CANNABIS CHEMISTRY (UNDERGRADUATE CERTIFICATE)

Cannabis chemistry is a field of chemistry that focuses on the chemistry of cannabinoid-containing compounds such as cannabis and CBD oils. The certificate in cannabis chemistry will give students both the theoretical and practical knowledge of how to perform analysis in this area of study. In addition to learning the science of cannabis, students will explore topics such as ethics, law, politics and regulation of the cannabis industry.

Admission Requirements

Admission requirements for this program are satisfied by the general requirements for undergraduate admission (http://bulletins.wayne.edu/undergraduate/general-information/admission/) to the University. Students holding any previous undergraduate degree from an accredited institution with a minimum of a 2.5 g.p.a. are eligible to apply.

Program Requirements

The Cannabis Chemistry Undergraduate Certificate requires the completion of a minimum of 15 credits. All course work must be completed in accordance with the regulations of the University (http://bulletins.wayne.edu/undergraduate/general-information/academic-regulations/) and the College (http://bulletins.wayne.edu/undergraduate/college-liberal-arts-sciences/academic-regulations/) governing undergraduate scholarship.
