). For the remaining twenty-two credits, four must be from multidisciplinary courses other than Physiology (minor).

Under Plan C, applicants for the master's of science degree must complete a minimum of 30 credits of didactic coursework. Of the minimum of 30 required credits, four must be from multidisciplinary courses other than Physiology (minor).

Physiology (Ph.D.)

The mission of the Ph.D. program in the Department of Physiology is to provide an outstanding educational experience for future scientists, researchers, and academicians in one or more areas of cellular and organism system physiology or developmental biology and reproductive systems. By combining a contemporary curriculum with innovative research, our goal is to develop skilled investigators in the physiological sciences who, by utilizing their advanced problem solving and presentation skills, are qualified to succeed as educators, independent researchers, and as scientists in a wide variety of professional venues.

Admission to these programs is contingent upon admission to the Graduate School (p. 13) and the graduate programs of the School of Medicine (p. 296), respectively. In addition, applicants for the Doctor of Philosophy degree are normally expected to have a personal interview with one or more members of the Departmental Graduate Committee.

All course work must be completed in accordance with the regulations of the Graduate School and the School of Medicine governing graduate scholarship and degrees.

Applicants for the Doctor of Philosophy degree must complete a minimum of ninety credits beyond the bachelor’s degree, of which at least thirty credits must be in doctoral research and dissertation direction. For the remaining sixty credits, 3 courses must be physiology advanced courses (for the Reproductive Sciences concentration, a minimum of ten credits in required from the Physiology-Reproductive Sciences coursework) and six from multidisciplinary courses other than Physiology (minor). Ph.D. students holding IBS Fellowships are required to take additional credits from courses in the IBS curriculum (http://bulletins.wayne.edu/courses/ibs/). Remaining credits to obtain the required total are taken as electives in subjects pertinent to the student’s chosen field of research. Requirements of the Department of Physiology Graduate Program must also be satisfied.

Reproductive Sciences Concentration

Students pursuing this concentration are expected to follow the requirements of the Physiology Ph.D. Program but their curriculum is oriented around courses in the reproductive sciences taught primarily by Obstetrics and Gynecology graduate teaching faculty. Students taking the Reproductive Sciences concentration will select dissertation mentors from the Obstetrics and Gynecology graduate teaching faculty and perform their dissertation research in the basic science facilities of the Department of Obstetrics and Gynecology.

Public Health Programs

The graduate-level public health programs at Wayne State University are offered by the Department of Family Medicine and Public Health Sciences (p. 291) in the School of Medicine (p. 296).

Public health is the academic discipline that identifies, prevents and reduces community health problems. Public health takes a population-based approach that addresses health promotion, disease prevention, restoration and maintenance of health. The range and scope of the sciences and skills required in public health include epidemiology, biostatistics, research methodology, health services research, and behavioral sciences. Central to the approach of public health is a focus on community-level influences on health including social, economic, cultural, ethnic, and environmental factors. Public health research methods involve defining selected community problems, proposing studies and solutions, surveillance, evaluating progress, and monitoring the use of resources.

- Master of Public Health (M.P.H.) (p. 317)
- Medicine and Public Health (M.D./M.P.H. Joint Degree)
- Social Work and Public Health (M.S.W./M.P.H. Joint Degree) (p. 361)
- Public Health AGRADE (p. 318)
- Public Health (Bridge Graduate Certificate) (p. 319)

Public Health (M.P.H.)

The Master of Public Health (MPH) Program is located in the School of Medicine’s Department of Family Medicine & Public Health Sciences. The MPH degree is a graduate-level professional degree that prepares students for public health practice in communities, organizations, work sites, and in governmental, public, and non-profit settings. MPH graduates are prepared with leadership abilities to promote population health and safety, prevent chronic and infectious disease, and to develop policy and practice-based evidence through clinical and applied research. The interdisciplinary and community-engaged nature of public health practice is reinforced throughout education, research, and service activities.

Admission Requirements

Admission to the MPH Program is contingent upon admission to the Graduate School (https://bulletins.wayne.edu/graduate/general-information/admission/). (See also School of Medicine Graduate Program policies (https://bulletins.wayne.edu/graduate/school-medicine/programs/) Contact the MPH Program (http://www.familymedicine.med.wayne.edu/mph/) for specific admission requirements. Applications for the MPH program are considered for fall, winter and spring summer semesters. Note that only completed applications are reviewed.

Program Requirements

MPH students select a concentration, either the MPH in Public Health Practice (MPH-PHP) or the MPH in Population Health Analytics (MPH-PHA). Candidates for the MPH degree must complete 42 credits in graduate course work. As shown below, both concentrations require the foundation courses, a practicum, and a Master’s project. Additionally, all MPH students must complete concentration-specific courses. Finally, students select approved electives to complete the 42 credit requirement. All course work must be completed within six years in accordance with
the regulations of the Graduate School (http://bulletins.wayne.edu/graduate/general-information/academic-regulations/) and the School of Medicine (http://bulletins.wayne.edu/graduate/school-medicine/programs/) governing graduate scholarship and degrees.

### Public Health AGRADE

#### Public Health AGRADE Program

AGRADE provides qualifying Public Health students in the College of Liberal Arts and Sciences with an opportunity to pursue an accelerated pathway to the Master of Public Health (MPH) program in the School of Medicine. The MPH prepares students for a professional career at the intersection of public, clinical and/or other allied health sciences.

#### Application

Undergraduate students enrolled in the Public Health major or minor are eligible to apply for AGRADE status in the semester in which they expect to complete 90 credits and have completed the following four undergraduate courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PH 2100</td>
<td>Introduction to Public Health</td>
<td>3</td>
</tr>
<tr>
<td>PH 3100</td>
<td>Social and Behavioral Aspects of Public Health</td>
<td>3</td>
</tr>
<tr>
<td>PH 3200</td>
<td>Introduction to Biostatistics</td>
<td>4</td>
</tr>
<tr>
<td>PH 3300</td>
<td>Epidemiology</td>
<td>4</td>
</tr>
</tbody>
</table>

Applicants must have a 3.6 GPA or better in coursework for their Public Health major or minor, and a cumulative GPA of 3.5 or better. Students with a GPA of 3.3-3.49 will be considered on an individual basis.

Applications will be reviewed each semester. Applicants must submit a personal statement indicating their interest in the MPH program, their career goals, and the reasons why they are especially suited to join this accelerated track. Applicants must also submit two recommendation letters from faculty that address the student's capacity for graduate study.

The GRE may be waived based on satisfactory performance in the AGRADE courses (at least a B grade in each AGRADE class). Acceptance to the BSPH-MPH AGRADE program is competitive. The MPH program admissions committee reviews all AGRADE applicant applications and makes decisions about admission to this accelerated track.

#### Requirements

Upon admission, students may elect 3-15 credits in approved graduate M.P.H. courses. These graduate level courses will complete elective bachelor's degree requirements as well as fulfill the beginning of study toward the master's degree.

<td>3</td>
</tr>
</tbody>
</table>

The bachelor's degree will be awarded following the completion of the undergraduate degree requirements. Graduate course work taken in this program must be completed within eight years (from the time that the first graduate course is taken that is counted toward degree requirements) or within six years from the awarding of the bachelor's degree, whichever comes first.

For more information, contact the Public Health undergraduate academic advisors (https://clas.wayne.edu/public-health/advising/) and consult the AGRADE FAQs (https://clas.wayne.edu/public-health/programs/agrade/).

#### Academic Progression Policies

**MPH Grade Policies**

**Required Courses:** Students must earn a B grade or better in all required courses. Grades of B- or lower are unacceptable. Students who receive a B- or lower grade in any required course must repeat the course and receive a B or better grade. Students are not eligible to take courses requiring the failed course as a prerequisite, or earn hours towards the Master’s Project or Thesis until the course deficiency is satisfied.

**Elective Courses:** Students who receive a B- or lower grade in an elective course will be allowed to balance the grade with subsequent grades to maintain a cumulative GPA of 3.0.

**Grade Point Average Requirement:** Students must maintain an overall minimum 3.00 GPA to remain in good standing. Grades below a B are not acceptable at the graduate level. Students who receive a B- or lower in a course will be asked to meet with their advisor to ensure that they are aware of Graduate School requirements and to determine remedial action.

**Course Repeat Policy:** Only two attempts to complete a required course will be permitted. Two unsuccessful attempts to complete a required course will result in termination from the program. The most recent grade for a repeated course is used in computing the grade point average and awarding credit hours for a degree. All attempts to take a course are recorded on a student’s transcript.
Public Health (Bridge Graduate Certificate)

The Bridge Graduate Certificate in Public Health Practice (BGC-PH) provides specialized training for individuals of varying backgrounds and experience who are committed to working in a public health related field. The BGC-PH provides a valuable foundation of core public health knowledge in epidemiology, biostatistics, environmental health, and the social basis of health.

Admission Requirements

Admission to the BGC-PH is contingent upon admission to the Graduate School (p. 35). (See also School of Medicine Graduate Program policies (p. 296)). Contact the MPH Program (http://www.familymedicine.med.wayne.edu/mph/) for specific admission requirements. BGC-PH applications are considered for fall, winter, and spring-summer semesters. Students may enroll in the certificate program concurrently with a regular graduate degree program (e.g. M.S., M.A., or Ph.D.).

Program Requirements

BGC-PH candidates must complete a minimum of 15 credits of course work. All course work must be completed within three years in accordance with the regulations of the Graduate School (http://bulletins.wayne.edu/graduate/general-information/academic-regulations/) and the School of Medicine (http://bulletins.wayne.edu/graduate/school-medicine/programs/) governing graduate scholarship and degrees.

Electives 3

Total Credits 15

Translational Neuroscience (Ph.D.)

Program Director: Jeffrey A. Stanley, Ph.D.
Office: Tolan Park Medical Building, Suite S-5, 3901 Chrysler Service Drive

The primary mission of the Translational Neuroscience Program (TNP) is to foster a new generation of neuroscientists trained in interdisciplinary science that focuses on improving the health and care of individuals affected by psychiatric or neurological disorders, or injuries to the nervous system through an understanding of disease mechanisms. The didactic curriculum encompasses an integrated syllabus of basic science, pre-clinical research, and clinical neurobiology, including cutting-edge neuroimaging technologies. The strength of the program is its interdisciplinary training faculty, which includes leading experts in brain disorders, diseases and injuries, pre-clinical animal research, transgenic and knockout models, substance abuse, neuropharmacological treatments, brain network and computational modeling, and brain development and aging.

The TNP is housed in the Department of Psychiatry & Behavioral Neurosciences (p. 294), but is comprised of over 40 faculty members from 18 different departments spanning 4 colleges and schools within Wayne State University (WSU). The collaborative and interdisciplinary nature of the TNP program aligns well with the University’s mission and strategic plan. Moreover, applications for graduate training in the neurosciences has quadrupled in the past 25 years making neuroscience research one of the most rapidly developing branches of medical research. The TNP program is fully committed in training basic and clinical neuroscientists who will be driving innovations that impact public health.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35) and satisfaction of the admission requirements the School of Medicine (p. 296). Applicants must have an undergraduate degree including several courses in basic sciences such as biology and chemistry. Three letters of recommendation are required from individuals able to judge the applicant’s scientific potential. A one-page statement of purpose for applying in the translational neuroscience program, a Curriculum Vitae (CV) that summarizes academic and research experiences, minimum grade point average of 3.0 (on a 4.0 scale), the Graduate Record Examination (GRE), and an interview with a Graduate Officer or designated representative from the Steering Committee are required. Writing samples including conference abstracts and presentations, or publications, are optional. Foreign students must be proficient in English as determined by satisfactory performance on the standardized TOEFL English proficiency examination. An interview with potential graduate faculty mentor(s) is also desirable.

Program Requirements

Students in the doctoral program are required to complete a minimum of ninety credits beyond the baccalaureate degree. Required courses include the following:

<table>

Advanced Topic Courses

12 credits minimum and 24 credits maximum encompassing neuroscience principles and methods, and the applications to nervous system disorders (starts in year 2)

Students are required to seek advice from a graduate advisor on his/her course selection. All course work must be completed in accordance with the regulations of the Graduate School (p. 38) and the School of Medicine (p. 296) governing graduate scholarship and degrees.
College of Nursing

Dean: Laurie Lauzon Clabo

The Wayne State University College of Nursing is regionally, nationally, and internationally recognized for educating graduate and undergraduate students as practitioners and scholars in the nursing profession. The College is committed to research and scholarly activity that contributes to the discipline of nursing and excels in the development, application, and dissemination of such knowledge to promote human health and well-being.

Nursing is an academic discipline and a profession. As a discipline, nursing develops knowledge concerning human beings, their care, health, and the environment. Concepts derived from such research order the discipline and profession of nursing as well as give identity to nursing practice and direct inquiry and theory development. As a profession, nursing creatively uses knowledge in response to the health care needs of the local and global society. Both of these functions are enhanced by the scholarly environment of the University and its multicultural urban setting as a context for professional nursing practice.

Consistent with this view of the nursing profession, the College supports the importance of liberal arts, humanities, and the sciences in nursing education. The faculty believes that programs designed for the preparation of nurses must be composed of the intellectual, social, cultural, and technical components of liberal and professional education that are available to students within an institution of higher learning. The faculty also affirms the necessity and value of clinical practice within a professional nursing program. Experience within a variety of clinical and vulnerable populations is one of the primary modes for the development of nursing practice competencies.

Learners from diverse backgrounds enter the College to begin or continue their education and thereby add to the richness of this learning environment. The faculty supports the right of students to question, challenge and debate within the context of inquiry as an essential ingredient to their development. Continuing evaluation on the part of the students and the faculty is essential to advancing nursing knowledge and sustaining the integrity of the program.

The faculty of the College of Nursing, as members of the academic community, recognizes that its professional functions extend beyond contributions to formal teaching. Research, practice, and community service are important expectations of the faculty. The faculty views as essential, academic freedom, shared governance, opportunity to develop knowledge, and responsibility to incorporate new knowledge into teaching and nursing practice. The faculty assumes responsibility for enhancing the image of the College of Nursing and the University locally, nationally, and internationally through various avenues including research, scholarship, practice, consultation, and participatory decision-making.

Accreditation

The baccalaureate program is approved by the Michigan State Board of Nursing, and graduates are admitted to the licensing examination for professional nurses in the State of Michigan. The baccalaureate, master’s, and Doctor of Nursing Practice (DNP) programs of the College are accredited by the Commission on Collegiate Nursing Education (CCNE). The graduate nurse-midwife major is also accredited by the Accreditation Commission for Midwifery Education (ACME), (formerly ACNM Division of Accreditation).
Academic Regulations for the College of Nursing

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 38) section of this bulletin. For additional College of Nursing (CON) regulations, students should consult the CON Program Handbooks. The following additions and amendments pertain to the College of Nursing.

Registration

Each student is required at the beginning of each semester to register according to the procedure and schedule published in the official University Schedule of Classes (http://classschedule.wayne.edu/). Registration must be completed before the student may attend classes. For registration dates, the student should consult the schedule of classes. A minimum of eight credits in graduate courses is required for a full-time load for graduate students. Some courses require approval of the faculty of record and the College Graduate Officer.

Professional Licensure and Liability Insurance

Graduate students must be registered to practice nursing in Michigan and have professional liability and malpractice insurance before registering for clinical and practicum courses. Students must submit a valid Michigan RN license by the end of the second semester of the program or they will not progress. The College offers a blanket school malpractice policy with a minimum amount of liability insurance of $1,000,000/$3,000,000. Each student is expected to pay $10.29 per academic year for the malpractice insurance policy coverage by the posted semester deadline dates prior to the start of clinical and practicum course work. Students in the Nurse-Midwifery major must secure individual malpractice insurance, consult with the Office of Student Affairs for information. A valid Michigan RN license and Liability insurance are required for a valid clinical permit.

Health Requirements for a Clinical Permit

A valid clinical permit must be on file in the Office of Student Affairs by the semester deadline dates prior to clinical and practicum courses. All students must have an admission physical examination and history and must comply with requirements for a Basic Cardiac Life Support (BCLS) course and present a standard immunization profile with a Tuberculin Skin (TB) test or quantiferon testing, proof of Rubella, Mumps, Rubeola, and Chicken Pox immunity, and the complete series of inoculations against Hepatitis B virus, and TDAP. A Urine Drug Screen Testing and a criminal background investigation are also required. Some majors require Advanced Cardiac Life Support Certification (ACLS).

Students who have met all of the Health Clearance Requirements will be issued a Clinical Permit. Students who do not have a Clinical Permit issued by the College of Nursing Office of Student Affairs will not be allowed into the clinical or practicum setting. Clinical Permits will be issued once each semester prior to the start of the semester. The deadline dates are August 15 (Fall), December 15 (Winter), and April 15 (Spring/Summer).

Master’s, Graduate Certificate, and Doctoral Academic Regulations (Scholarship and Progression)

The graduate grading system is intended to reflect high standards of scholarship. The policies for academic progression for graduate students are listed below.

1. A student must earn an overall grade point average of 3.0 or better to be awarded the M.S.N. degree.
2. A student achieving less than a 3.0 g.p.a. at any point in the program must achieve a g.p.a. of 3.0 or better within one semester. If there is evidence that the goal of a 3.0 g.p.a. is not achievable, the student will be excluded from the program.
3. A student may petition to repeat a graduate course once in which a grade lower than 3.0 is received. No more than two courses may be repeated.
4. A student may be excluded from the College of Nursing for unsafe and/or unethical conduct in the program without having been previously warned.
5. Students must be enrolled each academic year while in the graduate programs.
   a. Students who fail to enroll in Fall and Winter semesters of a given academic year will be considered not in good standing.
   b. Students who fail to enroll in Fall and Winter semesters of a given academic year will be subject to exclusion from the program.
6. Graduate students have a time limit to complete all requirements for the degree. The period begins with the end of the semester during which the student has taken work which applies toward meeting the requirements of the degree.
   a. MSN students have a six-year time limit.
   b. Graduate Certificate students have a three-year time limit.
   c. Doctoral students have a seven-year time limit.

Student Rights and Responsibilities

Continuance in the College is contingent upon compliance with official rules, regulations, requirements, and procedures of the University and the College of Nursing. The student is responsible for reading the contents of this bulletin pertinent to the College of Nursing and otherwise becoming informed of and fulfilling all course and degree requirements in proper sequence with satisfactory scholarship. In case of doubt regarding any matter affecting his or her standing as a student, the student should consult with an academic advisor. The faculty reserves the right to amend or revise the policies and requirements set forth in the College of Nursing section of this bulletin.
Graduate Programs

* Nursing (M.S.N.) (p. 323)
* Nursing (D.N.P.) (p. 326)
* Nursing (Ph.D.) (p. 328)
* Nursing & Infant Mental Health (D.N.P. or Ph.D. dual-title) (p. 330)

Nursing (M.S.N.)

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Additionally, students must satisfy the following criteria mandated by the College:

1. The applicant must have completed an Accreditation Commission for Education in Nursing (ACEN) or Commission on Collegiate Nursing Education (CCNE) accredited baccalaureate program in nursing with a grade point average (g.p.a.) of 3.0.

2. Possession of a current Michigan Registered Nurse Licensure. All applicants educated outside the U.S. must be certified by the Commission on Graduates of Foreign Nursing Schools (CGFNS). Contact CGFNS (http://www.cgfns.org/), 3600 Market St., Philadelphia PA 19104-2651 to request a certification application, or call: 215-222-8454. Verification of a student's CGFNS certification must be forwarded to the State of Michigan Board of Nursing by the CGFNS in order to take the RN licensure examination.

3. A personal goal statement.

4. Two letters of recommendation.

5. Resume.

6. Official transcripts from all postsecondary institutions.

7. Test of English as a Foreign Language (TOEFL) when required.

8. An interview with a faculty member may be requested.

There may be additional requirements in each of the specialty clinical major areas. Please refer to the major program and consult with a clinical specialty coordinator for specific requirements.

