Anthropology is the science of humanity, examining human life and variation in the different forms in which they are found. Anthropology considers the variety of customs, languages, and civilizations that make up humanity, uniting diverse sciences such as biology and geology, with humanistic endeavors such as religious studies, philosophy, and history. Anthropology has often been called the most scientific of the humanities and the most humanistic of the scientific disciplines.

Undergraduate training in anthropology is designed for various groups of students:

1. those desiring scientific knowledge of the social and cultural determinants of behavior;
2. those preparing to enter law, medicine, public health, social work, information sciences, or public administration;
3. those preparing for employment in historical or natural science museums;
4. those preparing to serve the business and/or industrial community as specialists in cross-cultural analysis or management consulting;
5. those seeking to enter the field of cultural resource management;
6. those expecting to work with the general public and, therefore, requiring a broad grasp of the nature of society, group behavior and social change;
7. those looking forward to teaching anthropology or another of the social or behavioral sciences;
8. those preparing for a career in another country, in international studies, or in foreign affairs;
9. those planning to pursue careers in law enforcement, police science, or criminal justice; and
10. those who desire to pursue graduate studies in anthropology.
