Courses in this department are designed with four aims:

1. They contribute to the liberal education of any student, whatever their predominant interest, by emphasis on clear and cogent thought, by consideration of the interrelations of fact and value, by training in logic and the methodology of inquiry, and by a study and analysis of major philosophical outlooks.

2. They supply a minor and cognate courses to students majoring in other Departments who wish to study their major subject in its wider philosophical implications.

3. They give Departmental majors a wide and intensive training in philosophy. The major appeals to those who wish to take graduate work in philosophy and to those who wish a broad background from which to study and understand the emergence and conflict of ideas in relation to contemporary problems.

4. They supply a relevant major and minor for students who plan a career in such fields as the law or the ministry.