Application

All new applicants must submit an application for graduate admission. Applications, including all supporting documentation, must be received in the appropriate offices by the posted deadline dates. Deadline dates for submission of application materials vary by semester (please refer to the College of Nursing website (https://nursing.wayne.edu/) for more information). Informational meetings are held monthly and applicants are encouraged to attend before completing the application. The schedule is listed on the College of Nursing website under the Admissions tab, then Information Meetings.

Admission Decisions

Admission decisions are based upon all materials submitted and reflect careful consideration of the applicant’s professional goals, interview and the resources of the College of Nursing. Even if an applicant meets all minimum requirements, admission may not be granted because of

1. unavailable program space and/or
2. inadequate College resources relevant to the applicant’s specific interest.

Deadlines

- **Fall**: May 15
- **Winter**: November 15

Readmission

The master’s student who withdraws from the program in good standing should contact the Office of Student Affairs one semester prior to the semester for which re-enrollment is desired. Following a review by the Director of Advanced Practice and Graduate Certificate Programs, the M.S.N. Committee and the Office for Academic and Clinical Affairs, the student will be informed of the steps required for readmission.

Revalidation of Credit: The M.S.N. committee reserves the right of revalidation of over-age (10 years) credits. Credits earned at other institutions may require revalidation at the time of Wayne State admission. In revalidation cases, the advisor and the student must set a terminal date for completion of all degree requirements, including such additional requirements as may be prescribed to revalidate the over-age credits.

Program Overview

Candidates for the Master of Science in Nursing (M.S.N.) must complete thirty-seven to fifty-two credits of study. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 322) and the Graduate School (p. 38) governing graduate scholarship and degrees. Credits must be normally distributed as follows:

- Clinical or Practicum Nursing Sequence: Cr. 18-24
- Supporting Courses: Cr. 6-11
- Master’s Core Courses: Cr. 13

All M.S.N. programs require the election of a particular major. Majors currently available to satisfy these requirements are detailed below. Supporting courses, which are clinically specific, are predetermined by selection of the clinical (or non-clinical) nursing sequence and will be found as part of the major areas of study. Students should inquire about possible additional offerings. All programs are subject to periodic revision.

All M.S.N. students must elect a series of courses that will prepare him/her to be competent in the utilization of research findings in practice. To develop these skills, the student completes courses in evidence-based nursing and/or biostatistics and epidemiology.

Plan of Work: With the approval of the advisor, the student and advisor develop and file a Plan of Work prior to completion of twelve graduate credits at Wayne State University. A student must have a minimum 3.0 grade point average in order to have a Plan of Work accepted by the Graduate Officer. Each Plan must include the course requirements for the clinical (and non-clinical) nursing sequence and intended degree. It is the responsibility of the student to meet with his/her advisor to file any changes in the Plan of Work.

Time Limitations: Students have six years to complete requirements. The six-year limit begins from the end of the semester during which the student has taken course work applicable toward meeting the requirements of the degree; this may occur before the student is regularly admitted to the major.

Required Clinical Experience Prior to APRN Clinical Courses: Several specialties require RN staff nurse experience in that specialty population prior to the start of the three sequential clinical courses after NUR 7030. Failure to complete this requirement may result in a delay in progression.

1. NNP - the equivalent of two full-time years of RN experience in a Level III or higher NICU;
2. PNP (Acute and Primary) - the equivalent of one full-time year of pediatric experience;
3. PMH - the equivalent of one-year of experience in a psych-mental health setting

M.S.N. Major: Advanced Public Health Nursing

(Minimum of thirty-three credits required)

The Master of Science in Nursing degree in Advanced Public Health Nursing (APHN) prepares nurses for advanced care of populations and communities. The APHN promotes the health and well-being of populations and communities. Improving the health of populations and communities is addressed through community assessment, program planning and implementation, leadership strategies, health policy development, and program evaluation. Community partnerships and collaborations are emphasized throughout the curriculum. The goal of this program is to prepare nurses who meet the APHN core competencies in education, practice, leadership, and research. The program sees the APHN as the voice for public health nursing.

M.S.N. Major: Neonatal Nurse Practitioner

(Minimum of forty-seven credits required)

The Master of Science in Nursing degree with a major in Neonatal Nurse Practitioner (NNP) prepares nurses for advanced practice in the care of high risk neonates. The curriculum combines both broad foundational knowledge essential for the care of neonates as a vulnerable population, as well as specialty knowledge in high-risk neonatal care. Attention is given to health promotion, prevention of disease and disability, disease process, clinical management, and family-centered care. The goal of this innovative program is to prepare advanced practice nurses who will promote the health and development of children and adolescents as individuals and as population groups encountering changing healthcare systems within urban and global environments. Graduates of the PNP-AC program are prepared to provide expert clinical care to meet the specialized physiological and psychological needs of children and adolescents with complex acute, critical, and chronic health conditions and/or urgent, emergent, and life-threatening conditions. The curriculum combines both broad foundational knowledge essential for the care of children as a vulnerable population, as well as specialty knowledge in pediatrics. Attention is given to health promotion, prevention of disease and disability, disease process, treatment, clinical management, and family-centered care provided in a variety of acute and critical care settings including hospitals, intensive care units, emergency departments, and clinics. Upon program completion, students are eligible to take a certification examination through the Pediatric Nursing Certification Board (PNCB).

M.S.N. Major: Pediatric Nurse Practitioner-Acute Care

(Minimum of forty-seven credits required)

The Master of Science in Nursing with a Pediatric Nurse Practitioner–Acute Care specialty prepares nurses for advanced practice in the care of acutely and critically ill children and adolescents. The goal of this innovative program is to prepare advanced practice nurses who will promote the health and development of children and adolescents as individuals and as population groups encountering changing healthcare systems within urban and global environments. Graduates of the PNP-AC program are prepared to provide expert clinical care to meet the specialized physiological and psychological needs of children and adolescents with complex acute, critical, and chronic health conditions and/or urgent, emergent, and life-threatening conditions. The curriculum combines both broad foundational knowledge essential for the care of children as a vulnerable population, as well as specialty knowledge in pediatrics. Attention is given to health promotion, prevention of disease and disability, disease process, treatment, clinical management, and family-centered care provided in a variety of acute and critical care settings including hospitals, intensive care units, emergency departments, and clinics. Upon program completion, students are eligible to take a certification examination through the Pediatric Nursing Certification Board (PNCB).

M.S.N. Major: Pediatric Nurse Practitioner-Primary Care

(Minimum of forty-seven credits required)
The Master of Science in Nursing with a Pediatric Nurse Practitioner–Primary Care specialty prepares nurses for advanced practice in the care of children and adolescents. The goal of this innovative program is to prepare advanced practice nurses who will promote the health and development of children and adolescents as individuals and as population groups encountering changing healthcare systems within urban and global environments. Graduates of the PNP-PC program are prepared to provide pediatric primary healthcare including health maintenance, anticipatory guidance, well-child examinations, developmental screening, and diagnosing and managing common and complex health/illness conditions. The curriculum combines both broad foundational knowledge essential for the care of children as a vulnerable population, as well as specialty knowledge in pediatrics. Attention is given to health promotion, prevention of disease and disability, treatment, clinical management, and family-centered care in a variety of settings including primary care clinics, specialty clinics, and community environments. Upon program completion, students are eligible to take a certification examination through the Pediatric Nursing Certification Board (PNCB).

**M.S.N. Major: Psychiatric Mental Health Nurse Practitioner**

*Minimum of fifty-two credits required*

All students in the Psychiatric and Mental Health Nurse Practitioner (PMHNP) major gain knowledge in biological, neurological, pharmacological, and physiological domains that prepare them to conduct comprehensive assessments and utilize a range of psychological interventions. The PMHNP clinical nursing course sequence focuses on: Psychiatric assessment, triage, and crisis intervention; Biopsychological models of mental health and illness; theory and practice with individual interest (e.g., addictions, eating and sleep disorders, gender issues, HIV/AIDS, major psychiatric illnesses, violence) and with clinical populations of interest. Upon program completion, graduates are eligible to take the American Nurse Credentialing Center (ANCC) Psychiatric-Mental Health Nurse Practitioner certification exam.
Nursing (D.N.P.)

The Doctor of Nursing Practice (D.N.P.) program was established in 2008 for registered nurses seeking advanced education for leadership in clinical positions, health policy development, evaluation and application of patient care research, and systemic efforts in health promotion and risk reduction. Through this program, students are prepared to use clinical research to improve and transform health care.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, applicants must comply with the following:

Applicants must have earned a bachelor’s or master’s degree in nursing from an Accreditation Commission for Education in Nursing (ACEN) or Commission on Collegiate Nursing Education (CCNE) accredited institution. They must have a minimum grade point average of 3.0 in the most recent nursing program. International students must meet University and College English language requirements and satisfy all WSU and State Board of Nursing requirements for nurses practicing in Michigan. Two letters of recommendation (one reference from a doctoral-prepared individual is preferred), a professional goal statement, a resume, and transcripts from all postsecondary institutions are also required. All qualified applicants will be interviewed.

Registered Nurse Licensure: Applicants must obtain current Michigan Registered Nurse Licensure by the end of the second semester of the program. All applicants educated outside the U.S. must be certified by the Commission on Graduates of Foreign Nursing Schools (CGFNS). Verification of a student’s CGFNS certification must be forwarded to the State of Michigan Board of Nursing by the CGFNS in order to take the RN licensure examination, NCLLEX. Post-masters nursing students must be certified by a nationally recognized body in their area of specialization.

There may be additional requirements in each of the specialty clinical major areas. Please refer to the major program and consult with a clinical specialty coordinator for specific requirements.

Application: The D.N.P Program admits students every Fall semester. The final deadline is May 15. Informational meetings are held monthly and applicants are encouraged to attend before completing the application. The schedule is listed on the College of Nursing website (http://www.nursing.wayne.edu/) under the Admissions tab, then Information Meetings.

Admission decisions are based upon all materials submitted and reflect careful consideration of the applicant’s professional goals, DNP Project interests, interview and the resources of the College of Nursing. Even if an applicant meets all minimum requirements, admission may not be granted because of

1. unavailable program space and/or
2. inadequate College resources relevant to the applicant’s specific interest.

A graduate level statistics course must be completed in the first semester of the program.

Students must successfully complete the first semester NUR 8620 Foundations course in order to progress in the D.N.P program.

Readmission The D.N.P student who withdraws from the program in good standing should contact the Office of Student Affairs one semester prior to the semester for which re-enrollment is desired. Following a review by the Director of Advanced Practice and Graduate Certificate Programs, the D.N.P Committee and the Office for Academic and Clinical Affairs, the student will be informed of the steps required for readmission.

Revalidation of Credit: The DNP committee reserves the right of revalidation of over-age (10 years) credits. Credits earned at other institutions may require revalidation at the time of WSU admission. In revalidation cases, the advisor and the student must set a terminal date for completion of all degree requirements, including such additional requirements as may be prescribed to revalidate the over-age credits.

All course work must be completed in accordance with the academic procedures of the College of Nursing and the Graduate School governing graduate scholarship and degrees.

The D.N.P. program must include a minimum of thirty credits (excluding the DNP Project) of graduate coursework completed in residence at Wayne State University. Neither courses numbered in the 9000s nor classes elected as “visitor” may be used to fulfill this requirement. Early in the program the student, in consultation with the academic advisor, plans a sequence of courses. This Plan of Work is approved by the academic advisor and the Director of Advanced Practice and Graduate Certificate Programs. It is the responsibility of the student to file any changes in the Plan of Work. Preliminary Examination must be applied for and approved following completion of the coursework requirements. Students will be expected to take preliminary examinations to demonstrate their knowledge of each primary field and all supporting fields. Students must pass these examinations.

Time Limitation: Students in all paths have a seven-year time limit to complete all requirements for the D.N.P. degree. The seven-year period begins with the end of the semester during which the student was admitted to doctoral study and was taking work toward meeting the requirements for degree. Students whose seven-year time limit has expired may be considered for an extension, provided that the Preliminary Examinations have been successfully completed. Subsequent extensions will not be considered in the absence of substantial progress during the previous year.

Required Clinical Experience Prior to APRN Clinical Courses: Several specialties require RN staff nurse experience in that specialty population prior to the start of the three sequential clinical courses after NUR 7030. Failure to complete this requirement may result in a delay in progression.

1. NNP - the equivalent of two full-time years of RN experience in a Level III or higher NICU;
2. PNP (Acute and Primary) - the equivalent of one full-time year of pediatric experience;
3. PMH - the equivalent of one-year of experience in a psych-mental health setting.

There are three curricular paths for students to complete the requirements for the Doctor of Nursing Practice. These options are oriented to the applicant’s educational level at the time of admission and professional career goals. One path is for students entering the program post-B.S.N., and two paths for those entering post-M.S.N. Full-time and part-time study options are available. Students in path I and path III have several clinical specialty options:

• Family Nurse Practitioner
• Adult-Gerontology Acute Care Nurse Practitioner
• Adult-Gerontology Primary Care Nurse Practitioner
• Psychiatric-Mental Health Nurse Practitioner
• Neonatal Nurse Practitioner
• Pediatric Nurse Practitioner-Acute Care
• Pediatric Nurse Practitioner-Primary Care
Path I: Post-B.S.N. Clinical Leading to the A.P.R.N. Specialty and the D.N.P. (Total Credits: 78-83)

Nursing (Ph.D.)
Established in 1975, the Doctor of Philosophy (Ph.D.) in Nursing program is designed to prepare researchers and scholars to provide leadership to the profession and discipline of nursing. The program emphasizes the development of the student's capacity to make significant, original contributions to nursing knowledge. The understanding that nursing provides services that help individuals, families, and communities achieve health drives the Ph.D. program. These services are based on systematic knowledge about human health and human-environment relationships. Particular attention is given to the kinds of human-environment relationships that are optimal for health. This systematic knowledge base is the foundation of nursing science.

Admission Requirements
Prospective students are encouraged to attend Informational Meetings (https://nursing.wayne.edu/admissions/info-meetings/) prior to application.

1. Admission to this program is contingent upon admission to the Graduate School (p. 35). In addition, applicants must comply with the following:

2. Application: All new applicants must submit the graduate student application.
   a. The application is available through the Graduate School and the College of Nursing (https://nursing.wayne.edu/admissions/phd/).
   b. Admission decisions are based upon all materials submitted and a personal interview with potential faculty mentors. Decisions reflect careful consideration of the applicant’s professional goals, research interests, and the resources of the College of Nursing. Although an applicant may meet all minimum requirements, admission may not be granted because of 1) unavailable program space, and/or 2) inadequate College resources relevant to the applicant’s specific area of research interest. Admission decisions will be made after all required materials have been received.

3. Nursing Degree: Applicants must have earned a bachelor’s or master’s degree in nursing or the equivalent from a National League for Nursing (NLN) or Commission on Collegiate Nursing Education (CCNE) accredited institution. International applicants must have earned an equivalent degree.

4. Grade Point Average: It is recommended that applicants who have a master’s degree have a 3.0 (on a 4.0 scale) graduate GPA, based on at least twelve credits of graduate level course work; and applicants who have a bachelor’s degree have a minimum 3.0 GPA in upper division undergraduate course work (the last sixty credits).

5. Graduate Record Examination (GRE): The GRE is not required.

6. References: Submit two letters of recommendation from nurse faculty, nurse researchers, and/or other professional colleagues (preferably at the doctoral-prepared level) who can evaluate the applicant’s scholarship and aptitude for research.

7. Resume: Resume or Curriculum Vita that includes education, work and/or research experience, publications, certifications, licenses, grants, professional affiliations, awards, honors, presentations, and/or courses taught.

8. Personal Goals Statement: Write a brief statement that describes motivation for doctoral study, career goals, potential focus of research and how that research interest may fit with one or more of the research orientations of the faculty in the College of Nursing. To determine a potential fit of research interests with faculty research programs, applicants are encouraged to view faculty interests in the Faculty Programs of Research (https://nursing.wayne.edu/
research/). One or two faculty whose research is aligned with the students should be included in the Goals Statement.

9. **Interviews:** Applicant interviews are required and will be scheduled after receipt of the College of Nursing application, goals statement and curriculum vita.

**Admission Deadline:** August 1

**Readmission:** Students who are inactive and desire readmission must submit a written request to the Director of the Ph.D. Program of the College of Nursing, four months prior to the semester in which they wish to register. The readmission decision is based on recommendation of the Ph.D. Program Committee and the Graduate School.

Candidates for the Doctor of Philosophy in Nursing must complete a minimum of ninety-one graduate credits beyond the baccalaureate degree including a thirty-credit dissertation. The thirty-credit dissertation registration requirement is fulfilled by registering in the courses NUR 9991, NUR 9992, NUR 9993, and NUR 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters. Students are also expected to attend a minimum of two semesters of Dissertation Colloquia during the dissertation credits. All course work must be completed in accordance with the academic procedures of the College and the Graduate School governing graduate scholarship and degrees.

**7000-Level Courses:** The Ph.D. program must include thirty credits, excluding dissertation direction, in courses numbered 7000 or above.

**Plan of Work:** Early in his/her program the doctoral student, with the assistance of his/her academic advisor plans a sequence of studies, the Interim Plan of Work. The Final Plan of Work, approved by the academic advisor and the PhD Program Director, College of Nursing, should be filed before the student has completed forty graduate credits (including transfer credits). Petition for Transfer of Credits and annual reviews should be submitted with the Plan of Work. It is the responsibility of the student to file the Plan of Work any changes in the Plan of Work.

**Residency:** The Ph.D. requirement of one year of residence is met by completion of six graduate credits in course work (not dissertation) over two successive semesters (Spring/Summer Semester may be excluded).

**Qualifying Examinations** must be applied for following completion of at least 50 credits of graduate level courses, including domain and methods as stated on the student’s approved Plan of Work.

**Candidacy:** The final Qualifying examination must be passed, and the Dissertation Committee approved to establish candidacy. MSN to PhD students must complete two semesters of the Research Residency and BSN to PhD students must complete one semester of the Research Residency and the 2-semester Pilot study before defending their proposal. The Teaching Residency must be completed prior to graduation.

**Time Limitations:** Students in all paths have a seven year time limit to complete all requirements for the Ph.D. degree. The seven-year period begins with the end of the semester during which the student was admitted to doctoral study and was taking work toward meeting the requirements for the degree. Students whose seven-year time limit has expired may be considered for an extension, provided that the Qualifying Examination is passed and the Dissertation Proposal has been successfully defended. Subsequent extensions will not be considered in the absence of substantial progress during the previous year.

**Postdoctoral Study**

The purpose of postdoctoral study is to develop scientists capable of sustaining independent research within the theoretical perspective of nursing science. Opportunities are available for postdoctoral study on an individual basis in relation to the specific interest of the applicant, and to the availability of expert faculty mentorship. Interested students should contact the Ph.D. Program Director at 313-577-0359.

**Ph.D. Curricular Options**

The faculty of the College of Nursing has developed three curricular paths for students to accomplish the requirements for the Ph.D. in Nursing. These paths offer options to applicants based on their present educational level and professional career goal: one path for students entering the program post-B.S.N., one for those entering post-M.S.N, and one is for those entering post-DNP. Full-time and part-time study options are available, fall, winter, spring and summer.

Students are advised to keep themselves informed of these requirements so that scheduling their courses will be consistent with prerequisite sequencing.

Nursing and Infant Mental Health (D.N.P. or Ph.D. Dual-Title)

Students in the Ph.D. or D.N.P. programs in Nursing can apply to earn a Ph.D. in Nursing or a D.N.P. with a dual-title in Infant Mental Health (IMH). This dual-title degree is designed to prepare nurses to support early social and emotional development in a variety of contexts in which parents or children suffer from developmental disabilities, health problems, or mental health problems. The program also prepares nurses to conduct research related to infant mental health. Students take courses in infant development and assessment, and develop specific skills related to infant mental health assessment and treatment. The dual-title coursework follows competencies outlined by the Michigan Association for Infant Mental Health that are required for endorsement as an infant mental health specialist or an infant mental health mentor.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School. Students should indicate on their application to the Nursing program their desire to earn an infant mental health dual-title. Students may also contact the IMH program director, Ann Stacks, any time prior to the completion of their qualifying/preliminary examination to enroll in the program.

Program Requirements

In addition to D.N.P. (p. 326) or Ph.D. requirements (p. 328), students are required to complete at least 12 credits of infant mental health coursework, 9 credits of which can count toward their nursing degree. Both D.N.P. and Ph.D. students are required to take a 2 credit course in infant mental health (SW 7025), and select one (D.N.P.) or two (Ph.D.) IMH courses from a list of SW and PSY courses. Students must earn at least a 3.0 g.p.a. in their courses. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 322) and the Graduate School (p. 38) governing graduate scholarship and degrees.

Total Credits 12

Ph.D. students must also complete a qualifying examination and a Doctoral Dissertation related to infant mental health. An IMH faculty member must be a member of the student’s dissertation committee.

Nursing Graduate Certificates

- Adult Gerontology Nurse Practitioner Acute Care (Graduate Certificate) (p. 331)
- Nursing Education (Graduate Certificate) (p. 332)
- Pediatric Nurse Practitioner Acute Care (Graduate Certificate) (p. 332)
- Pediatric Nurse Practitioner Primary Care (Graduate Certificate) (p. 332)
- Psychiatric Mental Health Nurse Practitioner (Graduate Certificate) (p. 333)

Adult Gerontology Nurse Practitioner Acute Care (Graduate Certificate)

This Graduate Certificate Program will allow certified advanced practice registered nurses, who have graduated with a clinical MSN or DNP, to acquire the nationally-specified adult-gerontology acute care content and clinical skills needed to take the national adult-gerontology acute care certification exam and then to function competently within the adult-gerontology acute care scope of practice. It will require satisfactory completion of 18 credits of didactic content and clinical placement. The certificate provides nurses with essential knowledge and skills to assume adult-gerontology acute care roles in a myriad of settings. Courses focus on integrating advanced health assessment, pathophysiology, and acute clinical care and management. Students will be expected to acquire a minimum of 500 hours of acute care experience as required to meet the specialty competencies and the requirements to take the Adult-Gerontology Nurse Practitioner Acute Care national certification exam.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35) and availability of College of Nursing resources. Students must also meet the following criteria for admission:

1. Completion of a graduate (M.S.N or D.N.P) clinical degree in Nursing from a nationally accredited institution; academic transcripts. If the student is currently enrolled in the D.N.P program, the certificate will not be awarded until the D.N.P. is posted on the transcript.
3. Two letters of recommendation.
4. Resume.
5. A personal goal statement.

This certificate requires courses which must be taken in sequence over one calendar year with no transfer credit accepted. This certificate requires a minimum of 18 credits which must be earned within three years. A grade point average of 3.0 must be maintained. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 322) and the Graduate School (p. 38) governing graduate scholarship and degrees. Additional courses may be required based on a gap analysis.

Nursing Education (Graduate Certificate)

This Graduate Certificate Program in Nursing Education is designed to prepare nurses for teaching positions in educational and service settings. The certificate provides nurses with essential knowledge and skills in teaching, program development, evaluation, clinical instruction, and other aspects of the educational process in nursing. Courses focus on concepts of learning; teaching methods and concepts of teaching in nursing; multimedia and computer-assisted instruction and distance education; development of educational programs in nursing; evaluation; testing; and clinical teaching from a theoretical and research perspective. The program provides learners with a theoretical framework for teaching in nursing and related competencies.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35) and the availability of College of Nursing resources. Students must also meet the following criteria for admission:

1. Completion of a Graduate degree in Nursing or concurrent enrollment in the MSN, DNP or PhD program in the College of Nursing at Wayne State University; academic transcripts. If the student is currently enrolled in one of the graduate programs, the certificate will not be awarded until the degree is posted to the transcript.
3. Personal goal statement.
4. Two letters of recommendation.
5. Resume.

This Certificate requires twelve credits which must be earned within three years with no transfer credit accepted. A minimum grade point average of 3.0 must be achieved. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 322) and the Graduate School (p. 38) governing graduate scholarship and degrees. Nursing 7710 and 7720 must be completed prior to taking NUR 7730.

Pediatric Nurse Practitioner Primary Care (Graduate Certificate)

This Graduate Certificate Program will allow primary care-certified pediatric nurse practitioners to acquire essential knowledge and skills in pediatric primary care with a particular focus on care of children with complex chronic conditions. It will require satisfactory completion of sixteen credits of didactic content and clinical practice. The certificate provides nurses with essential knowledge and skills to assume acute care roles in a myriad of settings using a patient and family-centered care model. Courses focus on integrating advanced health assessment, pathophysiology, and acute clinical care and management. Specific clinical experiences in two of the courses will be tailored to meet needs of individual graduate certificate students. Students will be expected to acquire a minimum of 600 hours of acute care experience as required to meet the specialty competencies and the requirements to take the Pediatric Nurse Practitioner-Acute Care national certification examination from the Pediatric Nursing Certifying Board (PNCB).

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35) and availability of College of Nursing Resources. Students must also meet the following criteria for admission:

1. Completion of a graduate (Master’s or doctoral) degree in Nursing from a nationally accredited institution; academic transcripts. If the student is currently enrolled in the D.N.P. program, the certificate will not be awarded until the D.N.P. is posted on the transcript.
3. Two letters of recommendations.
4. Resume.
5. A personal goal statement.
6. PNP-PC certificate.

This certificate requires courses which must be taken in sequence over one calendar year with no transfer credit accepted. This certificate requires a minimum of sixteen credits which must be earned within three years with no transfer credit accepted. A minimum grade point average of 3.0 must be achieved. Any additional requirements are determined by a GAP analysis. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 322) and the Graduate School (p. 38) governing graduate scholarship and degrees.

Psychiatric Mental Health Nurse Practitioner (Graduate Certificate)

This Graduate Certificate Program is designed to prepare nurses to assume primary care roles as a Psychiatric Mental Health Nurse Practitioner. The certificate provides nurses with essential knowledge and skills to assume psychotherapy, consultation, and liaison roles. Courses focus on systematic pathophysiology, pharmacotherapeutics interventions, advanced health assessment, and health policy and issues for advanced practice nurses.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Students must also meet the following criteria for admission:

1. Completion of a Master’s degree in Psychiatric Mental Health Nursing (CNS), or the completion of a Master’s Degree in another specialty area, or concurrent enrollment in the D.N.P. program in the College of Nursing at Wayne State University. If the student is currently enrolled in the D.N.P program, the certificate will not be awarded until the D.N.P. is posted on the transcript.
3. Two letters of recommendation.
4. Resume.
5. Personal goal statement.

This certificate requires twenty-nine credits, which must be earned within three years with no transfer credit accepted. A minimum grade point average of 3.0 must be achieved. All course work must be completed in accordance with the academic procedures of the College of Nursing (p. 322) and the Graduate School (p. 38) governing graduate scholarship and degrees. Additional courses may be required based on a gap analysis.

The Eugene Applebaum College of Pharmacy and Health Sciences (EACPHS) is a unit of the University formed by the collaboration of health science professions represented by the academic departments of:

- **Applied Health Sciences**: comprised of Clinical Laboratory Science, Mortuary Science, Pathologists’ Assistant Studies, and Forensic Investigation
- **Health Care Sciences**: comprised of Occupational Therapy, Nurse Anesthesia, Physical Therapy, Physician Assistant Studies, Radiation Therapy Technology, Radiologic Technology, and Radiologist Assistant Studies
- **Pharmaceutical Sciences**
- **Pharmacy Practice**

The College offers seventeen degrees and certificates. The academic programs of the College maintain autonomous admission requirements, curricula, degree requirements and academic procedures.

### History

The College of Pharmacy was founded in 1924. In 1974, the pharmacy unit merged with the Division of Health to form a College dedicated to educating the health care professionals in these fields. In 1985, the College of Pharmacy and Allied Health Professions became home to the Mortuary Science department, which had originated as a unit of the School of Business Administration in 1943.

In 1998, the State of Michigan set aside $48.2 million for a new facility, based on the University’s commitment to raise $16.1 million from private sources. Eugene Applebaum, a 1960 alumnus of the College's pharmacy program and founder of Arbor Drug Stores, made a lead gift of $5 million and agreed to chair the College’s capital campaign. The new building, which opened in 2002 on the Detroit Medical center campus, features 270,000 square feet of learning and research space. The facility brings all departments of the College under one roof, except Mortuary Science and Clinical Laboratory Science, which have separate facilities.

### Location

The Eugene Applebaum College of Pharmacy and Health Sciences is a state-of-the-art teaching and research facility at the southwest gateway to the Detroit Medical Center, located at 259 Mack Avenue at John R Street, near the School of Medicine and Shiffman Medical Library. This facility provides notable clinical and research settings where students participate as part of their professional development.

### Mission

The mission of this college is to advance the health and well-being of society through the preparation of highly-skilled health care practitioners, and through research to discover, evaluate, and implement new knowledge to improve models of practice and methods of treatment in pharmacy and health sciences. It is the intent of this college to serve as a preeminent model of learning, scholarship, and engagement, impacting health, safety, and well-being worldwide through leadership, innovation, and the interconnectedness of its disciplines. To this end the College offers a variety of graduate-professional and graduate programs. They are designed to provide advanced-level professional training, basic research and scholarly activities in the various health science fields.

### Accreditation

The Higher Learning Commission accredits Wayne State University and professional programs in this College are accredited by their respective agencies:

**CLINICAL LABORATORY SCIENCE:**

**PATHOLOGIST’S ASSISTANT PROGRAM:**

**NURSE ANESTHESIA:**

Council on Accreditation of Nurse Anesthesia Education Programs (COA), 222 S. Prospect Ave., Park Ridge IL 60068-4037 https://www.coacrna.org/

**OCCUPATIONAL THERAPY:**

Accreditation Council for Occupational Therapy Education (ACOTE), 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929 ([www.acoteonline.org](http://www.acoteonline.org))

**PHARMACY:**
The Accreditation Council for Pharmacy Education (ACPE), originally founded as the American Council on Pharmaceutical Education: 135 S. LaSalle Street, Suite 4100 Chicago, Illinois 60603-4810; Phone: 312-664-3575; FAX: 312-664-4652; website: http://www.acpe-accredit.org

PHYSICAL THERAPY:

PHYSICIAN ASSISTANT PROGRAM:

Academic Regulations

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations (p. 38) section of this bulletin. The following additions and amendments pertain to the College of Pharmacy and Health Sciences.

1. Professional course: any course required in the Pharm.D., D.P.T. or M.O.T curriculum and any course approved for professional elective credit and elected by the student for that purpose.
2. Satisfactory grade: a grade of 'C' or above, or a grade of 'S.'
3. Unsatisfactory grade: a grade of 'C-minus' or below 2.0 grade points, or a mark of 'X' or unauthorized 'W.' Marks of 'X' or marks of 'W' which have not been authorized will be treated as an 'E.'
4. Probation: a restricted status in a program (see below).
5. Dismissal from a program means that the student may no longer register in the program, or elect professional course work. Continued registration in the University requires that a Change of Status to another program be made.

Academic and Professional Progress

The College expects its students to develop professional competence and to satisfy the same high standards of exemplary character, appearance, and ethical conduct expected of other health care professionals. To merit confidence and esteem, both personally and in the health care professions, appropriate dress and demeanor are expected of each student in their respective academic and professional program. Each program has a process or committee in place to review student performance regularly and makes decisions concerning probationary status. A student may be dismissed from the College at any time for an unsatisfactory academic or professional record, for irresponsible attendance, or other failures to diligently pursue the academic and professional program.

Outside Employment

The curriculum has been arranged with the presumption that students will devote full time and energy to their academic program. Internships, fieldwork and other pharmaceutical employment is recognized as an integral part of the academic and professional growth of a pharmacy or health science student. However, students are responsible for maintaining the appropriate balance between such activity and satisfactory achievement in the classroom.

Attendance

Regularity in attendance and performance is necessary for success in college work. At the beginning of each course the instructor will announce and/or include in the syllabus the specific attendance required of students as part of the successful completion of the course.

Course Elections

The program must be elected on a full-time basis, following the curriculum as outlined in this bulletin, unless specifically directed otherwise by the Committee on Academic and Professional Progress and/or the faculty.

No course may be elected unless a satisfactory grade has been earned in each of the course prerequisites. Registration to audit a course or for courses elected on a Satisfactory or Unsatisfactory (S or U) is permitted only for elective credits, in certain designated courses such as field work, practicum and internships, in excess of the minimum degree requirements, or by guest or post-degree students.

Leaves of Absence

A leave of absence may, and should, be requested by a student when personal circumstances interfere with his/her ability to devote sufficient time to academic pursuits to assure reasonable expectations of success. A leave of absence is requested from and granted by the Dean (or designee) in consultation with the departmental committee or faculty advisor. If a student requests and is granted an immediate leave of absence during a term, it is the student's responsibility to follow the Academica procedures to withdraw from all courses enrolled in for that term as outlined by instructions found online (http://reg.wayne.edu/students/information.php).

A leave of absence must be requested no later than the end of the tenth week of the term, or in the case of courses not offered over a traditional semester, prior to completion of seventy-five per cent of the course, and requires a prior consultation with the student's faculty advisor, program director, department chair and/or the Assistant Dean for Student Affairs.

A student who takes an unauthorized leave of absence will be considered to have voluntarily withdrawn from the program and may be permitted to return only upon the recommendation of the Admissions Committee in consultation with the appropriate departmental committee or faculty advisor.

Time Limitations

The program must be completed within six calendar years of admission unless an extension is granted by the appropriate departmental academic progress committee or faculty advisor (extensions are appropriate in circumstances such as a delay required to repeat a course preceding or following an authorized leave of absence or an authorized leave of absence that extends beyond one year).

Students who are delayed in their progress for reasons of academic failure and/or leaves of absence beyond the six-year limit may be required to repeat and/or take additional courses in order to assure their graduation with appropriate preparation for contemporary professional practice; such determination will be made by the appropriate departmental academic progress committee in consultation with appropriate faculty.

Minimum Grade Requirement

No professional course in which an unsatisfactory grade is earned will be counted for degree credit in this program unless repeated for a satisfactory grade. Please refer to the specific program/department Student Handbook for information regarding minimum grade requirements.

Grade Appeals

Official Policies and Procedures
College Policy No. 89.01 FINAL COURSE GRADE APPEALS

THIS VERSION REPLACES AND SUPERSEDES ALL PRIOR VERSIONS OF FINAL COURSE GRADE APPEALS POLICY. This policy is effective immediately for final course grades received for Fall 2016 and all terms going forward.

The following is the policy implemented for Final Course Grade Appeals in the Eugene Applebaum College of Pharmacy and Health Sciences. At the beginning of each term, the instructor is to inform students in writing of the criteria used in arriving at grades for the class including...
the relative importance of prepared papers, quizzes and examinations, class participation and attendance. Where student performance in other practical and structured activities is relevant in evaluating professional competency, criteria used in such evaluations should be stated. Written materials should be graded in a timely manner and such materials, together with comments and an explanation of grading criteria, are to be made available to students. Students should be encouraged to discuss any class related problems with the instructor.

Instructors are expected to evaluate student work according to sound academic standards.

Equal expectations should be required of all students in a class (although more work is expected from graduate students than from undergraduates) and grades should be assigned without departing from announced procedures.

It is the instructor's prerogative to assign grades in accordance with his or her academic and professional judgment and the student assumes the burden of proof in the appeals process. Grounds for appeals are: (1) evaluation of student work by criteria not directly reflective of performance relative to course requirements; (2) sexual harassment or discrimination; or (3) the application of non-academic criteria in the grading process, as listed in the university's non-discrimination/affirmative action statute: race, color, sex (including gender identity), national origin, religion, age, sexual orientation, familial status, marital status, height, weight, disability, or veteran status.

Final grade appeals and dismissal appeals that fail to cite one or more of the above criteria will be automatically and will not be considered on the burden of proof in the appeals process. Grounds for appeals are: (1) evaluation of student work by criteria not directly reflective of performance relative to course requirements; (2) sexual harassment or discrimination; or (3) the application of non-academic criteria in the grading process, as listed in the university's non-discrimination/affirmative action statute: race, color, sex (including gender identity), national origin, religion, age, sexual orientation, familial status, marital status, height, weight, disability, or veteran status.

Final grade appeals and dismissal appeals that fail to cite one or more of the above criteria will be automatically and will not be considered on the merits. Dismissal for failure to cite appeal criteria does not extend the deadline for filing an amended appeal.

This final course grade appeal policy does not apply to allegations of academic misbehavior. Academic misbehavior matters are addressed by Section 10.1 of the WSU Student Code of Conduct (https://dos0.wayne.edu/pdf/student-code-of-conduct.pdf).

Definition: Instructor - Instructor applies to full-time, fractional-time, part-time faculty as well as Graduate Teaching Assistants, Adjuncts, and Academic Staff with teaching duties.

Final Course Grade Appeals Policy and Procedure

Informal Final Course Grade Review
1. Prior to an appeal of a course final grade all issues must first be directed to the instructor of the course for consideration of resolution.
2. The initial request of a grade review should be made directly to the instructor in an informal discussion during office hours or by a requested scheduled appointment.
3. If a student has documented efforts to obtain an informal meeting with the instructor and is unable to schedule this meeting within ten calendar days the student will then have the right to proceed to a formal grade appeal within thirty calendar days following posting of the final course grade. The instructor should make every reasonable effort to meet with the student during this time period prior to a formal appeal.

Formal Final Course Grade Appeal Policy and Procedure
If the final grade in question remains unchanged after the informal final course grade review, any formal Course Grade Appeal to change the grade in question must be initiated in writing by the student within thirty calendar days following the posting of the final course grade. The Student must submit a formal written appeal to the appropriate Department Chair. This formal appeal must include a copy of the current course syllabus and a student appeal letter including detailed justification for the appeal. This documentation must explicitly state which of the three criteria of allowable rationales is applicable and how the alleged violation occurred.

Formal Final Course Grade Appeal
1. The Department Chair shall provide a time-stamped and dated copy of the formal student course grade appeal to the instructor, program director or program/department grade appeal committee. The Department Chair (or designee) will then request input and/or response from the instructor, program director or the program/department grade appeal committee.
2. Student or Faculty involved in a grade appeal process may contact the University Ombudsperson at any time for assistance with any questions associated with a grade decision or the grade appeal process.
3. The Department Chair (or designee) may convene an ad hoc special review committee (or charge an existing committee) to advise on any dispute.
4. The Department Chair (or designee) shall review all documentation and respond in writing to the student within thirty calendar days of receiving the formal course grade appeal. The Department Chair (or designee) will place, in writing, the final decision to the student, instructor, program director, program/department grade appeal committee or the reason for any delay in decision. The decision of the Department Chair (or designee) can be appealed to the Office of the Dean.
5. Appeals to the Office of the Dean must be submitted in writing within ten calendar days of the postmarked response from the Department Chair (or designee). The Dean or his/her designee must respond to the student appeal within thirty calendar days. The decision of the Dean or his/her designee is the final decision at the College level.
6. If the appeal is denied at the Dean (or designee) of the College level, and the College appeal path is exhausted, if the student wishes to continue with the grade appeal process, per the University Academic policy (https://provost.wayne.edu/academic-policy/), the student may request a Provost Review within 30 days of this decision. The request should be addressed to Dr. R. Darin Ellis, Associate Provost for Academic Programs. The request should be submitted via the online form (https://provost.wayne.edu/academic-policy/). For assistance with the appeal process, the student may contact the Ombudsperson (https://wayne.edu/ombuds/). The student's formal appeal for Provost Review must include a copy of the current course syllabus, the initial student appeal letter including detailed justification for the appeal, the Department Chair’s (or designee's) response letter, and the Dean's (or designee's) written response. The decision of the Provost or his/her designee is final. No further appeal is possible.

Dismissal Policy
College Policy No. 89.06
Established and Approved September 28, 2016

The following is the policy implemented when a student has been dismissed from a program or department in the Eugene Applebaum College of Pharmacy and Health Sciences. Specific guidelines for dismissal are available (by programs and departments) in student handbooks and in other electronic formats on program, department, and College web pages.

Combined Grade Appeal/Dismissal Policy
If the final course grade leads to dismissal, the dismissal will be considered simultaneously in the final course grade appeal process. There is no separate or additional appeal process for a dismissal based on a final course grade. This would be referred to as a "combined" appeal.
In the event the combined final grade/dismissal appeal is denied by the Dean (or designee) a final appeal can be made by the student to the Provost as part of the combined grade appeal/dismissal process.

If dismissal results from an unprofessional behavior violation or other non-academic reason ([https://doso.wayne.edu/conduct/nonacademic-misconduct/](https://doso.wayne.edu/conduct/nonacademic-misconduct/)) not addressed within the program or department student handbook, the WSU Student Code of Conduct will be applied. Academic misbehavior matters are addressed by Section 10.1 of the WSU Student Code of Conduct ([https://doso.wayne.edu/pdf/student-code-of-conduct.pdf](https://doso.wayne.edu/pdf/student-code-of-conduct.pdf)).

**Definition:** Instructor - Instructor applies to full-time, fractional-time, part-time faculty as well as Graduate Teaching Assistants, Adjuncts, and Academic Staff with teaching duties.

**Combined Grade Appeal/Dismissal Policy and Procedure**

**Informal Grade Appeal/Dismissal Process**

1. Prior to a combined appeal of a grade/dismissal all issues must first be directed to the instructor of the course for consideration of resolution.
2. The initial request should be made directly to the instructor in an informal discussion during office hours or by a requested scheduled appointment.
3. If a student has documented efforts to obtain an informal meeting with the instructor and is unable to schedule this meeting within ten calendar days the student will then have the right to proceed to a formal combined grade appeal/dismissal process. The instructor should make every reasonable effort to meet with the student during this time period prior to a formal appeal.

**Formal Combined Grade Appeal/Dismissal Appeal Policy and Procedure**

If the dismissal status remains unchanged after the informal meeting with the instructor, the formal Grade Appeal/Dismissal process must be initiated in writing by the student within thirty calendar days following the notification of the final course grade that precipitated the dismissal. The student must submit a formal written appeal together with a completed a grade/dismissal appeal form prescribed by the College to the appropriate Department Chair (or designee). This formal appeal must include a copy of the current course syllabus and a student appeal letter including detailed justification for the appeal of the dismissal.

**Formal Combined Grade Appeal/Dismissal Appeal Process**

1. The Department Chair (or designee) shall provide a time-stamped and dated copy of the formal student dismissal appeal to the instructor, program director or program/department appeal committee. The Department Chair (or designee) will then request input and/or response from the instructor, program director or the program/department appeal committee.
2. Student or Faculty involved in a dismissal appeal process may contact the University Ombudsperson at any time for assistance with any questions associated with a grade decision or the grade appeal/dismissal process.
3. The Department Chair (or designee) may convene an ad hoc special review committee (or charge an existing committee) to advise on any dismissal.
4. The Department Chair (or designee) shall review all documentation and respond in writing to the student within thirty calendar days of receiving the formal dismissal appeal. The Department Chair (or designee) will place, in writing, the final decision to the student, instructor, program director, program/department appeal committee or the reason for any delay in decision. The decision of the Department Chair (or designee) can be appealed to the Dean.
5. Appeals to the Dean must be submitted in writing within ten calendar days of the postmarked response from the Department Chair (or designee). The Dean or his/her designee must respond to the student appeal within thirty calendar days. The decision of the Dean or his/her designee is the final decision at the College level.
6. If the appeal is denied at the Dean (or designee) of the College level and the College appeal path is exhausted, if the student wishes to continue with the final grade/dismissal appeal process, per the University Academic policy, the student may request a Provost Review within 30 days of this decision. The request should be addressed to Dr. R. Darin Ellis, Associate Provost for Academic Programs. The request should be submitted via the online form ([https://provost.wayne.edu/provostappealprocedure/](https://provost.wayne.edu/provostappealprocedure/)). For assistance with the appeal process, the student may contact the Ombudsperson ([https://wayne.edu/ombuds/](https://wayne.edu/ombuds/)). The student's combined grade appeal/dismissal for Provost Review must include a copy of the current course syllabus, the initial student appeal letter including detailed justification for the appeal, the Department Chair's (or designee's) response letter, and the Dean's (or designee's) written response. The decision of the Provost or his/her designee is final. No further appeal is possible.

**Dismissal Policy and Procedure**

This applies to appeals of any and all dismissals that occurred because of academic, non-academic, or professional behavior violations.

**Informal Dismissal Review**

1. Prior to a dismissal all issues must first be directed to the instructor of the course for consideration of resolution.
2. The initial request should be made directly to the instructor in an informal discussion during office hours or by a requested scheduled appointment.
3. If a student has documented efforts to obtain an informal meeting with the instructor and is unable to schedule this meeting within ten calendar days the student will then have the right to proceed to a formal combined grade appeal/dismissal process. The instructor should make every reasonable effort to meet with the student during this time period prior to a formal appeal.

**Formal Dismissal Appeal Policy and Procedure**

If the dismissal status remains unchanged after the informal meeting with the instructor, the formal dismissal process must be initiated in writing by the student within thirty calendar days following the notification of the final grade that precipitated the dismissal. The student must submit a formal written appeal to the instructor, program director or the program/department appeal committee. The student or Faculty involved in a dismissal appeal process may contact the University Ombudsperson at any time for assistance with any questions associated with a grade decision or the grade appeal/dismissal process.

**Formal Dismissal Process**

1. The Department Chair (or designee) shall provide a time-stamped and dated copy of the formal student dismissal appeal to the instructor, program director or program/department appeal committee. The Department Chair (or designee) will then request input and/or response from the instructor, program director or the program/department appeal committee.
2. Student or Faculty involved in a dismissal appeal process may contact the University Ombudsperson at any time for assistance with any questions associated with the dismissal process.
3. The Department Chair (or designee) may convene an ad hoc special review committee (or charge an existing committee) to advise on any dismissal.
4. The Department Chair (or designee) shall review all documentation and respond in writing to the student within thirty calendar days of receiving the formal dismissal appeal. The Department
Chair (or designee) will place, in writing, the final decision to the student, instructor, program director, program/department appeal committee or the reason for any delay in decision. The decision of the Department Chair (or designee) can be appealed to the Dean.

5. Appeals to the Dean must be submitted in writing within ten calendar days of the postmarked response from the Department Chair (or designee). The Dean or his/her designee must respond to the student dismissal appeal within thirty calendar days. The decision of the Dean or his/her designee is the final decision at the College level.

6. If the appeal is denied at the Dean (or designee) of the College level and the College appeal path is exhausted, if the student wishes to continue with the final grade/dismissal appeal process, per the University Academic policy, the student may request a Provost Review within 30 days of this decision. The request should be addressed to Dr. R. Darin Ellis, Associate Provost for Academic Programs. The request should be submitted via the online form (https://provost.wayne.edu/provostappealprocedure/). For assistance with the appeal process, the student may contact the Ombudsperson (https://wayne.edu/ombuds/). The student's combined grade appeal/dismissal for Provost Review must include a copy of the current course syllabus, the initial student appeal letter including detailed justification for the appeal, the Department Chair's (or designee's) response letter, and the Dean's (or designee's) written response. The decision of the Provost or his/her designee is final. No further appeal is possible.

Suspension
In extenuating circumstances, a suspension may be recommended during the appeal process. Suspension is a temporary removal of a student from participation in educational activities. While suspended, the student is placed on an administrative leave of absence.

Suspension may occur for failure to meet program/department, College or University requirements, because of a serious allegation of unprofessional behavior, or when a student is deemed to be a danger to others or him/herself. A recommendation for suspension can be made in writing to the student by the Assistant Dean for Student Affairs, the Associate Deans for Pharmacy or Health Sciences in consultation with the Dean of Students or the Office of the Provost.

Dismissal Policies Listed by Program/Department
In order to maintain the accuracy of program specific policies, students should refer to their respective professional program or department resources, including handbooks or other sources in Canvas applicable dismissal policy information.

Student Conduct
Every student is subject to all regulations set forth by the University and the College governing student activities and student behavior in the use of University facilities. The University and the College have responsibility for making these regulations available and it is the student’s responsibility to become thoroughly familiar with all regulations and to seek any necessary clarification. Questions and concerns regarding regulations should be brought to the attention of the appropriate faculty member and/or the Office’s office.

There are obligations inherent in registration as a student in the College. Students entering the health science and pharmacy professions are expected to have the highest standards of personal conduct. When there are reasonable grounds to believe a student has acted in a manner contrary to ethical standards, the law, or mores of the community, such student may be disciplined. This discipline may include suspension or dismissal from the program after due process in accord with published policies and the Student Code of Conduct.

Applied Health Sciences
Chairperson: Mark Evely
The mission of the Department of Applied Health Sciences is to provide students with highly effective and quality educational experiences that address contemporary challenges directly impacting public health, health care, environmental and workplace issues.

- Pathologists’ Assistant (M.S.) (p. 339)

Pathologists' Assistant (M.S.)
Office: 338 Mort Sci; 313-577-2050
Program Director: Veralucia Mendes-Kramer
http://cphs.wayne.edu/pathologists-assistant/

The Pathologists’ Assistant is academically and clinically prepared to assist pathologists in anatomic, surgical, autopsy and forensic pathology as well as ancillary services defined by the American Association of Pathologists’ Assistants. The Wayne State University Pathologists’ Assistant program trains individuals who will assist pathologists in the performance of postmortem examination and in the dissection, dictation, and evaluation of surgical specimens for microscopic diagnosis. The program also provides individuals with budgetary, supervisory, and teaching skills. Lastly, the program trains individuals to function as competent entry-level pathologists’ assistants capable of performing, under the supervision of a pathologist, those professional responsibilities as defined by the American Association of Pathologists’ Assistants (AAPA). The Pathologists’ Assistant program is accredited by the National Accrediting Agency of Clinical Laboratory Sciences (NAACLS).

Admission Requirements
Admission to this program is contingent upon admission to the Graduate School (p. 35). Applicants must have a bachelor’s degree (BA or BS) from an accredited college or university. In addition, students must:

1. have a minimum cumulative and prerequisite undergraduate grade point average of 3.0;
2. complete all prerequisite coursework with a minimum of a C or higher;
3. submit two letters of recommendation;
4. complete the TOEFL exam if English is not the first language;
5. submit a WES course-by-course evaluation of foreign transcripts;
6. provide documentation of 8 hours of shadowing experience in a surgical lab setting and 5 hours (or one autopsy) in a medical examiner setting;
7. attend one information meeting in the year of application.

Admission Interview
Interview is by invitation only to those candidates who have satisfied all requirements for admission. Interviews are extended only to the most competitive candidates owing to the limited number of seats in the program. Meeting the minimum requirements to the program does not ensure an offer for an interview.

General Information Meetings
The Eugene Applebaum College of Pharmacy and Health Sciences hosts general information meetings (http://cphs.wayne.edu/)
meetings.php) on the first Tuesday of each month at 6:00 p.m. Meetings are held through Zoom.

**Prerequisite Study**

In addition, the following coursework must have been successfully completed with a grade of C or higher in order to be considered for admission. Prerequisites listed below must be completed within the six years prior to the date of applying to this degree program.

- Two Biology courses (higher than BIO 1050)
- Microbiology with lab
- Anatomy and Physiology with lab
- General Chemistry with lab
- Organic Chemistry and/or Biochemistry
- Mathematics (MAT 1000 or higher) or Statistics
- English Composition

**Program Deadlines**

The program admits students annually to begin the program's curriculum in the spring semester, which begins in May. All prerequisite coursework must be completed by December 30th for Spring/Summer admission consideration.

- Application due date for spring 2022: Jan. 15, 2022 (all prerequisite coursework complete by December 30th, 2021)
- Application due date for spring 2023: Jan. 15, 2023 (all prerequisite coursework complete by December 30th, 2022)
- Application due date for spring 2024: Jan. 15, 2024 (all prerequisite coursework complete by December 30th, 2023)

**Program Requirements**

The Master of Science in Pathologists’ Assistant is offered under a Plan C option and requires completion of 77 credits of coursework as outlined below. All coursework must be completed in accordance with the academic procedures of the Graduate School (p. 38) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 336). A grade of ‘C’ in any graduate course is unacceptable.

**Background Screen**

Admission into the program is conditional until which time all admitted candidates complete a Background Screen.

**Physical Examination**

All applicants are required to submit a complete physical examination form to the program, which must include a complete immunization record, showing evidence of: HBV antibody titre, TB status, MMR, Chickenpox/Varicella, COVID-19, and flu vaccination record.

**Liability Insurance**

Clinical Education is provided during both year I and II of the program, along with didactic and laboratory courses. Year II of the program is spent in clinical rotations through various selected clinical facilities throughout the metropolitan Detroit area, Michigan and other parts of the country, handling patients specimens and decedent remains. Therefore, all students are required to maintain liability insurance, which will be purchased during both years of the program as a separate fee from those courses the student enrolls in. In addition, the student is responsible for the cost of health insurance and all other costs (such as travel, meals, and living expenses) associated with the clinical education of the program.
Health Care Sciences

Interim Chairperson: Diane Adamo

The Department of Health Care Sciences consists of six programs that share a common theme of excellence in the education and training of those involved in patient care. The department is housed in the Eugene Applebaum College of Pharmacy and Health Sciences (EACPHS) building which is near main, large health care institutions and close to the Wayne State University Medical School. Many of the department's faculty, who are involved in health care related research, offer students opportunities to assist in research. This has enabled greater appreciation for health care management and clinical decision-making.

- Nurse Anesthesia (p. 341)
- Occupational Therapy (M.O.T.) (p. 342)
- Physical Therapy (D.P.T.) (p. 343)
- Physician Assistant Studies (M.S.) (p. 345)

Nurse Anesthesia

Offices: 4601-4606 CPHS
Program Director: Mary Walczyk, DNP, CRNA; 4601 CPHS; 313-577-7689; mary.walczyk@wayne.edu
Assistant Program Director: Jessica Phillips, PhD, CRNA; 313-577-9239; jessica.montrief@wayne.edu
https://cphs.wayne.edu/nurse-anesthesia/ (https://cphs.wayne.edu/nurse-anesthesia/)

The mission of the Doctor of Nurse Anesthesia Practice is to build on the theoretical foundations of nursing and to provide new and advanced knowledge in understanding the science and art of nurse anesthesia practice. The program promotes research activities to enhance the knowledge and understanding of best practices essential to the delivery of quality and safe anesthesia practices to diverse patient populations. Graduates are eligible to take the National Certification Examination (NCE) given by the National Board of Certification and Recertification for Nurse Anesthetists (NBCRNA). The nurse anesthesia program is offered full-time only.

Accreditation

The program is fully accredited by the Council on Accreditation (COA) of Nurse Anesthesia Educational Programs.

Admission Requirements

Admission to this program is conducted through applications submitted to the Centralized Application Service (NursingCAS) CAS application (https://nursingcas.liaisoncas.org/apply/) and is contingent upon admission to the Graduate School (https://bulletins.wayne.edu/graduate/general-information/admission/).

To be eligible to apply to the Nurse Anesthesia program, applicants must have the following:

- Baccalaureate degree in nursing
- A minimum of one undergraduate course (3 credits) of Chemistry
- Organic or Biochemistry (No General Chemistry) taken within 10 years of application with a final grade of "B" or higher
- A minimum of one undergraduate course (3 credits) of Microbiology or Anatomy & Physiology taken within 10 years of application with a final grade of "B" or higher
- Overall minimum GPA of 3.0 or higher for the last 60 credits completed
- Overall minimum Nursing GPA of 3.0 or higher
- Overall Science GPA of 3.0 or higher
- Current RN licensure
- Current Advanced Cardiac Life Support (ACLS)
- Current Pediatric Advanced Life Support (PALS)
- CCRN Certification
- Current employment, a minimum of one-year full time in an ICU (SICU, MICU, CICU, Neurotrauma, Pediatric ICU in an academic teaching setting). PACU and ER employment are not accepted as ICU experience.
- Shadowing experience at your hospital of employment.
- If coursework was completed at a non-US institution, students must obtain a course-by-course evaluation of their transcripts by World Education Services: www.wes.org (http://www.wes.org/). The results of the evaluation must be sent to Wayne State University and the Centralized Application System.
- Complete WSU Graduate Application (https://gradslate.wayne.edu/apply/) at time of admission offer.

Please consult the WSU NA Website (https://cphs.wayne.edu/nurse-anesthesia/admission-requirements.php) for a complete list of admission criteria.

Admission Interview

A personal interview will be granted to select individuals who meet all admission requirements and have submitted the CAS application and the WSU Graduate Application by the admissions deadlines.

Completion of the personal interview does not guarantee admission to the Wayne State University Nurse Anesthesia Program. Admission to the program is competitive. All those admitted to the WSU NA program have met all requirements and have successfully completed a personal interview.

Program Requirements
The Doctor of Nurse Anesthesia Practice (DNAP) degree is 87 credits taken over nine semesters. Graduates are eligible to take the National Certification Examination (NCE) given by the National Board of Certification and Recertification for Nurse Anesthetists (NBCRNA). The nurse anesthesia program is offered full-time only. All course work must be completed in accordance with the academic procedures of the Graduate School (p. 38) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 336), respectively, and in accordance with the Nurse Anesthesia Student Handbook. No course work may be transferred or substituted for credit into the Wayne State University DNAP curriculum.

The goal of this entry-level program is to educate individuals to become occupational therapy health care professionals. It is designed as a two and one-half year program. Students must complete a bachelor’s degree program prior to admission. Upon completion of the M.O.T. degree,
students are eligible to sit for the national certification and examination procedures of the National Board of Certification in Occupational Therapy. A state License to practice is required after successful completion of the NBCOT certification examination.

**Accreditation**

The M.O.T. program at Wayne State University is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE), the accrediting body of the American Occupational Therapy Association (AOTA). The address for ACOTE is:

ACOTE, C/O Accreditation Department
American Occupational Therapy Association (AOTA)
6116 Executive Boulevard, Suite 200
North Bethesda, MD 20852-4929

The courses prepare students to take the National Certification Examination (National Board for Certification in Occupational Therapy (http://www.nbcot.org)).

One Bank Street Suite 300.
Gaithersburg MD 20878.
Phone: 301-990-7979.
Info@nbcot.org.
American Occupational Therapy Association, Inc. (http://www.aota.org) telephone: 301-652-6611; Fax: 301-652-7711

**Admission Requirements**

**Admission:** Applicants must meet the admission standards of the Graduate School (p. 35). Please contact the Occupational Therapy Program for further information.

**Professional Program Admission:** Applicants must apply for admission to the professional program, using the Occupational Therapy Centralized Application Service (OTCAS) Application (https://portal.otcas.org/), and be formally admitted at the graduate level. All applicants must hold a minimum grade point average of 3.0 or above for the professional program. All prerequisite courses must be completed with grades of ‘C’ or better. No more than two professional core prerequisite courses may be repeated to improve grades. In addition, the applicant must:

1. complete twenty hours of contact with a registered occupational therapist and provide documentation of this;
2. complete a Program Personal/Professional Statement;
3. submit a letter of recommendation from a current or former supervisor.

Students who have no work experience may seek a recommendation from an instructor of one of the Occupational Therapy Core Courses. For a checklist of application requirements, visit the program website. All applicants must apply through the OTCAS.

Each student is assigned a faculty advisor upon admission to the M.O.T. program. After completion of the graduate coursework, each student will be assigned a Level II Fieldwork Coordinator faculty advisor, to counsel the student for the remainder of the program.

**Undergraduate Preparation:** For pre-professional requirements, applicants should consult the departmental website, or the current Undergraduate Bulletin (http://bulletins.wayne.edu/undergraduate/college-pharmacy-health-sciences/health-care-sciences/occupational-therapy-concentration-bhs/).

The M.O.T. program consists of a minimum of 93 credits in coursework and fieldwork. All course work must be completed in accordance with the academic procedures of the Graduate School (p. 38) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 336).

**Physical Therapy (D.P.T.)**

Office: 2248 CPDHS; 313-577-1432
Program Director: Kristina Reid
Director of Clinical Education: Martha Schiller
http://www.pt.cphs.wayne.edu/

Physical therapy is a dynamic health profession that develops, coordinates, and utilizes selected knowledge, skills, and techniques in planning, organizing, and directing programs for the care of individuals...
whose ability to function is impaired or threatened by disease or injury. This therapy includes examination, evaluation, diagnosis, prognosis, intervention, and analysis of outcomes. It provides services to patients/clients who have impairments of body function and structure, activity limitations, participation restrictions, disabilities, or changes in physical function and health status resulting from injury, disease, or other causes. Physical therapists also must be able to collaborate with a variety of professionals, address risk factors to health, be leaders and providers in the areas of prevention and promoting health, wellness and fitness, serve as educators, consultants, administrators and advocates, utilize critical inquiry skills and direct and supervise the provision of therapy services.

Some examples of diagnoses of individuals who might be seen by a physical therapist include stroke, low back pain, neck pain, ACL knee injury, Parkinson's Disease, spinal cord injury, amputation, heart attack, athletic injury, arthritis, cerebral palsy, rotator cuff (shoulder) injury, total or partial joint replacement, spina bifida, general health and personal training, congestive heart failure, emphysema, cancer, head injury, multiple sclerosis, learning disabilities, speed and agility training, and many more.

The American Physical Therapy Association (APTA) is the organization which represents the physical therapy profession. The mission of the APTA is to further the profession's role in the prevention, diagnosis, and treatment of movement dysfunctions and the enhancement of the physical health and functional abilities of members of the public. Students interested in the physical therapy profession should also visit the APTA (http://www.apta.org/) website.

Accreditation: The Physical Therapy Program at Wayne State University is accredited by the Commission on Accreditation in Physical Therapy Education (http://www.capteonline.org/Home.aspx) (CAPTE). Graduates who receive a Doctor of Physical Therapy degree are eligible to take the national physical therapy licensure examination, the Canadian licensure examination, and for active membership in the American Physical Therapy Association.

General Admission
Admission to this program is contingent upon admission to the Graduate School (p. 35) and completion of the pre-professional course component.

The Doctor of Physical Therapy (D.P.T.) is offered by this department at two levels of admission: entry level D.P.T. and transitional D.P.T. The entry level degree program is for individuals who are not now practicing physical therapists but are interested in becoming physical therapists. The transitional Doctoral Degree Program in Physical Therapy is for individuals who are already licensed as a physical therapist in the United States or Canada and who wish to expand their knowledge and skills to be better prepared to work as a primary care provider and expert practitioner. These programs lead to the same degree but require different admissions criteria and the completion of different sets of core courses.

Entry-Level Program
Admission - Entry Level: A baccalaureate degree is not required for admission to the Doctor of Physical Therapy program. The requirements for consideration for admission vary, depending on whether the applicant will have an earned baccalaureate degree prior to enrollment but all applicants must meet requirements for admission to the Graduate School (p. 35). Starting in 2015, the Graduate Record Examination will be required.

Applicants who will not have a baccalaureate degree upon enrollment in the physical therapy program must successfully complete

1. a minimum of ninety credits,
2. all University General Education Requirements,
3. all physical therapy science prerequisite courses,
4. all physical therapy non-science prerequisite courses, and
5. an upper-level concentration to be considered for admission.

Applicants who will have completed a baccalaureate degree prior to enrollment in the physical therapy program must complete all physical therapy science prerequisite courses and all physical therapy non-science prerequisite courses. Additional information on program-specific prerequisites can be found in the Physical Therapy section of the Undergraduate Bulletin.

Students may also be dismissed from the program for unsatisfactory achievement, and will result in dismissal from the professional program. Receiving more than two 'C' grades, or five grades below a 'C' will result in dismissal from the professional program.

Admission to the entry-level Doctor of Physical Therapy (D.P.T.) professional program occurs on an annual basis with Physical Therapy courses beginning in the Fall Term. There are a limited number of spaces in the Physical Therapy program and admission is competitive. Completion of the admission requirements does not guarantee admission.

Transitional Program
An admissions moratorium has been approved this program, effective Winter 2019.

Admission to the transitional program requires that the applicant be a physical therapist who has graduated from an accredited Baccalaureate or Master's Physical Therapy Program and is currently licensed in the United States or Canada. Letters of recommendation and a personal statement are also required.

Degree Requirements - Entry-Level Program
The Doctor of Physical Therapy degree requires satisfactory completion of 121-124 credits, including all courses in the core curriculum listed below.

Note: Students may graduate with fewer than 124 credits with approval from Program Director

Consistent with Graduate School policy, the grading system for graduate students is 'intended to reflect a higher standard of critical and creative scholarship than those applied at the undergraduate level.' Continuing students are required to earn a minimum of a 3.00 g.p.a. to satisfy degree requirements. A graduate student who receives a ‘C’ grade in any course is expected to complete remedial work to demonstrate competency in the course requirements that may include repetition of the course the next time it is offered. Receiving more than two ‘C’ grades, or five grades below a B (3.0), in the curriculum is considered unsatisfactory progress and achievement, and will result in dismissal from the professional program. Students may also be dismissed from the program for unsatisfactory clinical performance or for unsatisfactory professional behavior.

All course work must be completed in accordance with the academic procedures of the Graduate School (p. 38) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 336). In addition, the criteria for academic performance given in the Physical Therapy Student Handbook should be followed. The Physical Therapy Student Handbook, provided by this program, also contains policy statements that may pertain to admission, candidacy, and degree requirements which students should consult.

The core curriculum is subject to change without prior notice in response to the changing health care environment and accreditation standards.

### Degree Requirements - Transitional Program

**An admissions moratorium has been approved this program, effective Winter 2019.**

Students in this program are required to complete eight core courses if the student already possesses a Master of Physical Therapy degree. For individuals not possessing a Master of Physical Therapy degree, the applicant's educational and professional qualifications will be reviewed and an individual plan of work will be designed to provide sufficient preparation for the transitional D.P.T. curriculum.

The Physical Therapy Student Handbook, provided by this department, also contains policy statements that may pertain to admission, candidacy, and degree requirements. Students pursuing the D.P.T. should consult this handbook for the current statements on these policies.

The core curriculum is subject to change without prior notice in response to the changing health care and educations environment.

### Health and Liability Insurance

Clinical Education is provided throughout the professional program along with didactic courses. The final twenty-eight weeks of the program are spent in two assignments in selected clinical facilities throughout the metropolitan Detroit area, Michigan and other parts of the country. Patient care involves inherent risk of exposure to potential diseases, particularly blood borne pathogens, and the risk of possible mishaps in patient care. Therefore, all students are required to maintain health insurance coverage and this must be in effect prior to and during the professional program. Liability insurance is rolled into course fees associated with clinical education. The student is responsible for the cost of health insurance and all other costs (such as travel, meals, living expenses) associated with the clinical education portion of the program.

### Physician Assistant Studies (M.S.)

Office: 2590 CPHS; 313-577-1368
Program Director: Mary Jo Pilat, PhD, MS, PA-C, CCR

http://www.pa.cphs.wayne.edu/

A physician assistant (PA) is a health care provider who is nationally certified and is found in every medical specialty and setting. PAs manage the full scope of patient care, often handling patients with complex medical problems. PAs conduct physical exams, assist in surgery, diagnose and treat illness, order and interpret tests, counsel on preventative health care, and prescribe medications. The role may also
include educational, research, and administrative activities as well as clinical responsibilities. PAs are critical members of the health care team, collaborating with physicians and all team members to improve patient outcomes.

**Admission Requirements**

Admission to this program is conducted through applications submitted to the Centralized Application Service for PAs (CASPA) (http://www.caspaonline.org) and is contingent upon admission to the Graduate School (p. 35). Applicants must have a bachelor’s degree from an accredited college or university. In addition, students must:

1. have a minimum cumulative and prerequisite undergraduate grade point average of 3.0;
2. complete the general test of the Graduate Record Examination by July 31;
3. submit three letters of recommendation, one from a work supervisor and preferably one from a physician assistant;
4. submit an essay expressing your motivation to become a PA;
5. have a minimum of 500 hours (within last two years) of direct, "hands-on" patient care experience in a health-service environment by September 1 of application deadline;
6. non-native English speakers must complete the TOEFL;
7. complete the CASPer Test (https://takecasper.com/).

Please consult the WSU PAS program (http://www.pa.cphs.wayne.edu) for a complete list of admission criteria.

**Admission Interview**

Admission to the program is competitive. All those admitted to the WSU PAS program have satisfied all requirements listed above and have successfully completed a personal interview. Interviews are offered to the most competitive candidates however not all candidates that meet the minimum requirements are offered an interview.

**Program Deadlines**

All prerequisite coursework must be completed by September 1 of the year prior to the start of the program. Applicants must complete the CASPer evaluation and submit two separate applications:

1. one to the WSU Graduate School and
2. one through the CASPA website.

**General Information Meetings**

General Information Meetings are held at the Eugene Applebaum College of Pharmacy and Health Sciences the first Tuesday of each month at 6:00 p.m. at the College. Visit the program website (http://cphs.wayne.edu/meetings.php) for details.

**Prerequisite Study**

In addition, the following coursework must have been successfully completed with a grade of "B" (3.0) or higher in order to be considered for admission:

- Human Anatomy¹,²: one course
- Human Physiology¹,²: one course
- Upper Level Science Course¹: one course (must be human based & at 3000 level or above)
- Microbiology¹: with laboratory, one course
- Nutrition: one course, general human/clinical nutrition
- Chemistry¹: two courses required (one course must be inorganic/general and second course must be organic chemistry or biochemistry)
- Developmental psychology: one course

Basic statistics: one course
- English composition: two courses
- Medical terminology, one course

¹ Must be completed within the six years prior to the date of application to this degree program.
² Combined Human Anatomy and Physiology Courses will only count for the Human Anatomy prerequisite requirement.

The Master of Science in Physician Assistant Studies is offered under a Plan C option, requiring successful completion of fifty-four credits in course work over two years or six semesters. All course work must be completed in accordance with the academic procedures of the Graduate School (p. 38) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 336), respectively, and in accordance with the Physician Assistant Studies Program Student Policy and Information Manual. A grade of ‘C’ in any graduate course is unacceptable.

Pharmaceutical Sciences
Office: 3610 CPHS; 313-577-1047
Chairperson: Steven Firestine
https://cphs.wayne.edu/sciences/index.php

The pharmaceutical sciences encompass the traditional disciplines of medicinal or pharmaceutical chemistry, pharmaceutics and pharmacology/toxicology. Medicinal chemistry is primarily devoted to the discovery and development of new compounds which may be of value in the diagnosis and treatment of disease. Included are applications of organic chemistry, natural product chemistry, biochemistry, pharmacology and the relationships among chemical structure, physical properties and biological activity. Pharmaceutics is concerned with the conception, design, production, characterization, and evaluation of drug delivery systems in vitro and in vivo. Pharmaceutics includes physical, chemical, biological, microbiological and engineering studies related to the design of drug delivery systems. Pharmacology/toxicology deals with the principles and mechanisms of drug action on biological systems and the toxicological aspects of drugs and other substances.

Applicants with a strong background in the behavioral, biological, pharmacy and/or the physical sciences are excellent candidates for graduate work in this department. Study within this department is heavy focused on an interdisciplinary approach and the curriculum involves a single major with specializations rather than separate majors. This leads to greater flexibility in designing individualized programs geared to the applicant’s preparation and interests.

- Pharmacy (Pharm.D.) (p. 350)
- Pharmaceutical Sciences (M.S.) (p. 347)
- Pharmaceutical Sciences (Ph.D.) (p. 348)
- Pharmaceutical Sciences and Urban Sustainability (Ph.D. Dual-Title) (p. 349)

Pharmaceutical Sciences (M.S.)

Admission Requirements
Admission to this program is contingent upon admission to the Graduate School (p. 35). For the master's degree program, with a major in pharmaceutical sciences, the following criteria must also be satisfied:

The General portion of the Graduate Record Examination is required of all applicants. There are no minimum GRE scores required for admissions; however, applicants scoring below 150 on the quantitative portion of the exam are generally not admitted.

Applicants whose native language is other than English must demonstrate proficiency in English (p. 35) prior to beginning the program.

In addition to the regular University application, the applicant must also submit the following:

1. A general statement (300-400 words, typewritten) of reasons for selecting the program, including a resume, career objectives, possible research interests, and a list of faculty members that the applicant is interested in working with for their thesis.

2. Three letters of recommendation.

If an applicant's undergraduate preparation is considered deficient for advanced work in the pharmaceutical sciences, additional work may be required at the undergraduate level. All prerequisite credits must be earned prior to or concurrent with the first graduate credits.

Program Requirements

The Master of Science with a major in Pharmaceutical Sciences is offered only as a Plan A master's program requiring thirty credits, including an eight-credit thesis.

Courses required will vary with the student's previous preparation and the area of specialization. These courses will be determined by the student's graduate advisor, with review and approval by the College Graduate Officer as formalized by the Plan of Work. In addition to individualized courses, all Master of Science students are required to complete four core interdisciplinary courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSC 6800</td>
<td>Introduction to Research</td>
<td>2</td>
</tr>
<tr>
<td>PSC 7010</td>
<td>Advanced Drug Action and Safety I</td>
<td>3</td>
</tr>
<tr>
<td>PSC 7020</td>
<td>Advanced Drug Discovery I</td>
<td>3</td>
</tr>
<tr>
<td>PSC 7040</td>
<td>Advanced Drug Formulation and Delivery I</td>
<td>3</td>
</tr>
</tbody>
</table>

All students in the Graduate Program are required to attend Departmental Seminars (PSC 7850, each semester). Each Master's degree student must present one regular Departmental seminar on their final research project. In addition, all Master's students will register for one credit of Introduction to Seminar, PSC 7860, in the Spring/Summer semester of their first year and provide a seminar of thirty minutes in length describing a research experience during their first year. To qualify for the degree, all courses specified on the Plan of Work must be satisfactorily completed with a cumulative grade point average of at least 3.0. In addition, a final oral examination of the thesis is required of all candidates.

Selection of Advisor

The Graduate Officer will serve as temporary advisor to the applicant during the first semester. During this semester, the applicant will conduct three research rotations in the laboratory of selected Faculty. Students are encouraged to meet with all graduate faculty in the specialty and discuss their research interests. At the end of the first semester, all Master’s students must choose an advisor and obtain his/her consent to direct the student's research. This advisor will then sign the student's program requests, Plan of Work and other necessary forms. If a student fails to find an advisor, the Graduate Officer may provide the student with an additional research rotation. Failure to find a research advisor could result in removal from the program.

Candidacy

Applicants apply to the College Graduate Officer to become degree candidates by filing a Plan of Work, approved by their advisor, prior to the completion of twelve graduate credits in the program. To qualify, applicants must exhibit satisfactory scholarship (graduate grade point average of 3.0 or above), have completed any prerequisite and/or corequisite courses specified at the time of admission and have regular admission status. Applicants who have not been advanced to candidacy by the time twelve graduate credits have been completed may be denied further registration in the program.

Academic Progress

All students are required to complete a comprehensive Capstone exam after the successful completion of all required courses. In addition, at the conclusion of the Fall and Winter semesters, progress of every student in the program will be reviewed by the departmental Graduate Program Committee. Each student is evaluated in terms of performance in course work, research progress, fulfillment of University requirements for filing a Plan of Work, and overall professional development. The evaluation at the conclusion of the winter semester includes a written assessment by the faculty advisor of the student's strengths and weaknesses, as well
as an indication of how any deficiencies will be addressed. All course work must be completed in accordance with the academic procedures of the Graduate School (p. 38) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 336).

A student will be placed on probation for any of the following reasons;

1. Qualified admission status at the time of matriculation;
2. Receipt of a grade lower than ‘B’ in any departmental course;
3. Notification from the advisor and/or thesis committee that the student is not making adequate progress in his/her research.
4. Inappropriate, unprofessional and unsafe conduct as determined by the Graduate Program Committee.

The student will be informed in writing, at the time of being placed on probation, of the requirements for removal from probationary status. The decision to place a student on probation rests with the Graduate Program Committee.

A student may be dismissed from the program for the following reasons:

1. Failure to comply with requirements set by the Graduate Program committee;
2. Receipt of two or more grades below ‘B’ in any single semester;
3. Unauthorized leave of absence;
4. Inability to find a research advisor;
5. Receipt of a grade less than B while on probation.

Leave of Absence
A leave of absence is defined as an absence from the graduate program for one or more semesters and is only permitted for extenuating personal or medical reasons. Students who are granted a leave of absence may be required to do remedial work, depending on the length of absence from the program.

Students who have not registered for two or more consecutive semesters will be placed on inactive status and must obtain the permission of the Department Graduate Program Committee and the College Graduate Officer before registering again.

Pharmaceutical Sciences (Ph.D.)

Admission Requirements
Admission: In addition to the requirements of the Graduate School (p. 35), the applicant should present a bachelor’s or master’s degree with a major in the behavioral, biological, pharmaceutical or physical sciences.

The General portion of the Graduate Record Examination is required of all applicants. There are no minimum GRE scores required for admissions; however, applicants scoring below 150 on the quantitative portion of the exam are generally not admitted.

Applicants whose native language is other than English must demonstrate proficiency in English (p. 35) prior to beginning the program.

In addition to the regular University application, the applicant must also submit the following.

1. A general statement (300-400 words, typewritten) of reasons for selecting the program, including a resume, career objectives, possible research interests and a list of faculty members that the applicant is interested in working with for their dissertation.
2. Three letters of recommendation.

Program Requirements
Candidates for the doctoral degree must complete ninety credits beyond the baccalaureate degree, in compliance with the academic procedures of the Graduate School’s requirements for doctoral degrees (p. 336). All PhD students are required to complete four core interdisciplinary courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSC 6800</td>
<td>Introduction to Research</td>
<td>2</td>
</tr>
<tr>

<td>Advanced Drug Action and Safety I</td>
<td>3</td>
</tr>
<tr>
<td>PSC 7020</td>
<td>Advanced Drug Discovery I</td>
<td>3</td>
</tr>
<tr>
<td>PSC 7040</td>
<td>Advanced Drug Formulation and Delivery I</td>
<td>3</td>
</tr>
</tbody>
</table>

The thirty-credit dissertation registration requirement is fulfilled by registering for the courses PSC 9991, PSC 9992, PSC 9993, and PSC 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively), in consecutive academic year semesters.

Selection of Advisor
Doctoral students either select an advisor after rotating in three labs.

Seminar Presentation
All Ph.D. students will register for PSC 7850 each semester they are in the program. In total, all PhD students must present three seminars not including their defense seminar. Students register for one credit of Introduction to Seminar, PSC 7860, in the Spring/Summer semester of their first year and provide a seminar of thirty minutes in length describing a research experience during their first year. After the first academic year, all Ph.D. students will register for one credit of PSC 7870, Second Year Seminar (Winter semester) and PSC 7880, Third Year Seminar (Fall). For PSC 7870, the seminar shall be on a topic not directly related to the student’s dissertation work. The topic will be selected by the student in concert with his/her research advisor and must be approved by that semester’s seminar coordinator not less than two weeks prior to the scheduled seminar. Furthermore, the student must make available to the Department a two-page outline or summary of the seminar, including pertinent references. The outline/summary must be approved by the seminar coordinator, who will deliver it to the Department faculty, students, and staff by email not less than one week prior to the seminar. Failure to comply with this requirement shall result in a lowering of the student’s seminar grade by one full mark. PSC 7880 will take place after the student has obtained Candidacy and will be on their dissertation research.

Academic Progress
All students are required to complete a comprehensive Capstone exam after the successful completion of all required courses. In addition, at the conclusion of the Fall and Winter semesters, progress of every student in the program will be reviewed by the departmental Graduate Program Committee. Each student is evaluated in terms of performance in course work, research progress, fulfillment of University requirements for filing a Plan of Work, and overall professional development. The evaluation at the conclusion of the winter semester includes a written assessment by the faculty advisor of the student’s strengths and weaknesses, as well as an indication of how any deficiencies will be addressed. All course work must be completed in accordance with the academic procedures of the Graduate School (p. 38) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 336).

A student will be placed on probation for any of the following reasons:

1. Qualified admission status at the time of matriculation;
2. Receipt of a grade lower than ‘B’ in any departmental course;
3. Notification from the advisor and/or thesis committee that the student is not making adequate progress in his/her research.

4. Inappropriate, unprofessional and unsafe conduct as determined by the Graduate Program Committee.

The student will be informed in writing, at the time of being placed on probation, of the requirements for removal from probationary status. The decision to place a student on probation rests with the Graduate Program Committee.

A student may be dismissed from the program for the following reasons:

1. Failure to comply with requirements set by the Graduate Program committee;

2. Receipt of two or more grades below ‘B’ in any single semester;

3. Unauthorized leave of absence;

4. Inability to find a research advisor;

5. Receipt of a grade less than B while on probation.

Leave of Absence

A leave of absence is defined as an absence from the graduate program for one or more semesters and is only permitted for extenuating personal or medical reasons. Students who are granted a leave of absence may be required to do remedial work, depending on the length of absence from the program.

Students who have not registered for two or more consecutive semesters will be placed on inactive status and must obtain the permission of the Department Graduate Program Committee and the College Graduate Officer before registering again.

Pharmaceutical Sciences and Urban Sustainability (Ph.D. Dual-Title)

Students admitted to the Ph.D. program in Pharmaceutical Sciences can apply to earn a Ph.D. in Pharmaceutical Sciences with a dual-title in Urban Sustainability. This dual-title degree is designed to prepare researchers and professionals to solve challenging urban problems that require working across disciplines. Students enrolled in this dual-title program take courses that help develop knowledge and skills relating to urban sustainability. They also undertake activities such as community service, participate in colloquia, and prepare a funding proposal related to urban sustainability. The dual-title coursework follows competencies outlined by the Transformative Research in Urban Sustainability Training program.

Students must satisfy all requirements for the Ph.D. in Pharmaceutical Sciences. Additional requirements for students enrolled in the Pharmaceutical Sciences and Urban Sustainability dual-title program include:

- 4 required T-RUST core courses out of 5 choices (below)
- 12 credit hours of electives from list of elective courses (at least 7 credits must be from a department other than PSC)
- Participate in community service (2x per year)
- Participate in colloquium
- Prepare proposal to an external funding agency
- Participate in internship with a partner organization
- Develop a 2-credit capstone seminar course in collaboration with other students
- Doctoral dissertation includes 1 chapter that addresses an urban sustainability issue
- Produce a collaborative publication with a doctoral research team under the supervision of the doctoral advisor

1 In order to satisfy the elective requirement, the topic area must be relevant to the program. Students should consult with their advisor for details.
The Profession of Pharmacy

Expanded opportunities for pharmacists in patient care roles and therapeutic decision-making have evolved during the past three decades. The traditional role in drug distribution has increasingly expanded to incorporate the concept of comprehensive medication management, a philosophy which gives pharmacists the responsibility for assuring drug therapy that achieves defined outcomes and improves a patient’s quality of life. Pharmacists in contemporary practice are trained and expected to work collaboratively with the patient and the patient’s other health care providers to assure that drug therapy is safe and effective.

The ability of the pharmacist to play an active role in drug therapy is recognized at both the state and national levels. In recent years, several states have passed legislation that allows pharmacists to initiate or modify drug therapy, through collaboration with a physician or through independent authority. In Michigan, pharmacists may prescribe under the delegated authority of a licensed physician.

Pharmacist Licensure

The graduate of the four-year Pharm.D. curriculum earns the degree Doctor of Pharmacy and is eligible for the NAPLEX examination to obtain licensure as a pharmacist. Licensure, either by examination or reciprocity, is available in all states and the District of Columbia.

Internship is a professional and practical experience under the supervision of a preceptor in a pharmacy approved by the Michigan State Board of Pharmacy, beginning after the student has been licensed by the Board of Pharmacy as an intern. Students must obtain a Michigan Internship License when they begin the professional curriculum of the College.

For additional information regarding internship, examination, or licensure in Michigan, write:

Michigan Department of Licensing and Regulatory Affairs
Ottawa Building
611 W. Ottawa
P.O. Box 30004
Lansing, MI 48909

Reciprocity information is available from:

National Association of Boards of Pharmacy
600 Feehanville Dr
Mount Prospect, IL 60056

• Pharmacy (Pharm.D. (p. 350))

Pharmacy (Pharm.D.)

The College offers to qualified applicants a professional program leading to the Doctor of Pharmacy (Pharm.D.). The Doctor of Pharmacy program develops a highly qualified expert in pharmacotherapy who is prepared to provide professional leadership in the practice of pharmacy.

Admission Requirements

Admission to the Doctor of Pharmacy program is competitive and the following criteria are used to evaluate applications from prospective students. Admissions decisions are made by the Admissions Committee. The committee evaluates all factors, including interview evaluation. Admission granted to students while they are in the pre-professional program will be contingent upon their completion of that program with grade point averages as indicated below.

1. Minimum core grade point average of 2.75 (on a four-point system), calculated on the final grades earned in the required pre-professional courses. Completion of core courses with minimum grades does not guarantee admission.
2. Minimum undergraduate grade point average of 2.75 (on a four point system).
3. Promise of success in a professional curriculum. Transcripts are evaluated for evidence of continued success in a full-time, science-based curriculum. Patterns of course repetition and excessive withdrawals are considered. It is recommended that applicants repeat no more than two mathematics and science courses in order to improve grades.
4. Applicants with a prerequisite g.p.a. lower than 3.0 must take the Pharmacy College Admissions Test (PCAT). The PCAT must be taken no later than the year prior to admission. Applicants are preferred to have a minimum composite PCAT percentile score of 50. Scores on the individual components of the PCAT examination will be reviewed by the Admissions Committee.
5. All applicants must complete the Wayne State University English Proficiency Requirement during the winter semester prior to fall admission. Applicants not enrolled at Wayne State University may arrange for out-state testing to satisfy this requirement at their present educational institution; for information, call the Testing and Evaluation Office: 313-577-3400.
6. A personal interview is required.
7. Nonacademic factors including work experience, community service and leadership abilities will be evaluated.
8. A criminal background check is performed on all accepted applicants and is evaluated prior to an applicant matriculating into the program.

Admission: Students are admitted to the Doctor of Pharmacy program for the fall semester only. Enrollment is limited to applicants who have met the general requirements for admission to the University by the stipulated deadline and present evidence of professional admissibility and promise of academic and professional competence in pharmacy.

The applicant must have completed (or be pursuing completion of) pre-professional core courses at the undergraduate level, with a grade point average of 2.75 or better, and demonstrated competency in computer literacy, critical thinking, and oral communication.

For complete information on admission, and pre-professional and professional undergraduate program requirements, consult the Wayne State University Undergraduate Bulletin (http://bulletins.wayne.edu/undergraduate/college-pharmacy-health-sciences/pharmaceutical-sciences/pharmacy-pharmd/).

Application: Deadline for submission of all application materials is November 1 each year. Applications are available through the Pharmacy College Application Service (http://www.pharmCAS.org). A competitive score on the Pharmacy College Admissions Test (PCAT) is also required for applicants with a prerequisite g.p.a. lower than 3.0. Only candidates who have completed all prerequisites by the end of the winter term preceding the fall term of prospective admission, are considered for admission.

Program Requirements

The Doctor of Pharmacy requires a minimum of 124 credits in the professional program. All course work must be completed in accordance
with the academic procedures of the Graduate School (p. 38) governing graduate scholarship and degrees and the College of Pharmacy and Health Sciences (p. 336).

A student must complete all curriculum and program requirements, remove any marks of ‘I’ or ‘Y’, and be recommended for the degree. The student must complete the required minimum number of credits, elect courses in the proper sequence in the curriculum shown below, and meet all course prerequisites and corequisites, unless excused from doing so by the Dean.

A graduate of the following four-year professional curriculum earns a Doctor of Pharmacy (Pharm.D.) and is eligible for the NAPLEX exam leading to licensure as a pharmacist. Students should also note that they may apply for a Bachelor of Health Sciences with a concentration in Pharmaceutical Sciences after completion of their first year of the Pharm.D. program. Students are eligible once they have completed a minimum of 120 credits, including all university general education requirements, professional courses in the P1 year, and any electives needed to reach that 120 credit minimum. The B.H.S. degree will allow students the opportunity to enter other fields of advanced study which require a baccalaureate degree, but granting of the B.H.S. degree does not qualify for licensure; application for licensure will occur after completion of the Pharm.D. degree.

1 A total of 6 credits of professional electives must be taken between the start of the Second Year Winter Semester and completion of the Third
Year Winter Semester; only Directed Study electives may be taken prior to the Spring/Summer of the Second Year. Students in the Research Scholars Track will fulfill the professional elective requirement with 4 credits of PHA 5195 (Research Scholars Elective) in addition to PHA 4395 Research Scholars: Research Development, subject to the provisions outlined in the Research Scholars Concentration.

2 PPR 6165 and PPR 6175 are offered in both Fall and Winter terms; students will be assigned to one of these courses in the Fall and the other in the Winter.

**Pharm.D. Practice Experiences**

To provide the pharmacy student with education in the application of knowledge he/she has gained in courses in the curriculum, pharmacy practice experiences are scheduled throughout the Pharm.D. program. Pharmacy practice experiences give the student the opportunity to apply his/her pharmaceutical education directly to patients in a variety of pharmacy settings: community, ambulatory, and institutional locations. Practice experiences are required of all students.

During the fourth professional year (P-4), required pharmacy practice experiences include General Community Practice, General Hospital Practice, Ambulatory Care, and Inpatient/Acute Care General Medicine. An additional experience involving patient care is also required. Students have two elective experiences which may be in patient care or non-patient care settings, such as pharmaceutical sciences or pharmacy practice research, managed care, pharmacy organizations, institutional or community management, or pharmaceutical management.

**Requirements:** Before students are scheduled to visit practice environments, they must provide health clearance documentation, proof of professional liability insurance, personal medical insurance, and Basic Cardiac Life Support certification; and sign a travel waiver. Students provide their own transportation to practice sites. A criminal background check may also be required by a practice site before a student can visit that site. Additional information on practice experience requirements and when they are required may be obtained from the College. These change regularly. The most recent requirements can be found on the website (http://www.cphs.wayne.edu/pharmd/resources.php).

**Research Scholars Concentration**

The Research Scholars concentration is offered to students who desire to complete a focus aimed at the development of research related knowledge and skills. There are a limited number of seats available and interested students must apply and be accepted to take this Concentration. Students are selectively offered a position in the Research Scholars Concentration and complete a longitudinal research project as part of that concentration. This program requires completion of PHA 4395 Research Scholars: Research and Development. In subsequent semesters, 4 credit hours of Research Scholars elective (PHA 5195) must be taken between Winter P2 and Winter P3 year, as agreed upon by the faculty research mentor and Research Scholars Program Director. Students electing to and being accepted into this concentration must also complete 1 additional mandatory research focused Advanced Pharmacy Practice Experience (PPR 7195) for 4 credit hours in the place of an elective Advanced Pharmacy Practice Experience offering.
School of Social Work

Dean: Sheryl Kubiak

The mission of the School of Social Work at Wayne State University is to transmit, develop, critically examine, and apply knowledge to advance social work practice and social welfare policy for the promotion of social, cultural and economic justice for poor, vulnerable, and oppressed population groups and for society as a whole. This mission is accomplished in a learning environment designed to prepare ethical and competent social work practitioners, in primarily urban settings, for social work practice, for conducting research with particular relevance to urban populations; and for innovative leadership and service to the urban community and the social work profession. Both faculty and students serve the community by participating in professional organizations, civic and community groups, and human service organizations.

The School of Social Work is an integral part of Wayne State University, an urban university in a culturally diverse, industrialized, metropolitan area. The School demonstrates its commitment to addressing the problems of people living in this environment through its teaching, research, and service activities. Through applied research, work in the classroom and placements in human service organizations that are the sites for field education, students learn how to provide effective social services and to influence social policies.

The School prepares professionals to help alleviate the conditions of those affected by poverty, racism, sexism, ageism, homophobia, unemployment, or mental health challenges and physical and/or developmental impairments. Students learn evidence-based methods of intervention with individuals, families, groups, communities, and organizations. Doctoral students learn the advanced research competencies required to engage in applied research for social work practice and social welfare policy. In synchrony with its emphasis on serving people in the Detroit metropolitan area, the School shares with the University a commitment to recruit students of minority ethnic backgrounds.

Accreditation

The undergraduate program leading to the Bachelor of Social Work and the graduate program leading to the Master of Social Work are accredited by the Council on Social Work Education, the authorized national accrediting body for social work education. There is no accreditation process for doctoral programs in social work. However, the School is a member of the Group for the Advancement of Doctoral Education in Social Work, the professional body that provides guidelines and oversight for doctoral degree programs in this field.

Programs

The School of Social Work prepares students at the undergraduate and graduate levels for entry level generalist practice or advanced practice in the profession. Its principal programs lead to the Bachelor of Social Work, the Master of Social Work, and the Doctor of Philosophy degrees. The Bachelor of Social Work program prepares students for entry level generalist professional practice. The Master of Social Work degree program prepares graduates for advanced professional practice. This program includes concentrations in interpersonal practice and innovation in community, policy and leadership. The Doctor of Philosophy in Social Work prepares social work educators and scholars whose research on pressing urban problems will advance social work practice and social welfare policy. The Doctor of Philosophy degree program includes rigorous training in qualitative and quantitative research methods, advanced course work in social work as well as completion of a cognate area in another discipline and mastery of specialized social work content areas.

Post-degree courses are available to graduates who have completed bachelor’s and/or master’s degrees. The School offers Dual Title and Graduate Certificate Programs, as well as special institutes and workshops for individuals employed in the field of social welfare and school social work. Continuing education in social work is also offered through the School’s Continuing Education Program.

School Social Work Approval Program

Students enrolled in the program leading to the Master of Social Work degree may qualify concurrently for Department of Education temporary approval for social work positions in Michigan school districts. Specific information on approval requirements for students and M.S.W. graduates may be obtained from the Office of Admissions and Student Services, School of Social Work.

Information Meetings: The School holds informational meetings every two weeks to introduce its undergraduate and graduate programs. Informational meetings for the Ph.D. Program are held monthly during the fall semester of each academic year. Potential applicants are encouraged to attend one of these meetings prior to applying. Meeting schedules for the B.S.W. and M.S.W. programs may be obtained by calling the School’s Office of Admissions and Student Services (313-577-4409). Meeting schedules for the Ph.D. Program may be obtained by calling the Ph.D. Program Office (313-577-4419). Meeting schedules for all programs are also posted on our website (http://www.socialwork.wayne.edu/).

Graduate Degree Programs

- Social Work (M.S.W.) (p. 353)
- Social Work (Ph.D.) (p. 357)
- Social Work and Anthropology (SWAN Ph.D.) (p. 359)
- Social Work and Gerontology (Ph.D. Dual-Title) (p. 361)
- Social Work and Infant Mental Health (M.S.W. or Ph.D. Dual-Title) (p. 361)
- Social Work and Public Health (M.S.W./M.PH Joint Degree) (p. 361)

Social Work (M.S.W.)

The School offers full-time and planned part-time study programs leading to the Master of Social Work. This program prepares graduates for advanced professional practice in social work. The full-time degree program consists of four semesters of study in which field work is concurrent with class work. Students spend two full days a week in the field and two days in classes for two consecutive years. With approval of the graduate officer, students in the second year may elect to have three full days a week in the field. Required classes in the full-time program may be offered in day, evening, and Saturday sessions. Web-based online courses are also offered.

The planned part-time program permits students to complete degree requirements over a three-year or a four-year period. Part-time study is open only to students who have been formally admitted to the program by the Admissions Director. Details of the several phases of class and field work involved in this program, as well as specific information on admissions requirements, may be obtained from the Office of Admissions and Student Services, School of Social Work.

Academic Regulations (M.S.W.)

For complete information regarding the academic rules and regulations of the University, students should consult the Academic Regulations.
Students in the School of Social Work are responsible for informing themselves of all rules, regulations, and requirements, complying with all official policies and procedures, and fulfilling all course and degree requirements in proper sequence with satisfactory scholarship. The student should consult the Academic Services Officer or the M.S.W. Academic Advisor concerning any academic matter. Students should consult the Academic Services Officer or the M.S.W. Academic Advisor when developing a Plan of Work or selecting electives. The primary responsibility for counseling with the Academic Services Officer or Academic Advisor and for seeking information on policies, procedures, degree requirements, and all academic matters rests with the student.

The faculty of the School of Social Work has the responsibility to require a student to withdraw at any time prior to receipt of the degree when, in its judgment, the student fails to do satisfactory work. Such decisions may be based on deficiencies in performance in class or field or in personal fitness for the profession. The faculty has adopted a set of criteria and procedures for academic termination. Every effort is made to assist students whose work suffers as a result of conditions beyond their control such as personal illness, serious illness in the immediate family, or similar emergencies. The School's Policies and Procedures related to Academic Performance (Termination, Grade Appeals, and Reinstatement) and Student Professional Performance Standards are available in the Office of the Dean and the Office of Admissions and Student Services.

Admission Requirements

Eligibility for admission requires a bachelor's degree from an accredited undergraduate program and an earned minimum G.P.A. of 3.0 or above. A G.P.A. of 2.75 to 2.9 may be considered based on program capacity and strength of the application. Admissions applications are reviewed when all required supporting materials have been received by the program. New students admitted into the foundation (core) year of the Master of Social Work program begin in the Fall term of each academic year. Applicants admitted into the advanced standing program begin in the summer semester of the academic year. All applicants are encouraged to submit applications as soon as possible as admissions will close once program capacity has been reached. Applications to the program may be submitted up to one year prior to the start of the beginning term of the selected program. The MSW#Pre#Candidate Master with Advanced Standing Status Program begins the summer term. All application materials must be submitted by the application deadline of March 1. The MSW#Core/Regular Status Program begins the fall term. Applicants are encouraged to apply and submit all application materials to the program by the priority processing date of October 1st. All application materials must be submitted by the admissions deadline of April 1st.

Applicants to the full-time or part-time program leading to the Master of Social Work must complete the online application (http://www.gradadmissions.wayne.edu/apply.php) and submit payment of the application fee. All application documents are submitted online. Official transcripts are to be submitted to the Office of Graduate Admissions, Wayne State University, directly from all previous college(s) or universities where college credits have been earned. A resume, personal interest statement, and two references are included in the online application documents to WSU. Applicants must

1. hold a four year baccalaureate degree from an accredited institution;
2. have completed thirty semester credits in academic work distributed in the social, behavioral, and biological sciences, and in English and the humanities;
3. show evidence of suitability and fitness for the profession and the ability to successfully undertake graduate professional education in social work.

Applications for admission to the School of Social Work for the Master of Social Work degree are given careful review in order to select those students best able to fulfill the requirements for professional social work education. The School reserves the right to make the final determination about all admissions decisions.

Admission to the Advanced Standing Program

An applicant for admission to the Master of Social Work program who holds a baccalaureate degree from an undergraduate social work program accredited by the Council on Social Work Education (CASSW) may be admitted with advanced standing. The School reserves the right to make the final determination about all Advanced Standing Program admissions decisions.

Students admitted with advanced standing status are required to complete three graduate credits toward the M.S.W. degree during the summer term following admission but are strongly encouraged to complete six graduate credits. In order to complete the degree program, a total of thirty-six credits are required in the advanced year of the curriculum as prescribed within the student’s selected concentration area. Students must complete SW 7160 or SW 7840 before enrolling in the advanced concentration area curriculum courses.

Students admitted with advanced standing may be permitted to complete the requirements for the Master of Social Work on a part-time basis. Students admitted to such a planned part-time program are required to complete SW 7160 or SW 7840 and encouraged to complete an elective during the summer term immediately following admission. The additional credits may be completed in subsequent semesters. The School does not grant credit for life experience or previous work experience.

Admission to Non-Degree Study

Students may enroll in certain classes as pre-master's registrants and will be permitted to accumulate a maximum of nine credits in this status. Pre-master's students may not enroll in the field work courses and certain other courses in which specific prerequisites and/or corequisites preclude their registration. If the student is subsequently admitted to a program leading to the Master of Social Work, credits earned in a pre-master's classification may be applied toward the degree.

Applicants for pre-master's, non-degree study must hold a baccalaureate degree from a college or university of recognized standing and have completed a minimum of thirty semester credits of academic work distributed in the social and biological sciences and in the humanities.

Applicants must complete the online application (http://www.gradadmissions.wayne.edu/apply.php) indicating non-degree status in the School of Social Work and payment of application fee.

Students applying for pre-master's study in the School of Social Work who have already been admitted and registered in the Graduate School of Wayne State University should consult the School of Social Work Office of Admissions and Student Services regarding the procedure for a change of college and/or status.

Transfer of Graduate Credits

Credits for professional social work courses earned at other graduate programs accredited by the Council on Social Work Education may be accepted toward the Master of Social Work degree. Students, however,
must meet all of the specific course requirements or equivalencies in the program leading to the Master of Social Work at this school. A maximum of thirty credits may have been completed in another accredited school of social work. Transfer students must be in good standing in the school from which they transfer, must meet all other requirements of this school, earn a minimum of thirty credits at this school, and must be in residence during the final semester prior to graduation.

A maximum of nine graduate credits from the social work curriculum or from curricula closely related to social work earned in an accredited graduate program may be accepted toward the Master of Social Work if, in the judgment of the faculty, the credits are appropriate as elective credits in the social work curriculum.

Transfer credit must be of a ‘B’ grade or better and certified as graduate level credit on an official transcript. Courses approved for transfer from outside or within the University cannot have been applied as credit toward a prior degree. Extension credits earned at institutions outside the State of Michigan cannot be applied toward a graduate degree.

Transfer credits do not alter the residency policy and time limitations governing School of Social Work degrees. Students may petition for the transfer of graduate credit only after they have been admitted to the M.S.W. degree program.

Nondiscrimination Policies

The School is bound by and actively endorses University policies of nondiscrimination respecting all persons regardless of race, color, sex, national origin, religion, age, sexual orientation, marital status, or physical or mental disability, and which expressly forbid sexual harassment or discrimination in hiring. The School prohibits discrimination against individuals because of political orientation. Copies of School and University nondiscrimination policies (p. 16) may be obtained in the Office of the Dean.

Withdrawal from the M.S.W. Program

A student who has been admitted to the Master of Social Work program shall be considered to have withdrawn from the program if the student is not enrolled in a course and/or field work during any semester of a planned program of study within the framework of the plan which has been approved. In order to withdraw in good standing, either permanently or temporarily, students must formalize their withdrawal with the School of Social Work Office of Admissions and Student Services. Under certain circumstances, with approval from the M.S.W. Coordinator, a student may be granted a leave of absence from the school for up to one calendar year. Copies of procedures for withdrawal or leaves of absence may be obtained from the SSW Office of Admissions and Student Services.

Readmission

Students who had been enrolled in a planned program leading to the Master of Social Work, who have withdrawn from the program and who wish to be considered for readmission to complete degree requirements, must follow regular procedures for admission to the School. Generally, students are required to complete two continuous terms of field work, readmitted students who had previously completed one term of field work will be required to repeat this term, and may be required to enroll concurrently in a course or courses in social work practice methods. Students who have withdrawn and wish to be readmitted may be required to obtain an assessment of their physical or mental health (or both) from a health professional approved and/or selected by the School.

Degree Application

Application for the degree must be filed no later than the end of the fourth week of classes in the semester in which student expects to complete the requirements for the degree.

Time Limitation

Students have a six-year time limit to complete requirements for the Master of Social Work.

Attendance

Students are expected to attend all sessions of courses for which they are registered and to notify the instructor or the instructor’s secretary prior to the class session, if possible, when the student may be absent due to illness or similar emergency. Each instructor may specify an attendance policy in the course syllabus, and announce it at the beginning of a course. Consistent or extended absences may jeopardize the student’s grade in the course and, possibly, the student’s enrollment in the School.

Field Education

All students enrolled in and , Field Work for Social Workers I and II, are required to carry professional liability insurance (now provided by the school) as a condition of field placement. The Field Education Manual contains a description of the field education program, and the policies and procedures related to the program. Students are responsible for observing the procedures governing field work practice which are detailed in the manual. The Field Education Manual is posted on the School’s website (http://www.socialwork.wayne.edu/) and may be downloaded and saved.

Field Education Health Clearance Policy

The School may require students in field placement to obtain assessments of their physical or mental health from health or mental health professionals approved by the School. The School of Social Work reserves the right to refuse to place or direct a student in field education if the physical or mental health status of the student indicates such action is warranted in order to safeguard clients, agencies, the student, other students, or the School.

The Master of Social Work degree requires a minimum of sixty credits of graduate course work, completed in accordance with the regulations of the Graduate School (p. 38) and the School of Social Work. The program includes a generalist curriculum at the first level, and at the second level, one of two specialized concentrations: Interpersonal Practice or Innovation in Community, Policy and Leadership. The generalist curriculum provides the foundation for the specialized curriculum.

Generalist Curriculum

The generalist curriculum provides a knowledge base for later study of advanced practice in the concentration. The generalist curriculum has content in the six major curricular areas: social work practice, human rights and social justice, human behavior and the social environment, social welfare policy and services, research, and field education. The generalist curriculum stresses fundamentals and knowledge of social work practice as they relate to individuals, families, small groups, organizations, and communities. In field education, theory is translated into practice and includes micro, mezzo and macro practice experiences.

</tr>
</tbody>
</table>
Students may waive one or more of these generalist courses by successfully completing a waiver exam. Successful completion of a waiver exam will signify the course is waived without graduate credit thus freeing the student to take other courses to meet degree requirements.

Declaring Your Concentration

During the generalist year, students declare their interest in a concentration by the end of the Fall semester. Full-time MSW students take their first concentration course – either SW 7160 DSM in Clinical Social Work Practice or SW 7840 Community and Organizational Measures during the Winter semester of their first year. Students admitted with advanced standing status declare their interest in a concentration when they enroll and take their first concentration course during the summer semester of their first year.

Advanced Curriculum - Concentrations

The advanced curriculum builds on the knowledge, values, and skills gained in the generalist curriculum, with the objective of increasing the student’s competence for dealing with greater complexities of social work practice by focusing on areas of social concern. This advanced portion of the M.S.W. program is designed to provide specialized advanced knowledge and practice skills. Students choose one of two concentrations in the advanced year.

Students must meet the requirements for a concentration:

1. satisfactory completion of specific concentration courses in practice methods and policy
2. satisfactory completion of a field education placement in the concentration for each of the semesters of the advanced curriculum.

OPTION I: Interpersonal Practice (IP):

The Interpersonal Practice (IP) concentration is for students who want to focus their practice primarily on individuals, families, and groups. The concentration provides students with broad-based knowledge and skills needed for IP practice in a variety of settings, with opportunities to focus on specific practice areas, theoretical approaches or modes of intervention.

This concentration area offers students grounding in contemporary Interpersonal Practice theories and methods. Students are required to take three foundation Interpersonal Practice courses: DSM in Clinical Social Work Practice (taken during the winter semester of the first year of the MSW program or in the summer semester prior to the second year), Interpersonal Practice Theories and Application, Assessment Skills for Interpersonal Practice, and one intervention course (SW 8345, SW 8355 or SW 8335). Students may then choose from a range of interpersonal practice electives that focus on contemporary techniques and evidence-based interventions in interpersonal practice with children, families, and adults across a wide range of social work settings and practice areas. Students may also choose to take electives from the Innovations in Community Policy, and Leadership specialization or from specific focus areas to deepen their knowledge and skills in specific areas.

OPTION II: Innovation in Community, Policy and Leadership (I-CPL):

The Innovation in Community, Policy and Leadership (I-CPL) concentration contextualizes student learning into three streams of practice including developing and sustaining effective communities, developing and sustaining effective policies and developing and sustaining effective organizations through leadership. Students may choose from a range of ICPL electives or electives from the Interpersonal Practice curriculum or from social work focus areas that will extend and enhance their knowledge and skills in specific areas.

I-CPL students will deepen their understanding of settings where this practice can take place through field placements which relate to urban social planning, community development, policy analysis and advocacy, program development and system coordination.

Social Work (Ph.D.)

The School offers full-time and part-time study programs leading to the Doctor of Philosophy (Ph.D.) degree. The doctoral curriculum is intended to provide social work educators with rigorous training in social work theory and research methodology to address contemporary issues associated with social work practice or social welfare policy at all levels. In addition, the doctoral program offers students the option of enrolling in a clinical scholarship concentration. The clinical scholarship concentration is designed to prepare graduates for important careers in clinical social work teaching, scholarship and research, as well as for leadership positions in the greater clinical social work community. A minimum of ninety credits beyond the foundation year of the M.S.W. are required for graduation.

Admission Requirements

All applicants must meet the admissions standards of the Graduate School (p. 35) and the School of Social Work. The doctoral degree in social work indicates not merely superior knowledge of the discipline but also intellectual initiative and the ability to design and conduct independent research and evaluation of social work practice and/or social welfare policy. Students in pre-candidacy will be evaluated on the basis of these attributes as well as on their grade-point performance. The doctoral program is open only to highly qualified students and all applications for admission to the program must have the approval of the School's Doctoral Steering Committee.

Doctoral Program Admission Requirements

In addition to the requirements for admission to the Graduate School, it is strongly preferred that candidates have:

1. **Grade Point Average:** A minimum undergraduate and graduate grade point average of 3.5 (on a 4.0 scale)
2. **Prior Degree:** An M.S.W. degree from a CSWE accredited institution. Applicants not having an M.S.W. must complete established requirements for the M.S.W. degree while working towards the Ph.D.
3. **Practice Experience:** Two years post B.S.W. or post M.S.W. social work practice experience
4. **Graduate Record Examination:** GRE scores (verbal, quantitative, and writing) taken within the three years prior to the application should be included in the application. Scores at or above the 50th percentile on the verbal, quantitative, and writing components of the GRE are preferred.
5. **English Proficiency:** International students must meet the English Proficiency requirements for Wayne State University. For more information, see https://wayne.edu/admissions/international/english-proficiency/.
6. **References:** Applicants should submit three professional references from former supervisors or instructors. At least two of these should be academic references from social work faculty, researchers and/or practitioners holding the Ph.D., J.D., or medical degree who can evaluate the applicant’s scholarship and aptitude for research.
7. **Statement of Professional Goals:** Applicants should write a brief statement describing their motivation for doctoral study, career goals, research interests, and interest in research mentorship by specific doctoral program faculty. In order to determine a potential fit of research interests with faculty research programs, applicants are encouraged to view faculty interests on the School’s website (http://www.socialwork.wayne.edu/).
8. **Academic Scholarship:** Applicants should submit one example of scholarly writing (published or unpublished). The writing example should be first-authored or sole authored work that demonstrates the
applicant’s ability to critique, synthesize, and make conclusions about social work relevant issues or problems.

9. Interviews: Promising candidates for admission will be invited to complete an in-person interview with program faculty for final consideration after the above requirements have been completed.

10. Applications: Applicants must submit the School of Social Work Application for Admission to the online Graduate Application, specifying that they are applying for fall admission to the Social Work Ph.D. Program. Students are also required to specify a Ph.D. concentration (policy and practice or clinical scholarship)

Application Deadline: Completed application packets must be received by December 18 prior to the fall term of desired admission.

Admission decisions are based upon all materials submitted and reflect careful consideration of the applicant’s professional goals, research interests, and the resources of the School of Social Work.

Program Requirements

Candidates for the Doctor of Philosophy must complete a minimum of ninety graduate credits, including up to 25 credits transferred from the MSW and thirty earned through the dissertation. The thirty-credit dissertation registration requirement is fulfilled by registering for SW 9991, SW 9992, SW 9993 and SW 9994 (Doctoral Dissertation Research and Direction I, II, III, and IV, respectively) in consecutive academic year semesters upon attaining doctoral candidate status (see below). All course work must be completed in accordance with the academic procedures of the School of Social Work and the Graduate School governing graduate scholarship and degrees.

Plan of Work: Doctoral students structure their course work in terms of an area of specialization within the discipline of social work. Doctoral students, with the assistance of their academic advisor, plan a sequence of studies. A preliminary plan of work, approved by the academic advisor and the Ph.D. Program Director, should be filed by the end of the first month in the program. Petitions for the Transfer of Credits should be attached to the Plan of Work. The Plan of Work should be finalized with the Graduate School before the student earns 40 credits in the doctoral program. Students are responsible for discussing program requirements and course changes with the Director of the Doctoral Program prior to registration for each semester. Students who have not yet attained the MSW degree should also regularly communicate with their MSW advisors to ensure that they are meeting MSW program requirements. Students are required to notify the doctoral director and advisor(s) in writing of any requests for changes in their Plan of Work.

Annual Review: Student progress toward degree completion will be monitored annually by the Steering Committee and Director of the Doctoral Program.

Residency: The Ph.D. requirement of one year of residence is met by completion of six graduate credits in course work (not dissertation) over two successive semesters.

Candidacy: Admission to candidacy for the doctoral degree will usually require two years of full-time graduate study beyond the M.S.W. It is granted upon fulfillment of the following requirements:

1. Completion of School and Graduate School residence and course requirements.
2. Filing of an approved Plan of Work with the Graduate School.
3. Completion of all theory, research methods, and statistics requirements.
4. Completion of the qualifying examination.
5. Selection of the dissertation advisor and committee

Qualifying Examinations must be applied for following completion of all of the required social work courses in the doctoral curriculum. The Qualifying Examination requires of students to engage in critical analysis of the state of research, practice, and knowledge in their substantive and cognitive areas, and for the reflective presentation of innovations in perspectives, theory, knowledge, and research design, methods and strategies that will advance social work practice and/or policy. By the end of the qualifying examination process students should be well grounded in their substantive areas of research and demonstrate an ethically sound, independent and original perspective regarding inquiry into social work practice. The subject of the Qualifying Examination is selected in consultation with the Doctoral Program Steering Committee.

Approval of Dissertation Prospectus: The candidate is required to prepare a Dissertation Prospectus and have it approved by their dissertation committee prior to beginning work on the dissertation. The Prospectus and Committee form must be submitted to and approved by the Graduate School.

Submission of Dissertation: The candidate is required to submit a doctoral dissertation on a topic satisfactory to his/her Dissertation Committee, designed to demonstrate proficiency in social work relevant research and scholarship, a capacity for ethical, independent, and creative research, and the ability to perfect and follow through on an appropriate research or evaluation design.

Dissertation Defense: Upon completion of the dissertation, the candidate is required to make a public presentation of his/her research. The Dissertation Public Lecture-Defense form must be completed by the candidate and the Dissertation Committee indicating readiness for public presentation of the candidate’s research and dissertation. This form must be submitted to the Graduate School at least two weeks prior to the date of the defense. The Dissertation Public Lecture-Defense includes the public lecture and defense where the candidate presents the results of the dissertation research with the audience and the dissertation committee, a private meeting between the dissertation candidate and the committee, and the evaluation by the dissertation committee whereby it is determined whether the candidate has passed the dissertation defense. Upon completion of this process, the Dissertation Public Lecture-Defense form is returned to the Graduate School with the recommendations of the Dissertation Committee.

Time Limitations: Students have a seven year time limit to complete all requirements for the Ph.D. The seven-year period begins with the end of the semester during which the student is admitted to doctoral study and commences working toward meeting requirements for the degree.

Doctoral Program Curriculum

Social Work Transfer Courses: (up to twenty-five MSW or post-MSW certificate credits relevant to the student’s proposed area of research) approved by the Director of the Doctoral Program.

Elective Coursework

In addition to the required coursework identified above, all students will be required to complete twenty-five credits in elective courses. Students may be eligible to transfer up to twenty-five M.S.W./post-M.S.W. credits of coursework. Courses that may be eligible for transfer include Social Work courses in theory, research, or policy, or electives taken during the Advanced Year of the M.S.W. program and/or post-master's certificate program that are relevant to the student's proposed area of research. Transfer credit must be approved by the Director of the Doctoral Program.

Social Work and Anthropology (SWAN Ph.D.)

An admissions moratorium is in effect for this program for the 2022-23 academic year.

The Social Work/Anthropology (SWAN) doctoral degree draws on the strengths of both fields in theory, social history, research, policy and practice. The SWAN degree combines the approaches of each discipline to make use of the program's urban location to foster scholarship focusing on global issues of the 21st century, such as the re-invention of post-industrial cities. Students receive a thorough grounding in the theoretical and applied aspects of both Social Work and Anthropology and apply this knowledge to pursue scholarship in such areas of interest as urbanism, globalization, and social/cultural organization. SWAN students follow a curriculum that draws from existing courses in each discipline, including a core course that focuses on the integration of the two fields. Content combining the perspectives of both disciplines is included in the qualifying exam and dissertation research requirements for the degree.

This program prepares scholars for work in several different occupations, including faculty positions in social work and anthropology as well as work in governmental, non-profit, and international settings.

Academic Scholarship: All course work completed to satisfy the following degree requirements must be done in accordance with the academic regulations (p. 38) of the Graduate School. All students are required to maintain a 'B' average. A grade of 'B-minus' or below in two courses will be sufficient reason to dismiss a student from the program. For the purposes of evaluating this condition, a grade of 'WF' is considered a failing grade.

Admission Requirements

Admission to this program is contingent upon admission to the Graduate School (p. 35). Only a limited number of applicants who have demonstrated superior ability and potential will be accepted in this program.

Prospective students should apply for admission to either the Social Work or Anthropology Ph.D. programs and specify, using a pull-down menu, their request for admission to the SWAN program. They must meet the admissions standards of both the Graduate School and the SWAN program. Students who do not possess an MSW should apply separately to the MSW program and notify the SW doctoral director of their application to both the MSW and SWAN programs. All application and admission materials must be submitted to the Office of Graduate Admissions by January 10 to begin in the following fall semester.

The Plan of Work must be submitted before forty credits have been completed and before the qualifying examination is scheduled.

The Doctor of Philosophy requires ninety credits beyond the baccalaureate degree, thirty of which must be earned as dissertation credits.

A minimum of thirty credits of graduate work must be at the 7000-level or above (excluding dissertation credits). Students must petition the SWAN Steering Committee for course equivalents, substitutes, or any other exceptions to the SWAN requirements.

Once the student has attained candidate status, he/she is required to register for doctoral dissertation credits. Students must register for 9000-level credits (SW 9991, SW 9992, ANT 9993, and ANT 9994) through the Graduate Office and must fulfill 7.5 credits in these courses each semester for four consecutive semesters (excluding spring-summer). All
course work completed to satisfy the following degree requirements must be done in accordance with the regulations of the Graduate School (p. 38), the College of Liberal Arts and Sciences (p. 224), and the School of Social Work (p. 353).

**Coursework:**

Student who have not attained the MSW degree are required to obtain this degree prior to graduating with a SWAN PhD. See the MSW Graduate Bulletin entry for details. Students are required to meet with their MSW adviser to develop an MSW plan of work that meets MSW program requirements. With the approval of the SWAN committee and the MSW coordinator, a limited number of SWAN courses may be counted towards MSW requirements.

The following courses, or their equivalents, must be completed by ALL students:

</tbody>
</table>

**Total Credits: 48**

**Elective Credits:** In addition to the required courses, listed above, a student will select three (3) credits of Social Work electives from either: SW 9050 First Year Seminar (1 cr), SW 9240 Social Work Education (3 cr), SW 9420 Research Practicum (2 cr), SW 9450 Writing for Publication and Presentation (1 cr), or SW 9650 Job Search Strategies. Six (6) electives are also selected from the student’s research area.

**Qualifying Exams:** The SWAN steering committee will design and administer the SWAN qualifying examinations so that students can demonstrate the breadth, depth and mastery of their theoretical and empirical knowledge related to social work and anthropology theory, research methods and data analysis approaches as well as their substantive domain of knowledge. Students will demonstrate this knowledge through a written examination consisting of four sections:

1. statistics,
2. culture area,
3. research methods, and
4. a substantive paper demonstrating students’ application of social science theory and SWAN knowledge to their intended research domain.

The statistics exam will be an in-school, open book exam developed by faculty teaching the required statistics courses. For the take home theory, topic area and substantive paper components, students will, in consultation with their academic advisers, select a three-person examination committee consisting of social work and anthropology faculty. These examination committee members will meet with students to develop reading lists and questions that students will then address in written take-home exams.

Students who fail one or more sections of the qualifying examination will be expected to retake only those sections that they failed. Students who fail one or more sections of the examination for a second time will be dismissed from the program.

**Foreign Language Requirement:** Students doing SWAN research fieldwork in non-English speaking settings will be expected to have 3 semesters of a foreign language or demonstrate fluency in their field language. These students need to take classes to complete the Anthropology Foreign Language requirement (3 semesters of the same foreign language at the undergraduate level; language credits do not count towards the 90 credits needed for a Ph.D.).

1. a grade of ‘C’ or better in one and one-half years of work in the language offered to meet the requirement (three semesters or five quarters of coursework at any accredited college or university);
2. satisfactory performance on a standardized (Educational Testing Services) examination; or
3. certification of competence to carry out research in the relevant language by a member of the graduate faculty of Wayne State or an equivalent university. The nature of the tools of research and requirements for satisfactory proficiency will be determined by each student’s doctoral committee. Additionally mandated tools of research may include additional statistics, mathematics, computer science and/or a field language.

**Additional Information:** A more detailed discussion of this doctoral program is available on the SWAN (http://clas.wayne.edu/swan/) website. Students should also consult the Graduate School’s general requirements for doctoral degrees (p. 30).
Social Work and Gerontology (Ph.D. Dual-Title)

The school offers a Dual-Title Degree in Gerontology. Gerontology is a multi-disciplinary field that integrates theory, practice knowledge, and research methodology to benefit older adults. Gerontologists trained at the Ph.D. level have the opportunity to play a key role in developing gerontological practices and in training new generations of practitioners and researchers in the field. The dual-title degree requires coursework in addition to the conventional social work doctoral program. Twelve credits are required for the dual-title that focuses on gerontological content in lieu of a cognate.

<table>

<td>Physical and Psychosocial Issues in Aging</td>
<td>3</td>
</tr>
<tr>
<td>SOC 7020</td>
<td>End-of-Life Issues</td>
<td>3-4</td>
</tr>
</tbody>
</table>

Faculty with gerontological expertise from the School of Social Work and other university schools and colleges will serve as mentors for students in the program. Students are also required to incorporate gerontological content into the research practicum and the substantive comprehensive exam. They are also expected to make gerontological content a substantial component of their dissertation and to include a gerontology faculty member on their dissertation committee.

Social Work and Infant Mental Health (M.S.W. or Ph.D. Dual-Title)

Students in the master's or Ph.D. program in Social Work can apply to earn a Dual-Title Degree in Social Work and Infant Mental Health (IMH). This dual-title degree is designed to prepare Social Workers to support early social and emotional development especially in contexts of risk such as poverty and violence exposure that place young children at risk for relationship disruptions and developmental concerns, and in families where parents or children suffer from developmental disabilities, physical health or mental health concerns. The dual-title program offers many advantages to students whose goal is to work with very young children and their families. Students who earn an IMH dual-title degree have a solid understanding of both research and clinical work with infants and families, are prepared to work in multi-disciplinary teams and to implement evidence-based treatments. MSW Dual Title Students also receive clinical supervision from program faculty during the IMH clinical seminar that is offered in the Fall and Winter terms. As a result of their training and supervision, IMH dual-title students are well-positioned to be competitive in the job market.

Admission Requirements

Applicants must meet the admissions standards of the Graduate School and the School of Social Work. Interested students can submit an online application (https://mpsi.wayne.edu/training/infant-health/) located on the program website. Current students can discuss their interest in the dual-title option with their faculty advisor prior to spring semester of their core year.

Social Work and Infant Mental Health (M.S.W. Dual-Title)

Students are required to complete the following IMH coursework in addition to the M.S.W. (p. 355) All students must complete and earn a 'B' or above in the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>SW 8884</td>
<td>Infant Mental Health Seminar II</td>
<td>2</td>
</tr>
</tbody>
</table>

Total Credits: 14

Master's students must also complete an IMH-related field placement in their second year. Advanced standing students must focus their year of fieldwork on an IMH-related placement.

Social Work and Infant Mental Health (Ph.D. Dual-Title)

The dual-title degree requires coursework additional to the conventional social work doctoral program (p. 358); twelve credits that focus on the social emotional capacities of young children birth to five years and in the primary relationships that support these capacities. Nine of these twelve credits can count toward the student's cognate. IMH expertise thereby gained should be reflected in a substantive research paper and a dissertation that addresses IMH issues and concepts. Students' studies and scholarly productions will be mentored by Social Work faculty members as well as IMH faculty members from other University schools and colleges.

Doctoral students are required to take the following courses:

Social Work and Public Health (M.S.W./M.P.H Joint Degree)

The Wayne State University (WSU) School of Social Work (SSW) and the School of Medicine, Department of Family Medicine and Public Health Sciences (DFMPHS) offer a Joint Master of Social Work (MSW) and Master of Public Health (MPH) degree.
The MSW/MPH joint degree provides students with a deeper understanding of complex determinants of health and the scientific methods necessary to operate in an interprofessional environment. The scientific basis for interprofessional practice requires a firm foundation in human behavior and development, culturally competent communication, organizational and social systems, and the core public health sciences, epidemiology, biostatistics, environmental health. The MSW/MPH degree will strengthen and deepen these skills and equip students to qualify for employment across both disciplines. In order to meet the demand for public health social worker practitioners, the MSW/MPH joint degree program fulfills the need for these professional qualifications.

Admission to this program is contingent upon admission to the Graduate School (p. 35). Admission criteria for the MSW/MPH Joint Degree will meet the requirements of both MSW and MPH Degrees that can be found on the program website (https://socialwork.wayne.edu/certificate/mswmph/).

Students enrolled in the MSW/MPH Joint Degree Program will fulfill both the MSW program requirements and the MPH degree program requirements with a minimum of 88 credits. A total of 20 credits may be double-counted toward both degrees. The MSW credit hour requirements are dependent upon the concentration chosen and whether the student possesses a bachelor’s degree in Social Work (i.e. is an Advanced Standing student). The School of Social Work offers two advanced year concentrations — Interpersonal Practice (IP) and Innovation in Community, Policy, and Leadership (I-CPL). The concentration chosen for the advanced year will determine the number of credits necessary to obtain the joint MSW/MPH degree.

Graduation requirements for the MSW/MPH Joint Degree are consistent with the MSW and MPH Degrees and will:

1. Require completion of all required courses for both the MSW and MPH degree, for a minimum total of 83 credit hours within a 6 year period. A total of 20 credits may be double-counted.
2. Require students to maintain a minimum grade point average of 3.0 in the entire program. A minimum of a B grade in all required courses in both the MSW and MPH program will also be required. Students obtaining less than a B grade in any core or required course will be allowed to retake it only once.

**MSW Program Courses**

**Foundation (Core) Curriculum**

The foundation (core) curriculum provides a knowledge base for later study of advanced practice in the concentration. The core curriculum has content in the five major curricular areas: social work practice, human behavior and the social environment, social welfare policy and services, research, and field education. The core curriculum stresses fundamentals and knowledge of social work practice as they relate to individuals, families, small groups, organizations, and communities. In field education, theory is translated into practice and includes micro, mezzo and macro practice experiences.

**Advanced MSW Curriculum**

The advanced curriculum builds on the knowledge, values, and skills gained in the foundation (core) curriculum, with the objective of increasing the student’s competence for dealing with greater complexities of social work practice by focusing on areas of social concern. This advanced portion of the M.S.W. program is designed to provide specific advanced knowledge and practice skills. Students choose one of two concentrations in the advanced year.

Students must meet the requirements for a concentration:

1. satisfactory completion of specific concentration courses in HBSE/Practice Methods;
2. satisfactory completion of a field education placement in the concentration for each of the semesters of the advanced curriculum.

**OPTION I: Interpersonal Practice (IP):**

This concentration offers students a particular theoretical orientation and clinical method from among three theory "tracks": Family Systems, Cognitive-Behavioral, and Psychodynamic. Each track has a corresponding integrative practice methods and human behavior course incorporating content on clinical method and technique, developmental issues, and psychosocial pathology, and each is offered over two consecutive terms. Students select field placements in areas of their special interest: among these choices: families at risk, child welfare, substance abuse services, schools, mental health, health care, and gerontology. Elective credits can be taken to meet the required MPH courses and are able to be double-counted.

**OPTION II: Innovation in Community, Policy and Leadership (I-CPL):**

This concentration contextualizes student learning into three streams of practice including developing and sustaining effective communities, developing and sustaining effective policies and developing and sustaining effective organizations through leadership. I-CPL students will deepen their understanding of settings where this practice can take place through field placements which relate to urban social planning, community development, policy analysis and advocacy, program development and system coordination.

A full range of elective credits are taken to meet the required MPH courses and are able to be double-counted.

### Graduate Certificate Programs

- Alcohol and Drug Abuse Studies (Graduate Certificate) (p. 363)
- Child Welfare (Graduate Certificate) (p. 364)
- Disabilities (Graduate Certificate) (p. 364)
- Gerontology (Graduate Certificate) (p. 364)
- Social Welfare Research and Evaluation (Graduate Certificate) (p. 365)

### Alcohol and Drug Abuse Studies (Graduate Certificate)

The Wayne State University Certificate in Addiction, Alcohol and Drug Abuse Studies (CADAS) is designed to provide advanced students in education, health and human services with an integrated learning experience that includes biological, psychological, social, cultural, and public health perspectives. The breadth and scope of the program allows students to accomplish their own specific objectives within a multidisciplinary context. The program attracts professionals currently working in social services, mental health, nursing, public health, education, and criminal justice who realize the need for the additional training and credentials. Adding the CADAS certificate to existing educational and/or work experience is likely to enhance an individual's career opportunities and options.

### Admission Requirements

Applicants must meet the admissions standards of the Graduate School (p. 35) and the School of Social Work. Eligibility for admission to the Graduate Certificate is limited to those holding a graduate degree from an accredited educational institution or actively pursuing a graduate degree at Wayne State University. There is a three-year time limit in which to meet certificate program requirements.

Applications are accepted throughout the year and students may begin the program during any semester. Application forms may be obtained by sending an email to the CADAS program advisor at cadas_cert@lists.wayne.edu or by calling 313-577-4409.

### Program Requirements

The coursework consists of a total of 12 credits, including from a selection of introductory (one required), advanced (2 required) and biopsychosocial (1 required) courses in the order specified and two required courses in the order specified.

During the personal interview the student and the advisor for the certificate program will develop the Plan of Work for coursework based on the student's background, areas of concentration, and career goals. Most students enroll in one or two courses per term. Courses are offered by departments throughout the University and most are offered at least once per year. Up to nine of the twelve credits may be applied to both the certificate and a graduate degree, subject to approval of the relevant academic department and the certificate program coordinator.

If the student has already completed a master's degree, the certificate is awarded when the student has met all the certificate requirements. If the student is earning the certificate concurrently with a master's degree, the certificate is awarded when all the requirements of the certificate and the degree have been met.

Biopsychosocial Courses (Select One)  
- PSC 6500 Drugs of Abuse (Offered Winter)  
- PHC 6500 Drugs and the Addictive Process (Offered Fall)  
- SW 7140 Biomedical Components of Substance Use and Addiction (Offered Winter)  

Total Credits 12

Child Welfare (Graduate Certificate)

The Child Welfare Graduate Certificate is designed to provide current specialized knowledge and best practices for child welfare social work practice in the Detroit metropolitan and state of Michigan practice arenas. Historically, professional social workers have worked with families and children impacted by social injustice and adverse economic situations. The curriculum is designed to provide best and competent practices in situations where families and children encounter child maltreatment, often with compounding issues of poverty, racism, substance abuse, domestic violence and other experiences of trauma.

The Child Welfare Graduate Certificate follows the admissions procedures and policies for the Graduate School (p. 35) and the School of Social Work (p. 353). The Child Welfare Graduate Certificate requires 12 credits.

Select one of the following:  
- SW 6535 Youth, Delinquency, and Juvenile Justice  
- SW 6540 Effects of Drugs and Alcohol on Physical and Social Functioning  
- SW 6575 Violence Prevention and Intervention  
- SW 8570 Dynamics and Intervention in Family Violence  
- SW 8330 Psychosocial Assessment of Children and Youth  
- SW 8180 Social Services in the Schools

All coursework must be completed in accordance with the academic procedures of the School of Social Work and the Graduate School (p. 38) governing graduate scholarship and degrees.

Disabilities (Graduate Certificate)

The Graduate Certificate in Disabilities prepares students to assume leadership positions as service providers, policy makers, administrators or educators. Students learn to plan creatively and to implement activities that positively affect the lives of persons with disabilities. The program provides a useful educational experience to those committed to the full community inclusion of persons with disabilities. Course work reflects disability issues throughout the life-span and focuses specifically on disability issues in urban settings. The program is a collaborative effort of the Developmental Disabilities Institute (p. 65) and the following academic units:

- the Department of Audiology and Speech-Language Pathology and Department of Psychology, the College of Liberal Arts and Sciences;  
- the College of Nursing;  
- the Department of Occupational Therapy, Eugene Applebaum College of Pharmacy and Health Services;  
- the vocational rehabilitation counseling program in the Theoretical and Behavioral Foundation division, and the special education program in the Teacher Education division, College of Education;  
- and the School of Social Work.

Admission Requirements

Applicants must meet the admissions standards of the Graduate School (p. 35) and the School of Social Work. Eligibility for the certificate is limited to persons possessing a master’s degree from an accredited educational institution or persons actively enrolled in a graduate degree program at Wayne State University.

Program Requirements

The graduate certificate in Disabilities program includes at least fifteen graduate credits taken in association with, or subsequent to, obtaining a master’s degree. Ten credits are earned through completion of the three required courses and a minimum of five credits of electives. At least five credits must differ from the course requirements of the graduate degree being pursued concurrently. A master's degree within the student’s discipline must be completed before the certificate is awarded. All course work must be completed in accordance with the academic procedures of the School of Social Work and the Graduate School (p. 38) governing graduate scholarship and degrees.

Total Credits 15

Courses include ten credits in core courses and a minimum of five elective credits. The electives allow students to specialize in a particular area of practice or research, as well as in a particular age range of people with disabilities. At least five credits must differ from the course requirements of the graduate degree being pursued concurrently.

Gerontology (Graduate Certificate)

The Graduate Certificate Program in Gerontology is designed to prepare graduate students and professional practitioners with graduate degrees to work in a variety of aging-related settings. The field of gerontology is multi-disciplinary, drawing on the best science and practice applications from a number of areas including biology, psychology, sociology, social work, health, and economics. The field of gerontology applies this knowledge to increase the understanding of aging and older adults and to meet the needs of the rapidly growing aging population. The gerontology field focuses on the needs and challenges of community dwelling older adults as well as on elders living in long-term care settings. Adding the gerontology certificate to existing educational and work experiences is likely to enhance an individual’s career opportunities and options.

Applicants must meet the admissions standards of the Graduate School (p. 35) and the School of Social Work. Eligibility for admission to the
Graduate Certificate is limited to those holding a graduate degree from an accredited educational institution or actively pursuing a graduate degree at Wayne State University. There is a three-year time limit in which to meet certificate program requirements.

Candidates must successfully complete twelve credits of approved courses for the gerontology graduate certificate. Coursework consists of one core course, the Introduction to Gerontology (SW 7995), and nine additional credits chosen from three other categories. During the personal interview the student and the advisor for the certificate program will develop the Plan of Work for coursework based on the student’s background, areas of concentration, and career goals. Most students enroll in one or two courses per term. Courses are offered by departments throughout the University and most are offered once per year. Up to nine of the twelve credits may be applied to both the certificate and a graduate degree, subject to approval of the relevant academic department and the certificate program coordinator. All coursework must be completed in accordance with the academic procedures of the School of Social Work and the Graduate School (p. 38) governing graduate scholarship and degrees, respectively.

If the student has already completed a master's degree, the certificate is awarded when the student has met all the certificate requirements. If the student is earning the certificate concurrently with a master’s degree, the certificate is awarded when all the requirements of the certificate and the degree have been met.

### Social Welfare Research and Evaluation (Graduate Certificate)

The certificate program in Social Welfare Research and Evaluation is designed to provide students with advanced research and evaluation skills necessary to assess the outcomes and efficacy of programs, services and interventions offered by social service organizations. In an era of increasing accountability, students will be equipped with the tools to engage in evidence-based practice and evaluation research at the micro, mezzo, and macro levels of practice.

#### Admission Requirements

Applicants must meet the admissions standards of the Graduate School (p. 35) and the School of Social Work. Eligibility for this certificate is limited to persons currently pursuing a master's degree in social work (MSW) or who hold a master's degree in social work, counseling or a related human services field. Prospective Research Certificate students are strongly encouraged to attend a social work doctoral program information session (https://socialwork.wayne.edu/phd/info-meetings/) prior to completing an application.

#### Program Requirements

Candidates for the certificate must achieve a minimum grade point average of 3.0 and complete eighteen credits as outlined below in designated advanced graduate courses. These courses include offerings in social work theory, advanced statistics and research methods. Further, students will complete an applied research practicum. The certificate must be completed within three years of entering the program. All coursework must be completed in accordance with the academic procedures of the School of Social Work and the Graduate School (p. 38) governing graduate scholarship and degrees, respectively.

#### Required Courses

<table>
<thead>
<tr>

<td>SW 9420</td>
<td>Research Practicum</td>
<td></td>
</tr>
<tr>
<td>SW 9450</td>
<td>Writing for Publication and Presentation</td>
<td></td>
</tr>
</tbody>
</table>

Graduation from the certificate program will require a minimum g.p.a. of 3.0. In consonance with the grading policy of the Graduate School, a grade of 'B’ minus or below is considered unsatisfactory. The School will place a limitation on the number of 'B’ minus grades that students may receive, even if they maintain an overall g.p.a. of 3.0. Students receiving two grades of ‘B’ minus will be terminated from the program. Students should plan regular contact with the Director of the Doctoral Program to ensure that they are meeting the course requirements for the certificate.
Field Education

The following agencies are representative of those who have worked with members of the Faculty in field instruction during recent academic years:

ACCESS
ADULT WELL-BEING SERVICES
